1. Chapter-I.

1. Introduction:

1.1. Introduction and Location:

Bhir district was known to history as Asmaka during Vedic, Epic and Puranic ages. Panini refers to Asmaka which included a portion of modern Bhir district. In the days of Pandvas, it was known as Durgavati and later on during the regime of queen Champavati it was named as Champavatinagar. It was ruled by the Andharas, Chalukyas, the Rashtrakutas and the Yadvas and subsequently went under the rulers, of Delhi. At the time of Mohamed Tughlak, the district was named as Bhir. The history of its name is rather ^{shrouded} ~~l~~

in mystery. The district is strewn with ancient religious places, the notable amongs-t them being (1) Kankaleshwar temple (at Bhir town), (2) Yogeshwari temple (at Ambejogai town), (3) Vajjnath temple (at Parli town). The Vajjnath temple of Parli referred to above is one of the twelve Jyotirlingas.

At the ~~xx~~ advent of modern period of history Bhir district was in the erstwhile Hyderabad State. Following the reorganisation of states in 1956, the district of Bhir alongwith other districts of Marathwada became a part of the then Bombay State, ~~whar~~ which was bifurcated in 1960 to constitute the present Maharashtra State.

The district is situated in the central part of Marathwada. It lies between $18^{\circ}-28'$ to $19^{\circ}-27'$ north latitude and $74^{\circ}-54'$ to $76^{\circ}-57'$ western longitude, with a total geographical area of 11,227 sq.kms.

1.2. Boundaries:

The district is bounded on the north by Aurangabad and Parbhani districts, and on the east by the southern portion of Parbhani district. On the west, lies Ahmednagar district.

The district has natural boundaries earved by rivers, the Godavari in the north and Manjra on the southern side.

1.3. Administrative set up :

The geographical area of the district is 11,227.0 sq. kms. distributed among 7 tahsils constituting the district. The district is divided into two sub-divisions namely Bhir and Ambajogai comprising of four and three tahsils respectively. The details of tahsil, area and population according to 1971 census are given below:

Sr. No.	Sub-division	Tahsil	Area Sq. Kms.	Population (1971)	
1	2	3	4	5	
1.	Bhir	1. Bhir	1,439.2	2,06,173	
		2. Patoda	69.2		
			1,321.2	1,20,638	
		3. Ashti	1,453.3	1,36,232	
		51.8			
		4. Georai	1,548.7	1,70,117	
			52.4		
2.	Ambajogai	1. Ambajogai	1,599.8	2,64,004	
			54.4		
		2. Kaij	1,730.9	2,10,434	
			60.9		
		3. Manjlegaon	1,504.7	1,78,523	
			35.3		
Total		2	7	11,227.0	12,86,121

Since the total area figures in respect of district is supplied by the Surveyor, General of India, while the total area figures in respect of tahsils are given by the State Land Record Department, the total of Rural area of the tahsils do not add up to the corresponding figure of the district.

The District Collector is the Administrative head of the district. He also acts as the coordinating agency amongst

different district officers at the district level. The Sub-Division are under the control of Deputy Collectors. Besides this the Collector is assisted by Resident Deputy Collector and few more Deputy Collectors at the district headquarters. Tahsildars are in charge of tahsil areas.

In the district there are seven towns and 1,028 inhabited villages with a population of 1,49,301 and 11,36,820 respectively according to 1971 Census.

It can be seen that majority of the ~~ing~~ inhabited villages fall under villages having less population upto 2,000 only. Every town has a municipality and all the villages are covered by gram panchayats/group gram panchayats. During 1974-75 there were seven Panchayat Samities and 915 Gram Panchayats including group gram panchayats functioning in the district. The Zilla Parishad has 65 members out of which 47 are elected, 4 are associated 2 Ex-Officio members and the remaining 12 are coopted. Every Panchayat Samiti has a Chairman and Deputy Chairman. The Chairman of the Panchayat Samiti is an ex-officio member of Zilla Parishad. The Zilla Parishad is divided into twelve ^{sections} ~~divisions~~ and there were different committees to help the President of Zilla Parishad in discharging his duties.

1.4. Area:

The geographical area of this district as per 1971 Census is 11,227 sq.kms. Out of which 10,903 sq.kms. is rural and 324 sq.kms. is Urban. The area under urban towns was more, prior to 1961 census, since there were 8 municipalities. The Pangaon Municipality in Ambejogai tahsil was deurbanised in 1961 census and thus the urban area decreased. This district ranks 14 th and 4 th in the State and Marathwada Region respectively in terms of area. Similarly the district ranks 23rd in the State in terms of population. As compared the area under the tahsils within the

Patoda
 district Kaij tahsil ranks first followed by Ambejogai, Georai, ()
 Since a decade there were no territorial changes in the district
 and hence area of the district remained the same.

1.5. Topography :

The district is partly table land and partly inbroken hilly ranges with elevations between 300 to 900 metres. The hill ranges of Balaghat are spread over in the central part of the district. The geographical conditions in general in the western part of the district comprising, Bhir, Patoda and Ashti talukas are not favourable as in the eastern part which possesses more fertile soils and receives assured rainfall. A portion of the district on north and south side is plain. Due to the ranges of Balaghat the district is divided into uplands locally called "Gangathadi" some portion of Kaij and Ambejogai taluka is touched by these ranges.

1.6. Hills, Rivers and Soil :

The central part of the district is a hilly tract occupied by Balaghat ranges and the major part of Patoda and Ashti talukas is covered by the hills and appears deserted, when compared with Kaij and Ambejogai talukas. The Balaghat ranges are spread over the northern part of Ashti taluka, most of Patoda and central part of Bhir taluka. The main rivers of the district are Godavari, Manjra, Sindphana, Kundka, Bindusara, Wan and Sina. Manjra rises from the hills of Patoda. Rivers Kundka, Wan, Sindphana rise from Balaghat hills. The small rivers in the district are Mehkari, Kamblu and Kadi.

The entire district is situated in the trap region and its soil is mostly fertile in Manjlegaon taluka. Deep, medium and shallow soil is prevalent in greater part of the district. It is dark gray to black in colour. The soil is retentive of moisture. It becomes sticky when wet and cracks freely in the dry weather.

The soil from the western part of the district indicates the existence of salt to the extent of 0.5 %. The soil along with the banks of Sindphana, Godavari and Majjra is more fertile. Nearly half of the cultivable area of the district is generally cropped under kharif crops. Jowar, Bajra and wheat are most important food crops of the district. Other crops included groundnut, rice, pulses, safflower, cotton and sugarcane.

1.7. Climate:

The climate of the district is pleasant and agreeable during the greater part of the year. Patoda and Kaij talukas have cool climate even in summer. The village Chincholi in Patoda has highest elevation from the sea level and its weather in summer season is akin to that of hill station. Among all the talukas climate of Ambejogai is very pleasant. The climate of Bhir, Manjlegaon and Georai on the low lands is warm.

1.8. Temperature:

During the year 1973 the maximum temperature of 44.6 C^o was recorded in the month of May as against the maximum temperature of 42.0 C^o recorded in the same month of 1974. The minimum temperature during the year 1973 and 1974 was 7.6 C^o and 5.7 C^o respectively. The average temperature for the district was 27.3 C^o during the year 1973 as against 25.3 C^o in the year 1974.

1.9. Rainfall:

As per the topography, the district is divided into high and low level tracts by the ~~xxx~~ central ghats running through Bhir and Patoda tahsils. The rainfall is not uniformly distributed during the monsoons. The average rainfall during the year 1974 was 578.5 mm. as against 753.6 mm. in 1973.

The highest rainfall received at Patoda during 1974 is recorded as 855.4 mm. whereas the highest rainfall recorded in Chousala centre in Bhir tahsil in 1973 was 1,214.0 mm. Tahsils situated in eastern part of the district, receive generally assured rainfall during the monsoon period which starts in June and continues upto the end of September. In the year 1973 the rainfall for the district on an average was 753.6 mm. whereas it was 578.5 mm. in 1974. The statement showing the actual rainfall recorded at the selected centres in the district during 1973 and 1974 is as under.

Statistics of rainfall recorded at the rainguages in the district during 1973 and 1974.

Sr. No.	Name of the selected centres	Rainfall in mm.	
		1973	1974
1	2	3	4
1.	Bhir ..	872.8	388.2 586.2
2.	Chousala ..	1,214.0	389.9
3.	Georai ..	739.5	572.1
4.	Manjlegaon. ..	811.5	613.7
5.	Ambejogai ..	804.7	594.4
6.	Kaij. ..	693.0	570.4
7.	Patoda ..	668.0	855.4
8.	Rooti. ..	206.9	474.1
9.	Ashti. ..	771.9	550.3
	Average rainfall ..	753.6	578.5

The above statement shows that the average rainfall in the district in 1974 was less by 175.4 mm. as compared to that in 1973.

Chapter - II.

Explanatory note on scope and limitations of Statistics presented in the District Statistical Abstract 1974-75.

2.1. The yearly publication of the District Statistical Abstract for the year 1974-75 is the 13th issue since the 1st issue was published in 1958-59. This is a yearly publication consisting of exhaustive statistics including socio economic indicators. The data in this publication is collected from the various departments of State Government, Government of India, Reserve Bank of India and Local Bodies etc. A foot note to that effect is given at the bottom of each table.

2.2. District At a Glance:

Figures presented in the statement of district at a glance for this district are in comparison with the Maharashtra State. The reference period is the same for the district and the state.

