CHAPTER I  
INTRODUCTION

Location

1.1 The District of Thana lies north of Bombay stretching northwards along the coast of the Arabian Sea for 113 kilometres between  $72^{\circ}45'$  and  $73^{\circ}48'$  East longitudes and  $18^{\circ}42'$  and  $20^{\circ}20'$  North latitudes. Its east-west spread is maximum at the south nearly stretching for 100 kilometres. The north-south length is approximately 140 kilometres.

Boundaries

1.2 The District has triangular shape. Poona and Nagar Districts lie on the east, Nasik District on its east and north-east, Gujraath and Centrally administered areas of Dadra and Nagar Haveli lie on the north, while the Arabian Sea forms the natural west boundary. In the south lie Greater Bombay and Kolaba District.

Topography

1.3 The District is divided into three parts on the basis of its topography. i) the central portion of the District having Sahyandri Ranges and its slopes which is mainly forest area ii) the central Region covering mostly paddy fields and iii) western plains along the west where horticulture, quality fodder and vegetables are agricultural practices.

Hills and Rivers

1.4.1 The Sahyandri Ranges run north-south in eastern region of the District continuously without break. There are also spurs running laterally to the main ranges. The heights of the mountains are maximum on the east and diminish gradually westwards. There are isolated peaks at the foot of the mountain

ranges. The mountain ranges are also spread unevenly in the central region of the District.

1.4.2 The two main rivers which join the sea on the west coast are Vaitarna and Ulhas. The Vaitarna River rises in the hills near Trimbak in Nasik District and then flowing southwards takes a westward turn entering Thana District at Vihigaon in Shahapur Taluka. It further passes across northern boundary of Shahapur Taluka to enter Wada Taluka near Nishet village and then taking east-west course through the middle of Wada Taluka it enters Palghar Taluka near Vasuri BK and runs in northwest direction upto Manor from where it turns south-west and then southwards upto Navghar forming Vaitarna creeck at the south of Palghar Taluka. The important tributaries of Vaitarna are i) Pinjal which rises in the mountains in the south of Mokhada Taluka and joins it at Alman village in Wada Taluka, ii) Deherja which rises in the mountains in Jawhar Taluka and joins it at Durves in Palghar Taluka, iii) Surya which rises in the mountains in Mokhada taluka and taking south-west and southward course joins it near Sakri village in Palghar Taluka and iv) Tansa which rises in the mountains in Shahapur Taluka and joins it near Chimane village in Bassein Taluka. The first three tributaries viz. Pinjal, Deherja and Surya join the Vaitarna from the right and Tansa joins it from the left. The Ulhas river rises in the mountains in the Bhor Pass and passing northwest through Karjat Taluka of Kolaba District and Ulhasnagar and Kalyan Talukas of Thana District forms creeck at Bassein. Its important tributaries in Thana District are i) Barvi which rises in the mountains in Murbad

Taluka and joins it at Aпти village in Ulhasnagar Taluka and ii) Bhatsa which rises in the mountains in Shahapur Taluka and joins it at Vadavali in Kalyan Taluka. Kalu is an important tributary of Bhatsa River. It rises in the mountains in Shahapur Taluka and joins Bhatsa River near Sangoda in Kalyan Taluka. Both these tributaries viz. Barvi and Bhatsa join it from the right. The Vaitarna is navigable for 25 kilometres in side the coast and Ulhas is navigable for nearly 40 kilometres from Kalyan.

### Soil

1.5 The soil types of Thana District can be conveniently divided into three categories:

- i) Black soil containing sand.
- ii) Red soil in the eastern regions mostly on the slopes and
- iii) Brownish black soil in the patches of the valleys mostly lying between the coastal plains and the hilly slopes of Sahyandri.

The first type of soil is fertile and is useful for horticulture, paddy cultivation, and vegetables, whereas the second type is useful for growing coarse millets like Nagli and Vari. The third type is useful particularly for paddy. First type of soil is found in Dahanu, Palghar, Bassein and Thana Talukas whereas the second type (Red soil) is especially prominent in Mokhada, Talasari and some parts of other talukas on the eastern slopes. The third type of soil is found in Bhiwandi, Kalyan and Shahapur Talukas.

