Part II ----- District Statistical Abstract.

STATISTICAL TABLES.....	75.
-------------------------	-----

--+-

GENERAL FEATURES:-

East Khandesh District abuts on the Deccan Table land between 20-15 & 22-7 north latitude and 75 & 76-28 east longitude approximately. It has an area of about 4467.3 sq. miles and a total population of 14,71,351 persons according to the 1951 census of population.

It is bounded on the North by the Madhya Bharat State, on the East by Buldhana District & Narmar District of the Madhya Pradesh, on the South by the Aurangabad District & on the West by the Districts of West Khandesh and Nasik. The extreme length of the district from North to South is 81 miles & breadth from East to West is 96 miles.

HILLS AND RIVERS:-

Geographically the East Khandesh District can be divided into three zones as under:-

- (1) The Satpura range in the North.
- (2) The Satmala or Ajantha hills in the South.
- (3) The plain country in between the above two hilly region.

The Northern portions of the three Talukas of Raver Chopda & Yawal are hilly & thinly populated as these are mostly covered by dense forests. The southern & western portions of the district are also hilly, but these hills are neither so high nor so continuous as compared with the Hills on the North.

The plain country is sloping from East to West & is divided in two parts by the River Tapi which flows from East to West & meets Arabian Sea near Surat. The other important river in the district is the Girna river which takes its source in Sahyadri hills in Nasik Dist. flows from West to East in the Southern part of the plain, takes a right angle turn near about Jalgaon & meets the Tapi. Other important tributary rivers are the Titur & the Waghur.

On either side of the Tapi runs an unbroken plain of the deep black cotton soil. The Tapi Valley on the North is well-wooded & on the South, except in Bhusawal Taluka, covered with Mango groves. The Girna Valley is fringed by poor red soil & tracts of waste, with rugged stony land. However, the soil immediately near the bank of the river is somewhat better though it stands no comparison to the soil in the Tapi Valley.

There are also hills ' Shirsoli ' in Erandol Taluka & Ghodasgaon in Bhusawal Taluka. The river Purna takes its source in Berar & meets the Tapi in Bhusawal Taluka. There are also some small rivers namely, the Bori, the Panzara, the Suki, the Mori, the Hadkari, the Ratnavati, but these are not very useful.

S o i l

On the whole the District can be classified into three major tracts from the point of view of soil.

- (1) The northern tract beyond the Tapi river & comprising of Raver, Yawal & Chopda Talukas.
- (2) The Central tract consisting of Amalner, Parola Erandol, Jalgaon, Bhusawal & Edlabad Peta.
- (3) The Southern tracts consisting of Jamner, Chalisgaon, Pachora & Bhadgaon Peta.

The northern tract mostly consists of rich black cotton soil except for a small strip of light soil along the foot of Satpuras. In the central tract there are three main varieties of the soil:- Deep Black, Red & Brown. The deep black soil is most Fertile & yields rich crops. The lighter red soil, though not so fertile, is sufficiently good for vaising cash crops such as cotton & groundnut. The general quality of soil in the southern tract is, however, inferior to that of the central or northern tracts. The reddish brown soil in Pachora Taluka & Bhadgaon Peta is best suited for Jawar, cotton Groundnut crops, while the soil of Chalisgaon Taluka

is capable of raising heavy crops with the help of adequate water supply.

Climate :-

The average rainfall in the district is about 30" & falls within a span of about four months in the mansoons. Extreme climate conditions are experienced in the district with a very cold winter & a very hot summer when the temperature generally shoots to 49° c. (ie. about 120° F.) The climate tends to be malarial after the Monsoon rains, especially in the villages adjoining the Sataras.

R A I N F A L L :-

In this district the rainfall is scarsly and is uneven in distribution. Certain areas of the district are chronically affected by scarcity and famine. The normal annual rainfall is about 30 inches in the district. The rainy season normally starts from June & lasts upto October, July being the month of highest rainfall. However during the last few years there has been general ~~cooling~~ ^{variation} in the rainfall by about 10 inches and so irrigation has assumed special importance in increasing agriculture production. The variations in the rainfall from year to year can be seen from a study of the following table.

Average Rainfall in Dist. - Khandesh							
Year	1951	1952	1953	1954	1955	1956	1957:1958
Rainfall (in inches)	24.90	14.91	26.40	24.53	31.51	37.27	25.24
No. of rainy days	36	27	40	47	54	51	39

ADMINISTRATIVE SET UP:-

The district is divided for Revenue administration in three sub-divisions, 11 Talukas and 2 Petas. Details as regards area, population etc. are as follows:-

Name of Sub-division	Name of Tal.:/Peta.	Area in sq. miles:	Total for sub-division:	No. of villages (Town)	Totals for sub-division:	Population (51 census):	Total for sub-division.
1) Amalner	: Amalner	: 324.5	: 1277.9	: 157 (1)	: 524 (8)	: 144672	: 448302
	: Erandol	: 368.5		: 150 (3)		: 127262	
	: Genda	: 293.5		: 110 (3)		: 108291	
	: Parola	: 291.4		: 107 (1)		: 68077	
2) Chalisgaon	: Chalisgaon	: 460.4	: 1486.7	: 125 (1)	: 440 (9)	: 146444	: 430831
	: Pachora	: 308.7		: 115 (4)		: 105158	
	: Jamher	: 521.1		: 141 (3)		: 122999	
	: Bhadgaon	: 196.5		: 59 (1)		: 56230	
3) Jalgaon	: Jalgaon	: 310.6	: 1627.6	: 85 (3)	: 460 (12)	: 164532	: 592218
	: Bhusawal	: 323.5		: 103 (3)		: 149055	
	: Yawal	: 368.5		: 80 (4)		: 115191	
	: Raver	: 361.5		: 113 (2)		: 117674	
	: Edlabad	: 249.5		: 79 (1)		: 45766	
T o t a l:		: 4457.2		: 1424 (29)		: 1471351	

Figures in bracket indicate the no. of towns. Jalgaon is the Head-quarter of the district East Kham Khandesh.

According to the census of 1951 the population of the district is 1,471,351 or 329 persons to the sq. mile. The density of population is greater than the other neighbouring districts of Maharashtra but it is smaller as compared with the whole Bombay division.

<u>District</u>	<u>Density per sq. mile.</u>
(1) West Khandesh----	208
(2) Nasik ----	237
(3) Buldhana ----	232
(4) Aurangabad ----	187
(5) Bombay Division -	414

Even though the density for the whole district is 329 persons per sq. mile, there is a wider variation, in the density of different Talukas. Higher concentration is found in Talukas as :- Bhusawal (453) Jalgaon (515) due to different factories. East Khandesh district has better lines of communications, & richer agricultural tracts. The extent of urbanisation in the district is much larger as compared to the neighbouring districts. Roughly it is as follows:

<u>District</u>	<u>Urban Population.</u>
East Khandesh ----	51.7 %
West Khandesh ----	20. %
Nasik Bombay Division .	25. %

Buldhana has the density 16. The whole district is 329 per Aurangabad sq. mile, the 14. % wider variation, in the within the district the extent of urbanisation varies from part to part. This can be seen from the table below:

Name of Taluka / Peta	Name of Towns.	Percentage of Urban population to total population (approx.)
1) Amalner	Amalner	20.00 %
2) Bhusawal	Bhusawal Bodwad Varangaon	48.00 %
3) Bhadgaon	Bhadgaon	16.00 %
4) Chalisgaon	Chalisgaon	20.00 %
5) Chopda	Chopda Adavad Chahrdi	32.4 %
6) Edlabad	-	00.00 %
7) Erandol	Dharangaon Erandol Kosda	33.8 %
8) Jalgaon	Jalgaon Nasirabad Asoda	49.00 %
9) Jamner	Shendurni Jamner Fahun	23.5 %
10) Pachora	Pachora Nagardevale Pimpalgaon Lonare	31.00 %
11) Parola	Parola	23.5 %
12) Raver	Raver Sarada	19.00 %
13) Yawal	Yawal Fulapur Naxvi Bhalod	24.00 %

It can be very easily seen that out of the 29 towns 16 towns are situated in Talukas namely Jalgaon, Bhusawal, Erandol, Pachora & Jamner, i.e. in the central part of the district, while in the Edlabad peta there are no towns & so there is no urban population.

Among the Talukas & Petas, Jalgaon Taluka has the largest percentage of population in the District, forming about 49 % of the total population of that Taluka, the next to it, is Bhusawal Taluka having 48 % urban population of the total population of that Taluka, this high percentage

of urbanisation appears due to the fact that Jalgaon is the District Headquarter & an important junction. It is mid-way between the Nagpur & Bombay as far as the Railway root is considered. Similarly, Bhusawal is one of the most important junctions & so the percentage of urbanisation is very high.

Next group consists of Talukas like Amalner, Pachora, Chopda, Yawal, where the urban percentage is about 30 to 35 %. At Amalner & Pachora the percentage is increased owing to the Mills & Factories. While at Chopda & Yawal the percentage is high due to rich agricultural tracts. Moreover at Chopda the market for cotton seeds is at state level & at Yawal market for Banana is at All India level.

The extent of urbanisation is lowest in Raver, as it is undeveloped; in Bhadgaon & Edlabada as they are having poor agricultural soil & as they are away from the Railway root.

The district as a whole has only 31.7% of urban population & remains predominantly rural.

The rural character of the population is further confirmed if we examine the distributional aspect of the population.

Population of a unit	No. of units	Percentage of total population
Under 500	174	12.8%
500-1000	362	17.3%
1000-2000	225	20.6%
2000-5000	87	17.0%
5000-10000	14	6.7%
10000-20000	10	9.2%
20000-50000	4	8.1%
50000-100000	2	8.3%

population is predominantly rural.

The majority of units in the district lie in the range 500-1000, 1000-2000, & 2000 -5000. The population in the three form nearly 55 % of the total population. Units with less than 2000 persons number 668 & from nearly 84 % of the total number of units. This concentration of population in small units indicates clearly the rural character of the district.

Occupational distribution of population:-

Agriculture is the prominent source of livelihood. This can be verified by the following table which shows occupational distribution of the population in the district.

Occupation	Persons	Percentage to total population.
1) Agriculture	1,036,653	70.4
2) Production other than agriculture	152,619	10.3
3) Commerce	80,361	5.4
4) Transport	33,898	2.3
5) Other sources & miscellaneous sources,	167,820	11.6
	1,471,351	100.00

It can be seen that nearly 70.4 % of the total population are dependent on agriculture for their livelihood. This is in line with the predominantly with the rural character.

S E X R A T I O:-

Out of a total population of 1471351 in the District, there are 746452 males & 724899 females. Thus there are 1029 males for every 1000 females. So the ratio is nearly equal to one.

Except in the Edlabad Peta, where there is no urban area, in all other Talukas & petas, the number of male persons is higher than the number of female persons.

LITERACY:

According to the census of 1951, the percentage of literates as calculated from the sample figures for the district comes to about 28 %. Among the males nearly 43 % are classed as literates. While among the females nearly 11 % are classed as literates.

The literacy in the urban areas is higher than in the rural areas 34% of the total urban population are literate while in the rural areas about 24 % of the population are classed as literates. The literacy in the rural parts are largely confined to men. Nearly 39 % among them are literate while among the females literates form only 8 percent. The corresponding position in urban area is, over 51 % of the males are literate & about, 19 percent among the females are literacy.