2.3. The scope and limitations of the statistical information presented herein is explained in brief in the following paragraphs.

2.4. Area and Population:

2.4.1. The data of 1971 population census is presented along with the information pertaining to variation in population data in the two decades i.e. 1951 and 1961.

2.4.2. Figures of 1971 census population are presented in table No.1 giving talukwise figures of area, rural and urban population, number of occupied residential houses as well as total number of households, male and female population, population per square kilometre as well as percentage variations over 1951 census are also furnished in the table No. 1 and 2. Information of villages according to population ranges as per 1971 census is shown in table No.3. It also gives information of total number of villages inhabited and uninhabited separately. Towns classified as per population ranges are shown in Table No.4.

The tahsilwise figures of workers based on livelihood classification and non-workers existing in the district are presented in table No.5. The figures are sub-divided into rural and urban sectors. Distribution of population according to age group, mother tongue and religion etc. is indicated in table No.6, and population of scheduled castes, scheduled tribes and neo buddhists is presented in table No. 7.

2.5. Rainfall and Climate:

2.5.1. Information of actual rainfall recorded at the selected centres in the district and the number of rainy days is shown in table No.8. Monthwise details of the selected centres for (1) Georai (2) Manjlegaon (3) Ashti (4) Bhir (5) Patoda (6) Chousala (7) Ambejogai (8) Rooti and (9) Kaij are given. The normal rainfall recorded for each centre is the average rainfall of prolonged period usually of eighty years.

2.5.2. Figures reported in table No.9 give monthly maximum, minimum and yearly temperature at one selected centre i.e. Bhir in the district for the year 1974.

2.6. Agriculture:

2.6.1. Agriculture is the predominant economic activity of the district. The statistical tables No. 10 to 21 give total geographical area, area under different crops, area irrigated with the different sources, number of irrigation wells in use, tanks, minor/major/medium irrigation works etc. etc.

2.6.2. Agriculture statistics is obtained mainly from the annual season and crop report of the district for the year 1972-73 and 1973-74. All the figures in table No. 10 to 15 for the years 1972-73 & 1973-74 are provisional.

2.6.3. Land utilisation statistics is presented in table No. 10 and details of cropwise area in each taluka for both the years i.e. 1972-73 and 1973-74 are given in table No.11. Estimated information in respect of out turn and average yield rate per

hectare of principal crops of the district is given in table No. 12. Net area irrigated with different irrigational facilities available in the district is shown in table No.13, whereas irrigated area under different principal crops in each taluka is reported in table No.14. Number of wells in use/not in use and other wells, are given in table No.15. The table No.16 and 17 give information about minor irrigation works as well as medium and major projects in each taluka. Agricultural wage rates presented in table No.18, are of the three selected centres i.e. Umapur (Goral taluka), (2) Renapur (Ambejogai taluka) and (3) Kada (Ashti taluka) in the district, and table No.19 indicates data relating to different types of agricultural implements/equipments and machinery in use in each taluka. Information on famine and history of scarcity is given in table No.20 and 21 respectively.

2.7. Animal Husbandry

2.7.1. The tables 22 to 25 furnish the statistical data about different categories of livestock and poultry in the district as per the quinquennial livestock census conducted in 1972. In table No.22 livestock data of all categories is shown, while table No.23 furnishes the information regarding veterinary facilities available in each tahsil of the district during 1974-75. The details of disease-wise livestock mortality is presented in table No.24 while table No.25 presents statistics relating to number of recognised slaughter houses and animals slaughtered therein.

2.7.2. Forest and Fisheries:

Data on forest area under different ranges, the quantity of minor and major forest produce and estimated cost of the forest produce of 1974-75 is presented in table No.26-A and 26-B. Table No.26-C gives the information regarding the quantities of fish.

2.8. Employment, Industry, Mining and Electricity:

2.8.1. Industry and Employment:

Statistical information pertaining to factories registered under factory Act 1948 is presented in table No.27,28 and 29. The types of factories covered with its details are as under. (1)Factories using power and employing 10 or more workers, (2)Factories not using power but employing 20 or more workers, (3)Factories not covered in 1 and 2 but notified by the Government as covered under the factory Act.

2.8.2. The details of each type of industry, the total number of working factories and number of mandays worked during the year under report as well as average daily employment classified by males and females separately are given in table No.27. The classification of industries is based on standard classification. Information in table No.28 and 29 indicates the distribution of factories according to their working strength and the distribution of factories according to number of days worked respectively. The information regarding annual survey of Industries is furnished in table No.30.

2.8.3. Employment Exchange Statistics:

Table No.31 and 32 give employment exchange statistics of the district while table No.33 indicates the volume of employment in different industries as on 31-3-1975.

2.8.4. Figures of electricity generated, consumption for domestic, commercial, industrial, public lighting and other purposes etc. etc. are shown in table No.34 and the number of towns and villages electrified and population covered in Ehir district up to 31st March 1975 are given in table No.35.

2.9. Cooperation:

This section deals with various activities of the cooperative movement. An abstract of the different types of

cooperative societies in existence in Bhir district is presented in table No.36 and number of cooperative banking facilities with total membership, share capital, reserve funds, working capital and amount of loans advanced (short term, medium term and long term) etc. is given in table No.37. Details of primary agricultural credit societies functioning in each tahsil are indicated in table No.38 and the data about other cooperative societies of different types in the district is given in table No.39. Operations of the central and primary cooperative marketing societies are shown in table No.40 and details of other different types of societies in the district are reported in table No.41. Activities of the regulated markets in each tahsil are shown in table No.42. The information regarding registered money lenders and loans advanced by them during the year under report, is given in table No.43.

2.10. Medical and Public Health:

The medical and public health statistics is presented in 5 different tables. Medical facilities made available through public and public aided bodies are shown in table No.44. Number of births and deaths registered are given in table No.45 and number of deaths reported due to various important reasons/causes in table No.46. The information pertaining to vaccination statistics and family planning activities respectively is presented in table No. 47 and 48.

2.11. Education:

Education statistics is displayed in 7 tables. The total strength of male and female literates with percentages both for rural and urban parts is shown tahsilwise in table No.49. The data on the education in urban and rural areas is shown in table No.50, and 51. Information appearing in table No. 52

indicates educational institutions of different categories catering the needs of the district alongwith total enrollment of boys and girls and number of teachers both trained and untrained. Information regarding beneficiaries from backward classes is given in table No.53 and concession of free education availed by the economically backward class communities is presented in table No.54. Amount released to various primary educational institutions by way of grants-in-aids is shown in table No.55.

2.12. Transport and communications :

This section deals with upto date statistics relating to facilities of the various modes of transport available in the district. The details of railway length according to different types of rail guages in the district are presented in table No.56. The road length according to the different categories as well as the types of surface of roads can be seen in table No. 57. Number of motor vehicles operated in Aurangabad Division are presented in table No.58, as the separate information pertaining to Bhir district is not readily available. The details of operational statistics is not included in table No.59, giving nationalised road transport according to State Transport Divisions of Aurangabad and Nanded since Bhir district is covered under the above two S.T. Divisions. The traffic census of important roads constructed by B. & C. Department in Bhir district is shown in table No.60, whereas growth of postal facilities availed by the rural and urban areas of this district for the years 1961-62, 1965-66, 1970-71, 1971-72, 1972-73, 1973-74 and 1974-75 is given in table No.61. Development of rural broadcasting in the district is shown in table No.62.

2.13. Local Bodies:

The sub-section 'Local Bodies' deals with the upto date statistics about village panchayats, municipal councils and Zilla Parishad of this district. Income and expenditure of the local bodies is given in table No. 63 for the year 1965-66, 1968-69 to 1974-75. The total number of Gram Panchayats existing in the district alongwith the total number of villages covered by Gram Panchayats as well as income and expenditure of the Gram Panchayats is shown in table No. 64. The upto date information of headwise receipts and expenditure of Zilla Parishad, Bhir is depicted in table No. 65-A, 65-B and 65-C. While income and expenditure of the seven municipal councils is shown in table No. 66 for the year 1974-75.

2.14. Plan and Community Development:

Statistical data regarding plan and community development is presented in table Nos. 67, 68, 69, 70 and 71. The details of expenditure and physical achievements under various schemes included in the Fourth Five Year Plan and during the Annual Plan for the year 1974-75 are shown in table No. 67 and 68 respectively. The table No. 69 gives particulars of the C. D. Programme implemented in the district. The entire rural area of the district is covered by the C. D. programme. Expenditure incurred out of the C. D. schematic funds in different stages by the blocks is reported in table No. 70 and the physical achievements under selected items by all the blocks (stagewise) operating in this district is presented in table No. 71.

2.15. Prices :

This section gives details about fluctuations in the prices of essential commodities in the district. The wholesale prices of the important agricultural commodities at regulated markets are indicated in table No.72. The prices are collected from three different selected rural centres and of the district headquarters. The prices of all such commodities at district headquarters are given in table No, 73 for the year 1974. Details of consumer price index for the working class of the said year can be seen in table No. 74 with 1961 as base year.

2.16. Judicial and Administrative :

Judicial statistics, existing strength of police force and crime statistics for the district is furnished in this section in table No. 75 and to 77.