### Climate

1.6 The climate of the District is distinctly different on the coastal plains and on the eastern slopes. Being fully tropical, the climate on the coast (i.e. the coastal strip including Thana, Bassein, Palghar and Dahanu Talukas) is very humid and warm. The variations in the temperature are small

on this coastal region. On the other hand, the climate on the eastern slopes and on the plains at the foot of the slopes is hot and comparatively less humid. However, the variation in the temperature on the eastern region is more than that on the coastal strip.

### Rainfall

1.7 The District gets assured rainfall of 2000 to 4000 mms from the south west Monsoon from June to September. Even though scarcity is a rare phenomenon in this District, the rainfall received throughout the District during 1972 was much less than normal creating scarcity conditions in the District.

### Area and territorial changes, if any

1.8.1 The total geographical area of the District is 9553 square kilometres out of which 9349.5 Sq.Km is rural and 203.5 Sq.Km. is urban. The District consists of 1622 villages (1588 inhabited and 34 uninhabited villages) and 24 towns as per 1971 Census.

1.8.2 During the period from 1961 to 1971, Kalyan taluka was split up into two talukas Kalyan and Ulhasnagar. The total number of talukas in the District therefore increased from 12 to 13 during this period. The head quarter of the newly created Taluka is Ulhasnagar Town.

### Forest

1.9.1 The area covered under Forest in the District is 3,73,704 (1971-72) hectares which forms 39.12 percent of the total geographical area of the District. The talukas of Mokhada Jawhar, Dahanu, Wada, Shalapur are comparatively thickly wooded whereas those of Thana, Kalyan, Ulhasnagar, Murbad, Bhiwandi, Bassein, Palghar and Talasari are thinly wooded. The forests

in the District fall under the type "Tropical moist (mixed deciduous forests)". Teak is the important species in the forests of this District. Besides Teak there are other species viz. Ain, Hed, Shisham, Bibla, Kalam, Khair, Sawar, Kakat, Shemat etc.

### Fisheries

1.9.2 The coast line extends for over 113 kilometres and marine fishing is practiced all over the coast in the District. Deep sea fishing is also carried on with the help of trawlers. The fishing trade has flourished in the District as there is always a demand for fish in the market at Bombay. The annual fish landing fluctuates much depending on many factors. The average fish landing from marine fishery per year for the last ten years (62-63 to 71-72) is estimated to be 67,500 tonnes. Fishing and fishing trade is increasing gradually and still has vast potentialities.

### Minerals

1.10.1 The mining activities are confined to quarrying of stones and sand. Stone and sand quarrying is carried on especially at places which are near urban areas in Kalyan, Bhiwandi and Thana Talukas.

1.10.2 Near Tungar Hills in Bassein Taluka, deposits of bauxite containing aluminium are found but the exploitation of the deposits has not been made. Deposits of reddish laterite clay are also found near Gokhivare in Bassein Taluka. This clay is used for making bricks, tiles and cheap red glazed wares.

1.10.3 There are also springs of mineral waters containing traces of sulphur at Kokaner, Sativali, Vajreshwari, Ganeshpuri

etc. This water has medicinal value.

1.10.4 There are salt centres on the coasts in Thana and Bassein Talukas where salt is produced by direct solar evaporation of sea water.

#### Population

1.11.1 The population of Thana District as per 1971 Census is 22,81,664. The rate of increase of population during the decade 1961-71 was 38 percent and that during the decade 1951-61 was 29 percent. The increase in the growth rate is probably due to large scale migration of people from outside the District in search of employment to Thana industrial complex. The housing problem in Greater Bombay is also a reason for large scale migration of people from Greater Bombay to the areas surrounding Greater Bombay which lies just adjacent to the District.

