SOCIO ECONOMIC REVIEW AND DISTRICT STATISTICAL  
ABSTRACT 1974-75 OF RATNAGIRI DISTRICT.

C H A P T E R - I

INTRODUCTION.

LOCATION:

1.1 Ratnagiri district is a part of Konkan strip running north to south along the western coast of India and lies between  $15^{\circ}36'$  to  $18^{\circ}50'$  north latitude and  $73^{\circ}50'$  to  $74^{\circ}36'$  east longitude. The District has a north south length of about 280 Kms. (180 Miles) and average east west extension of about 64 Kms. (40 Miles) except in its extremities, which taper to join the coast line. It has a coast line of about 320 Kms. (200 miles).

BOUNDARIES:

1.2 The district is surrounded by Sahyadri hills and beyond the Sahyadris, Satara and Kolhapur District in the east, Kolaba District in the north, Arabian sea in the west and Goa in the south.

TOPOGRAPHY:

1.3 Considering the natural conditions, the district can be divided into three parts (i) Hilly area of the Sahyadris and its offshoots (ii) the plateau surfaces which are used for cereal crops like rice and ragi (iii) coastal plains where coconut and arecanut gardens and fishing are the main sources of livelihood.

HILLS AND RIVERS:

1.4 Over 85 percent of the land surface in Ratnagiri district is hilly. The main range of the Sahyadris consisting of steep and forbidding scraps forms the eastern boundary of the district. In the centre are the transverse chains of small hills which project from the main range and develop higher elevations in the middle portion, where they are parallel to each other and as a result the numerous streams which flow through the valleys have formed parallel drainage pattern. On the slopes of these hills are situated rice and workas land. All the 14

rivers in the district flow from east to west to join the Arabian sea. Out of these the more important are i) Savitri (which forms natural boundary between Ratnagiri and Kolaba district and is navigable about 35 kms. in Ratnagiri district). (ii) Washishti (having length of 48 kms. out of which 40 kms. are navigable). (iii) Jagbudi (having a length more than 40 kms.). (iv) Shastri (having a length of 64 kms.) (v) Ratnagiri (length 64 kms). Besides these, there are other rivers namely i) Bao, ii) Mushkundi, iii) Jaitapur, iv) Waghote, v) Saigad, vi) Achare, vii) Kalawali, viii) Karli and ix) Terakhol. Majority of the rivers receive their water from the Sahyadrian main range. In length they seldom exceed 64 km. Their intensely seasonal regime is yet another limitations to their economic use. Parts of these rivers are tidal. In addition to these main rivers, the district has numerous small creeks and back waters all along the coast line. More important are the Kelshi creek (between Bankot and Suvarnadurga), Ade creek (two miles in the south of Kelshi), Palshet and Borya bays (between Washishti and Shashtri) and Kalabadevi and Redi creek. All these creeks afford anchorage to small crafts in fair weather and have a local importance in trade and fisheries.

#### Soils

1.5 The predominant soils in the district are laterite soils which vary in colours from bright red to brownish red owing to the preponderance of hydrated iron oxides. They are always acidic and fairly well supplied with nitrogen and organic matter. Their texture is loamy and depth varies from one foot to three feet. They are porous not retentive of moisture and are found all over the district except in Mandangad tahsil. The soils are found in several grades. The main grades are i) Soils useful for paddy cultivation ii) Warkas soils useful

for Cashewnut, mangoes and ragi cultivation, iii) Soils useful for coconut iv) Coastal alluvium, useful for coconut and arecanut gardens v) Salty lands locally known as Khar or Khajan.

#### CLIMATE:

1.6 The climate of the district though moist is generally healthy. There are three seasons viz. i) Summer (March to May), ii) Monsoon (June to October) and iii) Winter (November to February). Being a coastal district the variation in temperature during the day and through the seasons is not large. Maximum temperature at the coast rarely goes beyond  $38^{\circ}\text{C}$ . but in the interior it seldomly crosses  $40^{\circ}\text{C}$ . Owing to the proximity of the Sea the district is very humid and the relative humidity seldom goes below 50 percent.