The reasons for the higher percentage of literacy among the people in the urban areas are due to more facilities of education available in towns. Still it may be pointed out that even in Urban areas, the percentage of literate women is too low as compared to that of male.

As compared with the neighbouring districts it can be seen that the percentage of literates is higher except in case of urban areas. The following table gives a clear picture.---

Name of the Dist.	Percentage of literates in the	Percentage in rural areas	Percentage in urban areas	Percentage in male literates	Percentage in female literates
Nasik	21.40	13.00	30.70	33.20	9.10
Buldana	20.79	17.39	38.33	32.32	9.02
West Khan- -desh	19.20	15.20	38.50	30.60	7.40
East Khan- -desh.	28.00	24.00	34.00	43.00	11.00

It may be due to the fact that there is large immigration of males in the district from other districts as there is industrial growth in the district.

The following table shows Sex Ratios in the Talukas and Petas.

Taluka/Peta:	: No. of females per 1000 males.		
	Total	Urban	Rural
Amalner	971.3	932.5	984.3
Bhadgaon	974.5	959.5	977.5
Bhusawal	951	939	975.3
Chalisgaon	963	912.6	973
Chopda	997	981	1005
Edlabad	1006.3	Nil	1006.5
Erandol	983	992.4	978.1
Jalgaon	940.9	908	983.1
Jamner	991.3	968	999
Pachora	966.9	951.5	974.2
Parola	957	961.4	955
Raver	987.7	942	999.1
Yawal	976	941	994.7
Total	982.5	943.5	984.2

Scheduled caste & Scheduled Tribes.

The following table gives the population of the

Scheduled Caste & Scheduled Tribes in the District:-

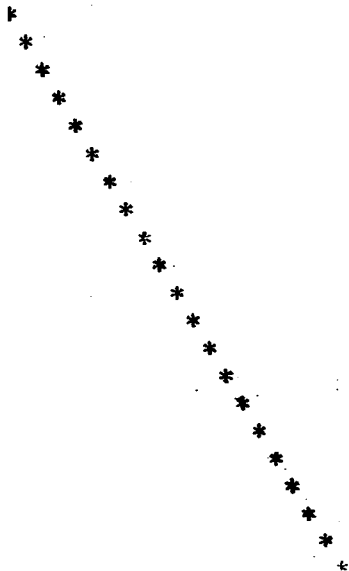

Scheduled Caste	Scheduled Tribes	Total	% to total population.
137,916	94,486	202,402	13.7

The scheduled caste & scheduled tribes number nearly 13.7 % of the total population of the district. The scheduled caste contributes about 68 % of the total scheduled castes & scheduled tribes.

F o r e s t

The total area under forests in this District measures to 7,0.30 sq. miles. There are about 752 sq. miles of forests in charge of forest department & 37 sq. miles of pasture forest in charge of the revenue department. The forests are mostly poor. The better & richer areas are confined to the Sitavra Ranges & yield small timber. Mostly it is used for fuel consumption. The ' Kurans ' in these forests, however offer grazing facilities to a large number of cattle from surrounding villages. Most of the forest have little growth of importance & mostly shrubs & minor trees are found in these areas. Due to the overfelling of trees especially during the World War II the forests have been depleted of the rich growth. So during the first plan period, the schemes for development were concentrated on improving the conditions of the forests through well planned afforestation schemes.

The total reserved area under forest, which is in charge of forest department only., is 476146.60 acres in the district. Out of this area nearly 22 % is in Chopda Range & about 32 % is in the Range of Yawal and Raver.

AGRICULTURE

Land Utilization:-

The following table shows the distribution of total area of East Khandesh district between cultivated land and uncultivated land. The cultivated land consists of the net cropped area and fallows. The uncultivated land consists of lands classed as culturable waste, forest and lands etc. which are not available for cultivation.

Land utilization in the District during 1956-57, 1957-58 and 1958-59

I t e m	Area in acres			Percent of total land		
	1956-57	1957-58	1958-59	1956-57	1957-58	1958-59
Total area (cultivable plus uncultivable)	2876254	2876254	2876254	100	100	100
Cultivable land	2003388	1995197	1997051	69.66	69.4	69.45
Net area sown	1985903	1981252	1983492	69.00	68.20	67.94
Fallows	17485	13945	13559	.66	1.20	1.51
Uncultivated Land	872966	881057	879203	30.34	30.60	30.55
Cultivable waste	22642	30192	29692	.8	1.05	1.3
Forest	400366	398753	398375	13.90	13.86	13.85
Other not available for cultivation	449958	452112	451135	15.64	15.69	15.67

The area under cultivable land formed 69.66 % 69.4 % and 69.45 % of the total geographical area of the district during 1956-57 to 1958-59, Forest amounted 13.90 % 13.86 % and 13.85 % during the period. Cultivable waste land is only 00.8 % to 1.3 % during the same period. The other land which is not available for cultivation is 15.64 %, 15.69 % and 15.67 % during 1956-57, 1957-58 and 1958-59.

The utilization of the total area of land in the district between two groups viz. the cultivated and uncultivated land did not show any wide fluctuation in last three years. It is also the case for the sub-groups of these two main group. The area under forest and the net area sown are decreased during the period.

The distribution of the Gross Cropped Area in the district between food crops and non food-crops:-

Year	Geographical Area of Dist.	Gross Cropped area	Food Crops	Non Food Crops	% of Gross Cropped to Geographical area
1956-57	2876254	2096308	1169033	927275	72.88%
1957-58	2876254	2085278	1195900	889378	72.50%
1958-59	2876254	2112336	1178263	934073	73.44%

Above figures indicate that more than half the area of the gross cropped area was under the food crops.

Food crops in the district includes Jowar, Bajra, Wheat, Rice and Pulses in Grain crops, and other fruit crops like Bannana, Sugarcane etc. While in non food crops Cotton is mostly important and fodder, oilseeds etc.

The following table will give the idea about the net cropped area in the District as a whole:

Year :	Net Cropped area :	Percentage to the xxxxx total area of district.
1956-57	1985903	69.04
1957-58	1981252	68.88
1958-59	1983492	68.92.

From the above table we find the trend that Net cropped area decreased in preceding years. Net cropped area was 69.04% of total area of the district in 1956-57 while total Gross cropped area was 72.88 %. Total Gross cropped area increased in 1958-59 which was 73.44 % but the net cropped area has ~~decreased~~ *decreased* as 68.92 % in the same period. It shows that the tendency of harvesting more crops from the same land appears to be increased in 1958-59.

Pattern of Land Utilization in Taluka / Peta of East-Khandesh.

The distribution of Land in the two categories cultivated and uncultivated land in the Talukas and Petas of ~~xxxxxx~~ East Khandesh., district is given in the statement below:-

District	: Year	: Total area	: Cultivable land			: Uncultivable land			: Total (7+8+9)
			: Net Cropped	: Fallows	: Total (4 + 5)	: Cultivable waste land	: Forest	: Other not available for cultivation	
East-Khandesh:	1956-57	2876254	69.05	0.61	69.66	0.787	13.920	7.405	22.112
	1957-58	2876254	68.90	0.48	69.38	1.050	13.860	6.135	21.045
	1958-59	2876254	68.96	0.47	69.43	1.030	13.850	6.323	21.203

From the figures in the above table we find that in case of net cropped area of the district there are no such wide fluctuations during the period of last three years, any how it was highest in 1956-57. In case of Fallows, area under it is decreasing in the same period. Cultivable waste land area was lowest in 1956-57 while it is increased in next years. Proportion of the Forest area in the same period seems to be constant, except slight fluctuations. The land which was not available was highest in 1956-57 which decreased in next year by 1 % of the total area of the District.

Taluka Jamner had the highest percentage of cultivated area, 8.43, 8.45 in 1956-57, 1957-58 and 1958-59, percentage with total geographical area of the district. Next to Jamner Taluka Chalisgaon had the percentage 7.33 , 7.33 and 7.34 in the respective years. Bhadgaon and Edlabad Peta had the lowest cultivated area as compared with the total geographical area of the district. That percentage was from 2.24 % upto 3.15% in the same years.

Years	Food Crops							Non Food Crops			
	Jawar	Bajari	Rice	Wheat	Pulses	Sugarcane	Banana	Other Food crops	Ground Nut	Cotton	Other Non food Crops
1956-57	12.46	9.52	0.62	3.62	19.36	0.115	0.933	2.217	15.13	27.64	2.01
1957-58	19.10	9.10	0.70	3.70	20.63	0.15	1.131	1.531	10.10	25.10	1.23
1958-59	18.31	9.32	0.63	3.90	20.22	0.143	1.133	1.709	13.57	27.50	0.77

The above table shows that as far as the whole district is concerned there are no wide fluctuations in the areas cultivated under each crops. Jawar & Cotton occupy in these areas in respective years.

Distribution of the Gross Cropped area between food-
Crops and non-food crops in 1956-57, 1957-58 & 1958-59

The following table gives the idea about the distribution of the gross cropped area in different talukas and Mahals of the East Kanara District.

Taluka Mahal	: Percentage of food crops : to G.C.A.			: Percentage of non food : crops to G. C. A.		
	: 56-57	: 57-58	: 58-59	: 56-57	: 57-58	: 58-59
1. Amalner	5.55	5.71	5.94	3.83	3.76	3.90
2. Bhadgaon	2.67	2.75	2.86	1.80	1.56	1.49
3. Bhusawal	3.67	3.33	3.51	3.68	3.48	3.76
4. Chalis - -gaon	6.91	7.23	7.46	3.55	3.19	2.99
5. Chandol	4.42	4.25	4.06	3.64	3.74	4.05
6. Edlabad	2.03	2.13	1.90	2.38	2.16	2.41
7. Erandol	5.59	5.52	5.17	4.20	3.98	4.06
8. Jalgaon	4.27	4.41	4.32	2.30	2.86	2.97
9. Jamner	5.33	5.90	5.49	6.22	5.80	6.24
10. Pachora	4.20	4.72	4.62	3.72	3.14	3.18
11. Parola	3.85	3.74	3.70	2.74	2.78	2.77
12. Raver	3.51	3.59	3.26	2.80	2.76	3.10
13. Yaval	3.52	3.44	3.16	2.90	2.95	3.37
T o t a l	55.77%	57.35%	56.73%	44.23%	42.65%	44.22%

From the above table it is observed that the division of the gross cropped area in to food crops and non food crops is remaining approximately constant in the last three years; only slight fluctuations can be observed which is negligible. Taluka Chalisgaon had the largest percentage of the food crops to the total gross cropped area of the district as a whole, which was ranging from 6.91, 7.23 and 7.46 percent during 1956-57, 1957-58 and 1958-59. While the percentage of non food crops was only 3.55, 3.19 and 2.99 percent during the same period. Next to Chalisgaon Taluka, Erandol and Jamner Talukas had the highest percentage for food crop area. In Erandol it was

5.59, 5.52 and 5.47 percent and in Jamner it was 5.56 5.90 and 5.49 percent to the total gross cropped area of the district as a whole. Even Amalner had the percentage of 5.55 to 5.94 during the same period. In case of the remaining talukas and Mahals, the percentage of the food cropped area was ranging from 2.03 to 4.42 during 1956-57, and from 2.18 to 4.72 percent during 1957-58 and from 1.90 to 4.62 percent during 1958-59.