1.11.2 Out of the total 1971 population of 22,81,664 , 12,04,855 are males and 10,76,809 are females. The sex ratio in terms of females per 1000 males in this District as per 1971 Census is 894. The sex ratio in the District shows a decreasing trend. It was 940, 920, 919 during the year 1941, 1951 and 1961 respectively. The percentage of urban population in the District is 36.23 and that of rural population is 63.77 as per 1971 Census. The percentage of urban population to the total population is highest in Ulhasnagar Taluka (82.86%). There is also substantial proportion of urban population in Thana (65.63%) and Kalyan (62.56%) Talukas. Three talukas viz Talasari, Mokhada and Murbad are completely rural and the proportion of urban population in other Talukas varies from 5 to 33. The total working population in the District as per 1971 Census was

8,53,672, out of which 2,78,984 (32.68 %) were cultivators 1,79,784 (21.06 %) were agricultural labourers and 3,94,904 (46.26 %) were engaged in other categories. The proportion of non-working population among males exclusively during 1971 was 45.78 percent where the corresponding proportion of non-working population among females exclusively was 81.39. The population of Scheduled Tribes in this District as per 1971 Census was 5,79,538 (25.40 %) and that of Scheduled Castes was 36,170 (1.59 %). The proportion of Scheduled Tribes in this District decreased from 30.29 % in 1961 to 25.40 % in 1971. The population of Scheduled Tribes is spread in the Talukas of Talasari, Dahanu, Palghar, Wada, Jawhar and Mokhada. There are also some pockets of Tribal population in Shahapur, Murbad, Bhiwandi and Bassein Talukas.

1.11.3 The overall population density in terms of number of persons per square kilometre during 1971 was 239. The population density for urban areas is 4063 whereas it is 156 in rural area. There are 24 towns ( 8 municipal and 16 non-municipal), and 1588 inhabited villages in the District as per 1971 Census. Two towns of Thana and Ulhasnagar have population of more than one lakh while the population of Kalyan town is little less than one lakh.

1.11.4 The percentage of literacy (i.e. percentage of literates to total population) during 1971 was 40.65 and the same ratios for 1961 and 1951 were 30.54 and 24.34 respectively. The percentage of literacy among females exclusively has however not kept pace with that among males exclusively. The literacy percentage for females exclusively has increased from 7.58 in 1941 to 14.19 in 1951 and further to 19.06 in 1961 and 29.80 in 1971. The corresponding percentage for males exclusively

has, however, increased from 25.84 in 1941 to 33.52 in 1951 and further to 41.09 in 1961 and 50.34 in 1971.

Administrative Set-up

1.12.1 The District is divided into 13 Tahsils which are grouped into sub-divisions as shown below:

<u>Sr.No.</u>	<u>Sub-division</u>	<u>Name of Tahsil</u>
1.	Dahanu (Head Quarter Dahanu)	Talasari Dahanu Palghar Jawhar Mokhada
2.	Thana (Head Quarter Thana)	Thana Kalyan Murbad Ulhasnagar
3.	Bhiwandi (Head Quarter Bhiwandi)	Bhiwandi Wada Bassein Shahapur

The Collector who is the head of the District is in charge of general administration, law and order, treasury, land revenue and civil supplies. The Collector is assisted by one Deputy Collector in his office and a number of other office personnel. The Sub-Divisional Officers of Deputy Collectors in charge of the sub-divisions and the Tahsildars are also assisted by office personnel (Aval Karkuns, Clerks etc.)

1.12.2 The Zilla Parishad constituted under Zilla Parishad and Panchayat Samiti Act 1962 is in charge of all ancillary activities viz. Public Health, Sanitation, Education, Community Development programme etc. It consists of elected members and Associate councillors. Further there are 13 Panchayat Samities in the District under the Zilla Parishad. The Chairman elected

by the members of the Panchayat Samiti works as head of the Panchayat Samiti. The Village Panchayat is the lowest local body in the line of local administration. In Thana District there were 899 village panchayats as on 31-3-73.

