CHAPTER : I:

INTRODUCTION

LOCATION :

The District of Ahmadnagar lying between 18.2' and 19.9' north latitudes and 73.9' and 75.5' east longitudes is situated partly in the upper Godavari basin and partly in the Dhima basin.

The district is bounded on the north by Nashik district, on the north east by Aurangabad district, on the east by Beed and Osmanabad districts, on the south by Solapur district and on the south west by Thane district.

With a total geographical area of 17,035 Sq. K.Ms, area-wise the district ranks second in the State, while in terms of population it stands fifth (22.69 lakhs).

ADMINISTRATIVE SET-UP :- Until recently, the district was in Pune Revenue Division, however now it is included in Nashik Revenue Division newly formed since February, 1981. For administrative purposes the district is divided into four sub divisions, which cover 13 tahsils in the district as detailed below.

<u>Name of Sub-division</u>	<u>Name of tahsils</u>
1. Ahmadnagar	1. Ahmadnagar
2. Parner	1. Parner

TOPOGRAPHY :

a) HILL RANGES :- The main Sahyadri range touches Akola tahsil in the western areas of Ahmadnagar district. From this main range, three spurs viz. Kalsubai, Laleshwar and Harishchandragad sprout out. Kalsubai is the highest peak of Sahyadri (1654 meters) and serves as the watershed between Darana & Pravara ^{and Mula} Rivers. Harishchandragad is 96 K.Ms. long and its branches run from Ratnagad, serving the watershed between Pravara and Mula Rivers. The Laleshwar is the largest range and demarcates the boundary of Pune & Ahmadnagar district. On entering into Parner tahsil, the Laleshwar sub branches one going through north of Nagar Town and forms watershed between the Godavari & the Bhima and the other turning south wards across the north east corner of Shrigonda tahsil and enters into Karjat tahsil.

b) RIVERS :- The Godavari and Bhima are the major Rivers of the district. The Pravara is the tributary of the Godavari. The Mula, the Adhala and the Mahalungi are the important tributaries of the Pravara. The southern part of the district consisting of Parner, Ahmadnagar, Pathardi, Shrigonda & Karjat tahsils constitutes the Bhima basin with the tributaries Sina, Kukdi, and Ghod.

In the following table the seasonality of the important Rivers, their length etc. are given.

SEASONALITY OF IMPORTANT RIVERS

:Sr. No.:	River	:Perennial/ :Seasonal	: Length in: : K.Ms.	: Tahsils through which : flows.
: 1 :	2	: 3	: 4	: 5

SEASONALITY OF IMPORTANT RIVERS (CONTD)

1	2	3	4	5
4.	Adhala	Seasonal	48	Akola, Sangamner.
5.	Mula	Perennial	150	Akola, Sangamner, Parner, Rahuri.
6.	Mahalungi	Seasonal	13	Sangamner.
7.	Ghod	Perennial	70	Shrigonda.
8.	Kukdi	Seasonal	28	Part of Parner
9.	Sina	Seasonal	120	Ahmadnagar, Jamkhed. and Karjat.

Amongst these Rivers the Pravara, the Mula & the Godavari have been a boon to this district, a large part of which comes under the scarcity tract. At Dhandardara in Akola tahsil on the Pravara and at Baragaon-Nandur in Rahuri tahsil on the Mula, the irrigation Dams are constructed. The canal irrigation system on these two Rivers alongwith the water available from the Godavari have transformed the agricultural economy of tahsil such as Shrirampur, Kopargaon, Rahuri, Newasa from one of subsistence into that of prosperity and plenty.

c) SOIL :- The entire district is occupied by basaltic lava-flows, which are popularly known as "Deccan traps." These lava-flows are some times associated with inter trappean beds such as lime stone, sand stone, clay shales, red bole beds, porous ash. Thin mantle of black cotton soil present almost everywhere on the basalts, River alluyium, Sands, Gravel, Clays & Silts represent the recent deposits in the district. Calcareous concretions and Nodules known as 'kankar', is commonly associated with the soil, more concentrated in the vicinity of stream courses.

The findings of the soil survey carried out by the soil survey office are given below.

- a) Total Rural area surveyed 7.91 lakh hectares.
- b) Percentage of area according to depth of soil.