#### RAINFALL:

1.7 Rainfall is not uniform in all parts of the district. It increases rapidly from the coast towards the western Ghats on the eastern border of the District. In and near the Ghats rainfall is very heavy. Amboli gets the heaviest rainfall in the district. Practically the entire annual rainfall occurs during the months from June to October. July is the month with heaviest rainfall. During the year 1974, there was maximum rainfall of 4,622 mms. at Tahsil centre Sawantwadi. Three other Tahsils namely Kankawali, Sangameshwar and Dapoli also received rainfall above 4,000 mms. Eight tahsils viz. Ratnagiri, Mandangad, Khed Chiplum Lanja, Rajapur, Kudal and Vengurla received rainfall ranging between 3,000 to 4,000 mms. Only 3 tahsils viz. Guhagar, Malwan, and Devgad received rainfall between 2,000 to 3,000 mms.

#### AREA:

1.8 The total geographical area of the district is 13,040 sq.kms. The district stands tenth in area in Maharashtra State. There were no territorial changes during 1974-75. Considering areas of each Tahsil

Sawantwadi tahsil has not the maximum area (1,336.2 sq.kms.) in the district, while Vengurla tahsil has the minimum area (327.9 sq. kms.)

#### FORESTS:

1.9 Total area under forests in the district is 397.28 sq. kms. and except 0.57 sq. kms. maintained by Revenue Authorities, all area is under the control of Forest Department. Out of total forests area 21.32 sq. km. are reserved and the rest of the area is unclassified.

#### MINERALS:

1.10 The district exports some of the important minerals. Manganese and Iron are found at Redi in Vengurla Tahsil and in some parts of Sawantwadi tahsil. Bauxite is found in the vicinity of Harnai, Vijaydurg and Devgad, Mica, Clay, Sand, Silica, asbestos, glass sand and copper are found in some parts of the district.

#### POPULATION:

1.11.1 The total population of the district as per 1971 census is 19,90,583 (8,86,995 males and 11,03,588 females). The density of population per sq. km. being 153 as against 164 for Maharashtra State. The district ranks ninth in Maharashtra State as far as population is concerned. Within the tahsils the density of population per sq. km. ranges from 257 (Vengurla tahsil) to 115 (Sawantwadi tahsil). As far as Urban towns are concerned the density varies from 3,580 (Ratnagiri town) to 250 (Shirgaon Town in Chiplun Tahsil) the average for the district being 1,085. Tahsils viz. Guhagar, Mandangad, Sangaeshwar, Lanja, Kankawali, Kudal and Devgad has no urban areas. In rural area the density of population varies from 219 (Vengurla tahsil) to 103 (Sawantwadi tahsil), the average rural density of population for the district being 142 per sq. km.

1.11.2 No. of females per 1000 males (i.e. sex ratio) is observed to be the higher (1,244) in Ratnagiri district than the state average which is 930. The same position is also observed in Rural and Urban

areas. It may be remarked that Urbanisation of this district is poor as will be seen from the percentage of Urban population to the total population which is 8.40 percent, as against 31.17 percent in Maharashtra State. This ratio in Ratnagiri district is the lowest in Maharashtra State. The continuous migration from this district to cities like Bombay is the main cause for both abnormal sex ratio as well as low Urbanisation. Migration has also affected the growth rate <sup>of</sup> population of the district as will be seen from the last two decadal variation viz. 1951-61 and 1961-71 which are 6.73 and 8.94. These decadal variations are the least in the State of Maharashtra. Corresponding decadal variations for Maharashtra State are 23.60 and 27.45 respectively.