1.12.3 There are eight Municipal Councils in the District out of which those of Thana and Ulhasnagar are biggest having populations more than one lakh. The list of Municipal Councils arranged in ranks is given below:

Rank according to population (1971)	Name of Municipal Council	Population as per 1971 Census
1	Thana	1,70,675
2	Ulhasnagar	1,68,462
3	Kalyan	99,547
4	Bhiwandi	79,576
5	Ambarnath	56,276
6	Dombivali	51,108
7	Bassein	30,594
8	Jawhar	6,110

Jawhar is the smallest Municipality having population of 6,110 persons.

#### Special Features

1.13.1 There are hill stations in the District at Jawhar and Suryamal ( in Mokhada Taluka). There are tourists' attraction centres at Bassein, Arnala, Mahim, Vajreshwari etc. The hot springs of Vajreshwari are famous in Maharashtra.

1.13.2 Large scale fishing is carried on the coast in the District. The important fishing centres are Satpati, Dativare, Dahanu, Kelwa, Mahim, Bassein, Popharan Uchheli, Nawapur, Murabe, Arnala and Uttan.

1.13.3 Tansa lake which is located in Shahapur Taluka is one

of the biggest lake having large catchment area. It is the major source of water for Bombay city. At present, a Dam is being constructed on Bhatsa River in Shahapur Taluka for augmentation of Bombay city water supply. This project is likely to be completed by 1977.

1.13.4 A large dairy project has been started at Dapchhari in Dahanu Taluka in this District with the purpose of shifting stables from Bombay to Dapchhari. This project is constructed on modern lines and deserves special mention.

1.13.5 An Atomic Power Plant has been established at Tarapur in Palghar Taluka for generating electricity from nuclear energy. It is a major achievement in the field of science and technology in this country.

CHAPTER II

Explanatory notes on the scope and limitations of data presented in Part II Statistical Abstract

2.1 The total number of tables presented in Part II Statistical Abstract are eighty eight which are classified into thirteen groups. The scope and limitations of these tables are described in the foregoing paragraphs.

Area and Population

2.2 There are seven tables in this group, out of which six tables give 1971 Census data regarding area, houses and population, decadal variation of population since 1951, classification of villages and towns according to population ranges, distribution of District population according to workers and non-workers as well as Scheduled Castes and Scheduled Tribes for every Taluka. Distribution of District population as per 1971 Census is given according to age groups and religion in the remaining table.

Climate and Rainfall

2.3 There are only two tables in this group which give monthwise rainfall data of thirteen centres in the District and temperature data of only one centre (Dahanu) for the year 1972.

Agriculture

2.4 The first six tables out of the total twelve tables in this group provide data for the year 1970-71 and 1971-72 regarding land utilization, cropping pattern, yield rate and total production of principal crops, sourcewise and cropwise area irrigated, utilisation of irrigation wells. Data regarding yield rate and production is provided for the District as a whole while the data in other tables is given tahsilwise. The

next two tables give tahsilwise data of minor irrigation works in 1971-72 and major and medium irrigation projects as on 30-6-72 in the District. The remaining four tables give data regarding agricultural wage rates in three selected centres, tahsilwise agricultural implements as per 1972 livestock census scarcity condition and work for 1972-73 and history of scarcity for last five years.

Animal Husbandry, Forest and Fisheries

2.5 There are five tables in this group and the first four tables give data regarding tahsilwise livestock as per 1972 livestock census, tahsilwise veterinary statistics, for 1972-73 tahsilwise recognised slaughter houses and animal slaughtered during 72-73 and diseasewise livestock mortality during 72-73, whereas the fifth table is sub-divided into three parts (A), (B) and (C) which provide data regarding forest areas, major and minor forest product and quantity of fish cured respectively in the year 1972-73.