In case of Non food cropped area, Taluka Jamner had the highest percentage of 6.22, 5.30 and 6.24 to the total gross cropped area of the district as a whole, during the same years. Next to Jamner taluka Erandol had the highest percentage ranging from 3.98 to 4.20 during the same period. In case of the other talukas and Mahals the percentage of the non food cropped area to the total gross cropped area was ranging from 1.80 to 3.83 in 56-57 1.56 to 3.76 in 1957-58 and from 1.49 to 3.90 percent in 1958-59.

The total percentage of the district of the food cropped area was 55.77, 57.35, and 56.73 percent during 1956-57, 1957-58 and 1958-59, while that the total percentage of the nonfood crops was 44.23, 42.65 and 44.22 percent in the same period. Thus it will be seen from the above that about only 10 % of the total cultivated area ~~is devoted to the food crops more than nonfood crops.~~ is devoted to the food crops more than nonfood crops. In this District, nonfood crops have the equal importance like food crops, specially because, nonfood crops include Cotton, Sugarcane, Groundnut and Banana. And these crops are money crops, which are giving good returns to the farmers while in case of food crops which includes, Jawar Bajari, Wheat and Rice which are important food crops.

Food Crops in the East Khandesh District:

(1) J A W A R :

Jawar is the important crop in the district and 98232 acres, 99237 acres and 90962 acres were under this crop during 1956-57, 1957-58 and 1958-59 respectively out of these areas, 50453, 54155 and 65565 acres were under Rabi Jawar while 329741, 346760 and 333202 acres were under Kharif Jawar in the district.

Percentage of area of Jawar in each of the Talukas and Mahals of the District to the total area of the District under Jawar, during 1956-57, 1957-58 and 1958-59.

Talukas/Mahal	Percentage of Area		
	1956-57	1957-58	1958-59
1 . Amalner	10.60	10.63	11.91
2 . Bhadgaon	3.90	4.46	4.50
3.. Bhusawal	7.87	7.55	6.81
4 . Chalisgaon	8.90	9.75	9.16
5 . Chopda	8.90	8.05	8.43
6 . Edlabad	4.48	4.58	4.24
7 . Erandol	11.91	9.55	10.18
8 . Jalgaon	6.13	6.55	6.39
9 . Jamner	11.51	12.65	11.78
10. Pachora	7.70	8.37	8.24
11. Parola	6.40	5.99	6.29
12. Raver	6.18	6.21	5.99
13. Yawal	5.90	5.89	5.59
Total	100.00	100.00	100.00

It is observed from the above table that in 1956-57 and in 1957-58 taluka Jamner had the largest area under Jawar, which was 11.51% and 12.65% and in 1958-59 taluka Amalner had the largest area 11.91 % Bhadgaob mahal had the lowest percentage 3.90 % and 4.46% and Edlabad Mahal had

1.21 % ... during the same period. The highest acreage under Jawar was 30703 acres in Jamner Taluka in 1957-58.

(2) BAJARI:-

Bajari is the second important food crop in the Dist. which has 210704, 202550 and 207707 acres area during 1956-57 to 1958-59.

Percentage of area under Bajari in the Talukas/ Mahals to the district area under Bajari during 1956-57 to 1958-59.

Talukas/ Mahals.	Percentage of area		
	1956-57	1957-58	1958-59
1) . Amalner	10.07	9.90	9.93
2) . Bhadgaon	7.50	7.18	8.24
3) . Bhusawal	3.01	2.91	2.97
4) . Chalisgaon	31.37	34.10	33.86
5) . Chopda	7.50	6.36	6.19
6) . Edlabad	.82	.75	.83
7) . Erandol	8.28	7.77	7.99
8) . Jalgaon	3.30	3.24	3.59
9) . Jamner	4.70	4.29	4.45
10) . Pachora	10.00	9.90	10.40
11) . Parola	9.79	9.98	8.42
12) . Raver	.96	.84	.84
13) . Yawal	3.04	2.87	2.57
Total	100.00	100.00	100.00

It is observed from the above, that this crop is mainly concentrated in Chalisgaon Taluka. The area under Bajari, in this Taluka was ranging from 31.37 to 34.10 percent, which was 66132, 69034 and 70352 acres during 1956-57 to 1958-59. The lowest percentage was in Edlabad Mahal in same period which was 0.75% to 0.83%.

Rice is the third food crop in the district, but it is not so important like Jawar or Bajari. It occupies very low percentage of area as compared with other food crops like Jawar, Bajari or Wheat. In 1956-57 Rice occupied 12970 acres, in 1957-58 that figure was 14661 acres, which was highest in last three years, and in 1958-59 it was 13182 acres.

Following table gives the percentage of the acreage of Rice in the Talukas and Mahals of the district during 1956-57, 1957-58 and 1958-59.

Taluka / Mahal	A R E A		
	1956-57	1957-58	1958-59
1. Amalner	5.37	5.01	4.81
2. Bhadgaon	11.77	12.70	13.94
3. Bhusawal	6.82	5.97	5.45
4. Chalisgaon	11.62	13.10	12.87
5. Chopda	6.75	4.74	4.70
6. Edlabad	1.80	1.70	1.60
7. Erandol	7.16	10.60	9.40
8. Jalgaon	6.87	6.24	6.35
9. Jamner	8.98	10.31	10.47
10. Pachora	14.98	14.94	16.07
11. Parola	4.97	4.52	5.02
12. Raver	7.10	6.60	6.39
13. Yawal	5.82	3.53	3.25
T o t a l	100.00	100.00	100.00

It is clear from the above figures, that Rice occupied the largest area in Pachora Taluka, During 1956-57, 1957-58 and 1958-59 the percentage of that area to the total area of the district, under Rice was 14.98%, 14.94% and 16.07% respectively. Specially in 1958-59 this crop had the largest percentage in the District during last three years.

In Edlabad Mahal the position was opposite, that Rice had only 1.60 to 1.80 percentage of acreage. It was lowest in 1958-59, only 1.60 %.

W H E A T :

Next to Jawar and Bajari, Wheat is an important food crop in the district. Area under wheat was highest during 1958-59 which was 80959 acres, while it was 75794 acres and 77054 acres during 1956-57 and 1957-58 respectively. But

Following table gives the idea of the percentages of the wheat in the talukas and mahals.

Taluka/ Mahal	A R E A		
	1956-57	1957-58	1958-59
1 . Amalner	15.17	14.27	10.69
2 . Daryapur	3.72	2.82	2.93
3 . Bhusawal	6.68	6.83	5.72
4 . Chalisgaon	5.24	5.02	5.52
5 . Chopda	10.96	9.99	9.21
6 . Edlabad	3.79	3.97	3.08
7 . Erandol	7.50	12.06	9.07
8 . Jalgaon	12.57	13.55	13.85
9 . Jamner	1.83	1.57	1.54
10 . Pachora	2.39	3.43	3.38
11 . Parold	5.55	4.75	5.86
12 . Raver	14.77	13.75	12.81
13 . Yawal	9.89	8.33	9.00
Total----	100.00	100.00	100.00

From the above, it is clear that the percentage of the area under wheat, was highest in Amalner taluka during 1956-57 and 1957-58, which was 15.17 percent and 14.27 percent, of the total area of the district under the crop. But in 1958-59 it was highest in Jalgaon taluka i.e. 13.85 percent. The highest acreage under the wheat was 11499 acres in Amalner taluka during the period.

The lowest percentage of area was in the Jamner Taluka, in the same period, which was only 1.54 % to 1.83%.

About 40% of the total area under wheat in the Dist. was under irrigation. For the last three years, this percentage was the same approximately.

P U L S E S :

Pulses include Tur, Gram, Mug, Math and Udid, etc.

The important Pulses occupied an area of 19.36 %, 20.63 % and 20.28 % during 1956-57 to 1958-59 of the total cultivated area of the district. The area was 405705 acres in 1956-57, 411255 acres in 1957-58 and 416141 acres in 1958-59. This area was highest in 1957-58.

Following table gives the distribution of the pulses among the talukas and mahals of the district.

Taluka/ Mahal	A r e a			* Percentage
	1956-57	1957-58	1958-59	1958-59
1 . Amalner	7.70	8.60		8.70
2 . Bhadgaon	4.34	4.08		4.31
3 . Bhusawal	8.00	7.94		7.93
4 . Chalisgaon	8.53	7.75		8.28
5 . Chopda	7.66	7.60		7.93
6 . Edlabad	4.45	4.80		4.18
7 . Brandol	10.16	10.44		10.43
8 . Jalgaon	8.54	8.69		9.32
9 . Janmer	13.69	13.27		12.83
10 . Pachora	7.15	8.22		8.27
11 . Parola	6.51	6.24		6.61
12 . Raver	6.34	6.10		5.65
13 . Yawal	6.88	6.33		5.81

* Percentage in the above table is with the total area of the Pulses in the district.

From the above figures it will find that Pulses occupied highest area in Taluka Jamner in the period of last three years. The percentages of the area in Jamner Taluka were 13.69 % in 1956-57, 13.27% in 1957-58 and 12.83% in 1958-59. In acres, 55540, 57232 and 53371 were under pulses in Jamner Taluka during three years. Taluka Erandol had also the remarkable percentage of area under pulses to the total area under pulses in the District, which was ranging from 10.16% to 10.48% in the same period.

The lowest percentage of area was in Bhadgaon Mahal during 1956-57 and 1957-58, which was 4.34% and 4.08%. And it was lowest in Edlabad Mahal in 1958-59 which was 4.18%.

Following table shows the distribution of area under important pulses--Math, Udid, Gram and Tur in the Talukas and Mahals of the District. Percentage is to the total area under particular pulses in the District.

Talukas / Mahals.	A R E A - - Distribution %					
	M a t h			U d i d

T o t a l	100.00	100.00	100.00	100.00	100.00	100.00

Above table is only for particular given crops among pulses and so it is not including all the crops under the head of pulses. So the above distribution is given only for particular crop in different talukas and mahals of the district.

M A T H :- This crop occupied largest percentage of area in Chalisgaon taluka, which amounted 26 % to 27 % of the total area of the district under Math. That acreage was 6652 acres to 7969 acres in the respective years. On the contrary area under Math was ~~my~~ lowest in taluka Raver, it was only 0.63% to 0.75% in the same period.

U D I D :- This is the second important crop in Pulses which occupied highest percentage of area in taluka Jamner About 14.88 % to 15.50 % of the total area of the district under Udid was in Jamner, the acreage was from 36012 acres to 40183 acres in last three years.

In Bhadgaon mahal this crop occupied the lowest percentage of area in 1953-57 and 1957-58 which was only 4.26 % and 4.32 %. But in next year it was lowest in Edlabad mahal, which was 4.13 % .

The total area under this crop in the district was 233323 acres in 1953-57 and 236334 acres in 57-58, while it was 228535 acres in 1958-59.

GRAM :- This is the third important crop amongst Pulses, Taluka Amalner had the largest percentage of Gram which was 19.50% to the total area in the district under the crop. But in the last two years, taluka Amalner had the largest percentage, which was 20.40% and 21.04 an area was 2553 acres and 2521 acres. But in 1956-57 in Brandol it was 3623 acres. The lowest area under Gram was in Edlabad and Jamner during the same period.

The total area under Gram in the district was 18586 acres in 1956-57 , 12643 acres in 1957-58 and 11983 acres in 1958-59.