1.11.3 The increase in percentage of literacy as per 1971 census in the decade 1961 to 1971 is from 28.5 to 39.6. The rate of increase in percentage of literates in Males, Females or Rural and Urban is more or less the same. Maximum population viz. 87 percent is Hindu by religion while Muslims are 6.3 percent and Buddhist (including Neo Buddhist) are 5.6 percent. Out of total population the schedule caste and schedule tribes are nearly 2.7 percent while in Maharashtra State the same percentage is 11.9.

#### :ADMINISTRATIVE SET UP:

##### STATE SECTOR:

1.12.1 The Collector is in charge of general administration law and order, <sup>treasury</sup>, land revenue and civil supplies. The district is divided into 4 Sub-Divisions. A sub-Divisional Officer is in charge of each Sub-Division. The District is further divided into 15 tahsils. Tahsildar is in charge of each tahsil. The Tahsildars are assisted by Circle Inspectors and talathis. Besides Revenue administration, there are district offices from different department for the departmental work. Table no. 1.12.1 show distribution of tahsils in each sub-division.

Sr. No.	Sub - Division	Tahsil
1	2	3
1.	Dapoli	1. Dapoli 2. Mandangad
2.	Chiplun	1. Khed 2. Guhagar 3. Chiplun 4. Devrukh (Sangameshwar)
3.	Ratnagiri	1. Ratnagiri 2. Lanja 3. Rajapur 4. Deygad
4.	Sawantwadi	1. Kankawali 2. Malwan 3. Kudal 4. Vengurla 5. Sawantwadi.

#### ZILLA PARISHAD:

1.12.2: The Zilla Parishad, Ratnagiri was established in May 1962

: Under the Ratnagiri Zilla Parishad, there are 15 Panchayat Samities with their jurisdiction identical with revenue tahsils except the areas administrated by the Municipal Councils. The Zilla Parishad covers whole rural population and also 26.67 percent of the Urban Population. The remaining i.e. 73.33 percent of Urban population being covered by Municipal Councils as per 1971 Census.

#### MUNICIPAL COUNCILS:

1.12.3 There are in all 7 municipal Councils at the following places. i) Khed, ii) Chiplun, iii) Ratnagiri, iv) Rajapur, v) Malwan vi) Vengurla and vii) Sawantwadi. The population of all the seven municipalities together is 1,22,590 (61.16% of total population of the district). The maximum being Ratnagiri Municipal area 37,551 and minimum in Khed municipal area (8,823). Besides these 7 municipalities, 8 other places viz. Harnai, Dabhol, Dapoli Camp, Pophali Shirgaon, Alrea, Nate and Redi have been classified as Urban places

in 1971 census.

SPECIAL FEATURES:

- 1.13.1 The District is one of the marine districts of the State with the coastal length of about 320 kms. which is more than half of the coastal length of Maharashtra State. Ratnagiri Waters is rich in prawns. About 1,300 Tonnes of prawns are exported abroad annually.
- ii. Mangoes and cashewnuts are important cash crops of this district. They are exported abroad.
  - iii. The Koyana Hydro Electric Project which generates electricity at Pophali is situated in Chiplun Tahsil.
  - iv. The district lacks in rail communications facilities but one all weather port is being developed at Ratnagiri. At present there are 18 seasonal ports in this district.
  - v. The district is industrially backward hence the migration of 'working force' population to place like Bombay is heavy. As a result of this, receipt of money orders is comparatively larger than in any other district of the Maharashtra State. (This is popularly known as 'money order economy').

## CHAPTER - II

### EXPLANATORY NOTE.

#### PURPOSE AND SCOPE:

2.1 In this chapter short notes on the tables presented in the Abstract part are given indicating the source of the data, limitations if any etc. The tables relate to various Socio Economic aspects of the district for the latest years. There are in all 85 tables of the abstract, divided into 13 groups as discussed below.

