CHAPTER No. I

INTRODUCTION

1. INTRODUCTION AND LOCATION :

The age long famous temple at Tuljapur town of this district enshrines the Goddess "Bhavani" the popular deity of Maharashtra. The cult of Goddess is very ancient one and finds mention even in " Vedas " where she is called "Aditi". The earliest inscriptional evidence regarding its antiquity can not go beyond 1398 A.D. The Goddess was the principal deity of 'Chhatrapati Shivaji', the other 'Chhatrapatis', and ' Peshwas ' who donated quite generously to the temple. The village "Thair" in the district is also an ancient place and was known as 'Tagara', It also finds a mention by ptolemy in his work "Periplus of ... Euphratesian sea " (1st century A.D). Here an ancient Buddhist 'daitya' has been converted in later period in to a Brahmanical shrine by installing the image of "God Vishnu" and is at present known as "Trivikrama" temple. Thair' is also the native place of poor saint "Gora Kumbhar". The "Rashtrakutas" who succeeded 'Chalukyas' of Badami in 753 A.D. had their epithet "LATTALURAPUR-AVARDHISA" which implies that they were the inhabitants of Latur.

2. BOUNDARIES :

To the extreme south of Marathwada Osmanabad district lies between 17° 35' and 18° 40' north latitude and 75° 16' and 76° 40' east longitude. Osmanabad district is bounded by part of Sholapur district on the south, Bhir district on its north, Nanded district and Bidar district of Mysore State on its east and Ahmednagar and part of Sholapur districts on its west. Sholapur city is the nearest town and it has therefore close

=====
Contdd...

(2)

commercial and social ties with it. Barsi taluka in Sholapur district is almost surrounded by Osmanabad district. Nanded and Bhir towns are about 136 miles (217.61 Km) and 80 miles (128 Km) respectively away from Osmanabad town and are directly connected by the State transport bus service.

The Sholapur -Aurangabad road passes through the district. The Latur-Miraj railway line and the Parli-Hyderabad railway line (now included in the South Central Railway Zone) also pass through this district. Latur is the biggest railway station in this district.

3. ADMINISTRATIVE SET UP.

Osmanabad town is the headquarters of Osmanabad district which was named after Meer Osman Ali Khan, the Nizam of Ex-Hyderabad State on the occasion of his coronation in 1910. The original name of Osmanabad town was 'Dharashiv'. Naldurg was the headquarters of this district before 1861. This district was included in the Ex-Hyderabad State in 1853 and formed its part and parcel upto 1956. After States reorganization in 1956 this district was merged in bilingual Bombay State on 1st November 1956 and was subsequently included in the Maharashtra State on 1st May 1960. This district formerly consisted of 1) Osmanabad 2) Tuljapur, 3) Parenda, 4) Bhum, 5) Kalam, 6) Latur, 7) Ausa and 8) Umerga talukas in the erstwhile Hyderabad State to which Nilanga, Udgir and Ahmedpur talukas of former Bidar district were added after reorganization. Now consisting of 11 talukas the district is presently in Aurangabad division generally called as Marathwada comprising five district viz; 1) Aurangabad, 2) Parbhani, 3) Nanded, 4) Bhir and 5) Osmanabad. Almost all district offices

=====
Contd..

(3)

are located in Osmanabad town which is situated on the banks of the river 'Bhogawati'. Yedsi is the nearest railway station about 13 miles away from Osmanabad town. Amongst the districts of Marathwada, Osmanabad has the biggest area under the Nizam's own crown Estate called 'Sarf-e-Khas'. The 'Sarf-e-Khas' was merged with the Government area under the Sarf-e-khas merge Regulation Act in 1949. All Jagir areas were also abolished and taken over under direct government administration in the same year. In the 1951 census, there were 19 towns. As the definition of the town was changed in the 1961 census, only 13 of them were classified as towns. Amongst them included all taluka headquarters and Murum in Umerga taluka and Naldurg in Tuljapur taluka. Latur, Osmanabad and Udgir towns have city municipalities and the rest have town municipalities.

There are in all 1,423 revenue villages in this district of which 12 villages are merged in urban areas and 24 villages are uninhabited.

The Collector is incharge of general administration, law and order, land revenue and civil supplies. He is assisted by Resident Deputy Collector in his office and three Deputy Collectors who hold the charge of the three revenue sub-divisions and have their headquarters at Osmanabad, Latur and Udgir respectively. Tahsildars are incharge of talukas.

4. ZILLA PARISHAD PATTERN :

The Zilla Parishad, Osmanabad came into existence on 1st May 1962. The parishad consists of 58 members out of which 52 are elected, three are associated, two are co-opted lady members and one is ex-officio member.

=====
Contd..

(4)

The three associated members of the parishad are 1) Chairman, Consumers Co-operative society, Ltd. Latur, 2) Chairman, District Co-operative Board, Osmanabad and 3) Chairman, District Central Co-operative Bank, Latur. The President, vice president and three Chairmen incharge of different committees are amongst the elected members. The president is incharge of the Zilla parishad meetings and standing committee. The vice president is the Chairman of Education and Finance Committees. There are other three Chairmen one of them incharge of public health and works, the other co-operation and industries, Agriculture and Animal Husbandry Committees and the third one is incharge of Social Welfare committee.

For administrative purposes the Chief Executive Officer is the Head of the Zilla Parishad. The zilla parishad consists of 11 branches. The Deputy Chief Executive Officer assists the Chief Executive Officer in the over all administration.

5. AREA :

The area of Osmanabad district is 14,117.0 Sq. km. according to the figures furnished by the Surveyor General of India as per 1971 census which is 21.88 % of the area of Marathwada and 4.59 % of the area of Maharashtra State. The rural area of this district is 13,725.8 Sq. Km. and the urban area is about 391.2 Sq. km. The area reported by the Director of Land Records, Maharashtra State for Osmanabad district is 14,256 Sq. km. In Marathwada region, this district is next to Aurangabad district in size.

In terms of area, Osmanabad district ranks seventh among the 26 districts of Maharashtra State. The average area of a district in Marathwada region works out to 12,905.00 Sq. Km. and the average per district in Maharashtra state is 11,837.00 Sq. km.

6. TOPOGRAPHY :

A major portion of this district is laterite plateau with an average height of 2,000 feet above the sea level. This district is covered with small hills and offshoots of the Balaghat. Parts of Bhum, Ausa, Kalam, Osmanabad and Tuljapur talukas are situated on Balaghat ranges and the rest on table lands.

The district lies partly in the upper Godawari basin and partly in the Bhima basin. Ahmedpur, Udgir, Kalam, Ausa, Latur and Nilanga talukas are situated on the plateau of the Balaghat and lie in the valley of the river Manjra which an important tributary of the Godawari. Osmanabad and Umerga talukas are drained by the Terna, an important feeder of the Manjra. Paranda and parts of Bhum, Tuljapur and Umerga talukas are in the basin of the Sina river which is a tributary of the Bhima.

