CHAPTER - I
INTRODUCTION

1.1 LOCATION :

The Satara district is situated partly in the Bhima river basin and partly in the Krishna river basin. The tahsils Khandala, Phaltan and Man are situated in the Bhima river basin, while the rest of the tahsils are situated in the Upper Krishna basin. The district has an area of 10,492 Sq. Kms.

The district lies between 17° 5' and 18° 11' north latitude and 73° 33' and 74° 54' east longitude.

1.2 BOUNDARIES :

The district is situated on the west of Deccan plateau and is surrounded by the Pune district on the north, by the Solapur district on the east, by the Sangli district on the South and by the district of Ratnagiri and Kolaba on the west.

1.3 TOPOGRAPHY :

1) HILLS : - There are two main systems of hills in the Satara district. The Sahyadri range and its off-shoots, and the Mahadeo range and its off-shoots. The main range of Sahyadri with a length of about 96 kilometres from north to south forms the western boundary of this district. The Mahadeo range starts about 16 km. north of Mahabaleshwar and stretches east and south-east across the whole breadth of the district. From this main range of Mahadeo hills three spurs stretch to the south. Hills in the district are very low, barren and ragged except near Mahabaleshwar and Koyana valley. The top of Mahabaleshwar the highest point in the district, is about 1,436 metres above mean sea level.

ii) RIVERS : - The Krishna is the principal river of the district. The other important rivers are the Koyana, the Nira, the Man, the Venna, the Kudali, the Urmodi, the Vasana, the Yerla and the Tarali.

The Krishna rises in the eastern brow of Mahabaleshwar plateau with its source at about 1,371 metres above mean sea level. Several streams which flow from the valleys formed by the main hill ranges in the district make up the head waters of the Krishna river. The drainage system of the Krishna river includes, besides the drainage of central system, the drainage of seven feeders, namely, the Kudali, the Venna, the Urmodi, the Tarali and the Koyana on the right and the Vasna and the Yerla on the left. From the source, the Krishna flows for nearly 160 kms. through the Satara district and enters thereafter into the Sangli district.

The Koyana is the largest feeder of the Krishna river in the district. It rises in the Mahabaleshwar plateau, runs towards south upto Helwak in Patan tahsil, where it changes its courses and flows towards east and falls into the Krishna at Karad.

The Nira river which flows on the northern boundary of the district and the Man river which flows in the south-east are tributaries of Bhima which itself meets the Krishna.

iii) SOIL : - The soils of the district are observed to be of varied textures. In the west, the soil in Mahabaleshwar, Wai, Jaoli and Patan tahsils is formed from the red laterite of the ghats. It is thin and poor on the hill slope, but gets richer, where natural or artificial terracing has accumulated soil with vegetable matter drained by rain waters. Rich black soil is found in the low lands of the valleys of Krishna, Venna, Kudali, Koyana and Kole rivers in Wai, Jaoli and Patan tahsils.

The central portion of the district consists of medium to deep black alluvial soils. Krishna valley soils are said to be one of the richest in the Deccan and the portion which lies in Satara and Karad tahsils is reported as the richest in the Krishna valley. For the most part it is the finest black

alluvial soil highly retentive of moisture and very fertile.

The soil in Khandala and Phaltan tahsils is poor and stony in the vicinity of the hills, but there are good black soils along the Nira and its tributary streams. In the eastern part of Khandala tahsil, the soil is poor, shallow and whitish but is capable of growing wheat if adequate water is available.

Towards the east of the Krishna valley the soil is poor with the exception of wide stretches of good black soil along the numerous streams and rivers in Koregaon tahsil.

In the Khatav tahsil, soils are of intermediate depth and more widely spreading than that of Man tahsil but not as rich as in Koregaon tahsil. In Man tahsil, the soils are extremely poor and shallow. Good soil is found only in narrow strips along the streams.

1.4 RAINFALL IN GENERAL AND SCARCITY CONDITIONS :

i) RAINFALL :- The rain starts by the middle of June and lasts till the end of September in the district. The rainfall is not uniform all over the district. It is very heavy in the western region and it goes on receding towards eastern part. The extreme west part gets over 5000 mm. rainfall, while the eastern part of the Sahyadri zone gets the rainfall between 1,200 mm. to 2,000 mm. The normal rainfall recorded at Mahabaleshwar centre is 6,182 mm. while at Pachagani it is 1,865 mm. The central zone gets rainfall between 600 mm. to 1,200 mm. The district head quarter Satara has normal rainfall of 1,025 mm. At other centres it is : Koregaon 707 mm., Khandala 504 mm., Wai 710 mm., and Karad 713 mm. In the eastern zone average rainfall is below 600 mm. annually. It is as follows : Phaltan 473 mm., Dahiwadi 462 mm., and Vaduj 512 mm.

ii) SCARCITY CONDITIONS : The eastern part of the district is prone to scarcity conditions. The Fact Finding Committee appointed by the Government of Maharashtra under the Chairmanship of Shri S.R. Sukhatankar has opined that the tahsils of Khandala, Phaltan, Man, Khatav and Koregaon are the drought prone areas in the district. During the year 1977-78 and 1978-79 no scarcity conditions prevailed in the district except

Man tahsil where the No. of villages affected were 39 and 42 in 1977-78 and 1978-79 respectively. During these years full suspension in L.R. was also granted in Man tahsil.

(ii) MINERALS :- Except for building stone, lime stone and little iron deposits in about 20 villages of Jacli tahsil and 30 villages in Patan tahsil, deposits of important minerals are not known to have occurred in any part of the district. Building stone sand of good quality and lime stone is found to be available all over the district. Good clay for bricks and tiles is found on the river banks.

