## CHAPTER I

### LOCATION:

1.1 Ratnagiri District is a part of Konkan strip running north to south along the western coast of India and lies between  $15^{\circ}36'$  to  $18^{\circ}50'$  north latitude and  $73^{\circ}50'$  to  $74^{\circ}36'$  east longitude. The district has a north south length of about 280 kms. (180 miles) and average eastwest extension at about 64 kms (40 miles) except in its extremities, which taper to join the coast line. It has a coast line of about 320 kms. (200 miles).

### BOUNDARIES:

1.2 The district is surrounded by Sahyadri hills and beyond the Sahyadris, Satara and Kolhapur District in the east, Kolaba District in the north, Arabian Sea in the West and Goa in the south.

### TOPOGRAPHY:

1.3 Considering the Physical features, the district can be divided into three parts (i) Hilly area of the Sahyadris and its off shoots (ii) the plateau surfaces which are used for cereal crops like rice and ragi (iii) coastal plains where coconut and arecanut gardens and fishing are the main sources of livelihood.

### HILLS AND RIVERS:

1.4 Over 85 percent of the land surface in Ratnagiri district is hilly. The main range of the Sahyadris consisting of steep and forbidding scraps forms the eastern boundary of the district. In the centre are the transverse chains of small hills which project from the main range and develop higher elevations in the middle portion, where they are parallel to each other and as a result the numerous streams which flow through the vallies have formed parallel drainage pattern. On the slopes of these hills are situated rice and workas lands. The rivers originate from the Sahyadri ranges and have reached their base level of erosion within a

distance of 20 kms. All the 14 rivers in the district flow from east to west to join the Arabian Sea. Out of these the more important are i) Savitri forms natural boundry between Ratnagiri and Kolaba Districts and is nabile about 35 kms. in Ratnagiri Dist. ii) Vashisthi with a length of about 48 kms is navigable upto 40 kms. iii) Jagbudi is more than 40 kms. long. The length of iv) Shastri and v) Ratnagiri is 64 kms. each. Besides these, there are other rivers namely i) Bao, ii) Muchkundi, iii) Jaitapur, iv) Waghotan, v) Jaigad, vi) Achare, vii) Kalawali, viii) Karli and ix) Terekhol. Majority of the rivers receive their water from the Sahyadrian main range. In length they seldom exceed 64 kms. Their intensely seasonal regime is yet another limitation to their economical use. Parts of these rivers are tidal. In additions to these main rivers, the district has numerous small creeks and back waters all along the coast line. More important are the Kelshi Creek lying between Bankot and Suvarnadurg, Ade creek is two miles in the south of Kelshi, Palshet and Borya bays are between Vashisthi, Shastri and Kalbadevi and Redi creeks. All these creeks afford anchorage to small crafts in fair weather and have a local importance in trade and fishing.

#### SOIL:

1.5 The predominant soils in the district are laterite soils which vary in colours from bright red to brownish red owing to the preponderance of hydrated iron oxides. They are always acidic and fairly well supplied with nitrogen and organic matter. Their texture is loamy and depth varies from one foot to three feet. They are porous not retentive of moisture and are found all over the district except in Mandangad Tahsil. The soils are found in several grades. The main grades are i) Soils useful for paddy cultivation, ii) Workas soils useful for Cashewnuts, Mangoes and ragi cultiva-

tion iii) Soils useful for coconut, iv) Coastal alluvium useful for coconut and arecanut gardens v) Salty lands locally known as Khar or Khajan.

#### CLIMATE:

1.6 The climate of the district though moist is generally healthy. There are three seasons viz. i) Summer (March to May), ii) Monsoon (June to October) and iii) Winter (November to February). Being a coastal district the variation in temperature during the day and through the seasons is not large. Maximum temperature at the coast rarely goes beyond 38°C. and in the interior it seldom crosses 40°C. Owing to the proximity of the sea the district is very humid and the relative humidity seldom goes below 50 percent.