Of all the towns in the district, Bhum commands the highest elevation of 2,500 feet from the sea level where as Paranda has the lowest height of 1,735 feet from the sea level. The average height of the plateau is 2,000 feet above the sea level. The low land portion to the south of the plateau lies in the Bhima basin.

7. HILLS RIVER SYSTEM AND SOILS :

The main system of hills is the Balaghat and its offshoots from the north-west corner from Ahmednagar and stretches to the south-east. It divides the district in to two portions, plateau to the north-east and low lands to the west, south-west and south. The general slope of the plateau is from south-west to north east.

=====
Contd..

There are two broad natural zones in the district viz;

- 1) The Balaghat plateau drained by the Manjra and the Terna rivers and their tributaries and 2) the southern lowland plain which is in the Bhima basin. The river Manjra flows on the northern border and demarcates this district from Bhir district. In addition to hill ranges the district abounds in net work of rivulets running from all sides. The Manjra which rises in Patoda taluka of Bhir district runs towards the east along the northern boundary as far as the north eastern corner of Latur taluka where it takes a southerly direction before entering Bidar district of Mysore State. Its length in the district is about 65 miles.

The Terna flows from west to east in Osmanabad, Ausa, Umerga and Nilanga talukas and meets the Manjra river near the eastern boundary of the district. The manyad is also a tributary of the Manjra. It flows towards the north-east through Ahmedpur taluka and enters Nanded district to meet the Manjra on the eastern boundary of the district. The Tawarja which drains Latur taluka joins the Manjra at Siwani village. On the western border of Parenda taluka the Sina flows from the north to the south. The Bori flows through Tuljapur taluka and joins the Sina river lower down in Sholapur district. Even though there are a number of small rivers and revultes streaming in the district like the Bori in Tuljapur taluka or the Manyad in Ahmedpur taluka or the Bennitura in Umerga taluka or the Banganga in Bhum taluka they remain practically dry for most part of the year as the water from them is drained out of this district from the high plateau resulting in to considerable shortage of water in the district.

The soil can be divided into three zones viz; 1) The eastern part consisting of Ahmednagar, Udgir and parts of Latur and Ausa talukas 2) Osmanabad, Kalam talukas and parts of Latur, Ausa and Umerga talukas 3) Tuljapur, Parenda and Bhim talukas.

The first zone consists in general of light and light-medium soils. They are of laterite type, not retentive of moisture and is therefore, suitable only for the cultivation of Kharif crops. The soils in some parts of Nilanga are of laterite type.

The second zone consists of heavy soil which is more retentive of moisture. Hence rabi crops are the major crops of this area.

The mountainous ranges in this zone have formed typical strips suitable for paddy cultivation. This is a peculiarity of this zone. Eventhough the types of soil are classified above on a broad basis, varieties in soils, however, are found within the talukas and more within the zones categorised above.

The forests dotted all over the district are some what dense in Tuljapur, Kalam and Udgir talukas. They occupy too little a portion of the total area in this district which has definitely resulted in soil erosion to a large extent.

8. CLIMATE, TEMPERATURE AND RAINFALL.

As the district forms part of the Deccan plateau, its climate is dry and is subject to extremes. The year can be divided into rainy season from middle of June to the end of September, a sultry period from about the end of September to the middle of November, winter from the middle of November to the end of January, dry period during February and March and summer during April, May and the middle of June. Summer is

in general full of gales and gusty winds. Even though the variations in temperature are large in general and the weather is subject to extremes of heat and cold, the summer season in the district is more cooler than in any other districts of Marathwada region being at a higher altitude, In general the climate of Osmanabad district is considered to be bracing and salubrious.

Osmanabad district gets rains from the south-east monsoon like other districts of Deccan plateau and the rains start in the middle of June, become intense in July and cease by the end of September. The normal rainfall of Osmanabad district is about 31" (787 mm). Tuljapur and Osmanabad talukas on the west usually get about 1,123 mm or 45" of rainfall. Ausa, Umerga and Nilanga talukas usually get 1,016 mm. to 1,346 mm or 40" to 53" of rainfall. While Parenda and Bhum talukas get near about 762mm to 888 mm. or 30" to 35" of rainfall. This part comes in the shadow of western Ghat and is therefore, called "Rain shadow area". Because of the low rainfall in Parenda and Bhum talukas, there is always a fear of scarcity and shortage of water.

It may be noted that this area being adjacent to Ahmedpur district, is frequently hit by scarcity. These talukas as compared to the other talukas in Osmanabad district are backward. The northern part of Ahmedpur taluka is also some times affected by scarcity of water. But in general Osmanabad district is not considered as scarcity area.

Recently Government of Maharashtra had appointed a Committee under the chairmanship of Shri Sukthankar the Secretary to Government of Maharashtra, Agricultural and Co-operation Department to look into the problem of scarcity and identify areas which are more prone to scarcity.

Accordingly after deep study of the problem the committee has identified the following areas as drought prone 1) Parenda, 2) Bhum, 3) Part of Kalam, Osmanabad, Tuljapur and Ahmedpur taluk

(9)
-: C H A P T E R: NO. II :-

EXPLANATORY NOTES ON SCOPE AND LIMITATION ON STATISTICS

PRESENTED IN THE DISTRICT STATISTICAL ABSTRACT

PURPOSE :

This is the 13th issue of the District Statistical Abstract since its first publication in the year 1958-59. In this publication every attempt is made to include exhaustive statistics about important socio-economic indicators of the economy. The talukawise data is furnished wherever possible so as to enable the reader to have a clear picture of the achievements in various fields in different talukas of the district. The data presented in most of the tables pertains to the year of 1974-75. In case of few tables where the data for the year of publication is not available the data for the latest available year is furnished.

The Statistical material presented here is mainly collected from various departments of the State Government as well as Central Government Offices, local bodies and other agencies. The footnotes given at the end of each table indicate the source from which the data is collected.

DISTRICT AT A GLANCE :

In this statement some broad and important particulars about the district in comparison with Maharashtra State level figures are presented under various heads like population, agriculture, co-operation, medical and public health, education etc. which bring forth salient features of the district. The reference periods for the figures concerning this district and Maharashtra state are mentioned against each item, as in

Contd..

many cases this period is not identical. The scope and limitations of the information in this Abstract is also discussed in the following paragraphs.

I. AREA AND POPULATION :

In this section seven tables (table Nos. from 1 to 7) are included. The table No.1 gives figures of area, rural and urban population, number of houses and households, density of population of different talukas of the district as per 1971 Census. The table No.2 gives talukawise figures of decadal variations in population since the 1951 Census. The talukawise classifications of villages and towns according to population ranges as per the 1971 Census in Osmanabad district is indicated in table Nos.3 and 4. The table No.5 presents the talukawise figures of number of workers according to livelihood classes. The table No.6(a), and 6(c) give population of the district as per the 1971 Census, and according to age group, and religion. The table No.7 indicates talukawise scheduled castes, Scheduled tribes and neo-Buddhists population of the district according to the 1971 Census.