#### I. AREA AND POPULATION:

2.2 There are 7 tables in this group and all these tables are based on data of 1971 census. The six tables (i.e. 1 to 5 and 7) show tahsilwise information about area and population, decadal variation since 1951, classification of villages and Towns according to population groups and distributions of population according to workers and non workers, population of scheduled castes schedules tribes and new buddhists. The distributions of population according to (i) Age group, and (ii) Religion for the district as a whole has been presented in table. no. 6.

#### II. CLIMATE AND RAINFALL:

2.3 Only two tables are included in this group. Table no. 8 gives monthwise rainfall data in respect of fifteen centres (which are Tahasil Head quarter) in the District for the year 1974 and table no. 9 provides detailed information of temperature data of 3 centres viz. Ratnagiri, Harnai, and Devgad for the year 1974.

#### III. AGRICULTURE:

2.4 12 tables are provided in this group. The first six tables 10 to 15 give provisional data for the year 1972-73 and 1973-74 regarding land utilisation, crop pattern, yield rate and outturn of principal crops, sourcewise and cropwise area irrigated, utilisation of irrigation wells. Data regarding yield rate and

production is given for the District as a whole which is based on the fully revised provisional data for the year 1972-73 and for the year 1973-74 it is based on revised final forecast. While the data in other tables is given tahsilwise. In table no. 16 Minor Irrigation Works (completed) and area irrigated has been shown for the year 1973-74. There are no major and medium irrigation projects in the district and hence information in table no. 17 is 'nil' Information regarding Agricultural Wage rates during the months of 1974 at selected three centres Harnai, Sangameshwar and Shiroda are given in Table no. 18. Table no. 19 indicates the number of Agricultural Implements in each tahasil as per 1972 live stock census. The remaining two tables give data regarding famine and scarcity during 1974-75 and history of scarcity for the five years from 1970-71 to 1974-75.

#### IV. ANIMAL HUSBANDARY, FORESTS AND FISHERIES:

2.5 This group contains five tables out of which table no. 22 relates to tahsilwise livestock data as per 1972 livestock census. Table no. 23 provides information about Veterinary facilities available in each Tahsil of the district for the year 1974-75 while table no. 24 gives livestock mortality according to diseases in the district as a whole. Table no. 25 gives information about animals slaughtered during 1974-75 in the recognised slaughter houses in the District. Table no. 26 is divided in 3 parts. Table no. 26(a) and 26(b) give information relating to forest area and major and minor forest produce in the district for 1974-75. Fisheries data regarding quantity of fish brought for curing, salt issued and fish removed in 1973-74 and 1974-75 is given in table no. 26(c).

#### V. EMPLOYMENT, INDUSTRY, MINING AND ELECTRICITY:

2.6 Information for the district as a whole is presented in 9 tables under this group. First three tables no. 27, 28 & 29 relates

to Factory Statistics for the year 1973. While data from Annual Survey of Industries 1971 is presented in table no. 30. Table no. 31, 32 provides Employment Exchange Statistics for the year 1974-75 while employment in different industries as on 31st March 1975 is shown in table no. 33. In table nos. 34 and 35 consumption of electricity in 1974-75 and towns and villages electrified as on 31st March 1961, 1966, 1970, 1973, 1974 and 1975 has been supplied.

#### VI. CO OPERATION:

2.7 Total eight tables i.e. table no. 36 to 43 are included in this group. Data regarding Co-operative activities during 1974-75 viz. number of Co-operative Societies of different types, their membership, share capital, working capital, loan advanced, no. of banks and loans advanced by them is given in the first four tables i.e. 36 to 39 while Statistics relating to operations of central and primary co-operative marketing societies, other co-operative societies is given in table no. 40 and 41. There is no regulated market in the district and hence table no. 42. is blank. The table no. 43 provides data regarding registered money-lenders and loan advanced by them during 1974-75.

#### VII. MEDICAL AND HEALTH:

2.8 In all 5 tables are included in this group. Table no. 44 gives data on Medical facilities through public and public-aided bodies in each tahsil during 1974. The tahsilwise number of births and deaths registered in Ratnagiri district during 1974 is presented in table no. 45 while no. of deaths due to important causes during the year 1971 to 1974 is shown in table no. 46 for district as a whole. Table no. 47 gives tahsil wise vaccination statistics and cholera inoculation in the year 1974 while family planning statistics is given in table no. 48. for the year 1974-75.