<u>Soil depth in Cm.</u>	<u>Percentage</u>
i) 7.5	13
ii) 7.5 to 25	36
iii) 25 to 50	23
iv) 50 to 100	11
v) Above 100	17
Total -	<u>100</u>

According to the Dry Farming Research Station, Solapur considering the depth of the soil and other factors, only about 26 % of the area is suitable for double cropping, while the rest of the area is suitable for only such crops as Bajra, Gram, Groundnut, Sunflowers, Safflower, Grasses and tree plantation.

d) ECONOMIC MINERALS : No minerals of economic importance are available in the district. The hard and compact basalts, however, are used extensively as building material and road metal. The pinkish coloured vesicular variety is amenable to cutting into blocks of desired sizes. The calcereous Kankar is burnt in lime kilns and there is a regular " Lime industry " around Ahmadnagar town.

CLIMATE : The climate of the district is characterised by a hot summer and general dryness during major part of the year, excepting during south west monsoon season, when the relative humidities are between 60 & 80 percent. Thereafter they decrease rapidly.

Ahmadnagar district gets rain mainly from the south-west monsoon but the distribution of rainfall is mostly uneven. Agro-climatically, the district gets divided into three parts, as under.

a) SCARCITY TRACT :- Out of the 13 tahsils in the district as many as 12 tahsils and the eastern one third part of Akola tahsil falls in the scarcity tract. The range of Annual rainfall in this part varies between 430 mm to 650 mm.

b) TRANSITION ZONE :- This second zone covers the middle one third part of Akola tahsil, receiving rainfall between 700 mm to 1250 mm.

c) The remaining one third part of Akola tahsil can be divided in to three small zones in order of sequence as under.

i) Transition 1 (TR.1) zone with annual rainfall between 1250 mm. to 2500 mm.

ii) Very high rainfall tract with non-laterite soil (VEM) having precipitation between 3000 mm. to 3500 mm.

iii) Ghat tract (GH) with rainfall between 3000 mm. to 3250 mm.

FAMINE AND SCARCITY :- The Sukhatankar Committee (1973) has identified the areas susceptible to drought conditions in the district by taking into consideration the normal precipitation, timeliness of rainfall with reference to cropping pattern & soils.

The details are given below.

Sr. No.	Tahsil	Area identified as drought prone by the Committee.
1	2	3
1.	Akola	Akola & Kotul Circles.
2.	Pathardi	Entire tahsil
3.	Parner	Entire tahsil
4.	Ahmadnagar	Entire tahsil
5.	Jamkhed	Entire tahsil
6.	Shevgaon	Entire tahsil
7.	Sangamner	Areas not served by large irrigation canal systems.
8.	Shrigonda	---
9.	Kopergaon	---
10.	Shrirampur	---
11.	Newasa	---
12.	Rahuri	---
13.	Karjat	---

Thus a major part of the district is found to be prone to scarcity conditions. It is generally experienced that out 5 years 3 years are scarcity years. One year is average & one year as good year.

from

The year 1977-78 was free/famine and scarcity.

DEMOGRAPHY : The population of Ahmadnagar district according 1971 Census is 22,69,117 (Males 11,60,205 & Females 11,08,912). Now as per 1981 Census the population of district is 27,11,058 (Males 13,82,917 & Females 13,28,141).

The population and decadal variation rate since 1901 of the district are detailed in the following table.

Year	Population in lakhs	Rate of variation	
		District	State
1	2	3	4
1901	8.20	(+) 12.86	(+) 10.74
1911	9.26	(+) 12.86	(+) 10.74
1921	7.19	(-) 22.33	(-) 2.91
1931	9.69	(+) 34.77	(+) 14.91
1941	11.23	(+) 15.87	(+) 11.99
1951	14.11	(+) 25.63	(+) 19.27
1961	17.76	(+) 25.88	(+) 23.60
1971	22.69	(+) 27.77	(+) 27.45
1981	* 27.11	* (+) 19.48	* (+) 24.36

* Provisional figures.

The above table indicates that the decadal growth rate of Ahmadnagar district was comparatively higher than that of the state, up to the year 1971. However there has been conspicuous decline in the population growth rate in Ahmadnagar district during the period 1971-81. The decline in the growth rate may be attributed to excellent performance of family welfare programme in the district.

DENSITY OF POPULATION - The density of population per sq. km. in Ahmadnagar district was 133 (1971) as against 164 for Maharashtra. Now as per 1981 (Provisional) the density of population in Ahmadnagar district is 159 as against 204 for the state. The prosperous sugarcane growing tahsils viz. Shrirampur and Kopergaon have a very high density of population according to 1971 census (307 & 251 respectively) while the scarcity areas like Karjat & Parner tahsils have low density of population (85 and 87 respectively).

SPECIAL FEATURES :

1. SUGAR PRODUCTION : Ahmadnagar district is the Sugar bowl of Maharashtra. With 17 Sugar factories in the district (12 in the Co-operative sector & 5 in the Private sector) the district produces about 25 % of Sugar in Maharashtra and Shrirampur is the biggest sugar market in India.