#### RAINFALL:

1.7 Rainfall is not uniform in all parts of the district. It increases rapidly from the coast towards the Western Ghats on the eastern border of the district. In and near the Ghats rainfall is very heavy. Amboli gets the heaviest rainfall in the district. Practically the entire annual rainfall occurs during the months from June to October. July is the month of heaviest rainfall. During the year 1975, there was maximum rainfall of 5596 mms. at tahsil Sawantwadi. Five other tahsils namely Kankawali, Khed, Lanja, Mandan-gad and Dapoli also received rainfall above, 4000 mms. All the remaining tahsils received rainfall ranging between 3,000 to 4,000 mms.

#### AREA:.

1.8 The total geographical area of the district -- is 13,040 sq.kms. The district stands tenth in area in Maharashtra State. There are no territorial changes during 1975-76. Considering areas covered by tahsils, Sawantwadi tahsil has got the maximum area (1,336.2 sq. km.) in the district, while Vengurla Tahsil has the minimum area (327.9 sq. kms.)

### FOREST:

1.9 Total area under forests in the district is 425.49 /kms.<sup>sq.</sup> out of this 28.79 /kms.<sup>sq.</sup> is maintained by Revenue Authorities and the rest of the area is under the control of Forest Department. Out of the total forest area 49.52/kms.<sup>sq.</sup> areas reserved and the rest of the area is unclassified.

### MINERAL:

1.10 Ratnagiri district is endowed with different types of several minerals of economic importance. Manganese and Iron ores are found in the southern part of Ratnagiri district at Redi, Banda, Tirawade, Aros etc. Chromite occurs at Kankawali, Wagde and Janavali in Kankawali tahsil. The reserves of chromite in Ratnagiri district are more than 70,000 tonnes. Ilmenite is found in the beach sands along a 40 kms. stretch from Purnagad to Malgund near Ratnagiri. Ilmenite is an ore of Titanium metal. Ratnagiri district is also blessed with huge deposits of silica sand and annually thousands of tonnes of silica sand is being despatched to places like Bombay, Pune, Kolhapur, Belgaon, Ichalkaranji etc. There are many good deposits of clay in the district. There are also occurrences of mica, Felspar, Steatite, Quartz, copper ore, asbestos, limestone and radio active minerals like uranium oxide in some parts of Ratnagiri district.

### POPULATION:

1.11.1 Total population of the district as per 1971 census is 19,90,583 (8,86,995 males and 11,03,588 females). The density of population per sq. km. is 153 as against 164 for Maharashtra / State. According to population the district ranks ninth in Maharashtra State. Within the tahsils the density of population per sq. km. ranges from 257 (Vengurla tahsil) to 115 (Sawantwadi tahsil). As far as Urban towns are concerned the density varies from 3,580 (Ratnagiri town) to 250 (Shrigaon town in Chiplun Tahsil). The

average for the district is 1,085 tahsils viz. Guhagat, Mandangad, Sangameshwar, Lanja, Kankawali, Kudal and Devagad have no urban areas. In rural areas the density of population varies from 219 (Vengurla tahsil) to 103 (Sawantwadi tahsil). The average rural density of population for the district is 142 per sq. km.

1.11.2: No. of females per 1,000 males (i.e. sex ratio) is higher (1244) in Ratnagiri district than the state average, which is 930. Similar is the position in Rural and Urban areas. Very little attention is given towards Urbanisation of this district. It may be seen from the percentage of Urban population to the total population, which is 8.40 percent, as against 31.17 percent in Maharashtra State

The continuous migration from this district to the cities, like Bombay is the main cause for both abnormal sex ratio as well as low Urbanisation. Migration has also affected the growth rate of population of the district as will be seen from the last two decadal variations viz. 1961-61 and 1961-71 which are 6.73 and 8.94. These decadal variations are the lowest in the state of Maharashtra. Corresponding decadal variations for Maharashtra State are 23.60 and 27.45, respectively.

1.11.3 The percentage of literacy has gone up from 28.5 in 1961 to 39.6 in 1971. The rate of increase, in percentage of literates is more or less the same whether males, females, rural or urban. Maximum population is of Hindus viz. 87 percent and Buddhist (including New Buddhist) are 5.6 percent. Out of the total population the schedule caste and schedule tribes are nearly 2.7 percent, while it is 11.9 percent in Maharashtra State.