(iv) FORESTS :- An area of about 1,515 Sq.kilo meters or 14.4 percent of the total geographical area of the district is under forests. It is scattered over the entire district. These forests belong to three groups :- (i) the evergreen Sahyadri forests (ii) the plantation on the slopes of the off-shoots of Sahyadri hills that run east and (iii) bush sprinkled hills to the east of Krishna.

The evergreen forests of Sahyadri ranges from a belt along the west of the district 10 to 22 kilometres broad. These forests extend without a break through the whole length of the district. They contain many trees valuable both as timber and firewood. The chief of these are Jambool, Anjan, Ain, Umbar, Kenja, Hirda, Phanas and Nara. Teak mixed with brush-wood is found in the second group of forest lands, i.e. ranges which branch east from the Sahyadris. These forests are much broken by patches of cultivated land. The forests of the third group are only sprinkled with bush and are very much scattered.

(v) AREA :- The district has an area of 10,492.0 Sq.kilometers out of which 10,109.6 Sq.kilometers is rural and 382.4 Sq.kilometers is urban area. The district ranks 16th in area among the 26 districts of the Maharashtra State.

(vi) DEMOGRAPHY :- The Satara district ranks 13th in population among the 26 districts of the Maharashtra State.

The following table gives tahasilwise decadal variation for the last decade.

Sr. No.	DISTRICT/ TAHSIL	POPULATION		Decadal percentage variation
		1961	1971	
1	2	3	4	5
	DISTRICT	14,30,105	17,27,376	+ 20.79
	<u>TAHSILS</u>			
1.	SATARA	1,91,313	2,39,984	+ 25.44
2.	WAI	1,04,746	1,25,099	+ 19.43
3.	KHANDALA	63,164	71,929	+ 13.88
4.	KOREGAON	1,38,838	1,64,456	+ 18.45
5.	PHALTAN	1,40,102	1,86,627	+ 33.21
6.	MAN	99,410	1,20,758	+ 21.47
7.	KHATAV	1,55,930	1,77,501	+ 13.83
8.	KARAD	2,51,640	3,11,026	+ 23.60
9.	PATAN	1,80,501	2,07,867	+ 15.16
10.	JAOLI	80,091	91,939	+ 14.79
11.	MAHABALESHWAR	24,370	30,191	+ 23.89

From the above table it will be seen that the decadal variation (1961-71) in Satara district is less than the State variation which is 27.45.

1.5 SPECIAL FEATURES :

i) SUGAR FACTORIES :- At present six sugar factories, two each in Karad and Phaltan and one each in Patan and Wai tahsils are located in the district. The Krishna Sahakari Sugar factory located at Rethare Bk. in Karad tahsil is one of the biggest sugar factories in Maharashtra. The sugarcane crushed in 1978-79 is 13,84,192 M. Tonnes.

ii) INDUSTRIES :- Though there is no concentration of industries in the district some important factories apart from Sugar factories are Ogale Glass works at Ogalewadi near Karad. Cooper Oil Engines at Satara Road in Koregaon tahsil and some cement product industries at Satara and Karad are located in the district. The Maharashtra Scoters Ltd. located at Satara has started its production during the year 1976-77.

Also there is a private seed production establishment viz. Nimbakar Seeds which produces various type of hybrid and high yielding seed and distributes the same all over the State.

iii) SMALL SAVINGS :- The district has a distinction of surpassing the Small Savings target by nearly 70 % during the year 1978-79. Total amount of Rs. 186.50 lakh was collected from various areas of the district as against the target of Rs.110.00 lakh for the said year.

iv) FORMATION OF DISTRICT INDUSTRIES CENTRE :

The District Industries Centre at Satara was formed on 15-3-1979. The centre consists of one General Manager and 7 Managers for different subjects which includes a Manager(Banks) also. The main function of the centre is to promote Industrial Development in the district, especially in rural area.

v) KRISHNA IRRIGATION PROJECT :

Krishna Irrigation Project envisages construction of two dams, one at Dhom across river Krishna and other at Kanher across river Venna alongwith their L.B.C. and R.B.C. canal system from each of these dams.

This project will provide irrigation facilities to 1,11,736 hectares of cropped area from Satara and Sangli districts.

Dhom Dam is 2,478 mtrs. in length and maximum height of the Dam is 50 mtrs. Dhom Dam is completed in all respects in 1977. Full storage was created for the first time during 1978 monsoon.

Kanher dam is 1955 mtrs. in length and maximum height is 50 mtrs. Earth work and Masonary work is in progress.

vi) DROUGHT PRONE AREA PROGRAMME :

Out of total 11 tahsils in the District five are covered under drought prone programme. These tahsils are Man, Khatav, Khandala and Phaltan and Koregaon. Of these, first four are accepted by the Govt. of India for the central assistance. Nearly 34 % of District population (around 5.15 lakh) is covered by the D.P.A.P. area.

There are 12 watersheds in the five D.P.A.P. tahsils covering 129 villages. The achievements under the D.P.A.P. programmes are discussed in Chapter IV.

vii) SMALL FARMERS DEVELOPMENT AGENCY (S.F.D.A.) :

Since the inception of S.F.D.A. in Satara District in year 1976, it is made applicable to all villages from Patan, Satara, Jaoli, Mahabaleshwar and Wai tahasils. Thereafter 19 villages from Khandala tahasil were added in the operational area of this project.

The following items of development are included in the project.