2. TRIBAL SUB-PLAN AREA : As per Government of India's directives, a separate special development plan is prepared for the areas having concentration of tribal population, taking into consideration their special problems & felt needs. In this district 106 villages from Akola tahsil are covered under the Tribal sub-plan area.

In all 8 Adiwasi Multipurpose Co-operative societies are functioning in Tribal area, which advances loan to Adivasis for cultivation & purchase of milch cattle.

The Forest produce such as Hirda, Kadhi patta etc. & Agril. produce is procured by the Tribal Development corporation through Tribal Co-operative societies. This helps Adiwasi cultivators in getting proper value of the goods sold by them.

Formerly Adiwasi cultivators used to take loan at abnormal rate from the private money lenders during rainy season. Now under " Pale mode scheme " the loan of 75 % in kind & 25 % in cash is granted to needy Adiwasi cultivators. So also Social Welfare Schemes are implemented under tribal sub-plan to promote the standard of tribal population.

3. I.R.D.P. :- The Integrated Area Development Programme, popularly known as 'Pige scheme' is implemented in seven tahsils of the district viz. (1) Parner (2) Ahmadnagar (3) Shrigonda (4) Karjat (5) Shrirampur (6) Pathardi and (7) Kopargaon.
4. DROUGHT PRONE AREA PROGRAMME : At the instance of the Govt. of India, two districts in Maharashtra have been selected for implementation of the World Bank aided Drought Prone Area Programme and Ahmadnagar district is one of them. In twenty two watersheds (covering 272 villages) spread over in all the tahsils of the district excepting Shrirampur, the programme is implemented at present with a view to stabilizing income & ensuring supply of basic necessities of human and cattle life.
5. EMPLOYMENT GUARANTEE SCHEME :- Ahmadnagar district is on the forefront in implementation of this prestigious scheme of the State. Out of 8,302 sanctioned works, 6,357 works were completed upto the end of 1979-80. During the reference year the total expenditure incurred on Employment Guarantee Scheme was Rs. 14.73 crores, & Generated 3.17 lakh mandays.
6. GOVERNMENT MILK SCHEME : Milk production is not only the subsidiary occupation but the boon to agriculturist of Ahmadnagar district. Govt. Milk Scheme started in 1969 with only 16 milk co-op. societies & the average per day milk collection was 416 liters. As against this during 1979-80 there were 299 Milk Co-op. societies in the district & the average collection of milk per day was 82,556 liters.
7. MAHATMA PHULE KRISHI VIDYAPEETH : This is one of the four Agricultural Universities in the State located at Rahuri at a distance of about 35 K.M. from District Head Quarter. This University has invented many high yielding & improved varieties of various cereals & pulses crops. The research work carried out by the university will be helpful to the agriculturists.

(CONTD)...

~~8. INDUSTRIAL PROFILES. Ahmadnagar district which is famous~~
for sugar industry is having 17 sugar factories. At present (three) industrial Estates are functioning at Ahmadnagar, Shrirampur & Kopergaon while Industrial Estate at Parner & Sangannor are under consideration of Govt. Spinning Mill at Rahuri & Shrirampur, Govt. Distillery at Chitali are also the important Industries of the district. Well known "Luna Moped" is Manufactured at Ahmadnagar city. So also handloom Sari production is also important industrial product of the district.

M. I. D. C. : An area of 275 Hactares near villages Nagapur, on Nagar-Marmad Road, 8 K.Ms. from Ahmadnagar is developed by M. I. D. C. In this area it was planned to erect 120 factories with investment of Rs. 50 crores which would provide employment to 5000 persons approximately.

At present 104 factories providing job to 3000 workers have already been started their production. Drillco, Modern Nets, Garware Nylon, Kirloskar Oil Engines, Iuts India, Trinity Forging Crompton & Grives etc. are the prominent entrepreneurs in M. I. D. C. area. Rapid Industrial development in M. I. D. C. has helped in promoting the standard of people in and around M. I. D. C. & A. nagar city.

9. VEHICLE RESEARCH AND DEVELOPMENT ESTABLISHMENT : This is the only Institutes of its kind in India wherein all sorts of vehicles are tested. It is located in Ahmadnagar cantonment area. The climate & geographical situation is different in India and hence Indian Army has to use all types of vehicles. Keeping this in view, vehicle Research and Development work is carried out by this establishment. Not only that all type of vehicles manufactured in India are first sent to this establishment for their over all tests. The V. R. D. E. provides guidance to entrepreneurs in the field of technolgh etc. An approval & certificate from V. R. D. E. is a must for all vehicle Manufacturers.

