CHAPTER-I-  
I N T R O D U C T I O N

LOCATION:

2.1. The Nasik District lies between  $19^{\circ}33'$  and  $20^{\circ}53'$  North latitude and  $73^{\circ}16'$  and  $75^{\circ}16'$  East longitude with an approximate length of 300 Km.

BOUNDRIES:

1.2. It is surrounded by Jalgaon District in the east and the north east, Dhulia in the north. Dangs and Surat Districts of Gujarath State on the north west, while Thana is on west and south west. Ahemadnagar is to the south and Aurangabad is to south east.

TOPOGRAPHY:

1.3. The District is situated partly in the Tapi basin and partly in the upper Godavari basin. Nandgaon, Kalwan, Baglan, and Malegaon Talukas are drained in the north and north east by the Girna and its tributories. These tahasils lie in the Tapi basin while all the remaining tahasils are covered by the Godavari basin and drained by the Godavari and its tributories, while the Satmala range of hills provides a fine water shed between the above two basins.

HILLS AND RIVERS:

1.4.1. The Satmala or Ajanta range runs across the District. It stretches east-wards from the Sahyadris, particularly from the highest summit viz. Kalsubai, hight of about 1654 Mtrs. The other main system of hills is Sahyadri and its offshoots which run north to south on the western portion of the District. From the main sahyadrian range, three prominent spurs stretch out to the east. Many of these ranges are mostly rocky flat topped and regular in hight and slope, whereas some are conical and irregular.

1.4.2. The Godavari and the Girna are the two main rivers of the district. Other important rivers are Vaitarana, Darna, Mosam, and Kadva. The Godavari rises at Brahmgi and drains Nasik and Niphad Tahasils for about 96 Km. A huge earthen dam on this river has been built at Gangapur; for storage and irrigation; during its course the Kadva, the Darna and the Nandini with many other small stream meet the Godavari.

1.4.3. The Girna rises at the west of the District near Hatgad village in Surgana and flows through Kalwan and Malegaon Tahasils. The course of the Girna within district is 144 Km. No river in this district is navigable.

SOILS:

1.5. There are four kinds of soils in Nasik district, black(Kali), Red(Lal) Red & black(Koral) and light brown (barad), Except in uplands, Black soil is found mostly in the plain Country near beds of rivers such as the Girna and Mosam. Red soil which is stiffer and shallower is found chiefly on hill slopes or plateaus. Red and black is found occasionally in hilly tracts. Light brown, the lightest of all soils, is found on hilly lands.

CLIMATE:

1.6. The climates of Nasik can broadly be classified as 1) Monsoon-From June to September 2) Winter-from October to middle of March and 3) Summer from middle of March to middle of June. The district, generally experiences salubrious climate. The summer season is moderately hot and the temperature varies from 36<sup>o</sup>C to 43<sup>o</sup>C. The rainy season is comparatively cooler with sporadic rains distributed over all the monsoon period. The winter is quite fair and slightly severe during the month of December and January.

RAIN FALL AND SCARCITY:

1.7. The district receives major rainfall because of influence of south west monsoon during June to October. The rain

-fall is not uniform in all parts of the district. It is more in the region of Sahyadri i.e. western part comprising Surgana Peint and Igatpuri tahsils. After 3 years scarcity conditions the monsoon was bountiful in most of the tahsils in Nasik district during 1973.

AREAS:

1.8. The total geographical area of the district is 15582 Sq.Km. covering 5.08 percent of the total area of the state. According to area Nasik ranks fifth in the State of Maharashtra.

FORESTS:

1.9. The total forest area in district during 1973-74 is 332894 hecets. i.e. about 21.29 percent of total geographical area. The distribution of total forest area amongst maintaining authorities is <sup>7272 hectares</sup> under Revenue Department, and 325622 hectares - under forest department, out of these forest 19,898 hectares area is protected forest and remaining area is reserved forest. Forest in Nasik district mainly gives production of timber and fuels.

MINERAL:

1.10. Minerals are conspicuously absent in Nasik district.

ADMINISTRATIVE SET UP:

1.11.1. Govt. Sector:- Administratively the district has been divided into 13 tahsils. The Collector is in charge of General Administration, Law and Order, Land Revenue and Civil Supplies. He has also to supervise the activities initiated by Govt. through state sector offices except Judiciary.

ZILLA PARISHAD:

1.11.2. In order to gear up to development activities and major participation by the people, the Zilla Parishad and 13 Panchayat Samities were constituted under the Maharashtra Zilla Parishad Act 1962. The Zilla Parishad has an elected President

assisted by Vice-President. The Administration of Zilla Parishad is carried out through Standing Committees and other subject - committees . At Block level, Panchayat Samiti consists of all elected and co-opted members from the area of the block and is headed by a Chairman . An I.A.S. Officer works as Chief Executive Officer, Zilla Parishad and he is assisted by various departmental heads. At Block level, the Block Development Officer works as a secretary to the Panchayat Samiti.

