CHAPTER-I.
INTRODUCTION.

LOCATION:

1.1. The Nashik District lies between 18.33' and 20.53' North latitude and 73.16' and 75.16' East longitude. It is rhomboidal in shape with the longer diagonal of about 170 Km. from south west north east.

BOUNDARIES:

1.2. It is surrounded by Jalgaon District in the east and the north east, Dhulia in the north, Dang and Surat Districts of Gujarat State on the north west, while Thane District is on the west and south west. Ahmednagar District is to the south and Aurangabad to the south east.

TOPOGRAPHY:

1.3. The District is situated partly in the Tapi basin and partly in the upper Godavari basin. Nandgaon, Kalvan, Baglan, and Malegaon tahsils are drained in the north and north east by the Girna river and its tributaries. These tahsils lie in the Tapi basin and are drained by the Godavari river and its tributaries, while the satmala range of hills provide a fine watershed between the above two basins.

HILLS AND RIVERS:

1.4.1. Hills The Satmala or Ajanta range runs across Nashik District. It stretches east wards from the Sahyadry, particularly from the highest summit viz. Kalsubai with a height of about 1654 metres. The other main system of hills is Sahyadry and its offshoots which run north to south on the western portion of the district. From the main Sahyadrian range, three prominent spurs stretch out to the east. Many of these ranges are mostly rocky, flat topped and regular in height and slope, where as some are conical and irregular.

RIVERS:

1.4.2. The drainage pattern and the trend lines of the -

ridges depends upon the structure of the underlying basaltic rocks of the district. These rocks interbedded with ash layers have developed three sets of master joints, running approximately in directions north south (strike direction) north west, south east and north-north-east, south west. The streams of the region have taken advantage of the weakness of these planes in carving their valleys as is shown by the following features. Streams generally run in one or other of these sets of directions, the bends at the confluences of almost every rill with its main stream are generally rectangular and the courses of most valleys are almost straight.

The district is drained by two main rivers, the Girna and the Godavari and their tributaries. The watershed between these being the Satmala range. Apart from these, there are a number of small Konkani rivers drained westwards into the Arabian Sea.

SOILS:

1.5. There are four kinds of soils in Nashik district, Black (Kali), Red (Lal) Red & black (Koral) and light brown (barad). Except in uplands, Black soil is found mostly in the plain country near beds of rivers such as the Girna and the Musan. Red soil is stiffer and shallower is found chiefly on hill slopes or plateaus. Red and black soil is found occasionally in hilly tracks, Light brown, the lightest of all soils, is found on hilly lands.

CLIMATE:

1.6. The climate of Nashik can broadly be classified as -
1) Monsoon-From June to September 2) Winter-From October to middle of March and 3) Summer From middle of March to middle of June. The district generally experiences salubrious climate. The summer-season is moderately hot and the temperature varies from 36°C to 43°C.

The rainy season is comparatively cooler with sporadic rains - distributed over all the monsoon period. The winter is quite fair and slightly sever during the months of December and January.

RAIN FALL AND SCARCITY:

1.7. The district receives adequate rainfall because of the influence of south west monsoon between June and October. The rain fall is not uniform in all parts of the district. It is more in the region of the Sahyadry. i.e. western part comprising Surgana, Peint, and Igatpuri Tahsils. Monsoon was bountiful in almost all Tahsils in Nashik district during 1976.

AREAS

1.8. The total geographical area of the district is 15,582 Sq. Km. covering 5.08 percent of the total area of the state. According to area Nashik ranks fifth in the State of Maharashtra.

FORESTS:

1.9. The total forest area in the district during 1976-77 is 3,30,861 hectares i.e. 21 percent of total geographical area. The distribution of total forest area according to maintaining-authorities is 7272 hectares under Revenue Department, and 3,23,589 hectares under Forest Department. Out of these forests, 19,898 hectares is protected forest and remaining area is reserved forest. Forest in Nashik district mainly give production of timer & fuel.

ECONOMIC MINERALS:

1.10. Lime nodules and Kankar are found all over the district. The lime nodules yield good lime, slightly hydraulic, but not sufficiently so to be used under water. Mixed with pounded bricks and sand it forms mortar. The trap rocks are very useful for building purposes. Occurance of iron ore is reported near Bhadar in the Surgana tahsil. The deposits consist of magnetite and ilmenite sands occuring in sporadic patches, but it is not

of any economic significance.