II. CLIMATE AND RAINFALL :

The table No.8 gives monthwise information regarding rainy days and actual rainfall recorded at various tahsil headquarter in this district. Normal rainfall recorded at each tahsil place is the average rainfall relating to that place over a long period. The table No.9 gives the temperature data for the selected centres. However there are no centres selected for this purpose in the district and hence data for this table are not available.

III. AGRICULTURE :

The tables from No. 10 to 21 are on agriculture and give information about land utilisation, area under different crops,

area irrigated under different crops and by different sources, production and yield rates of principal crops, minor irrigation works, major and medium irrigation projects, agricultural wage rates etc. The data regarding famine, scarcity and agricultural implements is also given.

The table No. 10 gives utilization of land according to standard heads of utilisation for the year 1972-73 and 1973-74. The table No. 11 indicates area under different crops while the table No. 12 gives the figures of out-turn and average yield rates of principal crops per hectare for the district. The table No. 13 represents the distribution of net irrigated area by source of irrigation. The table No. 14 indicates the area irrigated under different crops. The table No. 15 gives the number of irrigation wells in use and not in use in each taluka. The table No. 16 deals with minor irrigation works while the table No. 17 gives the data of major and medium irrigation projects. The table No. 18 gives the information regarding agricultural wage rates for skilled and unskilled labourers collected from three different rural centres. The table No. 19 provides the data regarding agricultural implements in each taluka as per the 1972 livestock census. The famine and scarcity data are shown in the tables numbering 20 and 21.

IV. ANIMAL HUSBANDRY ;

The table No. 22 presents talukewise data relating to livestock population as enumerated at the time of quinquennial livestock census of 1972, while the table No. 23 deals with the veterinary facilities available in each taluka of the district such as number of veterinary hospitals, dispensaries, aid centres etc. The table No. 24 shows the disease-wise livestock mortality in Osmanabad district. The table No. 25 gives details of the information of the recognised slaughter houses and

number of animals slaughtered in them during the period under reference.

V) FOREST & FISHERIES :

The tables numbering 26(A) and 26(B) included in this section gives details of area under forests and estimates of different forest produce. And table No. 26(c) gives the information regarding quantities of fish for the year 1973-74 and 1974-75.

VI) INDUSTRIES AND EMPLOYMENT :

The factory statistics is presented in the table Nos 27, 28 and 29 which cover the following types of factories registered under factories Act, 1948.

1) Those factories using power and employing 10 or more workers

2) Those factories not using power but employing 20 or more workers.

3) Those factories not covered by (1) and (2) above but notified by Government as covered by the factories act, 1948.

The table No. 27 presents industrywise total number of factories, the number of mandays for which they were working during the years and the average daily employment classified by adults, adolescents and children. The data presented in columns 6 to 7 of this table relate only to the factories submitting return. The table No. 28 presents industrywise distribution of working factories according to working strength while the table No. 29 gives distribution of factories according to number of days worked. It may be noted here that the number of workers shown in these tables are the average number of workers working daily throughout the years and not the total number of workers on the register of factories. The table No. 30 deals with the Annual Survey of Industries. The table No. 31 gives the registration of the candidates

vacancies notified and number of candidates placed in employment etc. In the table No. 32 occupational distribution of total registration and placement of employment exchange is detailed out. The table No. 33 indicates the volume of employment in different industries.

VII. ELECTRICITY :

The tables numbering 34 and 35 presents the data regarding electricity. The generation and consumption of electricity as well as the number of towns and villages covered under the electrification programme are indicated in the above two tables.

VIII. CO-OPERATION :

In all there are eight tables included in this section under which statistics relating to various activities of Co-operative movement in the district is shown. The table No. 36 presents different types of co-operative societies functioning in Osmanabad district. The table No. 37 gives the figures in respect of branches of co-operative banks, while the table No. 38 deals with the talukawise primary agricultural credit societies. The table No. 39 gives the data regarding other co-operative societies of different types. The table No. 40 indicates the operation of Central and Primary Co-operative marketing societies in each taluka. The table No. 41 deals with the operation of different co-operative societies. The table No. 42 indicates the operation of regulated markets. The table No. 43 shows the numbers of registered money lenders in different talukas of this district and loans advanced by them to traders and non-traders.

IX. MEDICAL AND PUBLIC HEALTH :

In this section five tables are included. The table No. 44 deals with the medical facilities available through public aided bodies in each taluka. The tables numbering 45 and 46 present the

information about vital statistics . The table No. 47 deals with the vaccination statistics and Cholera inoculation, while the table No. 48 presents the number of family planning centres functioning in each taluka and the number of sterilisation operations done number of I.U.C.D. insertions performed.

X. EDUCATION :

In this section seven tables are included. The table No. 49 indicates literacy in each taluka of Osmanabad district according to the 1971 census. The percentage of literacy has been shown separately sexwise as well as for rural and urban areas. The tables numbering 50 and 51 deal with education in rural and urban areas in the district as per the 1961 census. The number of institutions according to types, enrolment and the teachers employed in them is presented in the table No. 52. The table No. 53 deals with the beneficiaries of backward class students of different categories in Osmanabad district. The table No.54 indicates the number of students getting benefits of concession under the scheme of concession of free education to economically backward class students. The table No.55 indicates the expenditure incurred on primary education by way of grants.

XI. TRANSPORT AND COMMUNICATION :

In this section the statistics relating to various modes of transport is given. The table No. 56 presents the total length of railway route in the district according to different types

Contd..

of rail gauges. The surfacewise and categorywise road length is given in table No. 57. This table also includes roads constructed by different agencies such as Municipal councils, Zilla Parishad and the Building and Communications Department. The table No. 58 gives statistics regarding the number of motor vehicles in operation.

The table No.59 gives operational statistics of the nationalised road transport according to S.T. Division viz; Aurangabad and Nanded. The table No.60 gives the traffic census on important roads in Osmanabad district as on May 1973. The table No.61 presents the postal, telegraphs and telephone statistics since 1961-62, 1965-66, 1970-71 to 1974-75, the table No. 62 give the statistics regarding rural broadcasting in Osmanabad district.

XII. LOCAL BODIES :

The statistics about local bodies such as village Panchayats, Municipalities and Zilla parishad is presented in this section . The table No.63 deals with income and expenditure of local bodies viz; Village Panchayats, zilla parishad and municipalities while the table No.64 shows panchayat samitiwise income and expenditure.

Similarly the headwise receipts and expenditure of zilla parishad is indicated in the tables numbering 65(A) and 65(C) while in table No.65(B) extent of government grants given to zilla parishad is shown. The table No.66 deals with income and expenditure of municipal councils in the district.