This means the growth of population of the district was slightly more than state average. The table No. 1.12.2 indicates the decadal variation in population of Nasik district since 1901. This district witnessed the decrease in population during 1911-1921 by 7.64 percent, which was probably due to sever attack of influenza epidemic of 1918.

Table No.1.12.2.

Decadal variation in population since 1901.

1	2	3
1901	8.23

1961	18.55	+ 26.31
1971	23.69	+ 29.75
		+ 27.70

### VILLAGE CLASSIFIED BY POPULATION:

1.12.3. According to 1971 census, rural population of the district is 16.91 lakhs residing in 1628 inhabited villages. Highest percentage (32.83) of villages are in group having population between 500 to 999 while maximum population (30.83) is accounted by villages in the population group 1000 to 1999.

### DENSITY:

1.12.4. The density of this district is 152 persons per Sq.Km. as against 154 persons for the state as a whole . The Corresponding figure for the rural areas only are 111 for the district, 113 for the state .~~Taluka~~ Taluka wise variation shows that ~~talukas~~ of Nasik, Malegaon and Niphad are having comparatively higher density of population than the district ratio. The lowest density is 83 persons in Surgana. The density of urban areas is 1741 persons per Sq.Km.as against 2554 persons Sq.Km. ~~persons Sq.~~ for the state as a whole .

### SEX RATIO:

1.12.5. Since 1901 ,the sex ratio(Females 1000 males) of the population <sup>changed</sup> ~~is~~ between 984 to 940 while that of - Maharashtra varied between 978 to 936 . At each census since - 1911, the sex ratio in this district has been higher than the ~~xxx~~ average for the state. Same has been pattern for urban - population of the district. The sex ratio is continuously falling since 1931 and the 1971 values are lowest in last seventy years.

### LITERACY:

1.12.6. The district has made much progress in literacy Table No.1.12.5 gives percentage of literacy in Nasik-districts since 1901 . During the last 4 decades the improvement in literacy is very significant due to the compulsory primary - education and grant of concession to the Economically backward-

State in

people by the Govt. The district ranks fifth in the respect of literacy according to 1971 census about 36 percent are literate in the district as against 39 percent in the state as a whole . The literacy in rural areas of the district is relatively low viz 29% as against 31% of the state as a whole.

Table No. 1.12.6.

Year	Percentage Literacy.
1901	4.31
1911	4.37
1921	6.33
1931	7.89
1941	15.37
1951	21.40
1961	25.89
1971	36.30

WORKERS AND NON-WORKERS:

1.12.7. As per 1971 Census, out of the total population of 23.69 lakhs, only 8.98 lakhs (about 38%) are classified as workers . The percentage of workers among males and females are 51 and 24 respectively. The percentage of workers which stood at 49 percent at the time of 1961 census decreased to 38 percent in 1971, and this decrease appears to be due to the change in the concept of workers in 1971. The analysis of livelihood pattern gives some interesting features of the district. Comparatively very high proportion of about 72 % workers are engaged in-- Agriculture alone as against 65% for the state. About 11% are engaged in industry. Which includes household industry also as against 13% of the state, while a very small proportion of - about 2.44 percent <sup>are</sup> engaged in transport followed by construction and Mining and quarrying.

were having age more than 60 years. Percentage of Hindus is - maximum viz. 84.45 in the district.

SCHEDULED CASTES AND SCHEDULED TRIBES:

1.12.9. As per 1971 census, scheduled castes and scheduled tribes constitute 4.06 percent and 23.69 percent of the total population of the district respectively. The taluk-wise analysis reveals that the proportion of scheduled tribes is highest in Sargana (96%), followed by Peint (95%) while the lowest proportion is in yeolatalasil (6%). The proportion of scheduled castes is highest in Niphad (6%) followed by Nasik (5%) while the lowest proportion is in Sargana taluk (0.57%).

CHAPTER - III -

AN ANALYTICAL REVIEW OF SELECTED TRENDS.

3.1. In this chapter, an attempt is made to study the trend in various Socio Economic aspects of Nasik district by working out important indicators on Agriculture, irrigation, Live-stock, Electricity Consumption, Education etc. Tahasil is taken as a unit for analysing the progress in a particular sector at different points of time. The base is taken as 1961-62 i.e. first year of Third Five Year Plan in most of the cases.

INDICATOR NO.1:- PERCENTAGE OF GROSS CROPPED AREA TO NET SOWN AREA:

3.2. The table No. 3.2 gives Tahasilwise percentage of gross cropped area over net cropped area during 1961-62, 1971-72 and 1972-73. It is seen that as compared with 1961-62, the district percentage in the year 1971-72 has declined while for the year 1972-73, this declining trend is seen in all tahasils except Peint, and Yeola. Highest double cropping percentage was recorded in Malegaon, followed by Baglan and Niphad during 1972-73; where as minimum was for Surgana followed by Peint which are mainly tribal Tahasils.