#### AGRO INDUSTRIES:

1.12 Agricultural products in Ratnagiri district are paddy, ragali, oilseeds, Ground nut, Sugar cane, Cashewnuts, Coconut, betelnut and Kokan. Products of economic importance are paddy, mango, cashewnut,

Coconut, betelnut and Kokam. In addition to this, Major forest products are Bamboo, Hirda, Building wood, Kattachu (Kat), grass and other Ayurvedic Vanaspati. Ratnagiri being a hilly district land useful for Agricultural cultivation is comparatively less.

Ratnagiri District is famous for its quality mangoes. Best quality is known as Alphansoo. This is a seasonal product and its yield per annum is estimated at 23 thousand tons. It gives a seasonal employment to local people, such as, collection, preparation of wooden boxes, marketing and transporting. Recently mangoes are exported in substantial quantity in raw fruit form and also canned products. There are about 17 canning units engaged in production of canned mangoes, pickles and chatanis.

Other important agricultural products are coconut and betelnuts. Industries based on this are 1) selling of Green Coconut, Dried coconut and betelnuts. 2) Coir industries manufacturing coir rope, mattings and carpets. Coconut husk is an important raw material for the coir industry. There are 3 coir units functioning in the district. Betel-nut is converted into cented supari and sold all over Maharashtra. Three units are engaged in the preparation of cented supari. Cashewnut from this district fetches foreign exchange. There are 25 cashewnut factories. Out of this 14 are registered under S.S.I. rules. Systematic Cashewnut plantation has been taken up by Govt. recently and yield is expected to increase in the near future. Kokam fruits are also collected seasonally and processed in canning factories.

Paddy straw is useful for manufacturing paper and board. Recently one unit has come up in Chiplun and some more units are under planning and would be dependentt partially on out side sources. There are about 1100 rice mills in the district.

Plantation of Citreholla has been tried at some places

and two units are already under trial for manufacturing Citrenolla oil. At present there are 40 saw mills which are registered under S.S.I. rules in the district. There is only one Agricultural tool manufacturing unit at Sawanwadi.

SPECIAL FEATURES:

- i. Ratnagiri is one of the marine districts of the state. The coastal length is about 320 kms. which is more than half of the coastal length of Maharashtra State. The sea water is rich in prawns. About 1300 tons of prawns are exported abroad annually.
- ii. Mangroves and cashewnuts are important cash crops of this district. They are exported abroad.
- iii. Koyana Hydro Electric Project which generates electricity at Pophali is situated in Chiplun Tahsil.
- iv. Marine Biological Research Station is situated at Ratnagiri and Konkan Krishi Vidyapith at Dapoli.
- v. Iron ore mines at Redi are biggest mechanised mines in the state. During 1975, seven lakh tones of iron ore was exported abroad.
- vi. Kudal is getting industrialised with the establishment of four large engineering, factories, namely, Wymen Garden, Sethi Nippon, Powder Metal and Arvind Metal.
- vii. Ratnagiri has been declared as rural industrial project district.
- viii. The District lacks in Rail communication facilities but all weather port is being developed at Ratnagiri. At present there are 19 seasonal ports in the district.
- ix. The district industrially backward hence migration of population (working force) to cities like Bombay is heavy. As a result of this, receipt of money orders is comparatively larger than in any of the districts of Maharashtra State (This is popularly known as money order economy).

## CHAPTER II

### EXPLANATORY NOTES ON THE SCOPE AND LIMITATIONS OF DATA PRESENTED IN PART II - DISTRICT STATISTICAL ABSTRACT FOR THE YEAR 1975-76.

#### 2.1 PURPOSE AND SCOPE:

2.1 In this chapter, short notes on the tables presented in the abstract are given indicating the source of data, terminology used, limitations if any etc. There are in all 90 tables presented in this statistical abstract. The present issue relates to 1975-76 and detailed tables are given for this year in most of the cases. However, in some cases data for 1975-76 was not available. In such cases, data for the latest available year are given.