XIII. PLAN AND COMMUNITY DEVELOPMENT :

In this section five tables are included. The tables numbering 67 and 68 give plan expenditure under different heads of development and important physical achievements during fourth five year plan and 1974-75. The table No.69 gives particulars

of community development programme implemented in the district. In the table No.70 expenditure incurred in different development blocks is shown, where as physical achievements of some selected items that have been achieved in each and every development block are detailed out in the table No.71.

XIV. PRICES :

The table No.72 deals with monthly wholesale prices of certain agricultural commodities at regulated markets. The table No.73 deals with monthly average retail prices of important commodities collected from the district headquarters for the year 1974-75. In the table No.74 price index for the working classes is shown for Aurangabad and Nanded centres. The consumer price index number for the working classes is based on the price level of 1961.

XV. JUDICIAL AND ADMINISTRATIVE :

The statistics pertaining to police department and judicial courts is presented in this section. The table No.75 gives statistical data about strength of police force, while the table No.76 gives crime statistics of this district for the calendar year under review. The table No.77 deals with the work disposed of in civil and criminal courts.

XVI. MISCELLANEOUS:

This section includes : nine tables. In these tables statistical information on various items like cinema, banking offices, jointstock companies, insurance, small savings, land revenue, printing presses and general election etc. is presented.

(17)

The table No. 78 deals with the cinema statistics, while the tables numbering 79 and 80 give the data regarding banking offices and jointstock companies respectively. The table No.81 gives the number of insurance policies issued and amount insured, while the table No.82 deals with the collection of small savings. The table No.83 presents the land revenue collection. The data regarding number of printing presses, news papers and periodicals published is given in table No.84 . The table No.85 is a summary of all the information contained in the District Statistical Abstract 1974-75.

C H A P T E R No. IIIANALYTICAL REVIEW OF IMPORTANT INDICATORS

Indicator No.1 :- Percentage of gross cropped area to net area sown.

This indicator spots light on the extent of double cropping in the district. In the table placed below the net cropped area, double cropped area and the percentage of the latter to the former are given .

TABLE NO. 1

Table showing gross cropped area net cropped area and percentage of gross cropped area to net area sown in 1961-62, 1965-66 and 1973-74 (in 000 hectares)

Sr. No.	Item	During the year		
		1961-62	1965-66	1973-74
1	2	3	4	5
1)	Gross cropped area	1,081	1,134	1,186
2)	Net cropped area	1,039	1,090	1,089
3)	Percentage of gross cropped area to net area sown.	104.94	104.04	108.91

It is seen from the figures given for different years that the percentage of double cropped area to the net area sown has shown a slight change over a period of thirteen years. In the year 1961-62 the percentage was 104.04 while in 1973-74 it was 108.91. Inadequate irrigational facilities had been the root cause of such a low proportion of double cropping . The extent of double cropping in Ausa taluka was the highest where as Osmanabad , Kalam, Tuljapur and Ahmedpur talukas accounted for very meagre area under double cropping.

INDICATOR No.2 :- Productivity of Important crops.

The production of important crops for the years 1961-62, 1965-66 and 1973-74 are given in the following table along with yield rates per hectare of each crop.

TABLE NO. 2

Table showing the production of principal crops and their yield rates for the years 1961-62, 1965-66 and 1973-74

Sr. No.	Name of crop	1961-62		1965-66		1973-74	
		Yield per hectare in Kg.	Out-turn in 00 metric tonnes.	Yield per hect. in 00 metric kg.	Out-turn in 00 metric tonnes.	Yield per hect. in 00 metric	Out-turn in 00 metric tonnes
1	2	3	4	5	6	7	8
1.	Rice	586	170	332	126	568	123
2.	Wheat	455	259	255	157	322	204
3.	Jowar	713	3,092	450	1,973	380	1,666
4.	Bajra	258	48	210	37	269	115
5.	Gram	401	198	275	145	330	187
6.	Tur	392	270	327	232	350	317
7.	Groundnut	765	960	440	653	556	484
8.	Sesamum	298	16	263	17	197	15
9.	Sugarcane in terms of gur	3,489	181	8,209	553	5,688	438
10.	Tobacco	654	2	359	1	500	1

With the exception of sugarcane the production of almost all crops given in the table showed a remarkable decrease over a period of a decade starting from 1961-62. The decrease in the production of different crops could be attributed to scanty and untimely rains for the last 5 to 6 years. Consequent upon which there had been acute scarcity conditions all over the district during 1969-70 to 1972-73.

Contd...

INDICATOR NO. 3 : Gross value of Agricultural Production.

The following table gives gross value of some important crops.

TABLE NO. 3

Table showing the gross value of agricultural production.

Sr. No.	Name of the important crops.	Gross value (Rs. in lakhs)		
		1961-62	1965-66	1973-74
1	2	3	4	5
1.	Wheat	109	173	408
2.	Rice	112	158	246
3.	Jowar	1,011	1,204	2,832
4.	Bajra	15	37	149
5.	Tur	78	223	634
6.	Groundnut	539	849	1,307
7.	Gur	86	337	766
8.	Sesamum	18	29	55

From the above table it is seen that the value of agricultural produce increased during the year 1973-74 as compared to the figures of 1961-62. This had been so despite fall in the production of all the crops except gur, tur and Bajra. This anomalous situation of increased value with decreased production was the direct result of continuous rise in the prices of all agricultural commodities shot up spirally during the period under reference because of prevalent scarcity conditions.

Contd...

Indicator No. 4 :- Percentage of gross irrigated area to net irrigated area.

The percentage of gross irrigated area to net irrigated area gives an idea as to how much area has been irrigated more than once during the year under reference .

In the table given below statistics of net irrigated area and gross irrigated area are displayed alongwith the percentage of latter to the farmet.

TABLE NO. 4

Table showing net area irrigated, gross area irrigated and percentage of gross irrigated area to net irrigated area.

Sr. No.	Item	Area in 00 hectares during		
		1961-62	1965-66	1973-74
1.	Net irrigated area	45	54	87
2.	Gross irrigated area	51	61	99
3.	Percentage of gross irrigated area to net irrigated area.	113.33	112.96	113.79

The extent of irrigating the area more than once increased slightly during the year 1973-74 as compared to the year 1961-62 and 1965-66. The percentage of gross irrigated area to net irrigated area was 113.33 in 1961-62, 112.96 in 1965-66 while it increased slightly to 113.79 in 1973-74.

INDICATOR NO. 5 :- Changes in the cropping pattern

With the exception of few changes in the percentage, the food crops still enjoy dominant position. The percentage of food crops to gross cropped area which was 73.05 in 1961-62, decreased to 71.93 in 1965-66 and which again however showed increasing trend in 1973-74. The acute countrywide food shortages prevailing then due to scarcity conditions compelled the cultivators

to utilize the area normally meant for commercial crops for growing food crops. Hence the increase in the percentage of food crops to 78.38 in 1973-74. This can be ascertained from the simultaneous decrease in the percentage of non-food crops from 23.07 in 1965-66 to 21.62 in 1973-74. The table given below shows area under food and non-food crops, their respective percentages to gross cropped area and percentages of area irrigated under food and non-food crops to the gross irrigated area. The percentage of total-irrigated area showed decrease from 96.73 % in 1961-62 to 92.64 in 1973-74.

