

PREFACE

The current issue of the Hand-book of Basic Statistics of Maharashtra State presents the latest available statistical information for Maharashtra on various socio-economic characteristics. The opening table attempts a comparison of Maharashtra and India in respect of certain important socio-economic aspects and the last series of tables gives changes in some of the indicators over time. In the attempt to give up-to-date information, sometimes provisional data have been given. These data are likely to be revised when the final figures become available.