M u g :- The highest percentage of area under this crop was in Amalner Taluka in last three years. It occupied 14.99 % to 19.29% of the total area under Mug in the district. An area under Mug in Amalner was 8586 acres to 14658 acres. The lowest percentage of area was in Bhadgaon Mahal, which was from 2.56% to 3.37% in the same period.

The total area under Mug in the district was 57271 acres in 1956-57; 73237 acres in 1957-58 and 70412 acres in 1958-59.

Distribution of the total area under Pulses, in the crops--Math, Udid, Gram, Mug and other pulses; is given in the below table.

Years :	Area under different Crops of Pulses :					Total for the
1	2	3	4	5	6	7
	Math	Udid	Gram	Mug	Other Pulses (Remaining)	District
1956-57	7.27 %	58.75 %	4.58 %	14.12 %	15.28 %	100.00%
1957-58	5.80%	60.17 %	2.91 %	17.73 %	13.30 %	100.00%
1952-59	6.02%	60.92 %	2.88 %	16.92 %	13.20%	100.00%

From the above figures it is clear, that among Pulses, Udid is most important crop, which occupies about 60 % area of the total area under pulses in the district. Next to it Mug is important and then Math. Other pulses include Tur, Chavali etc. which occupied 13.20 % to 15.28 % area out of total area under pulses.

B A N A N A :-

This fruit crop is important among food crops in this district. This crop is one of the important crops in East-Khandesh. Land and the atmosphere is suitable for the crop in the district. It requires rich quality of the land and well managed water supply. Whole the crop is under irrigation which is essential for it. Banana crop is cultivated in all the talukas and mahals of the district. In the whole Dist. Banana crop has the importance like Cotton and Groundnut, which gives the remarkable returns to the cultivators. This crop requires double the period than that of other crops. This is one of the important exportable crop in the district. Following table gives the distribution of the total area under Banana crop, among the talukas and mahals of the district.

Talukas/ Mahals.	Percentage of Area *		
	1956 - 57	1957 - 58	1958 - 59
1 . Amalner	1.22	1.42	1.80
2 . Bhadgaon	3.99	4.79	5.00
3.. Bhusawal	1.73	2.38	2.14
4 . Chalisgaon	3.83	5.16	6.10
5 . Chopda	0.51	0.54	0.50
6 . Edlabad	1.25	1.62	1.70
7 . Erandol	3.74	4.52	5.00
8 . Jalgaon	3.07	2.93	2.62
9 . Jamner	8.15	8.82	8.50
10. Pachora	8.14	9.30	10.00
11. Parola	2.16	2.32	2.25
12. Raver	35.93	33.28	32.98
13. Yawal	26.31	22.72	21.63
Total	100.00	100.00	100.00

* Percentage is given to the total area under Banana Crop in the District.

The total area under Banana crop in the District was 20072 acres in 1956-57, 24637 acres in 1957-58 and 23718 acres in 1958-59. From the above table it will be seen that the crop is concentrated in Raver and Yawal Talukas. Taluka Raver had the largest percentage of area under Banana during three years, which amounted from 32.98 % to 35.93 %. The crop occupied 7214 acres, 8273 acres and 7822 acres in the same period.

In Chopda Taluka the area under Banana was lowest which amounted only 50% to 51 % of the total area under the crop in the district. Next to Raver and Yawal other talukas and mahals have not more than 10 % of the total area of Banana during the same period.

SUGARCANE :-

This is also an important crop in the district, which is developing. This crop gives the remarkable returns in monetary terms to the cultivators. This crop requires the rich quality of the land and the better facilities of the irrigation. This crop requires adequate water supply. The total area under sugarcane in 1956-57 was 2417 acres, in 1957-58 it was 3098 acres and in 1958-59, it was 3025 acres. Following figures are giving the distribution of Area of this crop between different talukas and mahals of the district.

Talukas / Mahals	Percentage of Area		
	1956-57	1957-58	1958-59
1. Amalner	8.53	6.16	7.14
2. Bhadgaon	14.68	20.10	22.97
3. Bhusawal	2.10	1.68	2.58
4. Chalisgaon	6.30	7.23	7.98
5. Chopda	3.80	4.10	4.28
6. Edlbad	0.52	1.08	1.93
7. Erandol	4.30	3.60	3.37
8. Jalgaon	2.73	1.90	1.75
9. Jamner	5.50	5.55	7.57
10. Pachora	5.10	6.22	6.90
11. Parola	6.60	10.21	4.04
12. Raver	12.21	10.28	10.12
13. Yawal	27.50	21.72	15.90
T o t a l	100.00	100.00	100.00

From the above table, we find that the crop of sugar-cane, which is cultivated in all the parts of the district is mainly concentrated in few talukas and mahals, as in Yawal Raver and Bhadgaon. During 1956-57 and 1957-58 the percentage of area was highest in Yawal taluka which amounted 27.50 % and 1.72 %. But in 1958-59 it was highest in Bhadgaon mahal, which was 23.07%, which is the indication for the considerable increase in case of the percentage of the area in that mahal. On the other hand in Edlabad mahal the percentage of area was the lowest, 0.52% in 1956-57. But in next two years it was lowest in Jalgaon taluka, 1.00% and 1.75%.

The highest acreage of Sugarcane was in 1958-59 which was 293 acres in Bhadgaon mahal.

In the whole district Sugarcane crop was entirely irrigated crop. Now a days the tendency of cultivating Sugarcane is increasing because due to a normal rainfall, production of Cotton got a considerable set back. So peasants automatically turned to Sugarcane, which is also a money crop next to Cotton.

Groundnut:-

In the oilseed crops, Groundnut crop is major and important crop in the district. Even Groundnut is the important crop in the district in the line of other crops, like Cotton and Sugarcane. Total area in the district under the cultivation of this crop was 318114 acres in 1956-57, and 32060 acres in 1957-58 and 343657 acres in 1958-59. It is clear from these figures that the area under this crop was highest in the last year.

*

*

*

*

*

The distribution of the area of Groundnut crop among the talukas and mahals of the district is given below. The given percentage is with the total area of the district.

Talukas/ Mahals	Percentage of Area		
	1956-57	1957-58	1958-59
1. Amalner	10.18	10.60	10.64
2. Bhadgaon	2.51	3.80	3.37
3. Bhusawal	6.68	6.86	7.20
4. Chalisgaon	14.23	14.64	13.43
5. Chopda	5.03	6.62	6.75
6. Edlabad	1.80	1.81	2.10
7. Erandol	11.48	9.96	9.01
8. Jalgaon	5.32	4.86	4.65
9. Jamner	11.00	11.75	11.29
10. Pachora	9.00	8.16	7.31
11. Parola	10.60	11.86	11.75
12. Raver	4.36	4.40	4.54
13. Yawal	7.95	7.36	7.65
Total	100.00	100.00	100.00

Above figures of the percentages in the table indicates, that the crop of Groundnut is highly concentrated in Chalisgaon, Jamner, Parola and Amalner talukas.

The percentage of area under groundnut was highest in Chalisgaon taluka during the last three year. It was amounted 14.23 % in 56-57; 14.64 % in 57-58 and 13.43 % in 58-59 of the total area of the district under the crop. That area was 45278 acres, 49833 acres and 46171 acres during the same period. The lowest area was in Edlabad mahal. The percentage in that mahal was from 1.80 % to 2.10 % to the total area of the crop in the district.

Non-Food Crops- Cotton:

Among Nonfood crops, specially Cotton is important Cotton is the money crop in this district and it has substantial area under cultivation during the period of last three years, An area under Nonfood crops was 44.23 % in 56-57 then it was 42.65 % and 44.22% during last two years, This percentage is to the total gross cropped area of the district, And out of this Cotton occupied about 27 % of the total gross cropped area in the district during the same period. Following table gives the distribution of the area under cotton. The total area under cotton was 583530 acres in 56-57, while it was 525989 acres in 57-58 and 569196 acres in 58-59. It is clear from these figures that the area of the Cotton was highest in 1956-57 during the period of last three years.

Talukas/ Mahals---	: Percentage of Area		
	: 1956-57	: 1957-58	: 1958-59
1. Amalner	7.28	7.72	7.40
2. Bhadgaon	4.96	3.66	3.12
3. Bhusawal	9.41	9.82	9.60
4. Chalisgaon	4.77	3.13	2.81
5. Chopda	9.62	10.58	10.45
6. Edlabad	7.45	7.39	7.52
7. Erandol	8.41	9.17	9.34
8. Jalgaon	6.61	7.67	7.22
9. Jamner	15.92	15.87	16.13
10. Pachora	8.32	7.08	7.17
11. Parola	3.92	3.31	3.04
12. Raver	7.53	8.06	8.62
13. Yawal	5.81	6.50	7.10
Total ---	100.00	100.00	100.00

Above table indicates that the area under Cotton was highest in Jamber taluka. During last three years which was about 16 % to the total area under the crop in the district. And the lowest percentage of the area was in Parola taluka which was about 3 %. The highest area under Cotton, in Jamber taluka was 92391 acres in 1956-57, and the lowest area was in Parola taluka which was 17318 acres in 1958-59.

Outturn:-

Following table gives an idea about the outturn of the important crops in the district during the period of three years from 1956-57 to 1958-59- .

Sr. No. :	Name of the Crop:	Outturn in 100 Tons		
		: 1956-57:	1957-58	: 1958-59
1	: Rice	28	31	20
2	: Wheat	130	115	212
3	: Jawar	1517	1730	1027
4	: Bajri	234	290	225
5	: Ragi	1	1	--
6	: Maize	1	3	3
7	: Other Cereals	4	3	4
8	: Total Cereals	1915	2173	1591
9	: Tur	81	87	101
10	: Gram	28	15	29
11	: Other Pulses	584	663	567
12	: Total Pulses	693	750	697
13	: Sugarcane	46	57	42
14	: Chillies	27	30	16
15	: Groundnut	361	952	741
16	: Sesamum	23	17	20
17	: Cotton (Bales of 392 lbs. each)	1614	1706	1333

From the above figures we can draw the following conclusions:- in case of Rice outturn was highest in 57-58 while it is decreased in 58-59 by 800 tons than that of 56-57. Outturn of wheat is maximum in last year which was 21200 tons, on the other hand it was lowest in 1957-58. Production of Jowar was highest in 57-58 and was lowest in last year. Total highest outturn of Jowar was 173000 tons. Jowar is the important crop in the district and largest area is always occupied by this crop, land and the atmosphere is suitable for Jowar in this district. The figure of the outturn of the total Pulses was highest in 1957-58 which was 750 00 tons. It was only 69300 tons in 56-57 and 69700 tons in 1958-59.

Outturn of chillies increased from 37 00 tons to 30 00 tons in 57-58 but again it was reduced to 16 00 tons in last year. It is also the same case for Groundnut; Outturn of it was highest 952 00 tons in 1957-58. But it was lowest in 1958-59, only 741 00 tons.

In case of the outturn of Cotton, figures shows that there was increase in 1957-58 than that was previous year. But again in 1958-59 the outturn was lowest. In 1957-58 the outturn of cotton was highest in the period of three years. But it is reduced in 1958-59.