TABLE No.5

Table showing crop pattern in Osmanabad district during 1961-62, 1965-66 and 1973-74.

Sr. No.	I t e m	Area in hectares		
		1961-62	1965-66	1973-74
1	2	3	4	5
				9,29,240
1.	Total food crops	7,89,496	8,15,608	
2.	Total non-food crops	2,91,312	3,19,914	2,56,324
3.	Percentage of total food crops to gross cropped area.	73.05	71.93	78.38
4.	Percentage of total non-food crops to gross cropped area.	26.95	28.07	21.62

INDICATOR NO.6 :- Increase in agricultural credit outstanding dues and gross value of agricultural produce.

During all these years of planned economic development agriculture had been the recipient of maximum financial aid from the Government. This is true not only in case of financial grants for an overall development of agricultural industry as

Contd..

a whole but individual credit facilities to farmers were also granted through co-operative agencies. This had all been to finance intensive and progressive methods of cultivation being adopted by agriculturists. Consequently loans advanced, dues outstanding increased to very great extent in recent years. The value of agricultural produce also increased enormously. This had been due to spiral rise in prices.

In the table given below statistics regarding agricultural credit and dues outstanding is presented.

TABLE NO. 6

Table showing agricultural credit, outstanding dues during 1961-62, 1965-66 and 1973-74.

Sr. No.	Item	Amount in thousand rupees during the year 19		
		1961-62	1965-66	1973-74
1	2	3	4	5
1.	Agricultural credit	11,583	43,330	10,647
2.	Outstanding dues	11,040	42,072	1,13,232

Contd.

It is seen from the above table that the amount of agricultural credit decreased slightly as compared to the year 1961-62. The dues outstanding increased by nearly ten times in 1974-75 over the corresponding figures of 1961-62.

INDICATOR No.7 :- Agricultural wage rates.

This indicator spots light on the earnings of agricultural labourers especially in rural area. The wages for skilled and unskilled workers are collected from three rural centres viz; Kingaon in Ahmedpur taluka, Killari in AUSA taluka and Murud in Latur taluka. In the table placed below actual wages that were paid to the skilled and unskilled labourers at the aforementioned three centres are given.

Contd.

TABLE NO. 7

Table showing the wage rates for skilled and unskilled labourers for the years 1973 and 1974.

Sr. No.	Name of the centre	Year	Skilled labour			Unskilled Labour		Other agril		Herd smen
			Carpe-nters	Black smiths	Cobb-lers	Male	Fem ale	Male	Fem ale	
1	2	3	4	5	6	7	8	9	10	11
1.	Kingaon	1973	4.71	4.71	3.58	2.50	2.00	2.54	2.00	2.54
		1974	4.50	4.50	3.00	2.75	2.50	2.75	2.50	3.00
2.	Killari	1973	4.88	4.88	4.13	2.63	2.25	2.63	2.25	2.25
		1974	4.63	4.63	4.38	2.50	2.00	2.50	2.00	2.25
3.	Murud	1973	7.00	7.00	7.00	2.50	2.50	3.00	2.00	2.50
		1974	7.00	7.00	7.00	2.50	2.46	3.00	2.00	2.50

From the aforementioned table it is seen that the wages at Murud centre were comparatively higher for both skilled and unskilled labbers. The wage rates of carpenters, blacksmiths and cobblers slightly decreased at Kingaon centre during 1974, as compared to the figure of 1973. The wage rates of carpenters and black smiths at Killari centre also recorded a decrease during the year 1974 as compared to the year 1973 where as the wage rates of cobbler in respect of Killari centre found to be slightly increased during 1974. The wages rates at Murud centre in respect of carpenters, blacksmiths and cobbler remained unchanged during the year 1974. The wage rates of male and female unskilled labours slightly increased both at Kingaon and Murud centres during the year 1974 as compared to the year 1973. The wage rates of unskilled male and female labour found to be slightly decreased at Killari centre. The wage rates of

Contd...

herdsmen recorded a decrease at Kingaon centre during the year 1974 as compared to the year 1973. There was no change in the wage rates of herdsmen at Killari and Murud centres during the year 1974.

INDICATOR NO.'8 :- Livestock per hectare of cultivable area.

Livestock plays a very important role in Indian agriculture in the absence of mechanised methods of cultivation, Osmanabad district has already established its name in the field of livestock. Of the three breeds of cattle viz; "Deoni", "Red Khandari" and "Khillari" in Osmanabad district, Deoni breed hails from Udgir and Ahmedpur talukas of this district, Khillari breed is mainly found in Parenda, Umerga and Tuljapur talukas of the district and "Red Khandari" in border areas of the district adjoining Nanded district.

Among buffaloes pandharpur and local breeds are found in the district. The table below gives livestock (Bovine and Ovine) per hectare of the cultivable area in Osmanabad district during the years 1961-62, 1965-66 and 1973-74.

TABLE NO. 8

Table showing livestock (Bovine and Ovine) per hectares of the cultivable area in Osmanabad district during the year 1961-62, 1965-66 and 1973-74.

Sr. No.	Taluka	Livestock per hectare of the cultivable area during the year		
		1961-62	1965-66	1973-74
1	2	3	4	5
1.	Osmanabad	0.95	0.98	0.88
2.	Kalam	0.89	0.81	0.81

Contd...

(26)
CONTD. TABLE NO. 8

1	2	3	4	5
3.	Latur	1.09 1.09	0.85	0.87
4.	Ahmedpur	0.95	0.95	1.00
5.	Udgir	1.15	1.03	1.00
6.	Nilanga	1.06	0.85	1.00
7.	Musa	0.95	0.76	0.81
8.	Umerga	0.98	0.74	0.84
9.	Tuljapur	0.82	0.62	0.76
10.	Parenda	0.74	0.86	0.73
10	Bhum	0.94	0.84	0.85
	District Average	0.96	0.85	0.87

It is seen from the above table that livestock per hectare of cultivable area decreased in all the talukas except Ahmedpur during 1972. Livestock per hectare of cultivable area is more in Udgir, Ahmedpur and Nilanga talukas as compared to other talukas in the district. The ratio is low in Parenda & Tuljapur talukas being 0.72 and 0.76 respectively.

INDICATOR NO. 9 :- Poultry as compared to population.

Poultry provides nutritive food to population as also additional income to agriculturists. The table below gives poultry per 1000 persons according to 1961, 1966 and 1972 live-stock census.

Contd..