Employment, Industry, Mining and Electricity

2.6 Out of the eleven tables in this group the first three tables relate to number of factories and average daily employment for the year 1971, industrywise distribution of working factories according to working strength as well as number of days worked. The next table gives Annual Survey of Industries data 1966. Employment Exchange Statistics and relating data for the year 1972-73 is given in the subsequent three tables. The next two tables provide data regarding distribution of Government employees as on 1-7-1966 according to ranges of pay and emoluments and according to various Departments. The last

two tables give Statistics regarding consumption of electricity during 72-73 and villages and towns electrified and population covered at the end of March 61,66,70 and 73.

#### Co-operation

2.7 There are eight tables in this group and the statistics regarding number of Co-operative societies of different types, co-operative banks, their membership, share capital, working capital, loan advanced etc. is given in the first four tables and statistics relating to operations of Central and Primary co-operative Marketing Societies, other cooperative societies and Regulated Markets is given in the next three tables. The last table gives data regarding registered Money Lenders. The data supplied in all the tables is for the year 1972-73.

#### Medical and Public Health

2.8 This group includes five tables which give tahsilwise information regarding medical facilities (through public and public aided bodies), vaccination, family planning and births and deaths in four separate tables, and information of the number of deaths due to different causes for the District as a whole in the remaining table. The data in all these tables except for that relating to family planning is given for the calendar year 1972 and the data for family planning is given for the year ending 31st March 1973.

#### Education

2.9 The first three tables out of seven tables in this group give tahsilwise statistics relating to literacy, education in rural and urban areas as per 1971 census. The next table gives statistics regarding educational institutions, pupils and teachers for the year 1972-73. The last three tables provide

information regarding Backward Class beneficiaries during 70-71 and 71-72, Economically Backward Class concession of Free Education during 70-71 and 71-72 and expenditure on primary education by way of Grant-in-aid to local bodies during 71-72 and 72-73.

#### Transport and Communication

2.10 This group includes seven tables which give Railway Routes, Road kilometreage according to category and surface classification, number of motor vehicles in Thana Region, State Transport activities, and traffic intensity in five different tables while postal statistics and coverage under rural broadcasting is supplied in the remaining two tables. The data is given for the year ending 31st March 1973. Except for traffic intensity (which is for May 1971) and postal data (which is for the year 1961-62, 1965-66 and 1970-71 to 1972-73)

#### Local Bodies

2.11 Statistics for the year 1972-73 regarding income and expenditure of village panchayats, Zilla Parishad, Municipal Councils is given in four tables in this group. The table relating to income and expenditure of Zilla Parishad is subdivided into three parts A, B and C for presenting data regarding Headwise Receipts, Government Grants to Zilla Parishad and Headwise Expenditure respectively.

#### Plan and Community Development

2.12 Out of five tables in this group the first two give expenditure and physical achievements of District Level Schemes for the year 1972-73 and the remaining three tables give stages and coverage of C.D.Blocks, their expenditure and physical

achievements during the year 1972-73

Prices

2.13 The data regarding whole sale prices prevaction in 1972 of certain agricultural commodities at selected centres, average retail prices of important commodities at the District Head Quarter during 72 and Consumer Price Index during 72-73 at Bombay and Jalgaon is given in three separate tables in this group.

Miscellaneous

2.14 The last group includes twelve tables giving official Statistics viz. statistics relating to Police strength, Crime, Courts, Cinema theatres, banking offices and population covered by the banking offices, Joint Stock Companies, Insurance policies, Land Revenue, Small Savings, Number of presses, Journals and General Elections in eleven tables and important indicators for the District showing general trend of development in various sectors over a period of two decades in the twelfth table.

CHAPTER III

Analytical Review of Selected Trends

3.1 In this chapter some socio economic indicators over a period of time are presented showing comparison among Tahsils.

Indicator No. 1 :- Percentage of gross cropped area to net cropped area

3.2 Table No. 3.2 shows Tahsilwise percentage ratios of gross cropped area to net cropped area for 1961-62, 1969-70, 1970-71 and 1971-72. These ratios show the extent of double cropping in the District. For Thana District as a whole the variation in this ratio is very negligible over the period 1961-62 to 1971-72. Except in the case of Palghar and Bassein Tahsils, the percentage ratios fall within the range 100 to 102 indicating that the double cropping is negligible in these Tahsils.