- - -C-r-o-p- - C a l e n d e r

Sr.No:	Name of the Crop	Sowing period of the crop	Harvesting period of the crop	Period for highest prices	Price per B.Md. Rs.
1	Rice	November 1st Last week of June is first week of July	November 1st & IIInd week	Rice is not registered in any of the market of the District.	-

Following table gives the idea about the holdings in the district.

Classification according to the Holdings	As Owner		As Tenant	
	No.	Actual Area	No.	Actual Area
1. Equal to 16 acres.	4	192-00	19	192-00
2. More than 16 acres but less than 95 acres	237	1256-00	1270	1682-07
3. More than 95 acres & less than 144 acres	131	19284-37	1586	1526-14
4. More than 144 acres but less than 192 acres	31	4430-05	449	524-03
5. More than 192 acres but less than 240 acres	18	3541-32	363	190-14
6. More than 240 acres.	25	7956-12	799	313-21
7. Less than 16 acres but equal to 95 acres	73	1031-01	103	136-39
8. More than 16 acres but less than 48 acres	30342	622010-10	625005	122703-32
9. Less than 16 acres	163243	890567-27	898870	123773-32

Above table indicates that the number of land holders is highest under the head of less than 16 acres. It is 1,63,243 where they have an area of 890567 acres and 123773 acres, including owners and tenants of the holdings. Next to it the number of land holders, who have more than 16 acres and less than 48 acres is highest. From the point of Economic Holding of 16 acres only 73 have the exact area of Economic Holding.

Then in the remaining figures, the number of land holders is highest in the category of more than 48 acres and less than 96 acres. 48 acres is the limit for Ceiling Area. Only 28 land holders have the largest holdings which are more than 240 acres in the district. Mainly total agricultural area of the District is divided among the land holders, who have less than economic holding of 16 acres.

The number of permanent tenants in the district is only 111 and 7 are the authorized sub-tenants. But the figure of other tenants is highest, which is 29029 and they hold 265052 acres.

The holding under the head of disability are mainly occupied under the head of minors and the widows. The number of holding under the head of minors is 9829 while that is 2815 under the head of widows. The number of land holdings is 110. An area of 5706-13 acres occupied by 164 land holdings is under the disposal of the Collector of the district. Only the following figures will show the distribution of agricultural area of the District:-

- (1) Total occupied - 20,37,746-06
- (2) Dry crop area - 20,37,543-12
- (3) Rice and paddy - Nil
- (4) Personally cultivated area - 8,871-06
- (5) Personally irrigated area - 1,228-28

By the term ceiling area it means 48 acres of Jrayat land and economic holding means 16 acres of jrayat land.

IRRIGATION :-

The total cultivated area under irrigation in the district was 3.75 %; 4.60 % and 4.50 % in the period of three years from 1956-57 to 1958-59. This percentage is with the total gross cropped area of the district. The main source of the irrigation in this district are the wells. There are no private canals in the district, but Government canals are there, which supply water to the few acres of the land. Even there is no such considerable irrigated area by means of canals, except in two talukas. It covers less than 200 acres other sources of irrigation, which includes lift irrigation etc. are also not so. Following table shows the percentages of the irrigated area to the gross cropped area of the particular talukas and the mahals of the district.

Talukas / Mahals	: Percentage of area irrigated to the : <u>gross cropped area of talukas /mahals</u> : 1956 - 57 : 1957 - 58 : 1958 - 59.		
	1 . Amalner	5.50	5.20
2 . Barwal	3.50	3.50	3.80
3 . Bhadgaon	5.00	7.40	4.80
4 . Chalisgaon	4.40	5.00	5.00
5 . Chopda	0.70	0.70	1.00
6 . Edlbad	1.00	1.00	1.00
7 . Erandol	2.50	4.10	4.00
8 . Jalgaon	2.10	2.10	1.10
9 . Jamner	1.02	1.50	2.00
10 . Pachora	4.50	1.30	4.70
11 . Parli	4.10	7.00	5.00
12 . Raver	6.00	10.50	8.5
13 . Yawal	2.00	9.00	10.00
% with the total gross cropped area of District	3.75%	4.60%	4.50%

From the above it is clear, that the percentage of the irrigated area to the total gross cropped area of the talukas and mahals is highest in Raver taluka during the same period, which amounted from 8 % to 10.50 %. While it was lowest in Chopda taluka which was about 1.8 %.

Total area irrigated in the district was 66698 acres in 56-57-70401 acres in 57-58 and 82997 acres in 58-59. This shows that there is a considerable increase in the irrigated area in the last year as compared with the first year. Following table shows the distribution of irrigated area in the district.

Talukas/ Mahals	Percentage of total irrigated area		
	1956-57	1957-58	1958-59
1. Akshai	10.51	11.70	10.10
2. Bhadgaon	3.55	6.27	4.99
3. Brusawal	5.88	4.94	6.00
4. Chaligaon	7.77	8.47	13.16
5. Chopda	1.81	1.80	1.70
6. Dilbad	2.00	2.78	1.96
7. Jalgaon	5.53	3.57	3.17
9. Jambur	5.18	6.01	5.90
10. Kachare	5.72	7.33	6.00
11. Parola	11.77	10.38	9.51
12. Raver	15.88	16.87	15.54
13. Vatal	10.04	10.70	12.33
Total for district	100.00	100.00	100.00

In the above table the percentages of the distribution of the irrigated area in the talukas and mahals of the district, with the total irrigated area of the district are given. Throughout the period of three years the percentage of an irrigated area was highest in the Raver taluka, which was about 16%. Next to Raver it was considerable in V. S. Jambur & Parola talukas. The lowest percentage of

the irrigated area was in Chopda taluka, which was about less than 2.00%.

Live Stock:-

Agriculture is the source of livelihood for nearly 70.4 of the people in the district. The importance of cattle need not be over emphasised in such an economy where agriculture is mainly dependent on bullocks. The males are mainly used for agricultural field work or milk. Mainly, in this district, the buffaloes are used as producers of milk. The important food of the buffaloes is cotton seeds, which is one of the important crop in East Khandesh, so the quality of the milk is very rich. Besides, they form the most important source of manure for agriculture.

The bovine population in the district according to cattle census of 1956 was as follows:-

Bovine Population in the District 1956

Taluka / Peta	Cattle (Females)	Buffaloes (Females)	Total of (Coh No-2+3)	No. of acres per pair of bullock.
1	2	3	4	5
1. Amalner	9865	4739	14604	19.95
2. Bhadgaon	6236	2378	8614	18.58
3. Bhusawal	9950	5066	15016	19.89
4. Chalisgaon	14943	5238	20181	16.71
5. Chopda	11444	4433	15877	17.66
6. Edlbad	9720	3170	12890	16.31
7. Erandol	10756	4787	15543	23.42
8. Jalgaon	10296	5624	15920	18.42
9. Jamner	16248	5720	21968	18.55
10. Pachora	10179	3930	14009	21.51
11. Parola	7567	2704	10271	20.27
12. Raver	10224	5929	16153	19.45
13. Yawal	7658	4555	12213	19.84
District Total	135086	58173	193259	19.22

The total population at the cattle in the district according to census of 1956 was 342904. Out of these, females giving milk numbered 135086, Buffaloes numbered 60775 & out of them females giving milk were 58173. Jamner, Chalisgaon & Haver had larger bovine population than the other talukas in the district.

In relation to the agricultural operation a pair of bullocks had an area of about 19.22 acres to plough [Net cropped area] (1958-59). The area per pair at bullock was less than this district figure, in all the talukas except Amalner, Bhuseval, Raver, Pachora & Parola, Yawal. Erandol had the largest area (nearly 23 acres) per pair of bullocks. The smallest area was at Edlabad where per pair of bullocks the area was 16.31 acres.

Agricultural Implements:- Agricultural production is also influenced by the type of implements, the agriculturist is making use of. As elsewhere the plough happens to be most important implement of cultivation. The total number of ploughs in the district according to census of 1951, was 58303 of these total number, iron ploughs utilised were 13716 i.e. nearly 23.52 % of the total ploughs. Their distribution, however was not uniform in all the talukas/ Petas of the district as can be seen from the following table:-

Agricultural Implements in the District :-

Taluks / Petas-	Ploughs.			Total	Other Agricultural Implements-----		
	Wooden	Iron			Carts	Electric Oil	Tractors.
1. Amalher	4569 (84.07)	865 (15.93)		5434	5444	Nil	2
2. Bhadgaon	2878 (85.52)	476 (14.48)		3354	3246	Nil	Nil
3. Bhusawal	2020 (68.55)	927 (31.45)		2947	5407	Nil	1
4. Chalisgaon	8741 (84.42)	1614 (15.58)		10355	8126	8	1
5. Chopda	4079 (87.07)	605 (12.91)		4684	7402	Nil	4
6. Edlbad	1084 (54.89)	891 (45.11)		1975	3345	Nil	2
7. Erandol	3776 (80.98)	887 (19.02)		4663	5806	6	2
8. Jalgaon	4820 (87.52)	687 (12.48)		5507	5999	20	2
9. Jamner	1221 (27.92)	3269 (72.8)		4490	7716	Nil	1
10. Pachora	3471 (75.55)	7124 (24.45)		4595	5190	2	Nil
11. Parola	3523 (80.30)	864 (19.70)		4387	4576	2	1
12. Raver	2988 (84.01)	569 (15.99)		3557	5922	5	1
13. Yawal	1417 (60.17)	938 (39.83)		2355	5001	4	Nil
District Total	44537 (76.5)	13716 (23.5)		58303	73180	47	17

(Figures in bracket shows the percentages to the total number of ploughs)

The iron plough used at Jamner formed 72.8 percent of the total number of ploughs & that taluka had the largest number of iron ploughs in the district. This was followed by Edlabad (45.11 %), Yawal (39.83%), Bhusawal (31.45%) The minimum percentage is in Jalgaon Taluka (12.48%). This variation in the percentages of iron ploughs may be due to the variation in the soil tracts in different talukas.

The total number of Electric Oil Engines in the dist. according to 1956 census, is 47 only, while the oil engines, with pumps used for irrigation purposes were 2106. This figure must have been increased considerably due to facilities provided by Community Development Programme Scheme.

INDUSTRIES:-

Industrial development of any region depends on a number of factors such as availability of raw material, easy transport facilities, availability of labourers etc. As East Khandesh is cotton growing area, the reason for establishment of cotton--ginning & pressing factories at various cotton growing centres in the district, is obvious.

The District is having very few large scale industries like cotton textiles & oil mills. Among the existing small scale industries in the district, cotton ginning & pressing is most prominent. At the end of 1956 there were 76 ginning & pressing factories. This number was increased to 100 in June 1958. These factories are scattered all over the district & are located where transport facilities are easily available. It is a seasonal industry which works from Nov. to April & most of these gin cotton of Vinnar (197/3).

There are three cotton textile units working in the district at Jalgaon, Amalner & Chalisgaon. Next to it oil industry occupied an important place. There were 26 oil factories including two Vanaspati manufacturing units during 1955-56. Out of these two units, one is at Pachora and other is at Amalner. Besides these units there were 116 small establishments registered under shop & est. act. There are also two units which are engaged in crushing cotton seeds. Out of the total production of cotton seeds in the district about 80 % is used as cattle food & the rest is crushed by these mills for extracting oil. In Jalgaon there is one Ink manufacturing factory & three printing presses. At the end of June 1958, the number of Bidi-manufacturing factories were four. They were situated at Erandol, Jalgaon, Raver & Yawal.