POPULATION/DEMOGRAPHY:

1.11.1. AREA AND POPULATION: Nashik district is spread over 15,582 Sq.Km. with 20 towns, 1,628 inhabited villages and 4 deserted villages with its population 23.69 lakhs as per 1971 - Census which is 4.70 percent of the total population of the State. It ranks third as far as population is concerned in the state. It would be seen from table No.1.11.1.that the Surgana Tahsil has got highest number of villages but the population is lowest, while - Malegaon tahsil g has got highest population followed by Nashik-tahsil. It will be seen that Nashik tahsil has got more urban - towns than any other tahsil in the district. The proportion of Urban population (29%) compared favourably with the state average (31 %).

DECADAL VARIATION:

1.11.2. Growth of population in the district during last decade(1961-71) was 27.70 percent as against 27.45 percent of the

state as whole. This means the growth of population of the district was slightly more than state average. The table No. 1.11.2. indicates the decadal variation in population of Nashik-district since 1901. The district witnessed a decrease in population during 1911-1921 by 7.64 percent, which probably due to severe attack of influenza epidemic of 1918.

Table No. 1.11.2.

Decadal variation in population since 1901.

Year	Population (in lakh.)	Decadal percentage variation.
1	2	3
1901	8.20	---
1911	9.16	+ 11.25
1921	8.46	- 7.64
1931	10.09	+ 19.37
1941	11.28	+ 11.69
1951	14.30	+ 26.81
1961	18.55	+ 29.70
1971	23.69	+ 27.70

VILLAGES CLASSIFIED BY POPULATION:

1.11.3. According to 1971 Census, rural population of the district is 16.91 lakhs residing in 1,628 inhabited villages. Highest percentage (3286) of villages are in group having population between 500 to 999 while maximum population (30.83) is accounted for villages in the population group 1,000 to 1,999.

DENSITY:

1.11.4. The density of population of this district is 152 persons per Sq. Km. as against 154 persons for the state as a whole. The corresponding figures for the rural areas only are 111 for the district and 113 for the state. Tahsilwise variation shows that tahsil of Nashik, Malegaon and Niphad are having comparatively higher density of population than the district ratio. The lowest density is 83 persons is Sargana. The density of urban area is 1741 persons per Sq.Km. as against 2554 persons per Sq.Km. for the state as a whole.

SEX RATIO:

1.11.5. Since 1901, the sex ratio(Female for 1000 - males) of the the population of Nashik district varies between 88 984 to 940; while that of Maharashtra varied between 978 to 935 . At each Census since 1911 , the sex ratio in this district has - been higher than the average for the state. Same has been the p~~ate~~ pattern for urban population of the district. The sex ratio is - continuously falling since 1931 and the 1971 figures are the - lowest in last seventy years.

LITERACY:

1.11.6. The district has made much progress in literacy in Nashik district since 1901. During the 4 decades, the improve- ment in literacy is very significant due to compulsory primary- education and grant of concession to the Economically backward- people by the Government. The district ranks fifth in the state in respect of literacy. According to 1971 Census about 36 percent are literate in the district as against 39 percent in the state- as a whole. The literacy in rural areas of the district is - relatively low viz.29% as against 31% of the state as a whole.

Table No.1.11.6.

Year	Percentage Literacy
1901	4.31
1911	4.37
1921	6.36
1931	7.89
1941	15.57
1951	21.40
1961	26.89
1971	36.30

WORKERS AND NON WORKERS:

1.11.7. As per Census, out of the total population of 23.69 lakhs, only 8.98 lakhs(about 38%) are classified as workers. The percentage of workers among males and female are 51 and 24, -

respectively. The percentage of workers which stood at 49 percent at the time of 1961 census decreased to 38 percent in 1971 and - this decrease appears to be due to change in the concept of - workers in 1971. The analysis of livelihood pattern gives some - interesting features of the district. Comparatively very high - proportion of about 72 % workers are engaged in Agriculture alone in the district as against 65 % for the state. About 11 % are engaged in industry, which includes household industry also as - against 13% for the state. While a very small proportion of about 2.44 percent are engaged in transport followed by construction and Mining and quarrying.

