CHAPTER - I

Introduction

1.1 Location The District of Thana lies north of Bombay stretching northwards along the coast of the Arabian sea for 113 kilometres between $72^{\circ} 45'$ and $73^{\circ} 48'$ east longitudes and $18^{\circ} 42'$ and $20^{\circ} 20'$ North latitudes. Its east-west spread is maximum at the south nearly stretching for 100 Kilometres and north-south length is approximately 140 Kilometres.

1.2 Boundaries An approximately triangular region with broad base at the south forming boundaries with Kolaba District, stretching along the ranges of Sahayadri on the east and along the coast of the Arabian Sea northwards has two sides joining at the top rather westwards. The political boundaries on the east touch Poona, Nagar and Nasik Districts while those on the north east they touch the Centrally administered Areas of Dadra and Nagar Haveli and Gujraath State on the north. District Poona and Ahmadnagar form North Eastern boundry while Nasik, Gujraath and Dadra Nagar-haveli form the Northern boundry of the district. The western boundry is clearly natural, well defined by the sea coast for 113 kilometres from Dahanu to the north of Greater Bombay. On the south lies the Bombay Suburban District and on the south east Kolaba District.

1.3 Topography The eastern portion of the District which has Sahyadri Ranges slopes down westwards rather steeply giving westwards drain for the region. The draining has naturally considerable gradient in the eastern most region which gradually diminishes towards west forming estuaries with the sea.

1.4 Hills and Rivers On the eastern boundaries the Sahyadri Ranges run north south continuously without break. Besides these ranges, there are scattered ranges as well over the District with spurs but they all are shorter than the Sahyadri Ranges.

1.5 Soil The soil types of Thana District can be conveniently divided into three categories:

- 1) Black soil on the coastal plains.
- 2) Red soil in the eastern regions mostly on the slopes.
- 3) Black soil in the patches of the valley mostly lying between the coastal plains and the hill slopes of Sahyadri.

The first type of soil is fertile and is useful for horticulture, paddy cultivation and vegetables, whereas the second type is useful for growing coarse millets like Nagli and Vari. The third type is useful particularly for paddy. First type of soil is found in Dahanu, Palghar, Bassein and Thana Tahsils, whereas the second type (Red soil) is especially prominent in Mokhada, Talasari and some parts of other talukas on the eastern slopes. The third type of soil is found in Bhiwandi, Kalyan, Wada and Shahapur talukas.

1.6 Climate The climate of the District is distinctly different on the coastal plains and on the eastern slopes. Being fully tropical, the climate on the coast (i.e. the coastal strip including Thana, Bassein, Palghar and Dahanu talukas) is very humid and warm. The variation in the temperature are small on this coastal region. On the other hand, the climate on the eastern slopes and on the plains at the foot of the slopes is hot and comparatively less humid. However, the variation in the temperature on the eastern region is more than that on the coastal strip.

1.7 Rainfall The District receives rain from June till September. The following table shows the total rainfall at each of the Taluka Head Quarters during 1971 with normal rainfall.

| Sr.No. | Taluka | Total Rainfall during 1971 (m.m.) | Normal Annual Rainfall (m.m.) | Remarks (+) or (-) |
|--------|----------|-----------------------------------|-------------------------------|--------------------|
| 1. | Dahanu | 2,407 | 1,436 | + |
| 2. | Talasari | 2,734 | 2,245 | + |
| 3. | Mokhada | 2,308 | 3,094 | - |

| 1 | 2 | 3 | 4 | 5 |
|-----|------------|-------|-------|---|
| 4. | Jawhar | 3,431 | 4,443 | - |
| 5. | Palghar | 2,501 | 1,725 | + |
| 6. | Wada | 2,866 | 2,593 | + |
| 7. | Bassein | 2,497 | 2,457 | + |
| 8. | Bhivandi | 2,715 | 1,611 | + |
| 9. | Shahapur | 2,283 | 2,436 | - |
| 10. | Murbad | 2,763 | 2,373 | + |
| 11. | Kalyan | 3,348 | 2,038 | + |
| 12. | Thana | 2,336 | 1,943 | + |
| 13. | Ulhasnagar | 4,610 | H.L. | |

Except at Jawhar, Mokhada and Shahapur the rainfall during 1971 is more than the normal rainfall. The rainfall is more on the inland than on the coast. Also it is more on the south and diminishes as we go from south to north. This is clearly obvious from the above table.