#### I. AREA AND POPULATION:

2.2 There are 7 tables in this group and all these tables are based on data of 1971 census. Table no. 1 gives tahsilwise area and population, while its break up into Rural and Urban as well as male and female, and decadal variations since 1951 to-1961 and 1961 to 1971 are presented in table no.2. Tahsilwise classification of villages and towns according to population ranges is given in table nos. 3 and 4, respectively. Distribution of population according to workers and non-workers, separately for each tahsil and according to age groups and religions is shown in table nos. 5 and 6, respectively. Table no. 7 gives tahsilwise distribution of scheduled castes, scheduled tribes and Neo-buddhist in Rural and Urban areas of Dathagiri District. Population figures in table nos. 1, 2, 4 and 7 are given in thousands.

#### II. CLIMATE:

2.3 In this group only two tables are included. Table no. 8 gives monthwise rainfall data in respect of fifteen

centres (Tahsil, Head quarter) in the District for the year 1975. In table no. 9 the maximum and minimum monthly temperature for Ratnagiri, Nargai, Devgad and Vengurla centres is given. Normal rain fall in no. 8 at each centre is based on data of rain fall for the last ten years.

### III. AGRICULTURE:

2.4 . 14 tables are provided in this group. The first six tables 10 to 15 give provisional data for the year 1973-74 and 1974-75 regarding land utilisation, crop pattern, yield rate and out turn of principal crops, sourcewise and cropwise area irrigated, utilisation of irrigation wells. Provisional data about yield per hectare in table no. 12 is based on the fully revised provisional data for the year 1973-74 and information for the year 1974-75 is based on revised final forecast. The area in table no. 10 is given in hundred hectares. Table no. 16 gives availability of under ground water for the year 1975-76. Table no. 17 provides information of minor irrigation works (1974-75) excluding wells. There are no major and medium irrigation projects in the district, hence information in table no. 18 is 'Nil'. The wage rate data for three rural centres are given for all months of 1975 in table no. 19. In table no. 20 information of agriculture holding collected during Agriculture Census 1970 is given. The tahsilwise data of agriculture implements given in table no. 21 is as per 1972 live stock census. There was no famine and scarcity during 1975-76 and hence information in table no. 22 is 'Nil'. Table no. 23 gives revenue circlewise history of scarcity for last six years from 1970-71 in each tahsil of this district.

#### IV. ANIMAL HUSBANDARY, FOREST AND FISHERIES:

2.5 There are six tables in this group, out of which table no. 24 relates to tahsilwise livestock data as per 1972 live stock census. Veterinary statistics, giving availability of medical facilities for live stock cases treated and inseminations done in each tahsil is given in table no. 25 for the year 1975-76. Table no. 26 gives livestock mortality according to diseases in the district as a whole. Information about for recognised slaughter houses is given in table no. 27 for the year 1975-76. Table no. 28 A gives forest area under revenue and forest departments while table no. 28 B gives details of major and minor forest products obtained from these forests. Value of forest products is given in thousand rupees. Table no. 29 is divided into three parts. Table No. 29(A) and 29 (B) provide tahsilwise information about inland and marine fisheries for the years 1974-75 and 1975-76, while in table no. 29 C data regarding the quantity of fish brought for curing, salt issued and fish removed is given for the years 1974-75 and 1975-76.

#### V. EMPLOYMENT, INDUSTRY, MINING AND ELECTRICITY:

2.6 There are in all ten tables in this group. First three tables viz. table nos. 30, 31, 32 relate to Factory Statistics for the year 1974, while in table no. 33 the information collected in Annual Survey of Industries for the year 1971 is given. Industrywise total mandays in table no. 30 are given in hundreds. Table Nos. 34 and 35 provide Employment Exchange Statistics for the year 1975-76. Tahsilwise information about works taken under employment generated and expenditure incurred during the year 1975-76 in Ratnagiri district, is given in table no. 36. Employment in different industries as on 31st March 1976 is shown in table no. 37. The data in table no. 38 is the classification of

consumption of electricity according to uses during 1975-76. Table no. 39 provides information regarding tahsilwise towns and villages electrified and population covered during the year and progressive for the years 1960-61, 65-66, 69-70, 72,73, 73-74, 74,75 and 1975-76. Population figures are in thousands.