- i) Agril. Development Programme
- ii) Allied Agril. Industries
- iii) Supply of Agril. Implements
- iv) Minor Irrigation
- v) Supply of Milch Cattle
- vi) Strengthening of Co-operative Societies

viii) I.R.D. PROGRAMME :

It is being implemented through S.F.D.A. in 3 tahasils viz. Patan, Satara and Mahabaleshwar.

ix) COMMAND AREA DEVELOPMENT AUTHORITY :

The jurisdiction covered by Satara Irrigation Project Circle in Satara District for construction viz. Wai, Jaoli, Koregaon and Satara tahasils comes under C.A.D.A. for administrative purposes. The main programme of this authority is to implement schemes on Agril. and Animal Husbandry for small and marginal farmers.

CHAPTER - II

EXPLANATORY NOTE

2.1 The data on different important sectors which have dominant effects on the economy are presented in this abstract for the year 1977-78 and 1978-79 (combined issue). In case the data for the relevant year is not available the data for the latest available years are presented. In most of the cases, the reference period of the data is the financial year. The data on Agriculture, however, relates to the agricultural year, whereas the data on 'Co-operation' is for the Co-operative year (1st July to 30th June). The data on other important items like rainfall, temperature, civil and criminal cases, vital statistics, is for the calendar year. The information as far as possible is presented tahsilwise for inter tahsil comparison.

DISTRICT AT A GLANCE :

2.2 Certain essential data in important spheres, such as,

- i. Population,
- ii. agriculture,
- iii. animal husbandry,
- iv. industries,
- v. co-operation,
- vi. medical and public health,
- vii. education,
- viii. transport and communication,
- ix. plan expenditure etc.,

pertaining to the district is presented along with the corresponding figures for the State for the comparison purpose.

DISTRICT STATISTICAL ABSTRACT :

2.3 The data incorporated in the District Statistical Abstract have been presented in suitable tables, classified in appropriate groups. The concepts adopted in preparation of

tables are summarised in the following paragraphs. The limitations of data are cited wherever necessary.

AREA AND POPULATION

2.4 The data of 1971 census mainly on population, area, houses and livelihood occupation, rural urban break-up etc. are presented in the first seven tables for all tahsils in the district. Data on population per square kilometre, decadal variations during 1951-61 and 1961-71, classification of villages and towns according to population ranges, number of workers and non-workers, population of schedule castes and schedule tribes, distribution of population according to age group and religion are also given in these tables.

2.5 (a) URBAN AREA :

The following places have been treated as 'urban areas.'

(towns) -

1. every place having a municipality or cantonment board irrespective of its population,
2. every other place which satisfies following three conditions :-
 - i. a population of at least 5,000 ;
 - ii. at least three-fourth of its male working population engaged in non-agricultural pursuits and
 - iii. a density of population of at least 400 persons per square km.
3. any other place not falling under above two categories which possesses certain distinct characteristics to qualify to its being treated as urban such as its being a project area or a developing township.

(b) Rural Area :- These areas which do not satisfy

the criteria prescribed for recognising urban area are called 'Rural Area'.

A census village in Maharashtra has always been a revenue village. A revenue village has well-defined boundaries, a map and a separate set of land records irrespective of whether that defined area has any population or not.

(c) WORKER : A worker is defined as 'a person whose main activity is participation in any economically productive work through his physical or mental activity. Work involves not only actual work but affective supervision and direction of work.

A public or social worker engaged actively in public or social work or political worker actively engaged in furthering the political aims of a party was also regarded as a 'worker'. In case of perennial work, such as, cultivation, livestock, plantation, some type of household industries, a person was treated as a 'worker' by ascertaining whether he had participated any time during the last one year, even if, he was not economically active in the week prior to enumeration. In case of regular work in trade, profession, service or business, a person was considered as 'worker' if he had participated in such regular work on any one of the days during the week preceding the ^{date} of enumeration and that work has been returned as his main activity.

(d) NON-WORKER : Non-workers are those who are not mainly engaged in any economically productive work.

A person primarily engaged in household duties or those who were students and help in the family economic activity, but not on full time scale were treated as 'non-worker' in respect of their main activity.

C L I M A T E :

2.6 The rainfall and temperature have pronounced effects on climate. The rainfall data presented in table No.8 gives normal rainfall, monthly rainfall and number of rainy days during the calendar year 1977, 1978 for the selected eleven centres. Normal rainfall figures are worked out on the basis of actual rainfall for the periods ranging from a minimum of five years and a maximum of 80 years. A day was treated as "rainy day" if during the twenty four hours the rain gauge recorded a minimum of 2.5 mm. of rainfall. The table No. 9 gives actual maximum and minimum temperatures recorded during each of the month of the calendar year 1977, 1978 in respect of Mahabaleshwar centre in Satana district.

A G R I C U L T U R E :

2.7 Important ^{the} silwise statistics on agriculture, such as

- i. land utilisation,
- ii. area under different crops,
- iii. yield per hectare and outturn of principal crops,
- iv. irrigated area under different crops,
- v. sourcewise irrigated area, and
- vi. data on irrigation etc.

are given in tables 10 to 14.

