SOCIO ECONOMIC REVIEW AND DISTRICT STATISTICAL
ABSTRACT 1972-73 OF RATNAGIRI DISTRICT.

CHAPTER - I.

INTRODUCTION.

LOCATION:

1.1 Ratnagiri district is part of Konkan strip running north to south along the Western Coast of India and lies between $15^{\circ}36'$ to $18^{\circ}50'$ North latitude and $73^{\circ}50'$ to $74^{\circ}36'$ East longitude. The district has a north south length of about 280 kms. (180 miles) and average east west extension of about 64 kms. (40 miles) except in its extremities, which taper to join the coast line. It has a coast line of about 320 kms. (200 miles). The ranges of Sahyadri in the east and the Arabian Sea on the west dominate the make up of this district.

BOUNDARIES:

1.2 The district is surrounded by Sahyadri hills and beyond Sahyadri Satara and Kolhapur districts in the east. Kolaba district in the north, Arabian Sea in the west and Goa in the South.

TOPOGRAPHY:

1.3 Considering the natural conditions, the district can be divided into 3 parts (i) Western hilly area of the Sahyadris and its offshoots (ii) The plateau surfaces which are used for cereal crops like rice and ragi and (iii) The coastal plains where coconuts and betel nut gardens and fishing is in practice.

HILLS AND RIVERS :

1.4 Over 84.85% of the land surface in Ratnagiri is hilly. The main range of Sahyadris forms the eastern boundary of the district. There are the steep and the forbidding scraps of the main Sahyadris. In the centre are the transverse chains of small hills which project from the main range and develop higher elevation in the middle portions, where they are parallel to each other and as a result the numerous streams which flow through the valleys have formed parallel drainage pattern. On the slopes of these hills are situated rice and Varkas lands. Out of 14 rivers flowing in the district, most important are (i) Savitri which forms natural boundary between Kolaba and Ratnagiri districts, and is navigable about 35 kms. in Ratnagiri District. (ii) Washishti having length of 48 kms. out of which 40 kms. are navigable (iii) Jagabudi having length more than 40 kms. (iv) Shastri having length of 64 kms. (v) Ratnagiri (length 64 kms.). Besides these there are other rivers (i) Much Kundi (ii) Jaitapur (iii) Waghote (iv) Jaigad (v) Achara (vi) Kalavali (vii) Karli and (viii) Terekhol. All these rivers are intensely seasonal and hence their economic use is limited. Parts of these rivers are tidal. In addition to these main rivers, the district has numerous small creeks and backwaters all along the coast line. The more important are the Kelshi creek (between Bankot and Sunandurg) Ada creek (2 miles in the south of Kelshi), the Palshet and Borya bays (between Washishti and Shastri), are, Kalabadevi and Padi creek. All these creeks afford anchorage to small crafts in fair weather and have a local importance in trade and fishing.

SOIL:

1.5 The predominant soils in the district are laterite soils which vary in colours from bright red to brownish red owing to the preponderance of hydrated iron oxides. They are always acidic and fairly well supplied with nitrogen and organic matter. Their texture is loamy and depth varies from one foot to three feet. They are porous and not retentive of moisture and are found all over the district except in Mandanagattaluka. The soils are found in several grades. The main grades are (i) Soils useful for paddy cultivation (ii) Varkas soils useful for ^{Cashewnut,} mangoes and ~~rice~~ cultivation (iii) Soils useful for coconut and arecanut (iv) Coastal alluvium useful for coconut and arecanut gardens (v) Salty lands locally known as Khar or Khajan.

CLIMATE:

1.6 The climate of the district ^{though} ~~through~~ moist is generally healthy. There are 3 seasons viz. (i) Summer (March to May), Monsoon (June to October) and winter (November to February). Being a coastal district, the variation of temperature during day and through the seasons, is not large. The maximum temperature at the coast rarely goes beyond 8° c. but in the interior it seldomly crosses 40° c. Owing to the proximity of the Sea the district is very humid and the relative humidity rarely goes below 50 percent.

RAINFALL:

1.7 Rainfall is not uniform in all parts of the district. It increases rapidly from the ~~xxx~~ coast towards the western

ghats on the eastern border of the district. In and near the ghats the rainfall is very heavy. The annual heavy rainfall. The average annual rainfall occurs during the months of June to October. July is the month with heaviest rainfall. During the year 1972 there was a maximum rainfall of 3058 mms. at Sawantwadi, next was 2869 mms. at Khed. The rainfall during 1972 was much below average. During 1972, 8 tahsils viz. Mandangad, Dapoli, Khed, Chiplun, Deorukh, Kankawali, Kudal and Vengurla received rainfall, ranging between 2000 to 3000 mms; 6 Tahsils viz. Gubagar, Ratnagiri, Lan-ja, Rajapur, Deogad and Malwan received rainfall below 2000 mms. while Sawantwadi received rainfall above 3000 mms.