#### VI CO-OPERATION:

2.7 Total eight tables i.e. table no. 40 to 47<sup>are</sup> included in this group. Data regarding co-operative activities during 1975-76 viz. number of co-operative societies of different types, their membership, share capital, working capital, loan advance, no. of banks and loans advanced by them is given in the first four tables, while statistics relating to operation of central and primary co-operative marketing societies, other co-operative societies is given in table no. 44 and 45. There is no regulated market in the district and hence table no. 46 is blank. The table no. 47 provides data regarding registered money-lenders and loan advanced by them during 1975-76. All amounts in the above tables are given in thousands.

#### VII. MEDICAL AND PUBLIC HEALTH:

2.8 There are five tables in this group. Information in table no. 48 gives data on medical facilities through public aided bodies in each tahsil during 1975. Figures of patients treated in this table are given in thousands. The tahsilwise data regarding number of births and deaths registered in Ratnagiri district during 1975 is presented in table no. 49 while no. of deaths due to important 1975 is presented/causes during the years 1971 to 1975 is shown in table no. 50, for the district as a whole. Table no. 51 gives tahsilwise vaccination statistics and cholera inoculations in the year 1975 while family planning statistics is given in table no. 52 for the year 1975-76..

#### VIII. EDUCATION:

2.9 The statistics relating to education is presented in table nos. 53 to 59. The table no. 53 shows the tahsilwise literacy

in rural and urban areas according to 1971 census. The figures are given in thousands. Tabel Nos. 54 and 55 indicate Educational level in Rural and Urban areas as per 1961 census. In table no. 56 information regarding educational institutions, pupils and teachers for the years 1974-75, 1975-76 is presented for the district as a whole. The next two tables in the group relate to backward class beneficiaries and economically backward class beneficiaries, respectively for 1974-75 and only district totals are given. The amounts given in these two tables are in thousand rupees.

#### IX. TRANSPORT AND COMMUNICATIONS:

2.10 In all seven tables are included in this group. There is no railway in the district and hence table no. 60-A is blank. Table no. 60-B gives data regarding ports. Table no. 61 provides road length according to category and surface classification as on 31-3-76. Data of motor vehicles in operation as on 31-3-76 in Thane region and operational statistics of Nationalised Road Transport during 1975-76 has been presented in table nos. 62 and 63, respectively. Data of traffic census conducted in May 1973 is presented in table no. 64. The information of communication facilities viz. posts, telegraphs and telephones for the years 1961-62, 65-66, 70-71 to 75-76 is supplied in table no. 65, while <sup>rural</sup> broadcasting information as on 31-3-1976 is presented tahsilwise in table no. 66.

#### X. LOCAL BODIES.

2.11 The four tables nos. 67 to 70 in this group give income and expenditure of local bodies such as village panchayats, Zilla Parishad, and Municipal Councils. First table gives at a glance income and expenditure of village panchayats, Zilla Parishad and Municipal Councils for the years 1965-66 and 1968-69 to 1975-76. The amount in these tables are given in lakhs. Next tables gives panchayat samitiwise detailed breakup of income and expenditure

of village panchayat during 1975-76. Table No. 69 is divided into three parts namely headwise information of receipts, Govt. grants to Zilla Parishad and expenditure of Zilla Parishad for the years 74-75 (actuals) 1975-76 (revised) and 1976-77 (estimated). Table no. 70 gives sub-headwise income & expenditure of Municipal councils for the year 1975-76.

#### XI. PLAN AND COMMUNITY DEVELOPMENT:

2.12 Out of five tables in this group, the first two tables viz. table nos. 71 & 72 give the expenditure and physical achievements of district level plan schemes for the fourth five year plan and during 74-75 and 75-76. Remaining three tables relate to stages of community development blocks as on 31-3-76, total expenditure incurred in each block and physical achievement in these blocks for the year 75-76, respectively. Population figures in table no. 73 are given in thousands.