Indicator No. 2 :- Productivity of important crops

3.3 Estimates of production of important crops are available for District as a whole. The yield rates are worked out on the basis of these estimated production of important crops for the years 1961-62, 1969-70, 1970-71 and 1971-72 and are shown in Table No. 3.3. The trend of yield rate of rice is fluctuating over the period 1961-62 to 1971-72. It has decreased from 1594 Kg. per hectare in 1961-62 to 1435 Kg. per hectare in 1969-70 and then increased to 1778 Kg. per hectare in 1970-71 and again decreased to 1515 Kg. per hectare in 1971-72. The trend of yield rates of Ragi, Tur and Gram is also fluctuating during this period. Yield rates of these crops are higher in 1970-71.

Indicator No. 3 :- Value of agricultural production

3.4 Value of production of important crop (Rice) in the District for the years 1968-69, 1969-70, 1970-71 and 1971-72 is worked out on the basis of wholesale prices and is given in Table No. 3.4.

Indicator No. 4 :- Percentage of net irrigated area to net cropped area

3.5 The percentage ratios of net irrigated area to net cropped area for each Tahsil in the years 1961-62, 1969-70, 1970-71 and 1971-72 are shown in Table No. 3.5. Out of thirteen Tahsils the net area irrigated is nil for eight Tahsils (Thana Kalyan, Ulhasnagar, Mokhada, Jawhar, Bhiwandi, Wada, Murbad). In the remaining five Tahsils the percentage ratio is maximum in Bassein (6.55) and quite negligible in Shahapur. The District as a whole is backward in irrigation.

Note:- There is no irrigated area in other Tahsils.

Indicator No. 5:- Change in cropping Pattern

3.6 The cropping pattern in Thana District during the years 1961-62, 1969-70, 1970-71 and 1971-72 is given in Table No. 3.6. The trend in cropping pattern over the period 1961-62 to 1971-72 is marked by gradual decrease in the ratio of area under food crops to total cropped area and gradual increase in the ratio of area under non food crops to total cropped area. The ratio of area under cereal has, however, shown a steady trend over the period (1969 to 1972) whereas the ratio of area under pulses has slightly decreased during the period (1969 to 1972).

Indicator No. 6 :- Percentage of net sown area to total geographical area

3.7 Table No. 3.7 gives percentage ratios of areas under i) barren and unculturable land, ii) fallow land and iii) net cultivated area to the total geographical area for the year 1970-71. The percentage ratio of net cultivated area to the total for Thana District is nearly half that for Maharashtra State and more or less two third of that for Bombay Division.

Table No. 3.7

2.	Percentage of fallow land to total area	1970-71	12.61	10.25	7.72
3.	Percentage of net cultivated area to the total area	1970-71	31.37	45.44	59.29

Indicator No. 7 :- Increase in Agricultural Credit, outstanding dues etc.

3.8 The trend in the advances of primary agricultural credit societies has increased steadily from Rs. 15.15 lakh in 1961-62 to Rs. 163.90 lakh in 1972-73. A steep rise is observed in the amount of advances made in 1972-73 in comparison with the advances in the earlier years. This is due to scarcity conditions which prevailed during the year 1972-73. The average advance

per member increased from Rs. 27/- in 1961-62 to Rs. 191/- in 1972-73.

Indicator No. 8 :- Agricultural Wage Rates

3.9 The agricultural wage rates are collected from three centres viz. Dahanu (Tal.Dahanu), Gorhe (Tal.Wada.) and Badlapur (Tal.Ulhasnagar). The wage rates are generally higher at Badlapur due to its proximity to Bombay. The annual average rates at these three centres are given in Table No. 3.9