### VIII. EDUCATION:

2.9 The statistics relating to education is presented in table no. 49 to 55. The table no. 49 shows the tahsilwise literacy in rural and urban areas according to 1971 census. Data about education at levels of rural (Tahsilwise) and Urban population (district as a whole) has been collected for 1961 census and given separately in table no. 50 and 51. In table no. 52 information regarding educational institutions, pupils and teachers for the year 1973-74 is presented for the district as a whole. The tables (no. 53 and 54) provide information regarding backward class enrolment and the number of beneficiaries and amount of backward class concession of free education during 1973-74, while table no. 55 gives information about expenditure on primary education by way of grant-in-aid to local bodies during 1974-75.

### IX. TRANSPORT AND COMMUNICATIONS:

2.10 In all seven tables are included in this group. There is no railway in the district and hence table no. 56(a) is blank. Table no. 56(b) gives data regarding ports. Table no. 57 provides road length according to category and surface as on 31-3-1975. Data of motor vehicles in operation as on 31-3-1975 in Thane Region and operational statistics of Nationalised Road Transport during 1974-75 has been presented in tables no. 58 and 59 respectively, while Traffic census data for May, 1973 is shown in table no. 60. The information of communication facilities viz. posts, telegraphs and telephones for the years 1961-62, 1965-66 and 1970-71 to 1974-75 is supplied in table no. 61, while rural broad-casting information as on 31-3-1975 is presented tahsilwise in table no. 62.

### X. LOCAL BODIES:

2.11 The 4 tables no. 63 to 66 in this group give income and

expenditure of local bodies such as village panchayats, Zilla Parishad and Municipal Councils. First table gives at a glance income and expenditure of village panchayats, Zilla Parishad and Municipal council for the years 1965-66 and 1968-69 to 1974-75. Next table gives panchayat samitiwise detailed breakup of income and expenditure of village panchayats during 1974-75. Table no. 65 is subdivided in three parts to give headwise information of receipts, Govt. grants and expenditure for the years 1973-74 (actuals) 1974-75 (revised) and 1975-76 (estimates) of Zilla Parishad. Table no. 66 gives sub-headwise income and expenditure of municipal for the year 1974-75.

#### XI. PLAN AND COMMUNITY DEVELOPMENT:

2.12 Total expenditure on all the district level schemes during Fourth Five Year Plan and during 1974-75 under different sub-heads and their physical achievements are supplied in table nos. 67 and 68. The other three tables (no. 69, 70 and 71) present activities of Community Development Programme viz. Coverage, expenditure incurred upto 1974-75 according to different stages of blocks and physical achievement of 1974-75.

#### XII. PRICES:

2.13 Three tables are included in this group. There are no Agricultural produce market committees in the district and hence table no. 72 is blank. The monthly averages of weekly prices of important commodities during 1974 at district Head quarter have been presented in table no. 73., Table no. 74 gives consumer price index number (revised series) for working class at Bombay and Jalgaon centres for the year 1974-75.

#### XIII. MISCELLANEOUS:

2.14 There are in all 11 tables in this group i.e. Table no. 75 to 85. The first 10 tables supply general official statistics

regarding police force and crime, work disposed in civil and criminal courts, cinema (Tahsilwise), Joint Stock Companies, Banking Offices, Insurance policies, collection of small savings, tahsilwise land revenue collection, tahsilwise printing presses and News papers and periodicals published. The last table gives trends in selected indicators based on data presented in table no. 1 to 84.

CHAPTER- III

ANALYTICAL REVIEW OF SELECTED TRENDS :

3.1 This chapter is an analytical review of some selected Socio Economic ~~Indicators~~ Indicators furnishing a comparison of the achievements in different ~~in~~ tahsils over a period of time.