TABLE NO. 9

Table showing poultry per 1000 persons according to the
1961, 1966, 1972 census.

Sr. No.	Taluka	Poultry per 1000 persons.			Percent- age incre- ase/decrease over.
		1961	1966	1972	
1	2	3	4	5	6
1.	Osmanabad	185	154	138	- 25.41
2.	Kalam	254	100	123	- 51.57
3.	Latur	170	90	60	- 64.71
4.	Ahmedpur	125	50	82	- 34.40
5.	Udgir	119	40	83	- 30.25
6.	Nilanga	165	60	88	- 46.67
7.	Ausa	210	60	87	- 58.57
8.	Umerga	220	110	108	- 50.91
9.	Tuljapur	216	150	213	- 1.39
10.	Parenda	239	200	213	- 10.88
11.	Bhum	243	190	200	- 17.70
	District Average	186	102	117	- 37.10

Poultry per thousand persons decreased from 186 in 1961 to 117 in 1972, resulting in ^a decrease of 37% in the district percentage. As compared to the figures of 1966 census it is observed that poultry per thousand persons increased from 102 in 1966 to 117 in 1972. During 1972 number of poultry per 1000 persons was found more (i.e. 200 or more) in Tuljapur, Parenda and Bhum talukas as compared to other talukas in the district. The ratio was less the 100 in Latur, Ahmedpur, Udgir, Nilanga and Ausa talukas

INDICATOR NO. 10 : Per capita consumption of electricity

Per capita consumption of electricity is a good reflector of economic activity as well as standards of living. The consumption of electricity in the district is increasing at a faster rate since 1965-66.

The per capita consumption which was at 0.65 Kwh. in 1961-62 increased to 3.23 Kwh in 1965-66 and to 24.77 Kwh in 1974-75. The increase in the consumption of power mainly attributed to rural electrification programme for energising irrigation pumps and to increase in industrial power consumption.

The table below shows purpose-wise consumption of electricity in the district in the years 1961-62, 1965-66 and 1974-75.

TABLE NO. 10

Table showing the purpose-wise consumption of electricity during the period from 1961-62, 1965-66 and 1974-75.

Year	Kilowat hours sold to public (in 000 Kwh)					
	Domestic consumption	Commer- cial and small power	Industrial power	Public lighting	Others	Total
1	2	3	4	5	6	7
1961-62	202	320	305	108	29	964
1965-66	826	1,696	1,306	443	1,483	4,754
1974-75	4,029	2,358	14,953	1,314	24,328	46,982

Rural electrification programme had been speeded up and as many as 650 villages were electrified upto the end of March 1975.

Contd..

INDICATOR NO. 11 :- Increase in the candidates enrolled and vacancies notified during 1961-62, 1965-66 and 1974-75.

The table placed below gives number of candidates enrolled and vacancies notified during 1961-62, 1965-66 and 1974-75.

TABLE NO. 11

Table showing number of candidates enrolled and vacancies notified during 1961-62, 1965-66 and 1974-75.

Sr. No.	Year	No. of candidates enrolled	Vacancies notified	Percentage increase/decrease over 1961-62	
				No. of candidates	Vacancies notified.
1	2	3	4	5	6
1.	1961-62	4,845	1,300	-	-
2.	1965-66	6,347	1,035	+ 31.00	- 20.38
3.	1974-75	9,333	405	+ 92.63	- 68.84

The number of candidates enrolled had been on the increase since 1961-62. From 4,845 in 1961-62 it increased to 9,333 in 1974-75 showing an increase of 92.63. As against this, vacancies notified were on the decrease since 1961-62. As many as 1300 vacancies were notified in 1961-62 where as during 1974-75 only 405 vacancies were notified which showed a decrease of 68.84 over 1961-62.

Contd...

INDICATOR NO. 12 :- Increase in the indoor and outdoor patients in hospitals, dispensaries and primary health centres.

There are three hospitals in the district of which one is located at Osmanabad and the other two at Latur. One hospital at Latur is equipped with pathological laboratory and radiology unit. Further there are 32 dispensaries of all kinds located at other urban and rural centres and as many as 15 public health centres in rural area of the district. During 1974 the number of indoor patients treated increased to 84,216 in comparison to 8,617 in the year 1961. Similar rise in the number of outdoor patients treated could be seen from 5,40,386 in 1961 to 11,79,365 during 1974.

The number of beds per lakh of population which fell from 21 in 1961 to 19 in 1965 had shown an increase to 24 during 1974 per lakh of population.

INDICATOR NO. 13 :- Increase in the number of students in different categories (boys and girls separately).

With the provision of free education upto primary level and grant of concessions, scholarships etc. to eligible students in the secondary and higher education, the number of students both boys and girls recorded remarkable increase in recent years. The number of teachers and institutions also recorded simultaneous increase obviously due to increase in number of students. This can be seen from the following table .

Contd...

TABLE NO. 12

Table showing the increase in the number of students
in different categories.

Sr. No.	Educational institutions	Position in the district			Percentage increase/decrease over 1961.
		1961-62	1965-66	1973-74	
1	2	3	4	5	6
<u>I. Primary schools</u>					
i)	Institutions	1,259	1,583	1,703	* 35.27
ii)	Boys	88,277	1,17,253	1,31,024	* 48.42
iii)	Girls	29,947	55,677	71,052	* 137.26
<u>II. Secondary schools</u>					
i)	Institutions	76	172	243	* 219.74
ii)	Boys	18,990	46,135	68,370	* 260.03
iii)	Girls	4,136	13,322	22,733	* 449.64
<u>III. Higher Institutions</u>					
i)	Institutions	4	5	23	* 475.00
ii)	Boys	696	1,987	14,328	* 1958.62
iii)	Girls	64	163	1,399	* 2085.94

In the primary section, the number of institutions and girls recorded 35.27% 48.42 % and 137.26 % increase respectively over and above the corresponding figures for the year 1961-62. In the field of secondary and higher education, the increase is indeed remarkable. The glaring fact noticed is that there had been tremendous increase in the number of girls as compared to boys in the primary and secondary section. In the higher education the number of boys increased enormously by as many as more than twenty times. Over the corresponding figure of 1961-62. The number of girls also enormously increased by as many as twenty one times over the corresponding figure of 1961-62.

Contd...

INDICATOR NO. 14 :- Increase in the road mileage per 100 square kilometre.

Roads play an important role in the developing economy. Acute scarcity conditions prevailed in the district during the years 1969-70 to 1972-73 with the result that Government started number of scarcity road works through different executive agencies. Consequently the road mileage increased from 523.99 Km. in 1961-62 to 3,839.68 Km. in 1974-75. As a result the percentage of road mileage to total mileage (including both roads as well as railways) increased from 88.73 % in 1961-62 to 97.02 % in 1974-75.

INDICATOR NO. 15 :- Increase in Banking facilities in proportion to population.