POPULATION ACCORDING TO AGE GROUP AND RELIGION:-

1.11.8. As per 1971 Census, maximum population viz. 43.36 percent is in age group 0-14 years, while 5.83 percent were having age more than 60 years. Percentage of Hindus is maximum viz. 84.45 in the district.

SCHEDULED CASTES AND SCHEDULED TRIBES:-

1.11.9. As per 1971 Census, scheduled castes and Scheduled tribes constitute 4.06 percent and 23.69 percent respectively of the total population of the district. The tahsilwise analysis - reveals that the proportion of scheduled tribes is highest in Surgana (96%), followed by Peint (95%), while the lowest proportion is in Yevla (6%). The proportion of scheduled castes is highest in Niphad (6%) followed by Nashik (5%), while the lowest - proportion is in Surgana tahsil (0.57%).

AGRO INDUSTRIES:

1.12. The Economic prospects of a district depends primarily on the availability of natural resources and the way - they are exploited to maximise the production. They can be - determined by observing how efficiently the different factors-

of production play their part in various fields of Economic - activity. Agriculture is the main occupation of the people in Nashik district with about 72% percent of the population engaged in this activity and the major part of the total geographical area is under agriculture. Since commencement of the Planning there is a marked progress and greater development is witnessed in the ~~the~~ field of agro industries . The following agroindustries are - started in Nashik district.

(1) Dehydration plant of Onion was established due to marked- increase in area and out put of this crop.

(2) Implements required for modern agriculture are also - introduced.

(3) Since grapes are the speciality, grape juice factory just like 'Noga' factory in Nagpur is also possible in the near future.

(4) One spinning mill and 3 Sugar factories are registered and are likely to be commissioned shortly. These will be in - addition to 3 Sugar Factories already working in Nashik- district.

(5) With the industrially developing area at Satpur, Near Nashik more agro based and forest based industries are possible.

SPECIAL FEATURES:

1.13. Following are the notable special features of - Nashik district.

(1) Main production Centre of Onion covering approximate area of 5000 Hectares.

(2) Other main agricultural productions are grapes and Sugarcane. Nashik grapes are a speciality for visitors in Summer season.

(3) Main supplier of Vegetables to Bombay.

(4) Mannad , biggest stocking Centre of the Food Corporation of - India.

- (5) India Security Press at Nashik Road and Government of India-Press at Gandhi-Nagar.
- (6) The Hindustan Aeronautics Limited (HAL) Factory at Ozar near - Nashik City.
- (7) The Central Wheat Research Station at Kundewadi, Tahsil Niphad.
- (8) The thermal power station at Eklahare Near Nashik Road.
- (9) The Police Training Centre at Nashik.
- (10) Industrially developing area of Satpur.
- (11) Nashik City is a well known religious place, having a large number of temples.
- (12) There are/Sugar Factories in Nashik district Two in Co-operative sector and one in private sector.

CHAPTER - II -

EXPLANATORY NOTES ON TABLES PRESENTED IN DISTRICT STATISTICAL -ABSTRACT- 1976-77.

GENERAL:-

2.1. The publication " Socio Economic Review and District Statistical Abstract 1976-77" presents statistics on various topics. The data presented in various tables are collected from the concerned State and Central Government Departments. The foot notes to the tables indicate the source from which data is collected. In all the tables except in few cases, data pertaining to the reference period viz. 1976-77 or calendar year 1976 are presented. District totals are given in the beginning and tahsilwise break up follows. The concepts, sources and limitations adopted while preparing the tables in this abstract are given in the following paragraphs.

AREA AND POPULATION:

2.2. Under this head, 7 tables based on figures of 1971 Census are prepared. These tables show the salient features of the district viz. 1) Tahsilwise area, houses, and population 2) Decadal variation in population since 1901 3) Tahsilwise classification of villages and towns according to population ranges 4) No. of workers and non-workers in each tahsil. 5) Distribution of population according to (A) Age group (B) Religion for district as a whole and 6) Population of Scheduled castes and Schedules tribes for each tahsil.

CLIMATE AND RAINFALL:

2.3 The data under this head are collected in two tables. One relates to rain-fall and the other temperature. Table No.8 presents normal rainfall and No. of rainy days and actual rainfall at 13 Stations in Nashik -District during 1976. While preparing -

this table data are obtained from the Statistician Department of Agriculture and whenever the same is not available, data supplied by Collectorate is taken into account. Table No. 9 presents maximum, minimum temperature at three selected stations during 1976.