Normally Dahanu, Palghar, Bhivandi, Thana and Kalyan receive rainfall between 1400 to 2000 m.m. while Talasari, Wada, Dassein, Shahapur and Murbad receive rainfall between 2000 to 2500 m.m. Mokhada receives about 3100 m.m. while Jawhar receives the highest i.e. 4400 m.m. rainfall. During 1971, except Mokhada, Jawhar and Shahapur rainfall in all other talukas exceed of the normal

The intensity of rainfall is highest in the month of July.

1.8 Area and territorial changes if any

The total area of the District is 4637 square kilometres. There were no territorial changes during 1971.

Forest

Thana District has rich forests and nearly 40% of the total area is covered under forests. The important species are Teak, Airo, Heed, Shisham, Bilda, Kalam, Khair, Sawar, Kakat, Shemat etc. Besides these, there are

commercially important trees like Apta the leaves of which are used for making Bidis, Moha (its fruit and flowers are used), Palas (it is used for lac), and bamboos (it is used for making baskets and ^{for} many other purposes). The revenue from forest product is considerable and in 1971-72 and it is of the order of Rs. 3 crores.

1.10 Minerals In the district, Bauxite deposits occur in Tungar Hill in Bassein taluka. The Tungar deposits are reported to contain 0.6 million tons of good grade Bauxite. Also inferior reddish or yellowish lateric clay is available at Gokhivare near Bassein Road Station and the reserves are estimated at 65,000 tons. The material is stated to be suitable for bricks, drainage pipes, Tiles and cheap red glazed ware.

1.11 Population The population of Thana District as per 1971 census is 22,81,664. It has increased by 38% during the decade 1961-1971 and by 29% during the decade 1951 to 1961. The following table shows the population and percentage increase over the decade.

| Census Year | Population | Decade percentage increase |
|-------------|------------|----------------------------|
| 1951 | 12,82,572 | |
| 1961 | 16,52,578 | 29% |
| 1971 | 22,81,664 | 38% |

This shows that the growth during the decade 1961-71 was more rapid than that during 1951-61. During both these decades industrial activities increased much in Thana and Kalyan Talukas and to some extent in other adjoining talukas. The employment generated due to rapid industrialisation is one of the main factors of increase in the population. If the trend of increase of population is assumed to be uniform from 1951 onwards the population would attain the estimated order of nearly 30 lakhs during 1981.

Further the sex ratio in the population of Thana District during 1971 was 894 females per 1000 males. The corresponding figures for earlier census years are given below:

| <u>Census Year</u> | <u>Females per 1000 males</u> |
|--------------------|-------------------------------|
| 1941 | 940 |
| 1951 | 920 |
| 1961 | 919 |
| 1971 | 894 |

The decreasing trend in the sex ratio is clearly indicative of the fact that more males from outside have migrated to the District in search of employment. The decreasing trend in the ratio during the decade 1961-1971 is steeper than those during the earlier decades.

The density of population during 1971 was 239 persons per square kilometre. However, 36 % of the population is concentrated in urban areas with high density of 4063 persons per square kilometre. Corresponding density for rural area is only 156.

The percentage of literacy during 1971 and earlier census years are given below:

| <u>Census Year</u> | <u>Percentage of literates to the total population</u> |
|--------------------|--|
| 1951 | 24 |
| 1961 | 31 |
| 1971 | 40 (Provisional) |

This shows that the level of literacy has increased from 24 to 40 during the twenty years from 1951 to 1971. The literacy among females exclusively is much less than that among males. However, the literacy among females has also increased as is seen from the following table:

| Census Year | Literacy among females(exclusively) (percentage) |
|-------------|---|
| 1941 | 8 |
| 1951 | 14 |
| 1961 | 19 |
| 1971 | 29 (Provisional) |

The distribution of working population according to the categories of workers throws light on the economic activity in the District. The following table shows the percentage ratios of major categories during 1961 and 1971.

| | Percentage ratio | |
|---------------------------|------------------|------------------|
| | 1961 | 1971 |
| 1) Cultivators | 49 | 32 (Provisional) |
| 2) Agricultural labourers | 15 | 21 (") |
| 3) Others | 36 | 47 (") |
| 4) Total workers | 100 | 100 |

This shows that the percentage of cultivators among workers has decreased from 49 to 32 and the percentage of Agricultural labourers and other has increased from 15 to 21 and from 36 to 47 respectively during the decade 1961-1971.

Scheduled Castes and Scheduled Tribes

The percentage of scheduled castes to the total population as per 1961 census was 1.37 only whereas corresponding percentage for scheduled tribes population was 30.29. The proportion of scheduled castes to the total population is low because of the fact that a large number of persons have been converted from Caste Hindus to neo-buddhists. The proportion of scheduled tribes is considerable in comparison with other Districts of Konkan viz. Kolaba and Ratnagiri.