2.17. Miscellaneous:

Statistics relating to Cinemas, Banks and Joint stock Companies, Insurance policies, Small savings, Land Revenue, Number of presses, news papers and periodicals etc. are given in table No. 78,79,80,81,82,83 and 84 respectively. Table No. 85 is the summary table indicating trends in the selected items in respect of (1)Area and population (2)Agriculture and irrigation (3)Soil conservation (4)Agricultural implements and livestock, fisheries (5) Factory employment (6)Electricity (7)Co-operation (8)Education (9)Medical and public health (10)Transport and communication (11) Community Development (12)Local self Government and Banking etc.

CHAPTER - III.

An Analytical Review

3. This chapter deals with important selected indicators of the district for comparative study.

3.1. Percentage of gross cropped area to net area sown :

The indicator shows the extent of double cropped area in relation to net cropped area in the district. The double cropped area of the district increased in the year 1965-66 over the year 1961-62. It however decreased in the years 1972-73 and 1973-74 over the years 1961-62 and 1965-66. The percentage of double cropped area to net cropped area was almost the same in the years 1972-73 and 1973-74. The double cropped area decreased in Bhir, Kaij, Patoda and Ashti in the year 1965-66 over 1961-62. It increased in remaining tahsils of Georai, Manjlegaon and Ambejogai over the year. The double cropped area decreased in Bhir, Patoda and Ashti in the year 1973-74 over the years 1961-62 and 1965-66. It however increased in Kaij over these years. The reasons for decrease of double cropped area over these years are inadequate facilities of irrigation, unassured rainfall and less fertile soil in addition to scarcity conditions in the district.

Percentage of gross cropped area to net cropped area in the years 1961-62, 1965-66, 1972-73 and 1973-74.

Sr. No.	Tahsil	Percentage of gross cropped area to net cropped area.			
		1961-62	1965-66	1972-73	1973-74
1	2	3	4	5	6
1.	Bhir	111.2	106.7	106.3	105.2
2.	Georai	106.1	108.6	100.0	100.0
3.	Manjlegaon	100.9	108.0	107.7	107.7
4.	Ambejogai	100.0	104.6	107.7	100.0
5.	Kaij	103.7	103.0	102.0	104.8
6.	R. Patoda	112.7	111.6	104.3	107.4
7.	Ashti.	110.2	107.2	100.0	103.2
Total for the District.		105.9	106.8	104.0	104.3

The percentage of gross cropped area to net cropped area in the year 1973-74 is highest in Manjlegaon tahsil. It is however lowest in Georai and Ambejogai tahsils. The percentage was highest in Manjlegaon and Ambejogai and lowest in Georai and Ashti in the year 1972-73.

3.2. Production of important crops :

The following table shows the yield per hectare and production of important crops in 1961-62, 1965-66 and 1973-74.

Sr. No.	Important crops	Yield per hectare in Kg.			Out-turn in '00' m. tonns		
		1961-62	1965-66	1973-74	1961-62	1965-66	1973-74
1	2	3	4	5	6	7	8
1.	Rice	603	341	412	49	34	35
2.	Wheat	371	258	345	155	102	165
3.	Kh. Jowar	542	408	()	455	334	()
4.	Rabi Jowar	559	486	(522)	1,459	1,083	(1,658)
5.	Bajra	286	206	334	256	215	577
6.	Gram	346	232	386	119	58	141
7.	Tur	252	205	260	59	39	68
8.	Sugarcane	4,638	8,678	5,667	111	153	136
9.	Cotton	108	64	114	464 (00 bales)	222 (00 bales)	111 (00 bales)
10.	Groundnut	787	449	709	757	314	168
11.	Chillies	481	499	447	27	29	17

3.2.2. The yield per hectare of rice, wheat, jowar, bajra, gram, tur, cotton, and groundnut is increased in the year 1973-74 compared to 1965-66. The yield per hectare of sugarcane and chillies is however decreased in 1973-74 compared to 1965-66. The yield per hectare is however decreased in respect of rice, jowar, gram, groundnut and chillies in 1973-74 compared to yield per hectare in 1961-62. The yield per hectare of wheat, bajra, tur, sugarcane and cotton is increased in the year 1973-74 compared to 1961-62. The out-turn of rice, wheat, jowar, bajra, gram and tur is also increased in the year 1973-74 compared to out-turn in 1965-66 and 1961-62. The out-turn of cotton, groundnut and chillies is however decreased compared to out-turn

of 1965-66 and 1961-62. This shows that the year ~~1961-62~~ 1973-74 was quite a normal year in which yield per hectare and out-turn of important crops was satisfactory. The yield per hectare and out-turn of important crops was better in the year 1973-74 than the yield and out-turn of 1965-66. The yield per hectare and out-turn was however less in the year 1973-74 than in the year 1961-62. The yield per hectare and out-turn of important crops were not as satisfactory in the year 1973-74 as were in the year 1961-62. The yield rate and out-turn was satisfactory in the year 1961-62 than the year 1973-74.

3.3. Gross value of agricultural production :

3.3.1. The gross value of important agricultural commodities was 1,55,770 thousand rupees in the year 1961-62 as per prices prevailing in the year. The gross value of these commodities increased to 1,83,470 thousand rupees in the year 1965-66 as per prices of the year. The gross value of these commodities in the year 1973-74 was 4,68,893 thousand rupees. This shows that the gross value of agricultural commodities increased to two and half times in the year 1973-74 compared to gross value of 1965-66. The gross value increased more than three times in the year 1973-74 than the gross value of 1961-62. There is not so much increase in the out-turn of these crops. The element responsible for increase of gross value of agricultural commodities ^{is} the prices. The prices of all the commodities have increased in the year 1973-74 than the prices in the year 1965-66 and 1961-62. The increase in prices in the year 1973-74 is nearly twice compared to 1965-66. The prices increased nearly three times to four times in the year 1973-74 than in the year 1961-62.

3.3.2. The average agricultural prices of commodities and value of agricultural production in the year 1961-62, 1965-66 & 73-74 .

Sr. No.	Commodity	Average price per m. tonne (Rs.)			Gross value of commodities (000 Rs.)		
		1961-62	1965-66	1973-74	1961-62	1965-66	1973-74
1	2	3	4	5	6	7	8
1.	Jowar	400	530	1,499	76,560	75,101	2,48,534

1	2	3	4	5	6	7	8
2. Wheat		586	1,114	2,110	9,068	11,363	34,815
3. Bajra		446	975	1,142	11,418	20,962	65,893
4. Gram		427	1,294	2,061	5,081	7,505	29,060
5. Tur		404	826	1,690	2,384	3,221	11,492
6. Sugarcane		388	483	1,584	4,307	7,390	21,542
7. Cotton		910	1,184	2,803	7,644	4,706	5,606
8. Groundnut		633	1,147	2,468	35,258	36,016	41,462
9. Dry chillies		1,500	5,933	6,170	4,050	17,206	10,489
Total value		xxxx	xxxx	xxxx	1,55,770	1,83,470	4,68,893

3.4. Percentage of gross irrigated area to net irrigated area.

The net area irrigated through all sources in the district in the year 1973-74 was 52,526 hectares. The net area irrigated in 1961-62 was 39,398 hectares and in 1965-66 was 51,527 hectares. There is increase in the net area, under irrigation, in 1973-74, over the year-s 1961-62 and 1965-66. The increase in the net area, in 1973-74 is considerable, compared to net irrigated area in 1961-62. The increase in net irrigated area in 1973-74, is however very small compared to 1965-66. The trend of gross irrigated area is however slightly different from the net irrigated area. The gross irrigated area increased, considerably, in the year 1965-66 over 1961-62. It, however, decreased in 1973-74 compared to 1965-66. The irrigated area, under double cropping, in the year 1973-74 was nil. The irrigation sources are therefore, utilised in this year either for perennial crops or for kharif or rabi crops, in view of the inadequacy of water. This shows that the area under irrigation is increasing with the decrease, in area under double cropping. The double cropped area under irrigation was observed highest in Patoda and lowest in Manjlegaon and Ambejogai in the year 1965-66. The irrigated area under double cropping was also found highest in Patoda and lowest in Manjlegaon, Ambejogai, Georai and Ashti in the year 1961-62.

The following table shows the gross irrigated area, net irrigated area and the percentage of gross irrigated area to net irrigated area in the district.

(Area irrigated in hectares)

Sr. No.	Taluka	Gross irrigated area			Net irrigated area			% of gross irrigated area to net irrigated area.		
		61-62	65-66	73-74	61-62	65-66	73-74	61-62	65-66	73-74
1	2	3	4	5	6	7	8	9	10	11
1.	Ehir	10773	9361	20944	7728	7949	20944	139.4	117.8	100.0
2.	Georai	1904	3700	3331	1904	3626	3331	100.0	102.0	100.0
3.	Manjlegaon	10037	10707	2677	10037	10707	2677	100.0	100.0	100.0
4.	Ambejogai	2138	2357	5657	2138	2357	5657	100.0	100.0	100.0
5.	Kaij	2999	5043	2497	2554	4123	2497	117.4	122.3	100.0
6.	Patoda	6767	12909	5180	5484	10081	5180	123.4	128.0	100.0
7.	Ashti	9553	13881	12240	9553	12684	12240	100.0	109.4	100.0
Total		44171	57958	52526	39398	51527	52526	112.1	112.5	100.0

The above table reveals that there is no irrigated area under double cropping, in the district in the year 1973-74.

3.5. Percentage of net irrigated area to net area sown.

The net area irrigated and the net area sown, in the year 1973-74, are 52,526 hectares and 6,90,908 respectively. The percentage of net area irrigated to net area sown works out to 7.6 percent.