Among the existing cottage industries in the district weaving claims the first place. There were 201 factories in this district during 1959 and on the average the number of persons employed in these factories were 11570. As will be seen from the talukawise information that amongst all the talukas in East Khandesh district, Yawal taluka has maximum factories. Next to it, Jalgaon, Bhusawal & Pachora. But the number of persons employed is more at Jalgaon Pachora & Bhusawal, as compared to those at Yawal.

The following table gives information for the years 1956, 1957, 1958 and 1959.

Item	Year			
	1956	1957	1958	1959
No. of factories	201	206	199	201
No. of Employees	10800	11690	11830	11570
No. of Employers	200	206	199	201

Number of small scale & cottage industries in the district is 89 (during year 58-59), the number of employers is the same. There is an increase of 22 such industries as compared to previous year 1957-58 and increase of 30 as compared to 1956-1957. The number of persons employed during 1958-59 is 2253. The details of these industries can be had from the following table.

Table showing the position of small scale & cottage industries in East Khandesh District.

	1956-57	1957-58	1958-59
No. of small scale and cottage Industries	69	69	89
No. of Employees	1350	1698	2253
Av. investment (Rs.)	175805	216611	273320
Fixed capital (Rs.)	449025	522315	642572

Generally the range of wages is from 0-75Np. to Rs. 1-25Np. per person.

E L E C T R I C I T Y :-

The first power house generating electricity was started at Jalgaon in 1932. It was folloed by Anaher in the same year. Now there are in all 8 power houses in East-Khandesh . About 273000 K.W.H. electric energy was sold by these power houses during 1957-58. The distribution of customers was as follows:-

Domestic	740
Commercial	386
Industrial	6
Irrigation	8
	<u>1140</u>

Police Force :-

There are 25 Police Stations and 1195 permanent and 42 temporary constables in East Khandesh District. The total cost spent during 1958-59 on police force being Rs. 1718733 /- . The number of cognizable crimes investigated during 1958-59 is 3575. The number of cognizable crimes investigated per constable is roughly 2.9 (during 1958-59). A general idea about the police force can be had from the following table:-

Police Force in East Khandesh (Both Perm. & Temp.)

Police Force.	Years		
	1956-57	1957-58	1958-59
Asstt. Superintendent.	1	1	1
Dy. Superintendent.	1	1	1
Inspectors & Dy. Inspectors	4	4	5
Sub-Inspectors	36	36	36
Jamadars & Head constables	335	335	336
Constables	1237	1237	1237
No. of Police stations.	25	25	25
Total cost (Rs.)	2115576	1987906	1718733
No. of cognizable crimes investigated.	3147	3534	3575

Marriages :-

It appears that a set back in agricultural production during the years 1957 to 59, has its effect on the number of marriages, as the financial aspect has its influence on marriages, especially in rural areas. The number of marriages registered is considerably decreased during 1959 as compared to 1956. Jalgaon, Bhusawal & Amalner talukas registered more marriages as compared with other talukas.

The following table shows talukwise information about the marriages registered during the years from 1956 to 1959.

Name of Talukas of Peta.	Years			
	1956	1957	1958	1959.
1. Amalner	123	114	70	33
2. Bhadgaon	6	6	7	2
3. Bhusawal	152	158	127	113
4. Chalithgaon	37	33	29	25
5. Chopda	15	20	37	22
6. Edlaba	3	16	9	2
7. Erandol	93	73	106	64
8. Jalgaon	130	155	111	129
9. Jamner	6	4	5	2
10. Pachora	25	21	16	21
11. Parola	116	20	12	14
12. Raver	107	102	102	103
13. Yawal	23	34	39	15
Total	746	755	670	520

Medical and Public Health:-

The total number of Hospitals in the district during 1956-57 and 58 was 2. There were in all during the same period 18 dispensaries, one at each taluka, Head quarter and one each at Bodwad, Savad, Shendarni, Fattapur and Dharangaon. There were also 38 dispensaries D. L. S. dispensaries and 23 J.M.P. centres in the district. There were 24 nurses during the year 1956-57, but it has increased to 26 during 1958-59.

The distribution of the hospitals and dispensaries ect. in the talukas / Petas of the district during 1956-57, 57-58, 58-59 was as follows:-

Hospitals and Dispensaries in the talukas /notas during 1956-57, 57-58 and 58-59.

Name of talukas	No. of Hospitals			and Dispensaries			Total No. of Patients and Outdoor patients treated
	56-57	57-58	58-59	56-57	57-58	58-59	
1. Amalner	2	2	2	2	2	2	28096
2. Bhadgaon	1	1	1	1	1	1	11553
3. Bhusawal	2	2	2	2	2	2	30123
4. Chalisgaon	1	1	1	1	1	1	13530
5. Chondgaon	1	1	1	1	1	1	15336
6. Fclabad	2	2	2	2	2	2	20000
7. Gandol	2	2	2	2	2	2	22318
8. Jalgaon	2	2	2	2	2	2	11003
9. Jamner	3	3	3	3	3	3	17996
10. Pachora	1	1	1	1	1	1	16705
11. Palgaon	1	1	1	1	1	1	17443
12. Raver	2	2	2	2	2	2	23753
13. Yawal	1	1	1	1	1	1	11371
District	21	21	21	21	21	21	230023
Total							265351

The number of doctors in Government hospitals and number of dispensaries in the district are constant during the years 1956-57, 1957-58 and 1958-59.

The table below shows the number of indoor patients treated during the year 1958-59 and the number of beds etc.

Place	No. of beds	No. of indoor Patients treated	No. of indoor patients per bed (approx.)
			Col. (3) Col. (2)
1	2	3	4
1. Jalgaon	70	3291	47
2. Bhusawal	26	1427	54
3. Yawal	8	41	5
4. Chonda	14	300	21
5. Amliner	16	231	14
6. Bodwad	6	154	25
7. Edlbad	Nil	Nil	-
8. Haver	4	69	17
9. Savadi	8	64	8
10. Shendurni	16	239	14
11. Jambor	11	156	14
12. Fattapur	Nil	Nil	-
13. Bhadgaon	5	22	4
14. Pichora	6	154	25
15. Chalisgaon	8	320	40
16. Parola	3	41	13
17. Dharangaon	12	410	34
18. Erandol	16	145	9
District total	209	7014	34

It will be seen that the number of indoor patients treated per bed is maximum at Bhusawal. The number is also considerably high at Jalgaon, Shendurni and Chalisgaon. Except in the case of Jalgaon, the number of beds provided were few.

Public Health:- The following table shows the total number of births, deaths etc, in the East Khandesh District during the years 1956, 1957, 1958, and 1959.

Year	Births	Deaths	Infant Deaths	Per thousand of population			Infant mortality rate per 1000 births.
				Births	Deaths	Infant	
1	2	4	6	3	5	7	8
1956	71278	29542	7878	48.4	20.1	5.4	110.52
1957	68538	33611	7721	46.6	23	5.25	112.6
1958	69151	42635	7720	47	28.9	5.25	111.6
1959	68961	34057	7876	46.8	23.1	5.4	111.3

It will be seen that during the year 1956, there is highest number of births, while during 1957 the number is the lowest. The infant mortality rate per 1000 births is decreased from 1957 to 1959. The number of deaths has reached its peak during the year 1958. However it can be seen that there is not much difference in the figures reported from years 1956 to 1959.

The following table gives taluka wise information for the year 1959.

Name of the Tal./Pata	Per thousand of population			Infant deaths	Infant mortality rate per 1000 births.
	Births	Deaths	Infant		
1 . Amalner	41.53	22.9	5.2	114.8	
2 . Bhadgaon	50.7	31	6.03	118.8	
3 . Bhusawal	43.52	19.08	4.12	93.00	
4 . Chalisgaon	51.4	25.1	6.1	118	
5 . Chopda	45.95	24.5	5.76	125	
6 . Edlabad	53.8	29.5	7.93	147	
7 . Erandol	47.9	22.7	5.54	115.7	
8 . Jalgaon	45.1	21.1	4.61	102.3	
9 . Jamner	46.5	24.4	5.92	123	
10. Pachora	46.3	23	5.7	124.8	
11. Parola	58.5	28.8	7	125	
12. Raver	37.8	20.4	4.4	116.6	
13. Yawal	46.4	20.6	4.3	92.5	

It will be observed that so far as the birth rates are concerned Parola Taluka registered the highest number of births namely 58.5 per thousand of population during 1959. The lowest registered was at Raver, where the birth rate was 37.8 . The birth rates in the other talukas/petas moved between these two figures.

The death rates varied between 19.08 per thousand at Bhusawal to 31 per thousand at Bhadgaon. The variation in the rate is appreciable. For all other talukas it is round about 20 or so.

The birth rates for the district as a whole in 1956 was 48.4 per thousand, while in the 1959 it is 46.8 per thousand. The death rate was 20.1 in 1956, while in 1958 it is 28.9 , the highest one, and in 1959 it is 23.1. Deaths of infants constituted an appreciable percentage of deaths registered during the four years. It is nealy 25% of the total deaths for the years in the district.

* * * *

It will be observed that the infant death rate is lowest at Bhusawal i.e. 4.12 per thousand while it is highest at Edlabad i.e.7.93 during 1959. The no. of infant deaths per thousand for other talukas is in between these two figures. The infant mortality rate per 1000 births is highest at Chopda and Parola i.e. 125.00

E D U C A T I O N :-

The Educational facilities available in the district during the years 1956-57, 1957-58 and 1958-59 are summarised in the following table:-

Institutions:	Year	No. of :Insti- :-tutions	No. of Pupils		T o t a l
			:Males	: Females :	

Arts & Science College	56-57	2	1441	99	1540
	57-58	2	1590	127	1717
	58-59	2	1819	145	1964
* Secondary Schools	56-57	52	14031	2224	16255
	57-58	58	17024	2695	19719

	58-59	1366	149218	74613	223831

[* Figures from about 10 High Schools not available

[** Excluding Municipal Schools]

There are two Arts and Science colleges in the district conducted by private institutions. One is Mooljee Jaitha Arts and Science College at Jalgaon and other is Pratap College at Amalner. Both these colleges are affiliated to the Poona University. The students from this district also derive benefits from the higher educational facilities available in the neighbouring Districts. As will be seen from the above table that the number of students taking college Education is increasing. But it can be noticed that the

• • • •

percentage of females taking college education is to much less as compared to those of boys. During the year 58-59, the ratio of females to males is 1: 12.5

The following table shows the percentages of passing during the years 1956-57, 57-58 and 58-59.

M. J. College, Jalgaon.

Examinations:	Y e a r s					
	1956-57		1957-58		1958-59	
	Boys	Girls	Boys	Girls	Boys	Girls
F.Y.Arts	88.5	94.1	83.7	100.0	21.2	45.0
Inter Arts	40.5	63.2	45.6	58.3	36.3	63.2
Sr. B. A.	66.0	25.0	60.0	69.2	43.6	66.6
F. Y. Sc.	85.3	100.0	79.3	100.0	25.6	40.0
Inter Sc.	49.1	66.7	40.7	33.3	50.1	66.7
Sr. B. Sc.	49.2	-	30.8	-	39.1	50.0

Pratap College, Amalner.