2.8 The basic definitions adopted are given below:

a) Geographical area : It is, according to village papers calculated from village returns prepared for revenue ^{Pur}poses and ~~purposes~~, such it may be different from that according to Surveyor General.

b) Forests :- It includes all actually forested areas or lands classed or administered as 'forests' under any legal enactment dealing with forests, whether State owned or private. If any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or uncultivated land.

c) Land put to non-agricultural uses : It stands for all lands occupied by buildings, roads and railways or under rivers, canals etc., and other land put to uses other than agricultural.

d) Barren and unculturable land : It covers land which can not be brought under cultivation unless at a high cost, whether in isolated blocks or uncultivated holdings. Land like mountains, deserts etc. is classified under this category.

e) Permanent pastures and other grazing land : It covers all grazing lands. Village common grazing lands and grazing lands within forest area are included under this head.

f) Culturable waste land : These may be either 'fallow' or 'covered with shrubs and jungles' which are not put to any use and include all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession.

g) Miscellaneous tree crops and groves not included in the net area sown :

This category includes all cultivable land which is not included in Net area sown but put to some agricultural use.

h) Current fallow lands : These are lands which are kept fallow during the current year. If any seedling area is not cropped again in the same year, it is also treated as 'current fallow'.

i) Other fallows : All lands which were taken up for cultivation but are temporarily out of cultivation for a period not less than one year and not more than 5 years are classed as 'other fallow'.

j) Net area sown : This consists of net area sown with crops and orchards, area sown more than once being counted only once.

k) Gross cropped area : Total of area under all crops including area under crops sown more than once is taken as 'Gross cropped area'.

(1) " Cultivable area is a sum of areas under -

(a) Miscellaneous tree crops and groves not included in the net area sown,

(b) current fallows,

(c) other fallows,

(d) culturable waste land, and

(e) net area sown,

IRRIGATION STATISTICS :

2.9 Important irrigation statistics regarding.

i. number of irrigation wells,

ii. activities of ground water survey and development Agency,

iii. Minor irrigation works,

iv. major and medium irrigation projects, and

v. area irrigated under major and medium projects,

are given in table No. 15, 16, 17 and 18.

ALLIED AGRICULTURE :

2.10 Agricultural wages rates at the selected centres, viz.,

i. Limb (Taluka - Satara)

ii. Koregaon (Taluka - Koregaon)

iii. Umbraj (Taluka - Karad)

collected by the District Statistical Officer through the Block Statistical Assistants are given in table No. 19. Number of operational holdings as per Agricultural Census - 1970 are given in table No. 20. Final figures of agricultural implements enumerated during the eleventh livestock census are given

in table No. 21. The tahsil-wise data on 'famine and scarcity' are given in table No. 22 for the years 1977-78 and 1978-79 and in Table No. 23 for the period from 1971-72 to 1978-79.

ANIMAL HUSBANDRY AND FOREST :

2.11 Population of livestock and poultry as per livestock census, 1972 (final data) is shown tahsilwise in table No. 24. Statistics on veterinary facilities existed, animals treated in such centres and disease-wise mortality of livestock are given in table No. 25 and 26. Table No. 27 furnished data on animals slaughtered in recognised slaughter houses in the district.

2.12 The data on 'area under forests' and major and minor forest produce for the year 1977-78 and 1978-79 have been shown in tables 28 (a) and 28(b) respectively. Area under forests with a classification into

- i. reserved,
- ii. protected, and
- iii. unclassed forests under the control of State Revenue department and under State Forests Department.

has been shown. These areas may not tally with the area under forests shown in table No.10 due to different concepts of classification into above three heads. Reserved forests are mainly for timber production in which rights of grazing and cultivation are seldom allowed. Grazing and cultivation under certain limitation and restrictions are allowed in protected forests. The unclassed forests refer to 'inaccessible forests' or 'unoccupied waste'.

INLAND FISHERIES :

2.13 The statistics relating to total area suitable for fish culture, ponds, lakes and reservoirs, area under pisci-culture inland fish production and carp fry used for pisci-culture are given in table No. 29 (A).

EMPLOYMENT, INDUSTRY AND ELECTRICITY :

2.14 The statistics relating to working factories under different groups with average daily employment, man-days worked, classification of factories according to working strength and number of days worked are given for the year 1977 and 1978 in table Nos. 30, 31 and 32. The term 'Factory' includes -

- a) those employing ten or more workers working with the aid of power,
- b) those employing 20 or more workers and working without aid of power, and
- c) those registered under the Factory Act, 1948,

eventhough the above conditions are fulfilled, the Defence Factories are excluded". Statistics regarding number of registered factories, productive capital investment, output and employment provided under different industries based on Annual Survey of Industries for the year 1973-74 and 1975-77 is given in table No. 33. Monthwise registration, vacancies notified, placements done, number of employment seekers on the live register at the end of the month, occupation-wise and sectorial, other data of employment exchange have been shown in table Nos 34, 35 and 37. The information regarding the employment generated under Employment Guarantee Scheme works is also given in table No. 36.

2.15 Data on consumption of electricity by different categories during the year 1977-78 and 1978-79 is given in table No. 38 and number of towns and villages electrified during and up to end of selected years are shown in table No. 39. The data are collected from Maharashtra State Electricity Board, Private Electric companies and Sugar Factories in the district.

CO - OPERATION :

2.16 Statistical information on the co-operative institutions and their activities have been given for the year 1977-78 and 1978-79 on the following items -

1. Loan advanced by co-operative banks and primary agricultural credit societies - different types of societies, their membership,

ii) Total value of purchase and sales by the central and primary co-operative marketing societies, and

iii. Annual arrivals in the regulated markets in each tahsil of Satara district in tables 40 to 46. Tahsilwise data regarding No. of members, capital structure, loans advanced and recovered etc., have also been given.

Working Capital : It includes paid-up capital, deposits and borrowings. Loans outstanding includes outstandings in respect of loans, cash credits and overdrafts and the amount of the outstanding bills purchased or discounted. Overdues refer to the amount of loans or instalments which was due for collection but which was not actually collected and for the repayment of which no extension has been granted by the competent authority. Information of registered money lenders and loans advanced by them is given in table number 47.

The main functions of Agricultural credit societies are to help members by way of providing short and medium term loans for meeting their agricultural necessities like improved seeds, fertilizers, agricultural improved implements etc. The help is also extended in the matters of storage, transportation and scale of the agricultural produce.