#### XII. PRICES:

2.13 Three tables are included in this group. There are no Agriculture produce market committee in the district hence table no. 76 is blank. The monthly averages of weekly prices of important commodities collected from selected shops at district head quarter during 1975 have been presented in table no. 77. The <sup>consumer</sup> prices index numbers for 1975-76 (revised series) for working class at Bombay and Jalgaon are given in table No. 78.

#### XIII. MISCELLANEOUS:

2.14 The last group 'Miscellaneous' of the abstract covers official statistics giving information regarding police force, crime statistics, work disposed off in Civil and Criminal courts, Cinema Statistics, Theatres and their seating capacity, No. of banking offices scheduled banks and joint stock companies, Life Insurance Statistics, Performance of Small Savings, tahsilwise collection of Land Revenue and no. of presses and publications. In the last table i.e. table no. 90 some important indicators for the district are worked out from the tables in the abstract, which indicate general trend of development in various sectors over a period of more than two decades.

CHAPTER-III

ANALYTICAL REVIEW OF SELECTED TRENDS:

3.1 This chapter is an analytical review of some selected Socio Economic Indicators furnishing a comparison of the achievements in different tahsils over a period of time.

Indicator No.1 : Percentage of Grss Sown Area to Net Sown Area.

3.1 Table No. 3.2 shows the extent of double cropping in various tahsils of Ratnagiri District. It will be seen from the table that during the period of 14 years there is hardly any changes in double cropping. During 1974-75, only in three tahsils viz. Sawantwadi, Vengurla and Malwan double cropped area was more than 5% of the area sown during 1974-75. In other tahsils (except Devgad) it was less than the district average)

Table No. 3.2

Table showing the tahsilwise percentage of gross cropped area to net cropped area in Ratnagiri District in 1972-73, 1973-74 and 1974-75.

Note : Information for 1973-74, is based on fully revised provisional data and for 1974-75 is based on the revised final forecast.

Indicator No.3 Value of Agricultural Production:

3.4 On the basis of whole sale prices prevailing in the district the value of production of important crops is estimated for the year 1972-73, 1973-74 and 1974-75. During the year under reference.

Output of Rice and Ra-gi was less than that of the year 1973-74 while outturn of Tur and Seasamum was more than that of the year 1973-74 (Table on next page)

Indicator No. 4: Percentage of Net irrigated area to net cropped Area.

3.5 Irrigation is practiced mostly in southern part of the district, while in northern part it is marginal only. Table no. 3.5 shows the percentage of net irrigated area to net cropped area for the years 1961-62 and 1972-73 to 1974-75. During the year under reference, the percentage for the district as a whole is slightly increased as compared to the percentage during 1973-74. In case of Ratnagiri, Mandangad, Sangameshwar, Vengurla and Devgad

Indicator No5. Changes in Cropping pattern:

3.6 Cropping pattern in the district for the years 1961-62, 1973-74 and 1974-75 is given in table no. 3.6. The table shows that over a period of 13 years, percentage of area that over/under total food crops as well as pulses and cereals to total cropped area has slightly decreased. ~~But~~ though The percentage of area under total non food crops has ~~to~~ have slightly increased when compared to 1961-62, ~~it~~ decreased ~~slightly~~ ~~in~~ ~~the~~ ~~year~~ ~~s.e.~~ 1973-74.

Indicator No. 7: Increase in Agricultural Credit Outstanding  
in dues etc.

3.8 Loans advanced by Primary Agricultural Credit Societies outstanding amount at the end of the year and their ratio per member indicate the extent of financing by Co-operatives. These figures are given in table No. 3.8. Loan advanced during 1975-76 amounting to Rs. 142.22 lakhs i.e. 18 lakhs more than that in 1974-75 as against the additional membership of 29,700. Advance per member and outstanding amount per member remains practically the same during 1975-76 as compared with the figures during 1974-75.