Indicator No. 1 : Percentage of Gross Sown Area to Net Sown Area;

3.2 Table No. 3.2 shows the extent of double cropping in various tahsils of Ratnagiri District. It will be seen from the table that over a period of twelve years there is hardly any change in double cropping. During 1973-74, only in three tahsils viz. Sawantwadi, Vengurla and Malwan double-cropped area was more than 5% of the area sown in other tahsils (except Devgad) it was less than the district average.

Table No. 3.2

Table showing the tahsilwise percentage of gross cropped area to net cropped area in Ratnagiri District in 1961-62, 1971-72, 1972-73 and 1973-74.

Indicator No. 2: Productivity of important crops.

3.3 Yield per hectare of important crops in Ratnagiri District is supplied in table no. 3.3 for the years 1961-62, 1971-72, 1972-73 and 1973-74. It is revealed from the table that yield rates of all the commodities have increased during the year 1973-74 as compared to the yield rates during 1972-73.

Indicator No.3 Value of Agricultural Production.

3.4 On the basis of whole sale prices prevailing in the district the value of production of important crops is estimated for the year/ 1971-72, 1972-73 and 1973-74. During the year/reference under the out. turn of crops was more than that of the year 1972-73.

Indicator No.4 : Percentage of net irrigated area to net cropped area.

3.5. Irrigation is practiced mostly in southern part of the district while in northern part it is marginal only. Table No. 3.5 shows the percentage of net irrigated area to net cropped area for the year 1961-62 and 1971-72 to 1973-74.

During the year under reference, the percentage for district as a whole is considerably decreased as compared to percentage :

during 1961-62, 1971-72 and 1972-73. In case of Ratnagiri, Mandangad and Sangameshwar tahsils the percentage has slightly increased in 1973-74 when compared to 1972-73 while in other tahsils it has decreased.

Indicator No.5: Changes in cropping pattern.

3.6 Cropping pattern in the district for the years 1961-62, 1972-73 and 1973-74 is given in table no. 3.6. The table shows that over a period of 12 years percentage of area under total food crops as well as pulses and cereals to total cropped area has slightly decreased. Even though the percentage of area under total non food crops seems to have slightly increased when compared to 1961-62, it has decreased marginally than earlier year. viz. /1972-73.

It will be seen that, in general, there is hardly any change in the cropping pattern during last 12 years.

Indicator No. 6: Percentage of net sown area to total geographical area.

3.7 Ratnagiri District has comparatively large tracts of barren and unculturable and fallow lands. As a result, the ratio of net cropped area to total geographical area is much less than the ratio for State as a whole. This comparison is shown in Table No. 3.7

Table no. 3.7.

3.	Percentage of net cultivated area to total geographical area.	26.81	52.21

Indicator No. 7: Increase in Agricultural credit outstanding dues etc.

3.8 Loans advanced by Primary agricultural credit Societies, outstanding amount at the end of the year and their ratio per member indicate the extent of financing by Co-operatives. These figures are given in table No. 3.8. Loans advanced during 1974-75 amounted to Rs. 124.32 lakhs i.e. Rs. 20 lakhs more than that in 1973-74 as against the additional membership of only 4,600. As a result advance per member increased from Rs. 53 during 1973-74 to Rs. 62 during 1974-75. Outstanding amount per member has also increased during 1974-75.

Indicator No. 8. \* Agricultural Wage Rates:

Annual averages of agricultural wage rates for the year 1972, 1973 and 1974 at three different centres viz..Harnai(tahsil Dapoli), Navadi (Tahsil Sangameshwar) and Shiroda (Tahsil Vengurla) are given in table no, 3.9 . The agricultural wage rates during 1974 in respect of field labours have increased at all centres except that of female at Shiroda. But those agricultural wage rates of females at Shiroda still remain at higher level than that of wages rates of female at Harnai and Navadi centres. The wage rates of carpenters in 1974 maintained the same level as that in

1973 except the wage rate of carpenter at Harnai which increase from Rs. 9.25 to Rs. 10.00.