	1972	2.79	1.90	10.00	-

Indicator No. 9 :- Livestock per hectare of cultivable area

3.10 Table No. 3.10 shows the ratio of cultivable area per pair of working bullock in each Tahsil. The cultivable area per pair of working bullock for the District is 4.57 hectares. In the Tahsils of Dahanu, Talasari, Kalyan, Bhiwandi, Jawhar, Shahapur, Ulhasnagar and Wada it ranges from 3.32 to 4.57 and in the Tahsils of Palghar, Mokhada, Bassein, Thana and Murbad it ranges from 4.73 to 7.79 hectares. Bullock is the traditional motive force for almost all agricultural operation (except milling of paddy). This average is maximum in Murbad Tahsil (7.79 hectares) and minimum in Dahanu Tahsil (3.32 hectares). The total bovine population in the District during 1972 was 6,41,354 and the ratio of number of animals (cattle and buffaloes) per 100 hectares of cultivable area is 134 and number of total bovine per 100 hectares of permanent pastures and cultivable waste is 173.

Indicator No. 10 :- Ratio of Poultry to Population

3.11 The total number of poultry in the District during 1972 was 8,36,858. The Tahsilwise numbers of average poultry per 1000 human population for 1961, 1966 and 1972 are given in Table 3.11. The District average for 1972 is 367 poultry per 1000 persons. The maximum average is in Talasari Tahsil (790) and minimum is in Ulhasnagar Tahsil (119). The District average decreased from 371 in 1966 to 367 in 1972. Comparing Tahsilwise averages the Tahsils of Palghar, Dahanu, Talasari, Jawhar, Mokhada, Wada, Shahapur, Murbad have their averages above the District average and the other Tahsils have their averages below the District average.

Indicator No. 11 :- Per capita consumption of electricity

3.12 The percentage distribution of consumption of electrical energy during the year 1970-71, 1971-72 and 1972-73 is shown in Table No. 3.12. The major load of electrical power is observed to be used for industrial purposes. The pattern of percentage distribution has remained the same during the three years 1970-71, 1971-72 and 1972-73. The total energy consumed during 1972-73 for all purposes was 1038.8 million K.W.H. The per capita consumption of electricity increased from 327 K.W.H. in 1970-71 to 394 K.W.H. in 1971-72 and to 455 K.W.H. in 1972-73.

Indicator No. 12 :- Number of candidates enrolled and vacancies notified

3.13 The number of candidates registered, vacancies notified, number of placements, and number on live-register at the end of the year are shown in Table No. 3.13. The number of placements

decreased from 2366 in 1971-72 to 1486 in 1972-73. Out of the total placements in 1972-73, 749 candidates were employed in private Sector and 737 in Public Sector. The percentage of placements of candidates of Scheduled Castes and Scheduled Tribes to total placements in the year 1972-73 was 15.91.

Indicator No. 13 :- Patients treated in Hospitals, Dispensaries etc.

3.14 The number of indoor and outdoor patients treated in the public hospitals, dispensaries, and primary health centres during the year 1970, 1971 and 1972 are shown in Table No. 3.14. The number of indoor patients decreased from 1,47,237 in 1970 to 1,07,419 in 1971 and slightly increased to 1,09,033 in 1972.

Indicator No. 14 :- Number of students enrolled in different educational institutions

3.15 The total numbers of primary and secondary institutions, pupils and teachers in the District for the years 1960-61, 1969-70, 1970-71 and 1971-72 are given in Table No. 3.15. A steady rise in the number of educational institutions, pupils and teachers is observed during the period 1969-70 to 1971-72. The number of primary institutions per secondary school decreased from 21.39 in 1960-61 to 11.24 in 1971-72. The ratio of number of pupils per teacher during 1969-70, 1970-71 and 1971-72 was 37, 36 and 35 for primary schools. This ratio for secondary schools remained steady at 28 during 1969-70, 1970-71 and 1971-72.

Indicator No. 17 :- Retail Prices

3.18 The average retail prices of important commodities in the month of November of 1962, 1966, 1970, 1971 and 1972 are given in Table No. 3.18. The general trend of prices is observed to be upward from 1962 to 1972. The prices of Bajra, Arhar(dal) Mung(dal), Gur and Kerosene showed steady increase from 1962 to 1972.