Table No. 3.8

Indicator No. 8: Agricultural wage rates:

3.9 Annual averages of agricultural wage rates for the years 1973, 1974 and 1975 at three different centres viz. Harnai (tahsil Dapoli), Navadi (Tahsil: Sanganeshwar) and Shiroda (Tahsil Vengurla) are given in table No. 3.9. The agricultural wage rates during 1975 in respect of field labourers have increased at all centres. During the year under reference, the wage rates of carpenters have also been increased at Navadi and Shiroda Centres while at Harnai Centre these rates remained the same as in 1974.

Indicator No. 9: Ratio of Cultivable area per pair of bullocks:

3.10 Cultivable area per pair of bullocks in each tahsil and for the district as per 1972 Livestock Census is given in table

No. 3.10. This ratio is highest in Sawantwadi Tahsil followed by

Khed Tahsil. In Guhagar, Dapoli, Lanjar, Rajapur, Kankawali, Kudal

Vengurla and Devgad tahsils is lower than the district ration. In

rest of the tahsils, it is near about the district ration.

Indicator No.10: Poultry as compared to population:

3.11 Table No. 3.11 shows tahsilwise ratio of poultry per thousand human population as per 1966 and 1972 livestock census. It will be observed that poultry per thousand human population increased from 613 in 1966 to 619 in 1972 in the district. This increase is notable in Guhagar, Mandangad, Khed and in Sangameshwar, Lanja, Sawantwadi and Malwan tahsils. In rest of the tahsils the variation in the ratio is meagre.

Indicator No.11 : Per. capita consumption of electricity:

3.12 The consumption of electricity according to various purposes is given in table No.3.12. It will be seen from the table that the percentage of electricity consumption for industrial purpose has considerably decreased while this percentage in respect of other uses has considerably increased. The per capita consumption of electricity has increased from 9.51 k.w.h. in 1972-73 to 15.81 k.w.h. in 1975-76.

Indicator No. 12: Increase in number of candidates enrolled in Employment Exchange and vacancies notified;

3.13 The number of candidates registered with the employment exchange shows an almost continuous decline since 1969-70 to 1973-74 but thereafter there is an increasing trend. Vacancies filled in through Employment Exchange were maximum during 1970-71 and lowest during 1974-75. During the year under report the higher number of candidates registered with Employment Exchange are seen since 1961-62.

## C H A P T E R I V

### ANNUAL PLAN 1975-76

4.1 The Government of Maharashtra has accepted the principle of decentralised implementation of plans in the third five year plan. A large number of schemes, were categorised as district level schemes. In order to have greater involvement<sup>ve</sup> of local people and representation of their aspirations, the Government of Maharashtra adopted 'District as a unit of planning' for the fifth plan. The main objects of district planning, is i) the reduction of inter district and intra-district imbalances ii) To ensure rational utilisation of resources and iii) Proper co-ordination and implementation of development programmes.

4.2 The organisational machinery set up in each district for the formulation, monitoring and overseeing of the District Plan originally consisted of (a) the District Planning Board (b) District Development and Consultative Council. These two bodies have subsequently been<sup>a</sup> amalgamated to form a single District Planning and Development Council which is presided over by the designated Minister of the District. The Chief Officer, Zilla Parishad, was to function as the member secretary of this body. This arrangement was changed by the orders of Govt. in Planning Deptt. dated 1-12-75 and Collector of the district is appointed member Secretary with effect from 15-12-1975. The services of the Deputy Chief Executive Officer (Planning) along with the planning cells of Zilla Parishad consisting of one Planning Assistant and one Junior Clerk are also placed at the disposal of District Planning and Development Council. They have to work under Administrative control of Collector and member Secretary of District Planning Development Council. To assist the council in its deliberations, a small executive committee is appointed under the chairmanship of designated Minister of District.

Collector functions as the secretary of this committee. For the Vth Five Year Plan of Ratnagiri District a ceiling of Rs. 50.08 crores was indicated to District Planning and Development Council. This amount has been determined for the various districts on the basis of the specified methodology. The share of Ratnagiri district was decided on the following criteria.

Sr. No.	Criteria	Rs. in crores.
1.	Allocation on population basis	28.44
2.	Scheduled caste/scheduled Tribes Buddhist population	1.06
