

R E P O R T

ON THE

PRELIMINARY SOIL SURVEY OF THE AREA TO BE COMMANDED  
BY THE HIRAKUD CANAL SYSTEM

By

Dr. R. C. Hoon, M.Sc., Ph.D.,  
HIRAKUD RESEARCH STATION, HIRAKUD (ORISSA)

R E P O R T  
ON THE

PRELIMINARY SOIL SURVEY OF THE AREA TO BE COMMANDED  
BY THE HIRAKUD CANAL SYSTEM

TABLE OF CONTENTS

<u>Subject</u>	<u>Page</u>
1. Introductory	1
2. Geographical & Geological Features	2
3. Topography	2
4. Field Work	2
5. Laboratory Testing of Soil samples	3
6. Predominant Soil Features of the Area :	4
(a) Depth of top soil	4
(b) Soil texture	5
(c) pH and Total soluble salt content of soil	7
(d) Exchangeable bases and base exchange capacity	8
(e) Calcium carbonate content	9
(f) Manurial status	9
7. Types of Storage Tanks	10
8. Sub-Soil Water	13
(a) Quality	
(b) Fluctuation of water table	
9. Quality of water of the Mahanadi River	16
10. Types of Natural and Planted Flora	17
11. Crop Pattern	17
12. Summary and Conclusions	19
13. Acknowledgement	21
14. References	21
