Secretary.

Shri T. S. Vedagiri.

MINISTER FOR IRRIGATION & POWER.

INDIA.

NEW DELHI,

December 2nd, 1957. .

My Dear Pantji,

As Leader of the Selected Buildings Projects Team, I forward herewith the report of the panel of the Team relating to Grain Storage Structures. I am very glad to inform you that the Union Ministers of Food and Agriculture and Works, Housing and Supply, have accepted the suggestions made in this report. Action on implementing the suggestions has already begun. The Ministry of Works, Housing and Supply have initiated at the Central Building Research Institute, Roorkee, a course of lectures on shell design and construction. This will enable the necessary machinery to be built up for undertaking construction and supervising the new building technique that has been suggested in the report.

We are circulating copies of the report to the State Governments for their comments and to solicit information regarding the type and extent of storage structures required by them. We are also informing them that the Team will be ready to assist them with designs suited to their special requirements.

Yours sincerely,
S. K. PATIL.

Shri Govind Ballabh Pant,
Chairman, Committee on
Plan Projects, &
Minister for Home Affairs,
NEW DELHI.

REPORT ON GRAIN STORAGE STRUCTURES

CONTENTS

	PAGE
1. Background	I
2. Existing Design	1
3. Observations & Recommendations	2
Alternative proposals	
Shell Type Design	
Design Features	
Other Items of Work :—	
(i) Foundations	
(ii) Plinth Height	
(iii) Height of Walls	
(iv) Thickness of Walls	
(v) Concrete Mix for Shell	
(vi) Flooring	
(vii) Finish of Walls	
(viii) Ventilation	
(ix) Lighting	
(x) Platform Protection	
4. Cost and Material Analysis	6
5. Administrative and other arrangements for implementation	7

Appendices

- I. Calculations of Shell Design
- II. Abstract of Cost of Conventional Type Grain Godown
- III. Abstract of Cost of Shell Type Grain Godown

Plates

- I. Conventional Type Grain Godown:—
Drawings of Shell Type Godown.
- II. Stress Diagram for Shells.
- III. Details of End, & Intermediate Frame.
- IV. Geometry of Shell.
- V. Developed Plan for Shell.
- VI. Plan, Elevation & Section.