CHAPTER. NO. II

EXPLANATORY NOTE

2.1 The data on different important sectors which have dominant effects in the economy are presented in this abstract for the year 1979-80. In case the data for the year 1979-80 is not available the data for the latest available year are presented. In most of the cases, the reference period of the data is the financial year. The data on Agriculture, however relates to the agricultural year, whereas the data on Co-operation is for the Co-operative year (1st July, to 30th June). The data on other important items like rainfall temperature, Civil and Criminal cases, vital statistics are for the calendar year. The information as far as possible is presented tahsilwise for inter tahsil comparison.

DISTRICT AT A GLANCE *

2.2 Certain essential data in important spheres, such as i) Population (ii) Agriculture, (iii) Animal Husbandry (iv) Industries (v) Co-operation (vi) Medical and Public Health (vii) Education (viii) Transport and Communication (ix) Plan Expenditure etc. pertaining to the district are presented along-with the corresponding figures for the State for the comparison purpose.

DISTRICT STATISTICAL ABSTRACT :

2.3 The data incorporated in the District Statistical Abstract have been presented in suitable tables, classified in appropriate groups. The concepts adopted in preparation of tables are summarised in the following paragraphs. The limitations of data are cited wherever necessary.

AREA AND POPULATION :

2.4 The data of 1971 Census mainly on population, area, houses and livelihood occupation, rural urban breakup etc, are presented in the first seven tables for all tahsils in the district. Data on population per square kilometre, decadal variation during 1951-61 and 1961-71, classification of villages and towns

~~according to population ranges, number of workers and non-workers~~
population of scheduled castes and scheduled-tribes, distribution
of population according to age group and religion are also given
in these tables.

2.5. A) URBAN AREA :- The following places have been treated as
Urban Area + (Towns).

1. Every place having a municipality or cantonment board irres-
pective of its population.
2. Every other place which satisfies following three conditions.
 - i) A population of at least 5,000.
 - ii) At least three-fourth of its male working population enga-
ged in non-agricultural pursuits and,
 - iii) A density of population of at least 400 persons per square
Km.

Any other place not falling under above two categories which
possesses certain distinct characteristics to qualify to it's
being treated as Urban such as its being a project area or a
developing township.

B) RURAL AREA : These areas which do not satisfy the crite-
ria prescribed for recognising urban area are called 'Rural Areas'

A) Census village in Maharashtra has always been a revenue
village. A revenue village has well- defined boundaries, a map
and a separate set of land records irrespective of whether
that defined area has any population or not.

E) WORKER : A worker is defined as ^a person whose main acti-
vity is participation in any economically productive work throu-
gh his physical or mental activity. Work involves not only actual
work but effective supervision and direction of work. A public
or social worker engaged actively in public or social work or
political worker actively engaged in furthering the political
aims of a party was also regarded as a worker. In case of pere-
nnial work, such as cultivation live-stock, plantation some

type of household industries, a person was treated as a worker by ascertaining whether he had participated any time during the last one year even if he was not economically active in the week prior to enumeration. In case of regular work in trade, profession, service or business, a person was considered as worker if he had participated in such regular work on any one of the days during the week preceding the date of enumeration and that work has been returned as his main activity.

D) NON-WORKER : Non-workers are those who are not mainly engaged in any economically productive work.

Persons primarily engaged in household duties or those who were students and helped in the family economic activity, but not on full time scale were treated as non-worker in respect of their main activity.

CLIMATE :

2.6 The rainfall and temperature have pronounced effects on climate. The rainfall data presented in table No. 8 gives normal rainfall, monthly rainfall and number of rainy days during the calendar year 1979 for the selected centres. Normal rainfall figures are worked out on the basis of actual rainfall for the periods ranging from a minimum of five years and maximum of 80 years. A day was treated as a rainy day if during the twenty four hours the rain gauge recorded a minimum of 2.5 mm. of rainfall. The table No. 9 gives actual maximum and minimum temperature recorded during each of the months of the calendar year 1979 in respect of Ahmadnagar district.

CHAPTER NO. 'III'

ANALYTICAL REVIEW OF SECTORIAL TRENDS

3.1 Based on the analysis of the data presented in part II of this publication, the following important sectorial trends are observed in the district economy.

3.2 AGRICULTURE :

Agriculture continues to be mainstay of the economy of the district. The extent of intensive utilisation of available land, crop pattern, yield rate and irrigation facilities indicate the level of agricultural development.

