Location -

1.1 Dhulia district lies between  $20^{\circ} - 38'$  and  $22^{\circ} - 03'$  north latitude and  $73^{\circ} - 47'$  and  $75^{\circ} - 11'$  east longitude. The district is stretching nearly 87 Kms. along Tapi and 48 Kms. along the eastern parts of Surat and Baroch districts of Gujarat State. Its breadth is varying from 52 Kms. to 123 Kms.

Boundaries -

1.2 The district On its east is Jalgaon District, while on the north Madhya Pradesh and on the west is Gujarat State. Nasik lies on its south.

Tophography -

1.3.1 Taking into account the height, climate, rainfall and soil pattern Dhulia district can be divided into 3 parts as under -

- 1) Wild and Hilly forest in the north.
- 2) Rich cultivated land on both the banks of Tapi.
- 3) Low rolling rocky hills, called tail ends of Western Ghats.

1.3.2 The first part comprises of Akrani, Akkalkuwa, and northern part of Taloda Tahsil. This part of the Tahsil contains thick forest and hilly area. This area lacks in communication. Life of the people is medieval and Tribal in character.

1.3.3 The 2nd part is the tract of rich Tapi valley. This area comprises of Nandurbar, Shahada, Shirpur, and part of Sindkheda and Taloda Tahsils. This part is well served with irrigation facilities.

(2)

1.3.4 The 3rd part contains Dhulia, Sakri and part of Sindkheda Tahsils. This part is flat and it has scope for irrigation from Panjara river.

Hills and Rivers -

1.4.1 The Satpuda Hills are to the North of Tapi and they are seven in numbers one by one. They have completely closed the communication of Gujarat and Maharashtra from north side of Dhulia District.

1.4.2 Tapi is the main river of this district. It's banks are too high to enable the use of it's water for irrigation. Important contribution of this river to this district is the silt it deposits on both the banks.

1.4.3 The river Naramada forms northern boundary of this district which flows for a length of 56 Kms. In this district Akrani, and Akkalkuwa Tahsils are drained by Narmada and its tributaries.

1.4.4 The names of important rivers, their length and the Tahsils in which they pass are given below. No river in the district is navigable.

| Name of the river | Length in Kms. | Tahsils in which the river passes          |
|-------------------|----------------|--|
| 1) Panzara        | 136            | Sindkheda, Sakri, Dhulia.                  |

Soil -

1.5 The Soil of this district is broadly classified into three zones i.e. 1)Light, 2)Medium, 3)Deep black. Approximately 50% of the total area is of light type soil, 30% of Medium black type soil and 20% is deep black soil. The light soil is largely seen in Dhulia, Sakri and Akrani Tahsils, western part of Nawapur Tahsil, and Southern part of Nandurbar Tahsil. This soil is good for Bajara, Kharif Jawar, Groundnut, and Cotton. Medium black soil is seen in Sindkheda and western part of Dhulia and Sakri Tahsils, and area covered by this Soil is well suited for irrigation. Akkalkuwa, Taloda, Shirpur, Shahada, and Nandurbar Tahsils are mostly covered by deep black soil. This type of soil is largely seen on both banks of Tapi river. This belt of rich fertile soil is about 16 Kms. on each side of the river. Well irrigation is uneconomical as the soil is deep hence is not practised.

The important type of soil is as follows-

- |                           |   |                |
|---------------------------|---|----------------|

Explanatory notes on the scope and limitations of data presented in Part-II Statistical Abstract.

2.1 The chapter deals with the brief description on the tables which are broadly classified into 13 groups in the District - Statistical Abstract (Part-II.)

Area and population -

2.2 In this group data regarding area, population, decadal variation since 19<sup>61</sup>, classification of villages and towns according to 1971 Census, distribution of population according to workers and Non-workers, scheduled castes and scheduled tribes according to 1971 Census and Age group, Mother tongue and Religion is given as per 1961 Census. Agriculture -

2.4 All the talukewise information for the year 1969-70 and 1970-71 regarding land utilisation, area under crops, ~~area~~ sourcewise and cropwise area irrigated, area and out-turn of principal crops, no of irrigation wells in use and not in use is given in 6 tables. The list of minor, medium and major irrigation project is given in 2 tables. Information regarding agricultural wage rates at selected centres, agricultural implements (1966 Census) in each taluka,

## CHAPTER - III

### ANALYTICAL REVIEW OF SELECTED TRENDS.

3.1 Comparison between the tahsils and over a period of decade is attempted by working out some important Socio Economic Indicators. In this chapter an analytical review of these indicators is taken.

Indicator No. 1 : Percentage of gross sown area to net sown area.

3.2 Tahsilwise ratio of gross cropped area to net cropped area for the years 1961-62, 68-69, 69-70 and 70-71 is given in table No. 3.2. Over a period of last ten years this ratio has reduced by 4.5 in the district as whole. However in Shahada tahsil this ratio has improved while reduction in this ratio for Nandurbar, Shirpur, Sindkhada and Sakri, is comparatively high.

## CHAPTER IV

### Annual Plan 1971-72

4.1 The year 1971-72 is the third year of the IVth Five Year Plan. The objectives of the IV Five Year Plan are in consonance with the basic objectives adopted in the long term development programme. The State's Annual Plan for 1971-72 has been implemented in Dhulia district through state level, divisional level and district level schemes. A review of district level schemes has been attempted in this chapter.

4.2 The total expenditure under State and Local sectors on various plan schemes in each year of the IVth Five Year Plan is given in table No.4.2.