2.17 The agricultural non-credit societies look after the work of better farming by way of educating the agriculturists in the adoption of improved agricultural practices, crop protection etc. The societies also undertake educational, economical, cultural and house building activities so as to uplift the standard of living of the agriculturists.

2.18 The main function of the Urban Bank, urban credit co-operative societies and salary earners co-operative societies is to promote the qualities of economy and co-operation among the members and also to make them industrious. They also augment the saving habits of the people by way of making the banking facilities easily available. They give loans to the members on the securities like gold, immovable property, Government securities, commercial goods, etc. They also provide loans to the Artisans and small traders.

2.19 The main functions of non-agricultural non-credit societies are to run printing presses, to provide electricity to members and consumers for domestic, industrial and agricultural purposes, to run Montessories, primary schools and educational institutions for educational spread and things of the kind.

The main function of primary co-operative marketing society is the purchase and sale of agricultural produce grown by its members or member co-operative societies in its area of operation.

MEDICAL AND PUBLIC HEALTH :

2.20 In this section, data on medical and public health for the year 1977 & 78 is given. Table No.48 gives medical facilities available through public and public aided bodies in each tahsil alongwith indoor and outdoor patients treated. Data on 'vital statistics', e.g.tahsilwise births and deaths and infant deaths registered in the year 1977 and 1978 with break-up into male and female and number of deaths due to important causes, from the year 1971 to 1978 is given in tables No. 49 and 50 respectively. Vaccination statistics and cholera inoculation done in each tahsil during 1977 and 1978 is given in table No. 51. Table No. 52 gives statistics on family planning during the year 1977-78 and 1978-79.

E D U C A T I O N :

2.21 The data on tahsilwise number of literates and percentage of literacy as per 1971 census are shown in table No.53. The data on education level of people in rural and urban areas are given in table Nos. 54 and 55. The data regarding pupils and teachers with number of institutions in pre-primary, primary, secondary and higher categories are presented in table No. 56. The data on backward class enrolment and concessions granted to economically backward class and expenditure incurred under normal and plan grants on primary education in the district is shown in table Nos: 57 to 59.

T R A N S P O R T A N D C O M M U N I C A T I O N :

2.22 Length of railway routes according to gauge is shown in

table No. 60. Table No. 61 gives road length according to category and surface classification. Roads maintained by municipal councils / cantonment boards are also shown separately in this table. The data of number of motor vehicles in operation in Kolhapur region covering Satara, Sangli and Kolhapur districts together are shown in table No. 62. (districtwise figures are not available). Important operational statistics relating to Satara division of Maharashtra State Road Transport Corporation are given in Table No. 63. (Satara State Transport division comprises of Satara district). Results of traffic census conducted in May 1977 and May 1978 on important roads in Satara district are given in table No. 64. Statistics on Postal, Telegraphs and telephone facilities and on rural broadcasting are depicted in the table Nos. 65 and 66 respectively.

LOCAL BODIES :

2.23 The financial position of Village Panchayats, Municipal councils and Zilla Parishad is shown in this section for the year 1977-78 and 1978-79.

2.24 The number of village panchayats includes number of independent Village Panchayats as also group Village Panchayats. Income and expenditure of Village Panchayats are exclusive of opening and closing balances respectively. Grants include grants from Government as well as from Zilla Parishad and Panchayat Samities for developmental activities. Government grants to village panchayats are mainly land revenue grants, equalisation grants and local cess grants. Government grants in respect of municipal councils are mainly grants on account of dearness allowances, grants for roads, for water supply, for educational purposes, for medical purposes and on account of percentage in land revenue. The receipts of Zilla Parishad are shown under four sub-heads, viz.,

- i. self-raised resources,
- ii. government grants,
- iii. grants for agency scheme, and
- iv. dept section. The expenditure is shown under two heads - Revenue Expenditure and Debt section.

2.25 The data are collected from the Zilla Parishad, Satara and all the municipal councils in Satara district.

PLAN AND COMMUNITY DEVELOPMENT :

2.26 Data on Plan expenditure under State and Local sectors and physical achievements in important fields during the year 1977-78 and 1978-79 are given respectively in table Nos.71 and 72. Statistics in respect of coverage of community development programme, stagewise expenditure of various blocks and block-wise physical achievements under community development programme are shown in table Nos. 73 to 75.

P R I C E S :

2.27 The table No.76 gives monthly average wholesale prices of agricultural commodities transacted in regulated markets. The district average for each variety and for each month is also given.

2.28 The table No.77 gives the monthly average retail prices as well as minimum and maximum price prevailing in the month of important commodities at Satara head-quarter during 1977 and 1978. As the information collected for the given commodities is restricted to only one quotation and that also from only one shop in the district head-quarter, the averages shown for individual commodities cannot be said to be fully representative but the data may prove useful as broad indicator of the trend in changes in retail prices over the period of time. The table No. 78 gives consumer price index number for working class of Sholapur and Pune centres for the year 1977-78 and 1978-79. For the calculation of index, the years 1960 and 1961 are taken as ' base years ' for Sholapur and Pune centres respectively.

M I S C E L L A N E O U S :

2.29 Statistical data pertaining to police force, crime statistics, cases disposed off in civil and criminal courts ,

cinema statistics regarding seating capacity in different types of theatres, number of banking offices, number of scheduled banks, their deposits and advances and number of Joint Stock companies, insurance policies and amount insured, collection of small savings, land revenue collections, number of presses, newspapers and periodicals published etc., are given in the table Nos. 79 to 89.

Table No. 90 gives information about the quantity of Rice, Wheat and Sugar issued to fair price shops. The demand and procurement of levy in Satara district are indicated in table No. 91. Statistics relating to General Elections of Assembly 1978 and Loksabha - 1977 are presented in Table No. 92 ".