AREA:

1.8 The total geographical area of the district is 13040 sq. kms. (4982.8 sq. miles). The district stands second in Bombay Division and nineteenth in Maharashtra State as far as area is concerned. There are no territorial changes during 1972-73. Considering areas of each tahsils, Sawantwadi tahsil has got the maximum area (1336.2 sq. kms.) in the district, while Vengurla tahsil has the minimum (327.9 sq. kms.)

FOREST:

1.9 Total area under forests in the district is 38577 hectares and is totally under the control of Forest Department. Out of total forest are 833 hectares are reserved, 2184 hectares reserved, while the rest 35560 hectares are unclassified.

MINERALS:

1.10 The district exports some of the important Minerals. Manganese ore is found at Redi in Vengurla tahsil and in some parts of Sawantwadi tahsil. Bauxite is found in vicinity of Harnai, Vijaydurg and Deogad. Mica, ^{clay} Sand, asbestos, glass sand, and copper are found in some Silica/parts of the district.

POPULATION:

1.11-1 The total population of the district as per 1971 census is 1990583 (886995 males and 1103588 females). The density of population per sq. km. being 153 as against 164 for Maharashtra State. The district ranks fourth in Bombay Division and ninth in Maharashtra State as far as population is concerned. Within the tahsils the density of population per sq. km. ranges from 257 (Vengurla tahsil) to 122 (Lanja tahsil). As far as Urban towns are concerned, the density varies from 3580 (Ratnagiri tahsil) to 500 in (Rajapur tahsil), the average ^{for} the district being 108. In rural areas the density of population varies from 219 (Vengurla tahsil) to 103 (in Sawantwadi tahsil) the average rural density of population for the district being 142 per sq. km.

1.11.2 No. of females per 1000 males (i.e. sex ratio) is observed to be the highest (1244) in Ratnagiri district when compared with the State, Average for the State being 930. The same trend is also observed in Rural & Urban areas. The same trend is also observed in rural and urban areas./ It may be remarked that the urbanisation of this district is poor as will be seen from the percentage of Urban population to the total population which is 8.41 per cent, while in

Maharashtra State the percentage of Urban population to total population is more than 31 percent. ^{This} The ratio is the least in Maharashtra State. The most probable reason for both abnormal sex ratio as well as low urbanisation ~~mix~~ rate is the heavy migration from this district to cities like Bombay. Migration has also affected the growth rate of the district as will be seen from the last two decadal variations ~~ix~~ viz. 51 to 61 and 61 to 71 which are 6.73 and 8.94. These decadal variations are the least in the State of Maharashtra. Corresponding decadal variations for Maharashtra State are 23.60 and 27.45 respectively.

1.11.3 The increase in percentage of literacy as per ~~XXXX~~ 1971 census in the decade 1961 to 1971 is 39.8 from 28.5. The rate of increase in percentage of literates in Males, females or Rural and Urban is more or less the same. Maximum population viz. 87 percent is Hindu by religion while Muslims are 6.3 percent and Buddhist (including new Buddhist) are 5.6 percent. Out of total population Schedule castes and schedule Tribes are nearly 2.7 percent while in Maharashtra the same percentage is 11.9

SPECIAL FEATURES:

1.13 i) The district is one of the marine districts of the State with the coastal length upto 320 kms. which is more than half of the coastal length of Maharashtra State.

ii) Mangoes and cashewnuts are important cash crops of this district. They are exported abroad.

iii) The Koyana Hydroelectric Project which generates electricity at Pophali is situated in Chiplun Tahsil.

iv) The district lacks in rail communication facility but all weather port is being developed at Ratnagiri. At present there are 19 seasonal ports in this district.

CHAPTER - III

ANALYTICAL REVIEW OF SELECTED TRENDS

3.1 This chapter deals with an analytical review of some selected Socio Economic Indicators furnishing comparative study of the achievement in different tahasils over a period of time.

Indicator No. 1 : Percentage of Gross Sown Area to net sown area.

3.2 Table No. 3.2 shows the extent of double cropping in various tahasils of Ratnagiri district. This table shows that over a period of decade there is hardly any change in double cropping. During 1971-72, only in two tahasils viz. Malwan and Vengurla double cropped area was more than 5 % of the net areas sown, in other tahasils (excepts Sangameshwar, Dcogad, Kudal and Sawantwadi) it was less than district average.

The table shows that over a decade, percentage of area under total food crops as well as pulses to total cropped area is slightly decreased, while the percentage of area under total non food crops as well as cereals, is slightly increased. In general, it will be observed that there is a very little change in the cropping pattern during last ten years.