The following table shows the net area irrigated and the net area sown with their percentage.

Sr. No.	Items	1961-62	1965-66	1973-74
1	2	3	4	5
1.	Net area sown (00 hectares)	8,239	7,526	6,909
2.	Net area irrigated (00 hectares)	394	515	525
3.	Percentage of net area irrigated to net area sown.	4.8	6.8	7.6

The above table reveals that the net area sown is decreasing where as the net area irrigated is increasing over the years. The percentage of net area irrigated to net sown area is therefore increasing. The percentage of increase is, comparatively, more in the years 1961-62 to 1965-66 than the years 1965-66 to 1973-74. Inadequacy of rains may be the probable reason for slow increase in the irrigation percentage, in these years.

3.6 Change in crop pattern :

3.6.1. The area sown is decreasing day by day even though there are attempts to bring additional land under cultivation. The area under double cropping is also decreasing. Naturally there is decrease in area under food crops and non-food crops over the years. The percentage of food crops to gross cropped area is however increasing day by day with the corresponding decrease in the percentage of non-food crops to gross cropped area. The tendency to bring additional area under food crops is increasing as it is the need of the day. The area under non-food crops is naturally decreasing. It is being replaced by food crops.

The following table gives the figures of area under food crops and non-food crops with their percentage to gross cropped area.

Sr. No.	Items	1961-62	1965-66	1973-74
1	2	3	4	5
1.	Total food crops (area in '000' hectares)	651	611	608
2.	Total non-food crops (area in '000' hectares)	222	193	113
3.	Percentage of food crops to gross cropped area.	74.5	76.0	84.4
4.	Percentage of non-food crops to gross cropped area.	25.5	24.0	15.6

3.6.2. The percentage of area, under food crops to gross cropped area is increasing in all the talukas in the district.

The percentage of area under food crops to gross cropped area was highest in Patoda taluka and lowest in Ambejogai. The percentage of area under non-food crops to gross cropped area was highest in Ambejogai and lowest in Patoda taluka in the year 1973-74.

3.6.3. The area under cereals was 4,72,042 hectares and area under pulses was 1,27,476 hectares in 1973-74. The area under cereals of the district, is decreasing over the years 1961-62 and 1965-66. The area under pulses, is however increased over the years 1961-62 and 1965-66. The percentage of areas of cereals to gross cropped area and pulses to gross cropped area have however increased in all these years.

The table gives the areas under cereals and pulses and their percentages to gross cropped area in the district.

Sr. No.	Items	1961-62	1965-66	1973-74
1	2	3	4	5
1.	Total area under cereals ('000) hectares	508	478	472
2.	Total area under pulses (000 hectares)	126	120	127
3.	Total gross cropped area ('000' hectares)	873	804	721
4.	Percentage of cereals to gross cropped area.	58.2	59.5	65.5
5.	Percentage of pulses to gross cropped area	14.6	14.9	17.7

The percentage of area, under cereals to gross cropped area, was observed highest in Patoda taluka and lowest in Ambejogai taluka in 1973-74. So also the percentage of area under pulses to gross cropped area, was observed highest in Ambejogai and lowest in Georai taluka in the year 1973-74.

3.6.4. The irrigation facilities have increased, in the district. The area under irrigation has also increased, in 1973-74 compared to area in 1961-62 and 1965-66.

The table showing the irrigated area under cereals, pulses, food crops and non-food crops with their percentages to gross irrigated area.

Sr. No.	Item	1961-62	1965-66	1973-74
1	2	3	4	5
1.	Irrigated area under cereals ('00 hectares)	334	422	420
2.	Irrigated area under pulses. ('00 hectares)	28	35	33
3.	Total irrigated area under food crops ('00 hectares)	422	546	495
4.	Total irrigated area under non-food crops ('00 hectares)	19	34	30
5.	Percentage of irrigated area under food crops to gross irrigated area	95.6	94.2	94.3
6.	Percentage of irrigated area under non-food crops to gross irrigated area.	4.4	5.8	5.7

3.6.5. The percentage of area under food crops, to gross irrigated area, in 1973-74, is slightly decreased over 1961-62. It is almost the same in 1965-66. So also the percentage of area under non-food crops to gross irrigated area, is slightly increased, in 1973-74, over the year 1961-62. It is ~~almost~~ almost the same in 1965-66. The percentage of area under food crops to gross irrigated area, is highest in Ashti and lowest in Ambejogai, in 1973-74. So also percentage of area under non-food crops, is highest in Ambejogai and lowest in Ashti, in the year 1973-74.

3.7. Agricultural credit dues outstanding and gross value of agricultural production :

The position of agricultural dues outstanding and gross value of agricultural production is given in the table shown below.

Agricultural credit dues outstanding in Bhir District,
(% in lakhs)

Sr. No.	Name of Taluka	Agricultural credit dues outstanding			
		1961-62	1965-66	1973-74	1974-75
1	2	3	4	5	6
1.	Bhir	31	37	76	64

1	2	3	4	5	6
2. Georai		15	50	169	156
3. Manjlegaon		8	26	30	71
4. Ambejogai		13	44	106	90
5. Kailash		15	48	109	98
6. Patoda		16	23	83	79
7. Ashti		10	54	74	64
Total		108	282	697	522

3.7.2. The outstanding dues of agricultural credit, in the year 1961-62, were 108 lakhs. They were 282 lakhs, in 1965-66, 697 lakhs in 1973-74 and 522 lakhs in 1974-75. The outstanding dues of agricultural credit, are seen to be increased rapidly till 1973-74. The dues, are slightly decreased, in 1974-75. The main reasons for increase of dues, may be the increasing prices of various commodities. The increase of dues, is as rapid as the prices. Secondly there were scarcity conditions in the district continuously for the period from 1970-71 to 1972-73. The repaying capacity was suddenly decreased, in these years. Subsequently the years of 1973-74 and 1974-75 were bit normal. The crop conditions were satisfactory. The outstanding dues, in 1974-75, were, therefore, decreased to little extent.

3.7.3. The agricultural production of important agricultural commodities increased in the year 1973-74 compared to year of 1965-66. The gross value of agricultural production has also considerably increased as the trend of increase of prices was very high in the year 1973-74. The gross value of agricultural production increased nearly two and half times in the year 1973-74 than the year 1965-66. It increased more than three times in the year 1973-74 than in the year 1961-62. The gross value of agricultural production in the year 1973-74 was 46.89 crores. The outstanding dues of agricultural credit were 6.97 crores in the same year. The outstanding dues of agricultural credit decreased to 6.22 crores in the next year. The element responsible for this decrease of outstanding dues in next year may be the extra ordinary increase in the gross value of agricultural production in the year 1973-74.

3.8. Agricultural wage rates :

The agricultural wage rates prevailing, in three selected rural centres viz, Renapur in Ambejogai, Kada in Ashti and Umapur in Georai were collected, in the year 1974-75.

Average agricultural wage rates of these three centres for 1963-64, 1969-70 and 1974-75 are given in the table shown below:

Sr. No.	Category	centre	Wage rate in Rs.		
			1963-64	1969-70	1974-75.
1	2	3	4	5	6
1. Carpenter		Umapur	2-75	4-27	7-00
		Kada	3-00	5-00	5-67
		Renapur	3-00	4-02	5-00
2. Blacksmith		Umapur	2-57	4-27	7-00
		Kada	2-50	5-00	5-67
		Renapur	2-50	4-02	5-00
3. Cobbler		Umapur	N.A.	2-42	5-00
		Kada	N.A.	5-00	5-00
		Renapur	N.A.	3-00	5-00
4. Field labour.		Umapur	1-47	2-20	2-50
		Kada	1-70	2-06	2-79
		Renapur	1-56	2-92	2-88

3.8.2. The wage rates of skilled and unskilled labour were observed to be increasing day by day, with the increase in prices of various essential commodities. The increase of wage rate is rapid. The wage rates were observed, almost double, in 1974-75 than the wage rates existing, in 1963-64. The wage rates of carpenter and blacksmith were highest in Umapur centre and lowest in Renapur centre, in 1974-75. The wage rates of cobbler were almost the same, in all the centres, in this year. The wage rates of field labour were observed to be ranging from Rs. 2-50 to Rs. 2-88, in these centres, in 1974-75. The ^{Wage} wage rates of field labour were almost the same, in all these centres, in 1963-64. They were ranging between Rs. 2-06 to Rs. 2-92 in 1969-70.

3.9. Livestock per hectare of land

Live stock is the only source of power, in agricultural industry, in these days, for common masses. The bovine population of the livestock caters to the need of power, in seasonal agricultural operations. The bovine population when compared with cultivable area indicates the extent, this power, available, for seasonal agricultural operations. As per 1972 livestock census, the total bovine and ovine population of the district is 9,73,145. The population, in 1966 livestock census, was more by about, 80,000 heads. It was more by about 74,000 heads, in 1961 census. The population of livestock decreased, in 1972 due to scarcity conditions, in the district. The population of livestock, in 1974-75, might have still decreased, due to acute scarcity conditions in 1972-73. The cultivable area of the district, was 10,08,950 hectares in 1973-74. The male bovine, over three years, in 1972 were 2,47,577. The cultivable area available, per pair of male bovine, over three years, in 1973-74, was 8.2 hectares. It was 6.9 hectares as per 1966 census and 7.3 hectares as per 1961 census. The cultivable area observed to be increased, for each pair of male bovine, over three year, in 1972 than in 1961 and 1966. It is due to decrease of livestock population, in the scarcity period.