AGRICULTURE:

2.4. Under this head, important statistics pertaining to land utilisation, area under different crops, irrigation, yield rates, out-turn, agricultural wage rates, minor, medium and major irrigation works and agricultural census data are presented. In first six tables viz. 10 to 15, data 1974-75 and 1975-76 (provisional) for Land utilisation, cropping pattern, area irrigated - sourcewise irrigation are given tahsilwise, while yield rates are given for the district as a whole for the years 1974-75 and 1975-76 and Table No. 16 gives information about availability of underground water for the years 1975-76 and 1976-77. CHAPTER - III.

AN ANALYTICAL REVIEW OF SELECTED TRENDS:-

3.1. In this chapter an attempt is made to study the trends in various Socio -Economic aspects of Nashik district by working out important indicators on Agriculture, Irrigation, Live-stock, Electricity Consumption, Education etc. Tahsil is taken as a unit for analysing the progress in a particular sector at different points of time. The base is taken as 1961-62 i.e. first year of Third Five Year Plan in most of the cases.

INDICATOR NO.1:- PERCENTAGE OF GROSS AREA TO NET SOWN AREA:-

3.2. The table number 3.2 gives tahsilwise percentage of gross cropped area over net cropped area during 1961-62, 1974-75 and 1975-76. The district percentage gross cropped area to net cropped area in 1975-76 when compared with 1961-62 has declined from 107.39 to 106.07. But when a comparison between 1974-75 and 1975-76 is made, it is seen that percentage of gross cropped area has increased from 105.47 to 106.08. During 1975-76 highest percentage of double cropped area was recorded in Baglan tahsil followed by Dindori and Nashik tahsils.

Table No.3.2.

Table showing tahsilwise percentage of gross area to net sown area in Nashik district for the years 1961-62, 1974-75, and 1975-76.

INDICATOR NO. 4:- PERCENTAGE OF NET IRRIGATED AREA TO NET CROPPED AREA:-

3.5. While comparing the position of percentage of net area irrigated to net area sown, it will be seen from the table No.3.5 that percentage of irrigated area in 1975-76 has shown an increase in Niphad, Malegaon, Baglan, Sinnar, Chandvad and Dindori tahsils. When compared to 1974-75 where as it is declined in Kalvan, Nashik and Igatpuri tahsils. The overall percentage of net irrigated area to net cropped area of the district in 1975-76 is more than doubled since 1961-62. There is no irrigation in Peint and Surgana tahsils.

INDICATOR NO.7:- INCREASE IN AGRICULTURAL CREDIT, OUT-STANDING DUES ETC.

3.8. The table below shows the extent of Co-operative finance distributed through primary Agricultural Co-operative Societies. The quantum of loans advanced has increased more than four-fold during 1976-77 as compared with the level of 1961-62. While comparing the position in 1976-77 with 1975-76, it is observed that there is a general increase in membership, loans advanced and loans outstanding. Besides this, loans advanced and outstanding per member also shown upward trend.

CHAPTER-IV.

ANNUAL PLAN:- 1976-77.

FIFTH FIVE YEAR PLAN:

4.1. The Government of Maharashtra has implemented the principle of decentralisation of powers in the third plan period by classifying a large number of schemes as 'district level - schemes'. During the fourth plan the process of 'Planning from - below' was started and the policy of the district planning was - adopted. The involvement and participation of the common man in the planning process is treated as fundamental to reap the benefits of - the development programme as well as to tackle the lowest.

4.2. The District Planning and Development Councils have been constituted consisting of the members of Parliament and state - legislature, prominent social and economic thinkers and eminent - persons etc. The minister in charge of the district is chairman and the district Collector is a member - Secretary of the District - Planning and Development Council. The responsibility of formulation of plan with-in the frame prescribed by Government has been - assigned to District Planning and Development Council.

4.3. The year 1974-75 marked the commencement of Fifth five year plan. The Government allotted a part of plan out-lay to District after involving new methodology of giving weightages to different items like population, Irrigation, backwardness, urbanisation, Scheduled caste and scheduled tribes population etc. As per this - methodology, 55.17 crores were allotted to Nashik district for its fifth five year plan. The sectorwise fifth plan allocation as proposed by the District Planning and Development Council is - given below.

Table 4.1.