The major proportion of scheduled tribe population is in rural area.

Administrative Set-up

Government Sector

1.12.1 The District is divided into 13 Tahsils which are grouped into sub-divisions as shown under:

| <u>Sr. No.</u> | <u>Sub-Division</u> | <u>Name of Tahsil</u> |
|----------------|----------------------------------|--|
| 1 | Dahanu (Head Quarter Dahanu) | Talasari Dahanu Palghar Jawhar Mokhada |
| 2 | Thana (Head Quarter Thana) | Thana Kalyan Murbad Ulhasnagar |
| 3 | Bhiwandi (Head Quarter Thana) | Bhiwandi Wada Massein Shahapur |

The Collector who is the head of the District is in charge of general administration, law and order, treasury, land revenue and civil supplies. The Collector is assisted by one Deputy Collector in his office and a number of other office personnel. The sub-Divisional Officers or Deputy Collectors in charge of the sub-divisions and the Tahsildar are also assisted by office personnel (Aval Karkuns, clerks etc.)

1-12.2 Zilla Parishad Sector

The Zilla Parishad constituted under Zilla

Parishad and Panchayat Samiti Act 1962 is in charge of all ancillary activities viz. Public Health, Sanitation, Education, Community Development programme etc. It consists of elected members and Associate councillors.

Further there are 13 Panchayat Samities in the District under the Zilla Parishad. The Chairman elected by the members of the Panchayat Samiti works as head of the Panchayat Samiti.

The Village Panchayats is the lowest local body in the line of local administration. In Thana District there were 889 village panchayats as on 31-3-72.

1-12.3 Municipal Councils There are eight Municipal Councils in the District out of which those of Thana and Ulhasnagar are biggest having population more than one lakh. The list of municipal councils arranged in ranks is given below:

| <u>Rank according to population (1971)</u> | <u>Name of Municipal Council</u> | <u>Population as on 1971 Census (Provisional)</u> |
|--|----------------------------------|---|
| 1. | Thana | 1,70,167 |
| 2. | Ulhasnagar | 1,68,128 |
| 3. | Kalyan | 95,480 |
| 4. | Bhiwandi | 79,523 |
| 5. | Ambarnath | 56,441 |
| 6. | Dombivali | 51,203 |
| 7. | Bassein | 30,602 |
| 8. | Jawhar | (less than 20,000) |

Jawhar is the smallest having population less than 20,000.

1.13 Special Features Thana District is well known because many of large and small scale industrial units are established in the District. The District lies adjacent to the north of Greater Bombay which is comparatively very small in area. Naturally the extension of industrial belt has penetrated into the northern region of the District and as a result of which Thana, Kalyan, Ulhasnagar and Ambarnath have come up as industrial centres. These centres have the same facilities as those in Bombay like means of communication, water supply, supply of electricity, availability of man-power etc.

-- 9 --

Besides this, the District is famous for fishery activities carried on the coast. Marine fishery is the main industry on the coastal villages in Dahanu, Palghar, Bassein and Than. Talukas. Now-a-days fishery activity is carried on large scale under cooperative sector. The important sea-fishery centres are Dahanu, Fokhran, Uhheli, Murabe, Satpati, Datiware, Arnala, Bassein and Uttan.

another special feature of the District worth mentioning is the cultivation of Banana in Bassein and Palghar Talukas and of Chikoo in Dahanu Taluka. These fruits are exported from the District on a large scale.

CHAPTER II

Explanatory notes on the scope and limitation of data
presented in Part II Statistical Abstract

2.1 In this chapter short notes regarding scope and limitation of the tables presented in the Abstract are given. Total number of tables presented is 87 classified in 13 groups.

Area and Population

2.2 This group consists of seven tables of which six tables give data viz. area and population, decadal variation since 1901, classification of villages and towns, distribution of population according to workers and non-workers as well as scheduled castes and scheduled tribes as per 1971 Census while seventh table gives distribution of 1961 population according to age group, mother tongue and religion.

Data of 1971 Census is supplied for District as a whole only.

Climate and Rain fall

2.3 Only two tables viz. 8 and 9 are provided in this group which give monthwise rainfall of 13 centres and temperature data of one centre (Dahanu) during the year 1971.

Agriculture

2.4 In 6 tables out of 11 tables in this group, the talukawise information for the year 1969-70 and 1970-71 regarding land utilisation, area under crops, sourcewise and cropwise area irrigated, Yield per hectare and outturn of principal crops and No. of irrigated wells in use and not in use is given. The list of minor and major irrigation projects is given in the next two tables. Information regarding agril. wage rates at 3 selected centres, Agril.