2.30 A table showing trends in selected indicators in the fields of development, such as -

- i. agriculture,
- ii. livestock,
- iii. industry,
- iv. education,
- v. health, etc.

is appended at the end. These selected indicators are very useful for assessing progress in various fields over important periods in the recent past.

CHAPTER III

AN ANALYTICAL REVIEW OF SECTORIAL TRENDS.

3.1 Data on various fields of developments have been presented in Part II of this issue under the heading District Statistical Abstract. An attempt has been made in this Chapter to present a comparative picture of tahasils in the district during the years 1960-61, 1970-71, 1976-77, 1977-78 and 1978-79. The indicators of different developmental sectors are worked out to show the position of each tahasil in the district during the above period.

3.2 Agriculture :- The development in the field of agriculture can be assessed from six main indicators. They are (1) Percentage of gross area sown to net area sown (2) Percentage distribution of gross area under important crops to total gross cropped area (3) Productivity of important crops (4) Percentage of net area irrigated to net area sown (5) Percentage area under different irrigated crops to gross irrigated area (6) Source-wise net irrigated area.

TABLE 1

Tahasilwise percentage of gross cropped area to net area sown in Satara District during the years 1960-61, 1970-71, 1976-77, 1977-78

Sr. No.	Tahasil	Percentage of gross cropped area to net area sown

11.	MAHABALESHWAR	104	104	106	106
SATARA DISTRICT		108	107	113	108

3.3 Actual figures of area cropped more than once during the years 1960-61, 1970-71, 1974-75 and 1975-76 were respectively as 55.0, 52.0, 66.0 and 68.3 thousand hectares. There is thus gradual increase in the double cropped area. The figures of 76-77 and 77-78 are provisional and hence are subject to scrutiny.

CHANGE IN CROPPING PATTERN

3.4 The following table broadly indicates the trend of cropping pattern in the district.

TABLE 2

Percentage distribution of area under important crops to total gross cropped area in the district.

Sr. No.	C R O P	Y E A R			
		1960-61	1970-71	1976-77	1977-78

TOTAL CROPPED AREA		100.00	100.00	100.00	100.00

It is seen from the above table that there is no considerable change in the cropping pattern of the district. The area sown under Sugarcane, groundnut, rice, wheat and jowar, however, show upward trend.

3.5 PRODUCTIVITY OF IMPORTANT CROPS :

Following table gives the yield rates and outturn of principal crops for the year 1960-61, 1970-71, 1976-77 and 1977-78.

TABLE 3

Sr. No.	CROP	Yield in Kg. per Hectare				Output in '00 M. Tonnes

					12,489			1,60,6	
9.	Cotton ('00 Bales)	262	227	205	126	3,7	8,7	8,4	7,3

* Figures for 1976-77 and 1977-78 are provisional and are under clarification.

3.6 The production of any crop depends on various factors like use of improved seeds, irrigation facilities, use of fertilisers and much on timely rains. As such the yield rates show fluctuation from year to year. Nevertheless, it can be said that the yield rates of all cereals have increased with the increasing use of high yielding varieties.

3.7 Tahasilwise percentages of net irrigated area to net area sown are given below.

TABLE 4

Sr. No.	Tahasil	Percentages of net irrigated area to net area sown during			
		1960-61	1970-71	1973-74	1974-75

11.	MAHABALESHWAR	11.04	11.28	19.68	24.56

The tahasils Wai, Khandala, Phaltan, Karad and Mahabaleshwar have good irrigation facilities while the tahasils Satara, Koregaon, Khatav, Patan and Jaoli have less than 10% net irrigated area of net area sown.

3.8 The area under different irrigated crops ~~XXXXXXXXXX~~ is compared with the gross irrigated area in the following table.

TABLE 5

Percentage of area under different irrigated crops to gross irrigated area

Sr. No.	C R O P	Y E A R			
		1960-61	1970-71	1973-74	1974-75

12.	Groundnut	0.79	0.33	0.47	0.27
13.	Total Non-food crops	6.44	8.58	3.60	6.78

Nearly two third of the gross irrigated area is used for growing cereals - mainly Jowar (Rabi) and Wheat. The use of irrigated land for Sugarcane is showing increasing trend.

3.9 The distribution of irrigated area by different sources is as follows.

TABLE 6

Sr. No.	Source of Irrigation	Net area irrigated (in Hectares)

In most of the tahasils excepting Phaltan the irrigation is mainly rely on wells by which nearly 50% of net irrigated area is covered. The source of Govt. canal irrigation is mainly available in Phaltan tahasil.

3.10 CO - OPERATION :

AGRICULTURAL CREDIT

The Co-operative societies play an important role in the field of agricultural development by extending credit facilities on an extensive scale. The progress of facilities given by Agricultural Credit Societies during the years, 1960-61, 1970-71, 1976-77, 1977-78 and 1978-79 are given in the following table.

TABLE 7

AGRICULTURAL CREDIT SOCIETIES						
Sr. No.:	I T E M	1960-61	1970-71	1976-77	1977-78	1978-79

2.	Membership	1,31,956	1,55,185	2,21,013	2,22,285	2,32,968
3.	Loan advanced (Rs. in lakh)	185.61	547.64	358.93	382.36	397.05
4.	Loan outstanding	204.29	725.78	737.36	801.71	775.85

3.11 It will be seen from the above data that although there is no much change in the number of agricultural credit societies functioning in the district during last 18 years, there has been considerable increase in their membership. However, it is discouraging to note that the amount of outstanding loan is very high.