3.10. Poultry population in the district.

The strength of poultry, as per 1972 census, was 2,22,125 fowls. The strength increased, in 1972 than in 1966. The strength was 2,39,017 fowls, in 1961. The strength of poultry, per thousand human population as per 1972 census was, 173 fowls. It was 156 fowls, in 1966 and 239 fowls in 1961. The strength of poultry, per thousand population decreased, in 1972, compared to 1961. It, however, ^{of} increased compared to 1966. The strength of poultry, per thousand human population, was 320 and highest, in Ashti taluka and 138 and lowest, in Georai.

3.11. Consumption of Electricity:

There is rapid progress, in consumption of electricity, in the district. The electricity consumed, in 1965-66, was 20,966 thousand units. The electricity consumed, in 1965-66, was 2,186 thousand units and in 1961-62, was 376 thousand units. The consumption of electricity, was ten times more, in 1974-75 than in 1961-62. Per capita consumption of electricity, was 16.3 units, in 1974-75. It was 2.2 units, in 1965-66 and 0.4 units, in 1961-62. The consumption of electricity was highest, for agricultural purposes followed by Industrial purposes, in 1974-75.

3.12. Enrolment of candidates in employment exchange:

The enrolment of candidates in employment exchanges is increasing day by day. As many as 5,524 candidates have enrolled, themselves, in the employment exchange offices, in the district, in 74-75. The candidates enrolled in 1973-74 were 6,497 and that in 1965-66 were 5,076. The strength of candidates on live register of exchange is increasing day by day. The placement of candidates, is rather meagre. 1,040 vacancies were notified, in 1974-75 as against which placement was 701 candidates only. As against 1,121 vacancies notified, in 1973-74, placement was 835 candidates. There were 2,000 vacancies notified, in 1965-66 and placement was 1,432 candidates. The trend of notification of vacancies and placement of candidates, is decreasing every year. The candidates on live register are, however, increasing. The ratio of enrolment of candidates and that of notification of vacancies and placement of candidates is rather reverse. The employment problem is becoming severe day by day.

3.13. Indoor and Outdoor patients in the hospitals & dispensaries:

Indoor patients treated in the hospitals and dispensaries, in the district, during 1974, were ^{32,500} 32,500. The indoor patients treated, in 1965, were 10,479 and in 1961 were 6,300.

This shows that there is increasing trend of treatment of indoor patients. The medical facilities are increasing day by day.

3.13.2. The outdoor patients treated, in the hospitals and dispensaries, were 5,80,557, in 1974. The patients treated in 1965 were 6,51,873 and that in 1961, were 4,94,336. There is decrease, in treatment of outdoor patients in 1974 than in 1965. This may be due to additional facilities provided for admitting them as indoor patients. As there are hospitals ^{at} ~~in~~ Bhir and Ambejogai, treatment of patients in these talukas, is more, as compared to other talukas, in the district.

3.13.3. The strength of beds, in hospitals and dispensaries, in 1974 was ⁶⁴⁶ . The ratio of beds per lakh of population, in 1974, works out to ⁵⁰ . It was 45 beds in 1965 and 40 beds in 1961. The strength of bed per lakh of population, is increasing day by day.

3.14. Enrolment of students in Educational institutions:

Primary institutions:

3.14.1. There were 76,825 boys and 32,306 girls enrolled in 1,529 primary institutions in 1973-74. The strength of boys and girls was 71,325 and 27,022 respectively, in 1,319 primary institutions, in 1965-66. So also, there were 50,443 boys and 14,912 girls, in 993 primary institutions, in 1961-62. This shows tremendous increase, in enrolment of students and corresponding increase, in institutions also. The strength of teachers, in these institutions has also increased. The strength was increased from 1,874, in 1961-62, to 2,884 in 1965-66 and 3,958 in 1973-74.

Secondary Education:

3.14.2. The strength of boys was 36,496 and that of girls was 9,327, in 1973-74 in 153 secondary institutions. There were 25,656 boys and 6,342 girls in 108 institutions, in 1965-66. There were 9,801 boys & 1,874 girls in 38 institutions, in 1961-62.

The enrolment, in secondary institutions has also increased with the increase in institutions. There were 531 teachers, in 1961-62, in these institutions. The strength of teachers was increased to 1,227, in 1965-66 and 2,167, in 1973-74.

Higher Education:

3.14.3. There were hardly two institutions, in 1961-62. One more college was added, in 1965-66. The strength of colleges, in 1973-74 was however 13. As many as 7,732 boys and 545 girls were educated, in 1973-74. The enrolment, in 1965-66 in these institutions was 1,273 boys and 78 girls. There were hardly 587 boys and 32 girls, in these two institutions, in 1961-62. This shows that the college education has become a very common feature in these days. The strength of students in colleges is, therefore, increasing day by day. The strength of teachers in colleges increased from 42, in 1961-62 to 70, in 1965-66 and to 298 in 1973-74.

3.15. Road length in Ehir district:

The road length, of all types of roads, in the district, was 3,580 kms., in 1975. It was 1,084 kms. in 1965 and 762 kms. in 1961. The communication facilities are increasing day by day, by making approaches, in rural areas. Easy approaches are made by constructing rural roads to villages and these roads are linked to district roads. The road length per 100 sq. kms. of area, in the district, is 31.9 kms. It was 9.9 kms. in 1965 and 7.0 kms. in 1961.

3.16. Banking facilities in the district.:

The population of about one lakh was served by 9 banking offices, in 1961. The population of 1,12,795 was served by 18 banking offices in 1966. The banking offices functioning, in 1974, were 62, serving a population of ~~about three lakhs~~ 2,87,172 in about 40 villages and towns.

3.17. Retail prices at the district headquarter:

With a view to assess the trend of retail prices of the essential commodities, at the district headquarter, the average retail prices of 1961, 1966 & 1974 are given, in the table, shown below:

Average retail prices of important commodities at the District headquarter.

Sr. No.	Commodity	Unit	Average retail prices for the year in Rs.		
			1962	1966	1974
1	2	3	4	5	6
1.	Wheat (Medium)	Kilo	0-66	1-22	2-29
2.	Wheat (Coarse)	"	0-63	1-19	2-08
3.	Jowar white	"	0-57	0-65	1-71
4.	Bajra	"	0-54	0-99	1-43
5.	Gramdal	"	0-64	1-84	2-94
6.	Arhar dal	"	0-83	1-29	3-12
7.	Mung dal	"	0-87	1-44	3-05
8.	Sugar	"	1-10	1-33	4-55
9.	Gir	"	0-68	0-77	2-06
10.	Groundnut oil	"	1-93	4-46	9-01
11.	Vanaspati Dalda	"	3-33	5-82	12-00
12.	Goat meat	"	2-50	3-75	7-56
13.	Eggs (h-en)	Dozen	1-80	2-34	3-74
14.	Dry chillies	Kilo	2-48	4-55	6-91
15.	Kerosene	Litre	0-32	0-52	1-08
16.	Chailiya	Kilo	7-25	9-05	9-74
17.	Cigarettes	10 Nos	0-31	0-39	1-15

It is evident, from the table, shown above, that there is tremendous increase, in prices of all commodities. The increase is almost double, in 1966 and three times, in 1974 compared to prices, in 1962. There is abnormal increase, in prices of food grains. The price of sugar is four times higher in 1974 than the price in 1962. The increase, in price, is highest in respect of groundnut oil. It raised from Rs. 1-93 in 1962 to Rs. 4-46 in 1966 and Rs. 9-01 in 1974.

CHAPTER - IV

P L A N N I N G

PLAN REVIEW 1974-75

4.1. After completing 20 years of Planned development country is on the threshold of the Fifth Five Year Plan starting from 1974-75 amidst a climate of great expectations. The Plan processes which have been so far in operation during the last four plans have undergone a basic change as the district has been made the basic unit of Planning. The Planning has now become a two way process, from National Level downwards and from District level upwards. This is a revolutionary approach which is aimed at removing imbalances between district and district, for better utilisation of resources and for achieving better coordination in implementation of developmental programmes.

4.1.2. The Government of Maharashtra has already acted upon this major decision in the realm of planning and has constituted District Planning Boards in each District. State Government has laid down the function of Planning Boards and has given guidelines regarding the formulation of the District Plan. It is of prime importance that the representatives of the people are thoroughly associated with the various stages of planning to settle priorities to decide sectorial allocation and also to know the limitations imposed on Planning due to shortages of resources, While formulating this, plan should be in conformity with the state policies in the same way as the state plans are guided by the framework of national policy.

4.1.3. Planning operation at the district levels has actually been started with the preparation of the Fifth Five Year Plan (1974-75 to 1978-79) and Annual Plan 1974-75.

4.1.4. After the District was adopted as a unit of Planning, the District Planning Board Bhir is doing this exercise for the first time to formulate the Annual Plan of the district for the year 1974-75. For the first year of the Fifth Five Year Plan, the Annual Plan of the district was adopted as it emerged from the State's Annual Plan.