Examination :	Y e a r s					
	1956-57		1957-58		1958-59	
	Boys	Girls	Boys	Girls	Boys	Girls
F.Y.Arts	85.9	100.0	85.1	100.0	18.2	27.3
Inter Arts.	38.8	88.8	57.3	80.0	44.1	88.9
Sr. B. A.	64.3	100.0	85.7	100.0	73.7	83.3
F.Y. Sc.	87.0	100.0	91.7	75.0	31.2	0.0
Inter Sc.	52.1	50.0	45.0	62.5	60.9	50.0
Sr. B.Sc.	41.2	-	40.0	-	42.2	50.0

Note: F. Year= Pre degree

At the very first sight, it is seen that the percentage of passing has gone down considerably in the case of First Year of M. J. College during 1958-59. It is due to the fact that the old courses have been changed & the First Year examination is replaced by Pre-degree examination, which is conducted by the University & not by the College, So the percentage of passing in case of Boys has fallen down from

about 83 % to about 22 % roughly in both the colleges. Secondly there is a less tendency of female students, to choose Science side. No female student appeared for Sr. B.Sc. examination from both of these colleges during 1956-57 and 1957-58. Overall the percentage of passing female students is more than that of male students.

From the data, available, it can be seen that the number of secondary schools increased by 6 during 57-58 and by 4 during 1958-59 as compared to respective previous years. The Secondary school facilities are available in all the talukas, Jalgaon taluka having the maximum number of schools, as might be expected. The following table gives the general idea about the strength of the schools-- during 1958-59 (All the primary schools are not covered)

Name of the Taluka/Peta : No. of Schools : No. of Pupils : Increase in no. of pupils over 1957-58 : Av. Strength per school.

1. Anahar	6	1948	104	324.66
2. Bhadgaon	1	292	67	292
3. Bhusawal	9	3669	521	407.66
4. Chalisgaon	5	1989	300	397.8
5. Chopda	4	1352	190	338.0
6. Erandol	4	1080	202	270
7. Edlbad	1	140	3	140
8. Jalgaon	12	4821	397	401.75
9. Jammaer	3	577	118	192.33
10. Pachora	4	1280	193	320
11. Parola	3	556	54	278
12. Raver	5	2150	276	430
13. Yawal	6	2530	235	421.67

Raver Taluka has the highest number of students (430 pupils on an average) a school. Then followed Yawal with about 235 students on an average a school.

the secondary schools at all the talukas/petas of the district during 1958-59 over the previous year. There was increase in the number of schools at Raver, Janner, Pachora, Brandol, Bhusawal, Chalissaon, & Jalgaon, in 1958-59 over the previous year.

It should be noted here that the proportion of female students is too low as compared to male students in talukas Edlabad, Janner & Pachora. In other talukas the proportion is on the average 1:7 (Female : Male) except in Jalgaon and Bhusawal, where it is 1:4.

As already stated others are two colleges, one at Amalner & other at Jalgaon. But in Amalner, there are only 6 secondary schools while in Jalgaon there are 12 schools. This difference has its effect on the strength of the two colleges.

As regards primary education, there were 1272 schools during 1956-57 and 1272 during 57-58 i.e. an increase of only one school during the year. While during 1958-59 there were 1302 schools i.e. an increase of 29 schools compared to previous year. Their position will be clear from the following table:-----

Information about primary schools for the years 1956-57, 1957-58 and 1958-59 is as below:-----

Particular	56-57	57-58	58-59
1. No of Primary schools	1272	1273	1302
2. Total No. of teachers	4575	4653	4725
3. No. of students	180237	183478	199483
4. No. of av. attend.	134406	137326	145441
5. Av. No. of students per primary school.	149	143	153
6. Av. No. of Teachers per primary school	3.6	3.7	3.68
7. Av. No. of students per teachers	39	40	42
8. % of Untrained teachers	10 %	12 %	11 %
9. % of average attendance of students.	75 %	72 %	73 %
10. No. of villages without Primary schools	366	364	351
11. No. of villages without any school facilities (with Pop. below 500)	68	68	79

As the above figures indicate, there are about on an average 3 to 4 teachers per school & the number of students ~~per~~ per school is 150. The average number of students per teacher is 40 which seems to be quite appropriate. The percentage of untrained teachers is decreasing from year to year, from 16% to 11% which clearly indicates improvement in educational staff.

As far as the average attendance of the students in the schools is considered, it is nearly 74% in the District. This percentage, in fact, is not so admirable. Still there are 351 villages at the end of 1958-59, where there are no primary schools. But at the same time it should be noted here that all the villages with a population over 500 persons are either having primary schools or their need is fulfilled by neighbouring villages. The no. of villages (with population below 500) without any facilities of primary schools were 68 during the years 1956-57 & 1957-58. But this number has been increased to 79. As the figures from the Table indicates that during 1958-59, the educational needs of 11 villages was not fulfilled by neighbouring villages, as compared to the year 57-58.

The following table gives talukawise information of primary schools for the year 1958-59.

Name of Taluka/ Peta	Teachers		No. of primary schools	No. of villages without schools	No. of Vill- ages without school facilities.
	Trained	Untrained			
1. Amalner	303	15	110	51	5
2. Bhusawal	488	80	114	25	Nil
3. Edlabad	107	35	61	19	13
4. Chalisgaon	476	47	138	15	5
5. Chopda	324	25	92	30	11
6. Erandol	363	50	121	46	5
7. Jalgaon	314	32	84	18	3
8. Jamner	309	76	136	28	4
9. Pachora	279	57	109	28	6
10. Bhadgaon	181	12	57	9	2
11. Parola	195	27	89	30	5
12. Raver	382	39	104	31	11
13. Yawal	480	29	87	21	9

It can be seen from the above table that the percentage of untrained teachers is largest in the Edlabad taluka i.e. about 32.7% as compared to trained teachers. It is followed by the Jamner taluka where this percentage is 24.5. The number of primary schools is larger in Chalisgaon & Jamner talukas as they are having larger population compared with other talukas. Amalner taluka is having the largest number of villages without primary schools; it is 51. This is followed by Erandol taluka where there are no schools for 46 villages while there are some villages, the educational need of which is not fulfilled even by the neighbouring villages. In this category, Edlabad taluka is having the maximum number i.e. 13 & Chopda and Raver are having 11 each. Edlabad taluka seems to be lagging behind, as far as primary education is concerned. In the case of Bhusawal taluka which is

adjuscent to the Edlabad peta, there is no single village of which the educations needs are not fulfilled.

Overall in the district, there is a substantial increase in the number of pupils during the year 1958-59 as compared to 56-57. The number of schools is also increased considerably and proportionately.

Other Institutions :- There are 4 training colleges in the District. The total number of male students were 304 and female students were 124, during 1958-59. There are 9 Type-writing institutes in the district. Out of which in 7 institutes there were 396 students during 1958-59. There are 8 montesary schools in the district. 391 students were on the roll during 1958-59. In 1956-57 there were only 288. The increase in the number of students is appreciable. There is one Remand Home at Jalgaon, The average number of inmates was 54 during 56-57, 45 during 57-58 and 51 during 1958-59.

TRANSPORT AND COMMUNICATION:-

The pace of economic development depends considerably on adequate provision of transport facilities particularly by rail and road--for transport of essential requirements like coal, cement, iron, steel etc., for various projects in different sectors of the plan and of agriculture & industrial produce. The heavy pressure on rail traffic can be relived mainly by the development of road transport for which a system of well constructed and connected roads is essential. In the East Khandesh district roads form the most important means of communications among the different parts of the district. The total mileage of roads under the charge of the P.W.D. was 328.25 miles during 1956-57 and 1957-58. During 1958-59 there was an increase of 7.23 miles. Out of this mileage, National highway is 88.5 imles, State Highway 237.75 miles and Major District Road about 1.75 miles.

The State Transport Buses are plying in almost all the parts of the district and connect all the talukas and Petas headquarter with the district Head-quarter.

There are two railway lines in the district. One is central railway having total length about 300 kilometers and other is Western Railway having total length about 90 kilometers are under broad guage while 56 kilometers are under meter guage. The Central Railway runs from tlukas Chalisgaon, Pachora, Jalgaon, Bhusawal Raver, Edlabad Peta, and Jamner. Western Railway runs from tlukas Bhusawal, Jalgaon, Erandol and Amlner. On the average there is a railway station for every 10.5 kilometers.

C O - O P E R A T I O N :

The co-operative movement in the District covers most of the activities of the people like banking, finance housing, marketing, large and small scale industries. The total number of (Agricultural Credit, Agri. Non-Credit, Marketing etc., Non-Agri. Credit and Non-Agri. Credit) societies in East Khandesh district was 1051 in 1956-57; 1067 in 1957-58 and 1034 in 1958-59. The following table shows the types of co-operatives in the district for the years 1956-57 , 1957-58 and 1958-59.

T y p e	: <u>No. of Societies:</u>			: <u>No. of Members</u>		
	:56-57:	57-58:	58-59:	56-57 :	57-58 :	58-59
I Agricultural - Credit Societies	789	798	788	80498	88105	91730
II Agri.Non-Credit Soc. Marketing Crop-Protection etc.	139	148	152	39526	50278	64290
III Non-Agri.Credit Societies(Urban credit including banks)	52	51	49	21471	23440	29045
IV Non Agri. Non Credit Societies	71	70	45	5889	5637	2676
T o t a l	1051	1067	1034	128384	167460	187741

It can be seen from the above that the number of members in co-operative societies is increasing from the years 1956 to 1959. The number of societies however are decreased from 1052 to 903. There is a considerable decrease in the Non-Agril. Non-Credit Societies in its membership from the tablewise information given in the abstract. It can be seen that the number of members of Non-Agril. Non-Credit Societies has considerably increased in Talukase--Gopich, Mangalore, River and Yonal during 1958-59.

As might be expected in the East Khandesa District where nearly 70.4% of the total population (1951 census) are dependent on agriculture for their livelihood, agricultural credit societies occupy the leading position. Their position during the years 1956-59 is given below:

Information on Agricultural P. Societies

Particulars	1956-57	1957-58	1958-59
No. of societies	1052	903	888
No. of Members	20021	26105	29015
<u>Deposits:</u>			
Share capital (in Rs.)	574460	612710	7524915
Members Deposits	127500	51859	726526
Non-Members deposits	118100	11097	4047
<u>Loans</u>			
Other outside borrowings	14312	274360	51326
Reserve & Other Funds	10000	498954	121586
Working Capital	10000	2607807	1738314

The total number of Agricultural Credit Societies including the large sized multipurpose societies during 1956-57 was 849, the number of societies recorded an decrease by 46 during 1957-58 compared to previous year. also during the year 1958-59, the number decreased by 15 as compared to previous year. However the number of members is increasing. The number of members has been increased by 7464 during 1957-58 and by 5510 during 1958-59 as compared to their respective previous years. The average number of members during 1956-57 is 94 per society, during 1957-58 it is 109 per society and during 1958-59 it is 119 per society.

The total number of villages covered by agricultural primaries i.e. 1420 i.e. 99.9 % villages have been covered during 1957-58. If we assume that on an average that each member is representative of a family consisting of five persons then the percentage of population covered by agricultural credit societies was approp. 44.24 during 1958-59.