WAGE RATES

3.12 The data on agricultural wage rates in rural areas are collected in three rural centres in Satara District since July 1963. The centres are Umbraj from Karad tahasil, Koregaon from Koregaon tahasil and Limb from Satara tahasil.

The average wage rate during the year 1977 and 1978 for male field labour at Umbraj were found to be Rs. 4.62 and Rs. 6.60 respectively while the same at Koregaon and Limb were Rs. 3.00 and 3.00 and Rs. 5.00 & Rs. 5.00 respectively. The average wage

rates for females at Umbraj, Koregaon and Limb during 1977 and 1978 were Rs. (i) 4.12 & 5.00 (ii) 2.00 & 2.00 (iii) 3.00 and 3.00 respectively.

3.13 LIVESTOCK :

Livestock makes a substantial contribution to the economy by providing subsidiary income to farmers, food to human population and provides avenues of employment to landless labourers.

Livestock Census has been recently conducted in year 1978. However, the finalised figures are not yet made available. Therefore, the data of 1972 Census are presented in following table.

The following table gives tahasilwise details of Livestock per 100 Hectares.

3.14 The bovine and ovine population per 100 hectare of cultivable land is less than the district average in Satara, Koregaon, Khatav, Patan, Jaoli and Mahabaleshwar tahasils.

ELECTRICITY

3.15 Consumption of Electricity :

The following table gives tahasilwise No. of villages electrified in 1961-62 and 1978-79 together with the number of

pump sets in these years.

TABLE 9

Sr. No.	Tahasil	Total villages in Tahasil (as per 71 Census)	Villages electrified (NO.)	1961-62	1971-79	1972	Pumpsets energised (NO.)	1978

11.	MAHABAL- LESHWAR	54	NIL	43	16	229		
TOTAL		1,167	50	835	4,653	17,586		

Nearly three fourth of the total villages in the district have so far electrified. The number of villages electrified in tahasils Satara, Wai, Jaoli and Fatan is less as compared to other tahasils in the district. This is mainly because of the fact that most of the villages which are remained to be electrified from these tahasils are situated in hilly track of the district.

Total electricity consumption per capita for different purposes is indicated below .

TABLE 9 A

Sr. No.	Purpose	Population in '000	1961-62	1971	1978-79

6.	Other purposes		3.89	2.66	
TOTAL		4,90	32.18	36.71	

Itemwise consumption of electricity for different purposes is given in table No. 38. The consumption of electricity is significantly increased from 51 Million KWH in 1970-71 to 86 M. KWH in 1977-78 while the same is reduced to 74 M.KWH in 1978-79 due to revised procedure of billing under Agricultural consumption. The billing is now done on the basis of H.P. of pumpsets instead of actual consumption.

3.16 Enrolment in the Employment Exchange and Vacancies notified.

Following table gives the statistical data available in connection with employment.

TABLE 10

4.	Percentage of placement to registration	18	9	3	3
5.	Candidates on Live Register at the end of the year	2,398	5,774	17,068	20,965

3.17 Enrolment in 1978-79 is 119 percent higher than that of 1960-61. The percentage of placement to total registration is decreased considerably from 18 percent in 1960-61 to 3 percent in 1978-79. This is due to the establishment of Aurangabad Selection Board through which most of the vacancies are filled in. The comparative figures of last three years of the number on live register reflects the magnitude of the unemployment problem. This does not also include the unemployed persons seeking manual work and those who have not registered their names with employment exchange.

3.18 Medical facilities : The following table gives the data on medical facilities available in the district.

9.	Total Population	3,00,095	6,55,000	7,28,000	7,76,000	7,50,000

The ratio of doctor to population is one of the indicators of the progress of medical facilities. The ratio was one doctor per 24,237 population in 1961, which is now one doctor per 16,723 population.

3.19 Medical facilities have increased substantially since 1961. This has enabled to treat large number of indoor and outdoor patients at public medical institutions.

3.20 EDUCATION : The education facilities have also increased remarkable during last 10 to 15 years. At present almost all the villages have been provided with primary school facilities. The following table gives the number of institutions, No. of pupils and No. of teachers.

3.21 From the above data it is revealed that as against the 2,18,102 students in primary schools there were 23,112 students in Secondary school i.e. 10.5 % in 1961, while as against 3,36,748 students in primary schools there were 95,960 students in secondary schools i.e. 28.49 % in 1978-79. These percentages indicate that there has been considerable decline in dropout rate of students primary secondary education. Similar percentages for enrolment of students in secondary to higher institutions were 7.7 % in 1961 and 17.0 % in 1978-79. The substantial increase in these rates can be attributed mainly to a good network of higher educational facilities established even at tahasil places and big villages. This can also be vividly seen from the following ratios.

3.22 With the increase in the number of educational institutions, there has been corresponding increase in the teaching

staff . Hence the teacher/pupils ratios are maintained nearly about the standard norms.

The net work of banking offices is spread over different tahasils of the district during recent years and as a result the ratio of number of households served per banking office is reduced from 6,755 in 1961 to 1,667 in 1977.

3.24 Roads :- The Pune Miraj Kolhapur broadgauge railway route goes through Satara district with the total length of 124 Kms. At the end of the year 1977-78 and 1978-79 total length of all types of roads excluding the municipal roads was 7,173 and 7,197 Kms. respectively. The road length at the end of the year 1960-61 was 2,481 Kms. Thus the road length per 100 Sq. Kms. of area is increased from 24 Kms. in 1960-61 to 68 Kms. in 1977-78 and 1978-79.

Following table gives the total road length in the district for B and C. and Zilla Parishad.