Banking facilities play an significant role in a developing economy. The co-operative banks succeeded to meet out the needs of rural credit to a great extent by the establishment of number of branches in rural areas. However the number of branches opened so far were found to be inadequate to the ever expanding credit needs.

The proportion of banks per lakh of population worked out to 4.90 during 1973-74. More population was served by the bank since 1961-62 because of the opening of additional branches of different banks in the district. By 1974 there were as many as 93. By 1974 there were as many as 93 branches of different banks in the district with the result that the population served by each branch came down from 86,920 in 1961-62 to 19,757 in 1973-74.

.....

INDICATOR NO. 16 :- Prices :

Prices of different commodities assume pivotal importance in developing economy. Prices of all commodities shot up spirally during the year 1974 as compared to the year 1962. From the table placed below it is seen that during the year under report the prices of all commodities recorded considerable increase.

TABLE No. 13

Table showing the average prices of important commodities during 1962, 1966 and 1974

C H A P T E R N O . I VP L A N N I N G

The year 1974-75 is the first year of Fifth Five year Plan. The State Government has decided to adopt the district as the unit of Planning and as such the organisational machinery set up in each district for the formulation, monitoring and overseeing of the District Plan originally consisted of the district Planning Board and the District Development consultative council, have now been amalgamated to form a single District Planning and Development council. The Annual Plan 1974-75 consisted of schemes implemented through State and Local sector agencies and also of the schemes which were sponsored by the Central Government. During the Fourth Five year plan an amount of Rs. 1,663.46 lakhs was spent. During the year 1974-75 expenditure of Rs. 516.02 lakhs was incurred as against the budget provision of Rs. 445.40 lakhs. The State Government has introduced "Employment Guarantee Scheme" during the year 1974-75.

In the table placed below the expenditure incurred on different major heads of development is given with clear demarcation of expenditure between state and local sectors

.....

Contd...

" Irrigation and power" received the highest priority. This could be seen from the fact that of the total amount of budget provision of Rs. 445.40 lakhs for the Annual Plan 1974-75 as a whole, the amount set aside for the above head was of the order of Rs. 117.22 lakhs. It almost amounts to 26.32 % of the total budget provision. The expenditure incurred during 1974-75 under the above head exceeded the budget provision. The percentage of expenditure of irrigation and power to the total plan expenditure was 30.54 .

Next in order was "Miscellaneous programmes" on which an amount of Rs. 111.12 lakhs was spent as against the budget provision of Rs. 446.10 lakhs. The newly introduced " Employment Guarantee Scheme" under the head "Miscellaneous Programmes" incurred a sizeable amount of expenditure of Rs. 108.55 lakhs, the budget provision of which was Rs. 102.42 lakhs.

During Fourth Five Year Plan the expenditure incurred under this head was Rs. 1.53 lakhs.

"Social services" accounted for an expenditure of Rs. 96.71 lakhs as against the budget provision of Rs. 4.02 lakhs. During fourth five year plan an expenditure of Rs. 709.79 lakhs was incurred under the head "Social services". "Co-operation and Community Development", accounted for an expenditure of Rs. 20.96 lakhs as against the budget provision of Rs. 7.12 lakhs. During Fourth Five Year Plan an expenditure of Rs. 58.47 lakhs was incurred under the above head. The expenditure incurred on the head "Transport and Communication" was to the tune of Rs. 15.74 lakhs the budget provision of which was Rs. 11.00 lakhs. During Fourth Five Year plan the expenditure incurred under

above head was Rs. 97.35 lakhs. " Industry and Mining" accounted for an expenditure of Rs. 5.37 lakhs as against the budget provision of Rs. 3.77 lakhs. During Fourth Five year Plan the expenditure incurred under the above head was Rs. 5.49 lakhs. Amongst different heads of development a sizeable amount of expenditure had been incurred on " Agricultural Programmes" next to the head " Miscellaneous programmes". The respective percentages of expenditure to the total expenditure incurred during 1974-75, on "Agricultural programmes", "Co-operation & Community Development", " Transport and Communication", "Industry and Mining", " Miscellaneous programmes" and " Social services" were 21.04, 4.06, 3.05, 1.04, 21.53 and 18.74.

AGRICULTURAL PROGRAMMES :

The expenditure incurred and the physical targets achieved under different sub-heads of the major head "Agricultural Programmes" during the Annual Plan period of 1974-75 are given below briefly.

AGRICULTURAL PRODUCTION :

An amount of Rs. 5.06 lakhs was provided in the budget against which Rs. 3.10 lakhs were spent. The percentage of expenditure on Agricultural production to the total expenditure under the major head " Agricultural programmes" was 4.94 and that to the total plan expenditure was 2.86. The physical achievements under this sub-head are as under.

Town compost to the tune of 1 ton was prepared. Under the plant protection scheme subsidy was given for the purchase of 2500 kg. of zinc phosphate and 2,824 kg. of Ammonium. Under this item small farmers and agricultural labourers land levelling

.....
Contd..

was undertaken in an area of 2.24 hectares, seed distributed to the tune of 89 quintals, 56 tonnes of fertilisers were distributed. Plant protection measures were carried out in 3121 hectares. Under the centrally sponsored scheme of agricultural production an amount of Rs. 32400 was spent. Improved seeds to the tune of 20,459.43 quintals were distributed during 1974-75.

During Fourth Five Year Plan food grains to the tune of 48,260.43 quintals were distributed. Chemical fertilisers were distributed to the tune of 20,034 tonnes during Fourth Five Year Plan.

SOIL CONSERVATION :

The Soil Conservation Programme which was initially undertaken up in the third five year plan period and continued further was also included in the Annual Plan 1974-75. The budget allocations were of the order of Rs. 27.14 lakhs while the expenditure was Rs. 31.79 lakhs. As much as 69,469 hectares of land was rectified and afforestation of soil conservation was carried out covering an area of 25 hectares. Under the centrally sponsored scheme of soil conservation an amount of Rs. 54,600 was spent. During Fourth Five Year Plan an area of 4,00,495 hectares of area was bunded.

MINOR IRRIGATION :

A budget provision of Rs. 42.40 lakhs was earmarked for minor irrigation works both in the state and local sector. The total expenditure amounted to Rs. 50.97 lakhs. Under this head subsidy was given to 89 wells and 128 pumping sets. In the local sector an irrigation potential of 332 hectares was created. In the state sector, an irrigation potential of 5.29 hectares was created. During Fourth Five Year Plan 1,733 new

wells were constructed and 1,632 pumping sets were installed.

AYACUT DEVELOPMENT :

Budget allocations to the tune of Rs. 5.48 lakhs were earmarked and the total expenditure incurred was 14.66 lakhs under this sub-head in the Annual Plan 1974-75. Under the item standard development units the physical achievement was 665 hectares and under the item construction of canals 200 meters length was completed during 1974-75.