4.2. This chapter comprises the plan review of the two periods viz. IV th Plan period and 1 st year of Fifth Five Year Plan i.e. 1974-75. During the Fourth Five Year Plan, the total expenditure incurred was to the tune of Rs.1,185.71 lakhs on the district level plan schemes. A total provision of Rs.399.77 lakhs was made for the district level schemes out of which Rs.376.38 lakhs have been spent during 1974-75. The percentage of expenditure was 94. An amount of Rs.326.58 lakhs was spent on state sector schemes whereas expenditure incurred on local sector schemes is Rs.49.80 lakhs. The percentage of expenditure on state sector schemes and local schemes works out to 86.77 % and 13.23 % respectively.

4.3. In the last year of the Fourth Five Year Plan in all 96 schemes were implemented. Out of which 49 schemes were from state sector whereas 49 schemes were from local sector. 2 Schemes were observed to be common in state and local sectors.

4.3.1. District Planning Board has taken up 93 schemes for implementation in the first year of the Fifth Five Year Plan. 59 schemes were under the control of state sector where as 30 schemes were under the control of local sector. Four schemes were found to be common in state and local sector. It is observed that only six new schemes were considered in the first year of the fifth plan period as compared to the schemes covered in the fourth five year plan.

TABLE NO. 1

Major headwise plan expenditure on state and local sector schemes and percentages of expenditure during the Fourth Five Year Plan period (1969-70 to 1973-74) and 1974-75 first year of fifth five year plan period.

Sr. No.	Major head	Expenditure Rs. in lakhs					
		IV th Five Year Plan			1 st year of the V th five year plan(1974-75)		
		State sector	Local sector	Total	State sector	Local sector	Total
1	2	3	4	5	6	7	8
1.	Agricultural programme	484.68 (40.88)	130.88 (11.04)	615.56 (51.92)	102.54 (27.24)	17.92 (4.76)	120.46 (32.00)
2.	Cooperation & Community development.	35.30 (2.98)	23.44 (1.97)	58.74 (4.95)	30.40 (8.08)	3.13 (0.83)	33.53 (8.91)
3.	Irrigation & Power.	-	-	-	93.79 (24.92)	-	93.79 (24.92)
4.	Industry & Mining.	1.35 (0.11)	2.46 (0.21)	3.81 (0.32)	0.76 (0.20)	-	0.76 (0.20)
5.	Transport & communication.	-	78.69 (6.64)	78.69 (6.64)	9.77 (2.60)	2.71 (0.72)	12.48 (3.32)
6.	Social services.	205.69 (17.35)	221.23 (18.66)	426.92 (36.01)	33.50 (8.90)	26.04 (6.92)	59.54 (15.82)
7.	Miscellaneous.	1.98 (0.16)	-	1.98 (0.16)	55.82 (14.83)	-	55.82 (14.83)
	Total	729.00 (61.48)	456.70 (38.52)	1185.70 (100.00)	326.58 (86.77)	49.80 (13.23)	376.38 (100.00)

Note:- The figures in bracket indicate the percentage to total expenditure.

4.3.2. The study of table No.1 reveals that the highest percentage of expenditure viz. 51.92 is booked on the schemes of Agricultural programme. Under the agricultural programme, major portion of expenditure was shared by the schemes of the state sector giving percentage of expenditure by the state sector as 40.88 and that by the local sector as 11.04. The next major head on which comparatively higher percentage of expenditure incurred is the social services.

The percentage of expenditure incurred on local sector schemes is 18.66 and that on state sector is 17.35. The expenditure incurred on the remaining major heads is comparatively less, i.e. 6.64 % expenditure is incurred on transport and communications under local sector and 4.95% expenditure is incurred on cooperation and community development giving percentage share of expenditure by the state sector schemes and by the local sector schemes as 2.98 and 1.97 respectively.

4.3.3. Table No.1 gives major headwise expenditure incurred in the first year of the Fifth Five Year Plan. It can be seen from the table that the highest expenditure to the tune of Rs.120.46 lakhs is booked under the major head of agricultural programme forming expenditure of 32.00 percent. The percentage expenditure share of the state sector schemes and the local sector schemes is 27.24 and 4.76 respectively. Major head irrigation and power stands second in term of percentage expenditure giving 24.92. This expenditure is totally under the state sector. The expenditure booked on the remaining major heads is comparatively less, i.e. 15.82 % expenditure is registered on social services distributing the percentage expenditure under the state sector and the local sector as 8.90 & 6.92 respectively. Under the major heads miscellaneous and cooperation and community development share of percentage expenditure is as 14.83 and 8.91 respectively. The percentage expenditure of 14.83 under miscellaneous major head is due to the implementation of employment guarantee scheme. The negligible expenditure is incurred on the major heads of transport and communication and industries and mining giving percentage expenditure as 3.32 and 0.20 respectively.

The sub-headwise details of the schemes implemented are discussed below:

4.4. AGRICULTURAL PROGRAMME:

4.4.1. The amount of expenditure incurred during the Fourth Five Year Plan period under agricultural programme comes to the tune of Rs. 615.56 lakhs.

The details of sub-headwise expenditure incurred during the fourth ~~five~~ plan period and the first year of the fifth plan period are depicted in table No.2 below with the percentages (in bracket) to the total expenditure under agricultural programme.

TABLE NO. 2

Sr. No.	Sub-head of development.	Expenditure Rs. in lakhs					
		IV Plan			1st year of Vth plan		
		State sector	Local sector	Total	State sector	Local sector	Total
1	2	3	4	5	6	7	8
	1. Agricultural production.	2.30 (0.37)	51.48 (8.36)	53.78 (8.73)	3.01 (2.50)	2.92 (2.43)	5.93 (4.93)
	2. Minor Irrigation.	325.97 (52.96)	77.51 (12.59)	403.48 (65.55)	41.98 (34.85)	15.00 (12.45)	56.98 (47.30)
	3. Soil Conservation.	136.37 (22.15)	-	136.37 (22.15)	30.07 (24.96)	-	30.07 (24.96)
	4. Ayacut Development.	15.91 (2.59)	-	15.91 (2.59)	15.55 (12.91)	-	15.55 (12.91)
	5. Animal Husbandry.	-	1.90 (0.31)	1.90 (0.31)	0.02 (0.02)	-	0.02 (0.02)
	6. Dairy Development.	0.16 (0.03)	-	0.16 (0.03)	0.09 (0.07)	-	0.09 (0.07)
	7. Forest.	1.64 (0.27)	-	1.64 (0.27)	11.04 (9.17)	-	11.04 (9.17)
	8. Fisheries	0.83 (0.13)	-	0.83 (0.13)	0.27 (0.22)	-	0.27 (0.22)

1	2	3	4	5	6	7	8
9. Ware housing & Marketing		1.50 (0.24)	-	1.50 (0.24)	0.51 (0.42)	-	0.51 (0.42)
Total		484.68 (78.74)	130.89 (21.26)	615.57 (100.0)	102.54 (85.12)	17.92 (14.88)	120.46 (00.0)

The table shown above reveals that during the fourth plan period the highest percentage of expenditure of 65.55 is incurred on minor irrigation sub-head followed by 22.15 percent expenditure on soil conservation sub-head. This shows that the highest priority is accorded to the minor irrigation sub-head followed by soil conservation sub-head. Very negligible percentage of expenditure of 8.73 is booked on agricultural production programme. The expenditure on the remaining sub-heads is almost negligible. Correspondingly, the highest percentage expenditure of 47.30 during the year 1974-75 is incurred on minor irrigation sub-head followed by 24.96 percent expenditure on soil conservation sub-head. More or less the principle of weightage of expenditure followed in the fourth plan is continued in the year 1974-75 as far as minor irrigation and soil conservation sub-heads are concerned. For the sub-heads of ayacut development, forest and agricultural production the percentage expenditure is 12.91, 9.17 and 4.93 respectively. For the remaining sub-heads very negligible expenditure is registered forming even less than one percent expenditure.

4.5. Agricultural production:

4.5.1. Under this sub-heads of development Rs. 53.78 lakhs were spent during the IV plan period forming 8.73 percent expenditure to the total expenditure whereas expenditure of Rs. 5.93 lakhs was registered during the year 1974-75. In order to promote the agricultural production in the district, the schemes such as seedfarms, plant protection, horticultural development, intensive cultivation of food crops were implemented during both the plan periods.

4.5.2. So far as achievements during IV plan period of this sub-head are concerned improved seed of 36,808 quintals were distributed to the cultivators. The area brought under intensive cultivation practices is 1,95,376 hectares. The chemical fertilisers to the tune of 11,672 tonnes were distributed. Plant protection measures were undertaken in an area of 5,22,412 hectares. Compost of 1,74,021 tonnes was prepared.

Similarly achievements registered during 1974-75 are discussed as follows. The improved seed of 2,249 quintals were distributed to the cultivators. The chemical fertilizers to the tune of 4,864 tonnes were distributed. Plant protection measures were undertaken in an area of 86,307 hectares. Compost of 32,425 tonnes was prepared.

4.6. Minor Irrigation:

4.6.1. Irrigation is life belt of agricultural production and minor irrigation is considered as more economic and suitable to agro-economic development. It is felt that imbalance in the development of irrigation can be corrected to considerable extent by creating minor irrigation facilities. With this aspect in view schemes of construction of tanks, bandharas, new and old wells and pumping sets were programmed and implemented during the IV plan period and also during the year 1974-75. During the IV plan period an amount of Rs.403.48 lakhs was spent registering 65.55 percent expenditure to the total expenditure whereas expenditure to the tune of Rs.56.98 lakhs was booked forming 47.30 percent expenditure to the total expenditure.