It can be easily seen from the above table that the number of Agricultural Credit Societies reduced from 56-57 year to 1958-59 year. It is because the societies were converted into large sized multipurpose societies or amalgamated into other credit societies. The total overdue worked at 32 % to the total loans outstanding at the close of the year 1958-59. This shows the financial weakness of the societies. The increase in the percentage of overdues, it is reported, due to the failuer of crop owing to unnatural rainy season, resulting in slow recovery of dues.

An idea about their operations during 1957-58 and 1958-59 can be had from the following table:-

Particulars	: 1957-58 (Rs.)	: 1958-59 (Rs.)
1. Total loans outstanding		
begining at the year	23725770	27109636
2. Fresh advances during		
the year	20958472	21761332
3. Amount due for repayment	23390714	27260499
4. Recoveries during the year	18509211	18377416
5. Advance recoveries	---	---
6. Authorised arrears	---	---
7. Total loans outstanding		
at the end of the year.	237257700	27109636
8. Unauthorised arrears at		
the end of the year	5321508	8383080
9. Overdues at the end of		
the year.	5321503	8880083

Loans outstanding is classified for 682 societies ~~in~~ during 1957-58 and for 781 societies during 1958-59. The percentage of ~~for~~ frozen doubtful debts and bad debts compared with the loans outstanding was as under:-

Year	: Frozen Debts	: Doubtful	: Bad debts	: Total
	:	:debts	:	
1957-58	6.42%	0.28%	0.030%	3.75%
1958-59	5.6 %	0.4 %	0.046%	6.046%

The primary credit societies are mainly dependent on borrowing from the central cooperative Bank ~~and~~ and have very small deposits of their own. The deposits contributed only 1.8% of the working capital.

Agricultural Non Credit :-

The progress and growth of cooperative movement amongst the rural people, depends upon the successful working of the agricultural Non-Credit societies; especially the Marketing Societies. Hence in the agricultural non-credit sector, Marketing cooperatives occupy an important place. Among the agricultural non-credit societies during 1958-59, there were 37 cooperative marketing societies, 68 Crop Protection Societies, 13 cooperative farming societies, 7 lift irrigation societies, and others are Taluka Development Boards/Associations Dairy Societies etc. In East Khandesh District, there is a fine net work of cooperative Marketing Societies. In each Taluka there is a marketing society which in addition to its normal work of Marketing of agricultural produce, is also undertaking business of supply of agricultural requisites like oil cakes, fertilizers, improved seeds & implements. There are some societies handling only one commodity, this is the peculiarity of this district.

Lift irrigation societies have brought 505 acres of land under irrigation; out of irrigatable land under command of 1578 acres. These societies could not bring the total area under irrigation due to various difficulties such as lack of technical help etc, and reluctance of the people to pay heavy water charges.

Non-Agricultural Credit Societies :-

In this category there are included the salary earners societies, urban credit societies, Housing societies etc. and others not included in the farmer two groups. It shows that the cooperative movement is not restricted to the rural area only but it is also spreading in urban areas also. Among urban credit societies, the salary Earners societies, Banks and Urban credit societies are organising in this district.

The following table indicates the progress of such societies-----

Particulars	Year		
	1956-57	1957-58	1958-59
1. No. of societies	52	51	53
2. No. of Members	21499	23440	23595
3. Share Capital	1598232	1724125	1811302
4. Reserve & Other Funds--	1522286	1532359	1661785
5. Deposits from Members	6927984	7841367	10008431
6. Deposits from Non-members	4250633	5019903	4103183
7. Working Capital	14644252	13783008	18427454
8. Loans advance	21236006	22201249	27478929
9. Loans outstanding	8236386	8301533	8790231
10. Overdues	809934	625875	724298.

Out of the 53 Urban credit societies during the year 1958-59, 8 are Urban banks, 4 are Urban credit societies, 32 salary Earners Societies, 6 Mill hand societies, 1 Urban credit and Thrift society and 1 Factory workers societies. It is revealed from the above table that there is an appreciable increase in the Membership, working capital, share capital and at the same time an appreciable decrease in the overdues, from years 56-57 to 58-59, which indicates the successful working of such societies,

Co-operative Financing Agency:-

There is one District central cooperative Bank (East Khandesh) and Two Land Mortgage Banks in the district East Khandesh Central Cooperative Bank was established in the year 1916 at Jalgaon. This is one of the important cooperative banks in the Maharashtra state, having 40 branches spread over all the district. The bulk of agricultural finance continued to be provided by this

bank. at the end of the year 1958-59, there were 1148 societies and 3095 members of this bank. There are two Land Mortgage banks in the district, one at Jalgaon and other at Pachora. The latter one was established in 1928. These two banks are catering to the needs of long term finance to the agriculturists. The working of these banks is hampered owing to the New Tenancy Act, and delay in valuation of lands.

The following table gives the clear picture of their position:-

East Khandesh District Central co-operative Bank
Jalgaon

Particulars.	Year		
	1956-57	1957-58	1958-59
No. of Branched including Head Office	30	33	40

Net Profit	21710	10927	1320

The Land Mortgage Banks are implementing 'Well Scheme' also. During the year 1958-59, the Banks advanced Rs. 1,72,800/- for sinking of new wells and construction of old wells. These banks play a vital role in the implementation of land reform policy of the state.

M I S C E L L A N E O U S

THE GIRNA PROJECT:-

I . Apart from the various minor irrigation schemes, a major irrigation project i.e. the Girna Project, mostly benefiting to the areas in the East Khandesh district, has been included in the Second Five Year Plan. The Girna Project as originally planned envisaged construction of a dam at Panzan, near the border of Nasik & East Khandesh district, to impound a storage of 11,000 million cubic feet & bringing under irrigation an area of about 82900 acres including perennial crops. On completion, the project was also expected to give irrigation benefits to a small part of the Malegaon Taluka in the Nasik district, Chalisgaon, Parola, Bhadgaon & Erandol talukas from East Khandesh District for which the normal rainfall is 21.58, 28.04, 26.34, 28.79 & 27.04 inches respectively. The areas in the East Khandesh district are classified as "less liable to famine" under the distribution of areas of the state into "very liable to famine, less liable to famine & practically safe from famine."

II.- After a detailed study of the project it was found that the area commanded by the direct left bank canal from the dam contained large patches of shallow soils & unsuitable for irrigation & the construction of the canal would have been very expensive on account of the difficult terrain through which it had to pass. It was seen that a substantially greater utilisation of the Girna Waters could be secured by diverting it to other better areas while the capacity of the Panzan Reservoir could be increased to 24000 million cubic feet, without materially affecting the cost by suitably modifying the design. The project was therefore finalised as below:-

(a) The main dam on the River Girna for 24000 million cubic feet storage.

(b) The subsidiary storage on Manyad River for 1500 million cubic feet.

(c) Raising the existing Jamda weir, & remodelling & extension of the Jamda Left Bank canal.

(d) Construction of a weir at Dahigaon & Dahigaon Left Bank Canal.

The project as above has been administratively approved for Rs. 3.68 crores in June 1958.

III- Change in weir from Sontek to Dahigaon:-

As per Administratively approved project the site for weir for Lower Girna Canal was previously at Sontek, for canal for 40 miles length taking off from the weir. On detailed examination, however, it was found that Sontek was not a suitable site for weir & hence it was decided to explore sites lower down after examination, an alternative site just upstream of the village Dahigaon was selected. At this site there is exposed rock in river bed & the course of the river is favourable for non silting condition for the canal.

IV - Present Position:- (i.e. in June 1960)

The work of the dam at Panxan is given on contract & is in progress. The earth work on remodelling the extension of Jamda Left Bank Canal is in full swing. Earth work in the first 18 miles of the Lower Girna Canal Ex-Dahigaon weir has just recently started. The construction of Dahigaon weir is in progress.

V- In a nutshell the construction in irrigation programme of Lower Girna Canal is as follows:-

Upto 1961-62 work of 18 miles will be completed when about 4150 acres are likely to be irrigated. Upto 1963-64 work of 34 miles will be nearly completed and area likely to be irrigated is 36000 acres. Full irrigation on Jamda extension (32000 acres) will take place in 1965-66 and that of Lower Girna Canal (88624 acres) in 1966-67.

S E C O N D F I V E Y E A R P L A N

In East Khandesh District-----*

There are about 115 schemes which are implemented in the East Khandesh District during the Second Five Year Plan period. Almost all the schemes started functioning during the first year of the plan. Sector wise, there are 57 schemes relating to Agriculture & Community Development, 1 relating to Irrigation works, 13 to industry & mining, 2 to Transport & communication, 37 to Social Services & 5 to scientific & Industrial research etc.

For the purpose of analysis the above schemes can also be classified roughly as Research schemes 6, staff schemes 13, Training schemes, 8, Financial or grant-in-aid schemes 18, Expenditure schemes 9, Expenditure & Physical achievement schemes 61.

From the list of the schemes in this district, it appears at the first look that greater emphasis is laid on improvement on rural life, especially on agricultural sector. All the talukas in the district are covered by the Community Development Blocks. Out of which 5 are Pre-extension 6 in stage I & 2 in stage II as on 31st Dec. 1960.

Many important schemes have been undertaken in this district such as the major irrigation project namely Girna Project, the account for which is given in detail previously. A cottage Hospital is established at Chopda & a Govt. Polytechnic has been started at Jalgaon. In short, there is all sided development in this district during the second plan.

C O M M U N I T Y D E V E L O P M E N T
P R O G R A M M E ----

A nation-wide programme of intensive development known as Community Development Programme was started in the state in October 52. The main object of these programmes is to bring about a social change in the rural areas by arousing enthusiasm of the rural people for a new way of life. In this District, the programme was started during the period of the First Five Year Plan & the latest position (As on 1st April 1960) is as follows:-

Name of Block:	Stage	Date of inauguration	No. of Blocks per C.P.A. pattern
1. Amalner	Stage I	2-10-1959	1
2. Bhadgaon	Stage I	1-4-1956	1
3. Bhusawal	Community D.	2-10-1954	1½
4. Chalisgaon	Stage I	1-5-1956	1½
5. Chopda	Stage I	1-4-1957	1½
6. Edlabad	Stage II	26-1-1954	1
7. Erandol	Pre-Extension	2-10-1959	2
8. Jalgaon	Pre-Extension	2-10-1959	1½
9. Jamner	Stage I	2-10-1957	1½
10. Pachora	Stage I	1-4-1959	1½
11. Parola	Pre-Extension	1-4-1959	1
12. Ravar	Pre-Extension	1-4-1960	2
13- Yawal	Pre-Extension	1-4-1959	1½

7 This programme includes measures for a rapid increase in food & agricultural production promotion of education & health & introduction to new skills & crafts which form an integral part of rural life. For the proper implementation of these programmes, Block Development Officer is appointed in each Block & other extension officers of different technical departments to help him. The block area is divided

into different circles (group of villages) & a new cadre of Gram Sevak (Village level worker) has been specially created for each circle.

A brief account of the development work done upto 31st March 1960 in some of the Block areas is given in the following statement.

Item	Blocks---*	Chalisingaon	Bhusawal	Chopda	Bhadgaon	Jamner
1. Compost pits dug (Nos.)	2850	1792	1923	1080	2382	
2. Fertilisers distributed (B.Mds.)	152676-22	68040	61994-07	37391	71117	
3. Improved seed distributed (B.Mds.)	10654-05	1741-20	9784-31	5654	38580	
4. Bulls castrated (Nos.)	6481	5147	879	1528	905