DAIRY DEVELOPMENT :

An amount of Rs. 7.20 lakhs was spent on dairy development activities as against the budget provision of Rs. 3.19 lakhs. Subsidy was given to as many as 31 dairy co-operative societies. The average collection of milk per day in respect of Government milk supply scheme Udgir was 5000 litres.

FISHERIES.

An amount of Rs. 81,000 was spent during 1974-75 for the development of fisheries in the district. Fish seedlings to the extent of 3,32,300 were stocked in the impounded waters. Fish collection during the period of 1974-75 was 75,270 kg. During Fourth Five Year Plan 42,84,000 fingerlings were stocked and 5,258 quintals of fish were netted.

WARE HOUSING AND MARKETING :

During the year 1974-75 in Osmanabad district an amount of Rs. 2,100 was spent for the development of ware housing and marketing. Financial assistance to the tune of Rs. 2,100 was given to market committees.

CO.-OPERATION AND COMMUNITY DEVELOPMENT :

Co-operation :-

Under this sub-head Rs. 16.54 lakhs were spent during 1974-75 as against the budget provision of Rs. 0.94 lakhs for

strengthening co-operative structure in the district. Two marketing societies were given share capital contribution and subsidy was given to 714 branches. Share capital contribution to the tune of Rs. 15.00 lakhs was given to sugar factories.

COMMUNITY DEVELOPMENT.

Under this sub-head Rs. 4.42 lakhs were spent. Much of this expenditure was incurred for the continuance of C.D. blocks already functioning.

IRRIGATION AND POWER :

Under this sub-head an amount of Rs. 117.22 lakhs was earmarked and the total amount spent was 157.57 lakhs. New major project viz; Manjra project was undertaken during 1974-75. Construction work of Earthen dam of 6,500 cubic meters was completed. The canal work was completed to the extent of 42,000 cubic meters. The earth work of Banganga project to the extent of 67,687 cubic meters was completed and masonry work of 3,348 cubic meters was also completed during 1974-75. The work of Tiru and Tawarja project was also in progress during 1974-75. The earth work of Ulup project was completed to the extent of 31750 cubic meters. The work of Jakapur project was in progress during 1974-75.

INDUSTRY AND MINING :

Two sugar factories one at Dhoki in Osmanabad taluka and another located at Killari in Ausa taluka were functioning with full swing during the year 1974-75. Number of saw mills, processing mills such as ginning, dal mills, rice mills, oil mills are already in existence and there is still a large scope for the establishment of more units in the district. Besides, there is also scope for other types of small scale industries.

(41)

During 1974-75 the amount of expenditure incurred under this sub-head was Rs. 5.37 lakhs as against the budget provision of Rs. 3.77 lakhs. During the year 1974-75 10 balutedar multi-purpose societies were assisted with share capital. Financial assistance was given to two industrial societies for the purchase of tools and equipments. Under the centrally sponsored schemes of rural industries project Latur an amount of Rs. 4.07 lakhs was spent.

TRANSPORT AND COMMUNICATION :

An amount of Rs. 15.74 lakhs was spent as against the budget provision of Rs. 11.00 lakhs. During Fourth Five year plan an amount of Rs. 97.35 lakhs was spent under this head. During 1974-75 road length of 32.56 km was completed . The construction work of landing strip was also in progress during 1974-75.

MISCELLANEOUS.

An amount of Rs. 42.07 lakhs was earmarked in the budget provision for the sub-head information and publicity and employment guarantee scheme. The employment guarantee scheme was newly introduced by the Maharashtra Government during the Annual Plan 1974-75. An amount of Rs. 110.88 lakhs was spent under this scheme during 1974-75. Under the sub-head information and publicity Rs. 24,000 were spent during 1974-75 for the installation of Community listening sets. In all 91 such sets were installed during 1974-75.

.....
Contd...

SOCIAL SERVICES :GENERAL EDUCATION :

Under this sub-head as many as 24.95 lakhs were spent during 1974-75 as against the budget provision of Rs. 21.28 lakhs. The expenditure exceeded the budget provision. As many as 94 Government Z.P. schools were given aid for their development and expansion. Under the scheme of upgradation of primary cum middle highschools in to fullfledged high schools, one school was upfgaded. Grants were given to local bodies for the construction of 15 primary school buildings. Open merit scholarships were awarded to three colleges.

TECHNICAL EDUCATION :

Under this sub-head an expenditure of Rs. 2,500 was incurred.

PUBLIC HEALTH :

The total expenditure under this sub-head amounted to Rs. 1.10 lakhs. Three centrally sponsored schemes viz; "National Malaria Eradication Programme", "Family planning" and "Small pox eradication" were implemented in the district for which an expenditure of Rs. 21.97 lakhs was incurred.

The eradication of malarial disease was achieved in Osmanabad, Bhum, Parendā, Latur, Kalam, AUSA, Underga and Nilanga talukas. Under the national Programme of family planning 4,545 cases of sterilization were made. In addition 57 cases of Intra Uterin Contraceptive Device were also done.

APPLIED NUTRITION PROGRAMME :

Under this sub-head an amount of Rs. 8.07 lakhs was spent as against the budget provision of Rs. 57000.

Under the school feeding programme 27,500 students from school took the benefit.

WATER SUPPLY AND DRAINAGE :

Under this sub-head an amount of Rs. 57.63 lakhs was spent as against the budget provision of Rs. 77.49 lakhs. Under the rural water supply scheme as many as 100 drinking water wells were constructed during 1974-75, 61 bore wells were also constructed during 1974-75.

URBAN DEVELOPMENT :

The total expenditure under this sub-head was reported as nil during 1974-75.

HOUSING :

An amount of Rs. 2.08 lakhs was spent on this sub-head as against the budget provision of Rs. 3.68 lakhs. In all 1000 huts were constructed under the scheme "Provision of house sites to landless workers".

WELFARE OF BACKWARD CLASSES:

An amount of Rs. 3.62 lakhs was earmarked during the Annual plan 1974-75, out of which Rs. 1.14 lakhs was spent. As many as 387 students of scheduled castes, scheduled tribes and other backward classes were granted scholarship, tuition fees, Examination fees, etc. Grant was also given to one backward class hostel, 208 persons belonging to backward class received loan cum subsidy, 5 balwadis were started and 30 irrigation wells were constructed for scheduled castes, scheduled tribes and other backward class persons. One industrial co-operative society of backward class persons was started. Under the scheme of financial assistance to individuals and group housing of backward class, scheduled caste and scheduled tribe persons, 24 persons took the benefit.

Under the centrally sponsored scheme of award of post S.S.C. scholarships to scheduled castes, scheduled tribes, demoted tribes, nomadic tribes and vimuktā jatis, 814 students from scheduled castes, 195 students from scheduled tribes and 155 students from denoted tribes/ nomadic tribes and vimuktā jatis took the benefit. Financial assistance was given to 32 societies of scheduled castes and 325 societies of Vimukta Jatis.