4.6.2. Four tanks and 52 new bandharas were constructed and 36 old bandharas were repaired during the IV plan period. In all 3,121 new wells were constructed and 205 old wells were repaired and 2,055 pumping sets were installed. Total additional irrigation potential created is 17,033 hectares during the IV plan period. 17 minor irrigation tanks were constructed and irrigation potential created was 1,618 hectares during 1974-75.

4.7. Soil Conservation:

4.7.1. The soil conservation is the other programme which helps to increase agricultural production. Exhaustive programme of bunding and reclamation was undertaken during IV plan period and expenditure of Rs. 136.37 lakhs was incurred forming 22.15 percent on this sub-head to the total expenditure. Similarly an amount of Rs. 30.07 lakhs was incurred during 1974-75 on this sub-head registering 24.96 percent expenditure to the total expenditure.

4.7.2. An area of 2,71,296 hectares was banded and 172 hectares of land reclaimed during the IV plan period. Correspondingly 12,651 hectares of land was banded.

4.8. Ayacut Development:

4.8.1. During the IV plan period ayacut development works were undertaken and expenditure to the tune of Rs. 15.91 lakhs was booked and correspondingly an amount of Rs. 15.55 lakhs was spent in the year 1974-75 covering an area of 1,278 hectares.

4.9. Animal Husbandry:

4.9.1. The programme of animal husbandry was implemented with the object of supplementary food requirement. The expenditure of 0.31 percent was incurred during the IV plan period whereas the expenditure of 0.02 percent was incurred in the year 1974-75.

4.9.2. Nine veterinary dispensaries and veterinary aid centres ~~and~~ and 14 artificial incemination centres were started during the IV plan period. In the year 1974-75, two artificial incemination centres were started.

4.10. Dairy Development:

4.10.1. Dairy Development is also one of the means to provide supplementary occupation to the rural population. In the IV plan period expenditure of 0.03 percent is incurred on this programme whereas during the year 1974-75 expenditure of 0.07 percent is booked on this sub-head.

4.10.2. During the IV plan period 39 cooperative milk societies and federations were started whereas nine milk unions and federations were assisted in the year 1974-75.

4.11. Forest:

4.11.1. Under this sub-head expenditure of 0.27 percent was incurred in IV plan period whereas expenditure of 9.17 percent was registered during the year 1974-75.

4.11.2. Afforestation for soil conservation was carried out in 411 hectares in the IV plan. Valuable trees were planted in 328 hectares during the IV plan period. Correspondingly afforestation for soil conservation was taken in 1,130 hectares in the year 1974-75.

4.12. Fisheries:

4.12.1. The programme of fisheries is considered as supplementary food for human consumption. It is nutritious programme providing important proteins. The expenditure incurred on this programme is 0.13 percent during the IV plan period. The expenditure of 0.22 percent was registered in the year 1974-75 on this sub-head.

4.12.2. During the IV plan period, the fingerlings stocked and fish netted was to the tune of 3,100 thousands and 2,530 quintals respectively whereas the achievement registered for fingerlings stocked and fish netted during the year 1974-75 was 944 thousands and 149 quintals respectively. In addition to this 56 Kg. nylon twine was also distributed amongst fishermen.

4.13. Warehousing and Marketing :

4.13.1. In order to improve economic conditions of the cultivators and to fetch better prices to their agricultural produce, the warehousing and marketing programme is developed. For this purpose the expenditure of 0.24 percent was incurred on this ~~xxxx~~

sub-head in the IV plan period ^{where} as the expenditure of 0.42 percent was booked in the year 1974-75.

4.13.2. Subsidy to seven market committees was granted in the year 1974-75.

4.14. COOPERATION AND COMMUNITY DEVELOPMENT:

4.14.1. The expenditure on the programme during the IV plan period is Rs. 58.74 lakhs which works out to 4.95 percent of the total expenditure. Corresponding expenditure booked on this sub-head is Rs. 33.53 lakhs forming 8.91 percent expenditure to the total expenditure. The programme is divided into two sub-heads viz. cooperation and community development.

TABLE NO.3

Sub-headwise expenditure incurred on the programme of cooperation and community development during IV plan period and in the year 1974-75.

Sr. No.	Sub-heads of development	Expenditure Rs. in lakhs in the IV plan.			Expenditure Rs. in lakhs in 1974-75		
		State sector	Local sector	Total	State sector	Local sector	Total
1	2	3	4	5	6	7	8
1.	Cooperation	35.30 (60.10)	0.89 (1.51)	36.19 (61.61)	30.40 (90.67)	-	30.40 (90.67)
2.	Community Development.	-	22.55 (38.39)	22.55 (38.39)	-	3.13 (9.33)	3.13 (9.33)
	Total	35.30 (60.10)	23.44 (39.90)	58.74 (100.0)	30.40 (90.67)	3.13 (9.33)	33.53 (100.0)

4.15. Cooperation:

4.15.1. To provide facilities to the agriculturists the activities of cooperation have been intensified during the IV plan period and in the year 1974-75 and the expenditure of 61.61 percent and 90.67 percent is incurred respectively in the IV plan period and in the year 1974-75.

4.15.2. During the IV plan period short term ~~medium term~~ & long term loans to the tune of Rs. 1,087 ~~xxx~~ and 321 lakhs were distributed for undertaking the seasonal agricultural operations. The percentage of recovery during IV plan period was 67 percent. In addition to this 4 agricultural credit societies, 2 farming societies, 3 processing societies and 1 cooperative lift irrigation societies were organised during the IV plan period. In the year 1974-75 the short term ~~medium term~~ and long term loans to the order of Rs. 55 and 45 lakhs were distributed for intensifying the agricultural activities in the district. The percentage of recovery during the year was 41 percent. In addition to this Government share capital, was made available to ~~the~~ one sugar factory in the district.

4.16. Community Development:

4.16.1. There are 12 C.P.A. unit blocks functioning in ~~the~~ seven Panchayat Samities of the district in both the periods under consideration. By the close of the IV plan period 4 applied nutrition blocks and 2 blocks of composite programme of women and children welfare were functioning in the district. Similarly during the year 1974-75 5 applied nutrition blocks and 2 composite programme of women ^{welfare} and children are found to be functioning in the district. The expenditure incurred on the programme during the IV plan period and during the year 1974-75 is 38.39 percent and 9.33 percent respectively.

4.17. IRRIGATION AND POWER:

4.17.1. Prior to formation of District Planning Board execution of major and medium projects was at the state level and as such no expenditure is booked during the IV plan period in the district. With the functioning of the District Planning Board the execution of major and medium projects was transferred to the district. District Planning Board has registered expenditure to the tune of Rs. 93.79 lakhs under this sub-head of development forming 24.92 percent expenditure to the total expenditure.

4.17.2. During the year 1974-75 works on Manjra Project (continuing major irrigation project) Ghatshil project (continuing medium irrigation project) and Jayakwadi stage-II (new scheme) and Kundlika and Saraswati (new medium irrigation projects) were in progress. In addition to this 63 villages were electrified and 1,010 pumps were installed on wells in the district during the year 1974-75.

4.18. INDUSTRIES AND MINING :

4.18.1. Small scale and cottage industries programme was intensified in the district during the IV plan period as there was no big factory established. The expenditure incurred on the programme during the IV plan and in the year 1974-75 was Rs. 3.81 lakhs and 0.76 lakhs which works out to 0.32 percent and 0.20 percent to the total expenditure.

4.18.2. During the IV plan period 26 industrial cooperative societies 4 handloom weavers cooperative societies were formed. While in the year 1974-75, 7 industrial cooperative societies were formed. Managerial subsidy was granted to 7 societies and Government share capital was made available to 7 societies.

TRANSPORT AND COMMUNICATION:

4.19. Road Development:

4.19.1. The expenditure incurred on the programme during the IV plan and in the year 1974-75 was Rs. 78.69 lakhs and Rs. 12.48 lakhs forming percentage share as 6.64 and 3.32 to the total expenditure respectively.

4.19.2. Under this programme the roads of 944 kms. were constructed and roads of 858 kms. were modernised during the IV plan period. 58 C.D. works were also provided. The length of rural roads constructed was 1,933 kms. 71 culverts and 4 bridges were also constructed during the plan period. Similarly in the year 1974-75, 70 kms. new roads were constructed and roads of 8 kms. were modernised. 10 C.D. works were provided. The length of roads constructed in hilly and inaccessible areas was 20 kms. and length of rural roads constructed is 3 kms. 27 culverts and 4 bridges were also constructed during the year 1974-75.

4.20. SOCIAL SERVICES :

4.20.1. The programme implemented under this major head are General Education, Water Supply and Drainage, Urban Development, Housing & Welfare of Backward classes. The percentage of expenditure incurred on the programme of this major head during the IV plan period and in the year 1974-75 was ~~36.01~~ 36.01 percent and 15.82 percent respectively.

The sub-headwise expenditure of this major head is given below:

TABLE NO. 4

Sub-headwise expenditure incurred under major head Social Services during the IV plan period and in the year 1974-75.