Indicator No. 9 : Ratio of cultivable area per pair of working bullocks.

3.10 Cultivable area per pair of bullocks in each tahsil and for the district as per 1972 livestock census is given in table No. 3.10. This ratio is highest in Sawantwadi tahsil followed by Khed tahsil. In Guhagar, Dapoli, Lanja, Rajapur, Kudal, Vengurla and Devgad it is lower than the district ratio. In rest of the tahsils, it is near about the district ratio.

Indicator No. 10. Poultry as compared to population.

3.11 Table No. 3.11 shows Tahsilwise ratio of poultry per thousand human population as per 1966 and 1972 livestock census. It will be observed that poultry per thousand human population increased from 613 in 1966 to 619 in 1972 in the District. This increase is notable in Guhagar, Mandangad, Khed and Devgad Tahsils, while there is considerable decrease in Sangameshwar, Lanja, Sawantwadi and Malvan tahsils. In rest of the tahsil the variation in the ratio is neagre one.

Indicator No. 11 : Per capita consumption of electricity.

3.12 The consumption of electricity according to various uses as well as per capita consumption is given in table No. 3.12. It will be seen from the table that the percentage consumption of electricity for industrial purpose has consistently increased while this percentage in respect of other uses shows fluctuation over the years from 1971-72 to 1974 - 75. The per capita consumption of electricity has increased from 7.89 K.w.h. in 1971-72 to 13.74 k.w.h. in 1973-74.

Indicator No. 12 : Increase in number of candidates enrolled in Employment Exchange and vacancies notified.

3.13 The number of candidates registered with the Employment Exchange shows an almost continuous decline since 1969-70 to 1972-73, but there after there is an increasing trend . vacancies filled in through Employment Exchange were maximum during 1970-71 and lowest during 1974-75.

3.15 In table no. 3.15, number of pre-primary secondary and higher institutions with their enrolment is given for the years 1961-62, 1972-73 and 1973-74. Enrolment during 1973-74 in all types of institutions has increased except that in pre-primary schools when compared to enrolment during 1972-73. There is an increase in number of primary and higher institutions during the year 1973-74.

4.2 The Government of Maharashtra has accepted the principle of decentralised implementation of plans in the third five year plan. A large number of schemes were categorised as District Level Schemes. In order to have greater involvement of local people and representation of their aspirations, the Government of Maharashtra adopted 'District as a unit of Planning' for the fifth Plan. The main object of district planning is (i) the reduction of inter-district and intra-district imbalances (ii) To ensure rational utilisation of resources and (iii) proper co-ordination and implementation of development programmes.

4.3 The organisational machinery set up in each district for the formulation, monitoring and overseeing of the District Plan originally consisted of (a) the District Planning Board (b) District Development and Consultative Council. These two bodies have subsequently been amalgamated to form a single District Planning and Development Council which is presided over by the designated Minister of the District. The Chief Executive Officer, Zilla Parishad is to function as the member Secretary of this body. To assist council in its day - to - day activities, a small executive committee is appointed under the Chairmanship of designated Minister of District. The Deputy Chief Executive Officer (Planning) of the Zilla Parishad functions as the secretary of

the committee. For the Vth Five Year Plan of Ratnagiri District a ceiling of Rs. 50.08 crores was indicated to District Planning and Development Council. This amount has been determined for the various districts on the basis of the specified methodology. The share of Ratnagiri district was decided on the following criteria.

Criteria	Rs. in crores.
1. Allocation on population basis	28.44
2. Scheduled Cast/Scheduled Tribes/ Buddhist population	1.06
3. Urban population	0.64
4. Geometric mean of Agricultural backward- ness per hectare and per worker	3.18
5. Road and railway length per sq. km. and per lakh of population	1.94