3.25 PRICES :-

The consumer price index for working class of Solapur centre will show that the General Price Index for 1977-78 and 1978-79 shot up to 326 and 343 respectively from the base year 1960. The general index for Pune centre for 1977-78 and 1978-79 were 302 and 310 respectively (base year 1961).

3.26 Since November 1962 prices of important commodities are collected by District Statistical organisations at each of the District Headquarter on every Friday. As the prices are collected for selected commodities from selected shops they may not represent the district position but the data may still prove useful as a broad indicator of the trend in changes in retail prices over the period of time in the district. The following table indicates the average prices of some important commodities collected at Satara town for the year 1962-63, 1970-71, 1976-77, 1977-78 and 1978-79.

From the above table it will be seen that the prices of almost all commodities have considerably increased during the period of 1963 to 1978.

CHAPTER IV

INTRODUCTION

4.1 Since the commencement of the Fifth Five Year Plan i.e. from 1974-75 the idea of Planning from below has started operating and the formulation of the District Plan was started. The new approach conceive that the formation of district plan is the only means for ensuing efficient use of local potential and resources as also for providing a firm basis for planning at the State level. From 1974-75 district planning bodies were constituted for each district and the district was adopted as a 'unit' of Planning. The object of the district plan is to maximise the benefits of the Plan expenditure by bringing in past experience, knowledge and local needs.

4.2 The District Planning body which is called as the District Planning and Development Council is headed by the 'Palak Mantri' of the District as Chairman. Other Ministers of the District and the Divisional Commissioner are Vice Chairman and the Collector as the Member Secretary. The members of the Council include all M.P.s., M.L.As.,^{M.L.S.} President, Zilla Parishad, Mayor, one President each from 'A', 'B' & 'C' class municipal councils Chairman of District Central Co-operative Bank, Chief Executive Officer, Zilla Parishad, Director, Land Development Bank, nine non-official members etc. The Council generally meets twice a year for formulating and coordinating district development plans.

4.3 To assist the council in its day to day planning and Development activities an Executive Committee is constituted at district level. The Chairman and Vice Chairman of the committee are the same as that of the council. The Member Secretary, is, however, the District Planning Officer. The Committee consists of some selected members from the Council. The Committee meets regularly for the plan performance and to suggest ways and means for effective implementation of the plan schemes.

In this Chapter a brief review of the Annual Plans 1977-78 and 1978-79 is taken.

The following table gives the consolidated information

about the budget and expenditure figures under State Plan and Centrally sponsored schemes for the years 1977-78, Fifth Plan period and for the year 1978-79.

B = Budget E = Expenditure

From the above table, it will be seen that the total expenditure of Rs. 1915.48 lakhs was incurred on State Plan Schemes during the Fifth Plan period as against the budget provision of Rs. 2290.11 lakhs.

The performance of the state plan and centrally sponsored schemes during the years 1977-78 and 1978-79 is reviewed separately in the following paragraphs :-

1. STATE PLAN SCHEMES

The following table shows the budget and expenditure figures under different major heads for the reference period under review

B = Budget

E = Expenditure

In the above table, the bracketed figures show the extent of utilisation of the budget provisions under each major head of development. From the data it is seen that the budget provisions were fully utilised during the fifth plan period. The expenditure was, however, exceeded by Rs. 72.73 lakhs in the year 1978-79. A comparison of expenditure incurred under different major heads during two annual plan periods 1977-78 and 1978-79 reveals that there is an overall increase in the expenditure during the year 1978-79 under all major heads except 'Cooperation'. In fact, the expenditure under Cooperation and Community Development during the year 1977-78 was on much higher side as compared to the amount spent during 1978-79. This is due to reduction in expenditure under 'Community Development' from Rs. 7.72 lakhs in 77-78 to Rs. 0.04 lakhs in 78-79.

There is also significant increase in the expenditure during the year 1978-79 on Agricultural Programme as compared to that in the year 1977-78 or in any other previous years. This increase is mainly due to intensive implementation of D.P.A.F. programme activities.

The following table gives the percentage distribution of total expenditure incurred on different major heads of development.

TABLE NO. 3

Sr. No.	Major Head of Development	Annual Plan 1977-78 (Rs)	Fifth Plan 74-75 to 77-78 (Rs)	Annual Plan 1978-79 (Rs)

7.	Miscellaneous	15.73	19.80	13.73
		100.00	100.00	100.00

There is no significant variation in the percentage distribution of expenditure incurred during the reference periods under review except on Irrigation & Power and Social Services during 1978-79 in total expenditure, the share of the major head 'Social Services' is maximum i.e. about 29 percent followed by 26% of Agril. Programme.

PHYSICAL ACHIEVEMENTS - STATE PLAN SCHEMES

The details of physical achievements under different schemes are given in Table 72 of Part II of this publication. However, a brief review of important achievements under each sub-head of development is taken in the following paragraphs :-

1. Agricultural Programme : This major head of development covers important programmes viz. Agricultural production, Minor irrigation, Animal Husbandry, Forest, D.P.A.F. programme and Fisheries.

(a) Agricultural Production : Under this sub-head plant protection activities were intensified during 78-79 as compared to the previous year. The achievements under this scheme included rat control scheme, midge fly control, in 5,094 hectares & 573 hectares respectively in 1978-79

(b) Under the scheme of Minor irrigation works, construction of 23 percolation tanks in 1977-78 and 27 percolation tanks in 1978-79 was undertaken. Besides subsidy was given for construction of 185 wells (91 in 77-78 and 94 in 78-79).

(c) Animal Husbandry Programme : This programme include the schemes of providing additional amenities to the existing veterinary dispensaries and supply of cockrels. During the reference period 1,000 in 77-78 and 270 in 78-79 cockrels were distributed.