Sr. Sub-heads No. of develop- ments.	Expenditure Rs. in lakhs in the IV plan			Expenditure Rs. in lakhs in 1974-75			
	State sector	Local sector	Total	State sector	Local sector	Total	
1	2	3	4	5	6	7	8
1. General Education.	0.58 (0.14)	160.87 (37.68)	161.45 (37.82)	3.62 (6.08)	19.60 (32.92)	23.22 (39.00)	
2. Technical Education.	-	-	-	-	-	-	
3. Health & Family Planning	11.31 (2.65)	30.60 (7.17)	41.91 (9.82)	2.27 (2.60)	1.55 (2.60)	3.82 (6.41)	
4. Nutrition programme	-	-	-	-	1.25 (2.10)	1.25 (2.10)	
5. Water supply & Drainage.	182.85 (42.83)	25.45 (5.96)	208.30 (48.79)	12.19 (20.48)	2.02 (3.39)	14.21 (23.87)	
6. Housing	5.35 (1.25)	1.07 (0.25)	6.42 (1.50)	0.44 (0.74)	-	0.44 (0.74)	
7. Urban Development.	3.57 (0.84)	-	3.57 (0.84)	-	-	-	
8. Welfare & backward class.	0.37 (0.08)	3.24 (0.76)	3.61 (0.84)	14.83 (24.91)	1.62 (2.72)	16.45 (27.63)	
9. Labour & Labour welfare.	1.66 (0.39)	-	1.66 (0.39)	0.15 (0.25)	-	0.15 (0.25)	
Total	205.69 (48.18)	221.23 (51.82)	426.92 (100.00)	33.50 (56.27)	26.04 (43.73)	59.54 (100.0)	

4.20.2. It is evident from the table shown above that maximum expenditure of 48.79 percent is incurred on water supply and drainage followed by expenditure of 37.82 percent on general education in the IV plan period. The expenditure on the remaining sub-heads is below 10 percent. Whereas in the year 1974-75 maximum expenditure of 39.00 percent is incurred on general education followed by expenditure of 27.63 percent on welfare of backward classes.

4.21. General Education:

4.21.1. All the schemes under this sub-head were implemented by the local sector except the scheme of development of technical high school which is implemented by state sector. The expenditure on this sub-head is 37.82 percent to the total expenditure of the major head of social services during the IV plan period in the district. Similarly expenditure of 39.00 percent is booked in the year 1974-75 on this sub-head.

4.21.2. During the IV plan period construction of 40 school buildings with 160 rooms was completed. 153 primary schools and 33 secondary schools were started and 496 teachers were trained in the above period. The strength of 12,669 students was increased in primary schools where as 6,847 students were increased in secondary schools in the IV plan period. In the year 1974-75, 19 primary schools were started and 101 teachers were trained. 6,171 students were found to be increased in primary schools in the year 1974-75. 5 Primary schools were upgraded into high schools. E.B.C. concession was granted to 5,763 students and concession was also granted to 298 boys of primary school teachers.

4.22. Health :

4.22.1. During the IV plan period total expenditure of Rs. 41.91 lakhs was made and out of which Rs. 11.31 lakhs was shared by the state sector ^{where} Rs. 30.60 lakhs were shared by local sector. The percentage share of expenditure is 9.82 to the total expenditure of the head of social services. Similarly in the year 1974-75

an amount of Rs. 3,82 lakhs was spent on this sub-head forming 6.41 percent share in the total expenditure .

4.22.2. During the IV plan period construction work of hospital building was completed. In the year 1974-75, the primary health centre Raimoha was upgraded into Rural Hospital. The construction work of hostel for nurses training is also taken up during the year 1974-75 .

4.23. Water Supply and Drainage :

4.23.1. During both the plan period under consideration, the schemes of piped water supply are being implemented by the state & local sectors. In the IV plan period the expenditure incurred on this sub-head is 48.79 percent to the total expenditure. Similarly expenditure booked in the year 1974-75 is 23.87 percent to the total expenditure.

4.23.2. In all 143 piped water supply schemes were implemented during the IV plan period benefiting 442 villages. 521 drinking water wells were constructed during the IV plan period. Similarly in the year 1974-75, piped water supply works were completed at 41 villages benefiting 260 villages. 47 Simple wells were constructed during the year 1974-75.

4.24. Housing:

4.24.1. Very meagre expenditure of 1.50 percent was incurred on the schemes of housing during the IV plan period. Similarly expenditure of 0.74 percent is booked on this sub-head in the year 1974-75.

4.24.2. 42 tenements were constructed during the IV plan period and 182 villages were covered by the village housing scheme. In the year 1974-75, 1084 huts were constructed for landless labourers.

4.25. Urban Development:

4.25.1. Only one scheme is implemented by the state sector. The expenditure incurred is 0.84 percent. The loan and grant was provided to the municipal council of Parli-Vaijnath for implementation of development plans of council.

4.26. Welfare of Backward classes:

4.26.1. The schemes of welfare of backward classes have been implemented by the state and local sector and the expenditure of 0.84 percent is incurred in the IV plan period. The expenditure of 27.63 percent is incurred in the year 1974-75 by the state and local sector.

4.26.2. In the year 1974-75 scholarships were provided to 1,331 students & financial assistance was made available to 73 cooperative societies of backward classes and 20 housing societies.

4.27. Labour welfare :

4.27.1. Craftsman training scheme is implemented by the state sector. Training is imparted in the institute for rural artisans in the district. This scheme is common in both the periods under reference. Expenditure incurred on the scheme is 0.39 percent and 0.25 percent respectively in the IV plan and 1974-75.

4.28. Miscellaneous programmes:

4.28.1. Under this major head of development information and publicity and employment guarantee sub-heads fall. The expenditure incurred on the major head during the IV plan period and in the year 1974-75 is Rs. 1.98 lakhs and Rs. 55.82 lakhs respectively.

4.28.2. During the IV plan period 463 rural radio sets were installed in the district whereas in the year 1974-75, 30 rural radio sets were installed. Under the sub-head of E.G.S. work is being provided to all the able bodied and unskilled persons from rural areas whenever such demand is felt. Under this scheme works like community wells, percolation tanks, minor irrigation works, afforestation and market and other link roads are to be taken. This scheme was operated in the year 1974-75 only.

TABLE NO. 85 (Contd..)

1	2	3	4	5	6	7	8	9
6. Net area sown per Agril. workers (1951, 1961 & 1971)	Hectare	N.A.	1.66	x x	2.09	x x	x x	
7. % of area sown more than once to net area sown.	Percentage	1.48	5.72	5.77	6.91	4.30	N.A.	
8. Gross irrigated area	Hectare	29,829	41,664	56,827	69,851	52,526	N.A.	
9. % of gross irrigated area to gross cropped area.	Percentage	4.47	5.28	7.22	8.19	7.29	N.A.	
10. Net irrigated area	Hectare	26,729	38,067	49,873	57,513	52,526	N.A.	
11. Area irrigated by canals.	"	625	-	-	-	-	N.A.	
(a)* Area irrigated by tank.	"	1,378	3,946	11,860	16,639	18,674	N.A.	
12. Area irrigated by wells	"	22,479	33,831	36,664	40,335	30,635	N.A.	
13. Area irrigated by other sources.	"	2,247	290	1,349	539	3,217	N.A.	
14. Area irrigated under:	"							
(a) Foodgrains	"	23,281	34,699	42,399	57,911	45,349	N.A.	
(b) Sugarcane	"	789	2,430	1,654	2,750	1,350	N.A.	
(c) Groundnut	"	N.A.	195	550	1,220	195	N.A.	
(d) Cotton	"	245	819	2,179	1,195	2,469	N.A.	
(e) Fruits	"	N.A.	N.A.	610	1,573	N.A.	N.A.	
III. SOIL CONSERVATION (WORK DONE U-PTO)								
1. Area bunded	Hectare	-	11,534	79,396	1,77,876	4,41,428	4,54,079	
2. Area terrace-dm.	"	-	-	-	17	17	17	
3. Area reclaimed	"	-	-	-	139	234	234	

TABLE NO. 85. (Contd..)

1	2	3	4	5	6	7	8	9
IV. AGRICULTURAL IMPLEMENTS (for the year)			1956	1961	1966	1972		
1. Ploughs	(1) Wooden	Number	1,070	1,771	1,388	1,199	x x	x x
	(2) Iron	"	20,083	19,881	25,321	27,443	x x	x x
2. Oil engines with pumps (for irrigation purposes)		"	269	807	2,952	4,110	x x	x x
3. Electric pumps (for irrigation purposes).		"	17	31	539	2,200	x x	x x
4. Sugarcane crushers.		"	335	378	1,275	230	x x	x x
(i) Power operated		"	13	-	199	128	x x	x x
(ii) Bullocks driven		"	322	378	1,076	102	x x	x x
V. LIVESTOCK (for the year)								
1. Total livestock		"	9,48,397	10,65,926	10,71,148	9,86,285	x x	x x
2. Net cropped area per pair of bu- llocks (male cattles over 3 years) are.		Hect.	7.23	5.40	5.21	6.40	x x	x x
3. Poultry		Number	1,12,705	2,39,017	1,56,586	2,22,360	x x	x x
VI. FACTORY EMPLOYMENT (for the year)			1951	1960	1966	1970	1973	1974
1. Working Factories		Number	15	27	22	24	23	N.A.
2. Average daily employment		"	N.A.	1,040	476	728	752	N.A.
3. No. of workers in registered factories per lakh of popula- tion.		"	N.A.	104	48	73	58	N.A.
VII. ELECTRICITY :								
1. Electricity generated		Million K.W.H.	-	0.37	-	-	-	-
2. Electricity consumed.		"	-	0.33	3.42	15.15	14.11	20.97