3.3 The following tables throw light on the above aspects.

(The Tahsilwise figures for the year 1978-79 are not made available).

3.4 The data reveals that while the percentage of double-cropped area in the district did not vary much in the three reference years viz. 1960-61, and 1970-71, an appreciable increase is observed during 1976-77 and 1977-78.

3.5 The actual figures of double cropped area during the reference years 1960-61, 1970-71, 1976-77 and 1977-78 were 65,028 , 66,262, 1,56,576, 1,56,854, hectares respectively which shows definite increase in the area sown more than once.

3.6. In Ahmadnagar District though there is a well developed network of canals, cultivation and especially double cropping in the district still relies heavily on good rains.

The proportion of irrigated area in Rahuri, Shrirampur & Kopergaon tahsils is quite significant as compared to other thashils because of availability of canal irrigation facilities on a large scale.

AREA UNDER DIFFERENT IRRIGATION CROPS.

3.13 The above data shown that well irrigation continues to be the major source of irrigation as well irrigation accounted for nearly half of the total irrigated area. The surface irrigation includes sources like Govt. canals, Pravate canals, Tanks etc.

CO- OPERATION

3.14 The Co-operative movement has made rapid strides in this district and provision of agricultural credit forms the main plank of this movement.

In the following table the Co-operative statistics are presented.

6. Loan out-standing (Rs. in lakhs).	566.29	1751.00	3457.17	

3.15 It is seen that though the no. of societies has almost remained constant as compared to 1960-61, the membership increased by 1.85 lakhs at the end of 1979-80. The working capital and loan advanced also increased respectively 644 % and 430 %. However the increase in over dues from Rs. 71 lakhs to Rs. 1225 lakhs (17 times) during the period of 18 years is quite disturbing factor.

WAGE RATE

3.16 The data on agricultural wage rates are collected every fortnight from representative agriculturists at 3 selected centres in the District. They are Akola, from Akola tahsil, Belapur from Shrirampur tahsil & Karjat from Karjat tahsil.

3.17 It is observed that during 1979 unskilled male labour earned Rs. 3.00 at Belapur as against Rs. 4.00, 3.75 Karjat & Akola respectively, Among skilled labour carpenter's wage rate was the highest while that of cobbler's wage rate was lowest. A carpenter earned Rs. 10-00 per day at Belapur. Rs. 11-00 at Karjat & Akola tahsils.

A cobbler earned Rs. 7-00 per day at Karjat as against Rs. 8-00 at Belapur & Akola.

LIVE STOCK

3.18 Livestock provides subsidiary income to the farmers besides the draught power for carrying out agricultural

operations. In the following table bovine & ovine population per 100 hectare of cultivable land is given.

TABLE NO. 8

3.19 The number of livestock per 100 Hectare as cultivable land was 150.0 for the district as a whole. In Ahmadnagar, Newasa, Shevgaon, Kopergaon, Jamkhed, Karjat & Shrigonda tahsils the average is found to be less than the average of the district. The lowest number of bovine & ovine population per 100 Hectare of cultivable land is found in Shevgaon while Sangamner had the highest numbers.

ELECTRICITY

3.20 Considering the importance of electricity for the development of the rural economy, rural electrification has received a period of place. The tremendous progress made in this regard can be gauged from the following table.

TABLE NO. 9

RURAL ELECTRIFICATION IN AHMADNAGAR DISTRICT IN 1960-61 & 1979-80

12	Sangamner	-	130
13	Kopergaon	-	100

3.21 It is seen that in 1960-61, only one village was electrified while at the end of 1979-80 1,112 villages were electrified. This covers (84 %) of the total villages in the district.

3.22 It is also observed that as per 1961 Livestock Census there were only 121 electric pumps for irrigation purposes. This figure rose to 36620 at the time of livestock census in 1978.

EMPLOYMENT

3.23 Unemployment and under employment are a drag on the economy. However only the data maintained by the employment exchange are available on this important subject. In the following table the available data regarding employment are presented.

TABLE NO. 10

NO. OF CANDIDATES ENROLLED AND VACANCIES NOTIFIED BY THE EMPLOYMENT EXCHANGE IN 1960-61, 1970-71 & 1979-80

4 Percentage of placement to registration	8.83	9.40	5.12	
5 Candidates on live register at the end of the year.	3721	5996	26332	

3.24 It is noticed that though the number of job seekers has increased two fold since 1960-61, the job opportunities have not kept pace with this increase. The actual placement was still less and while the percentage of placement to registration was 8.83 in 1960-61 it dropped down to just 5.12 % in 1979-80. As a consequence, while there were only 3721 candidates on the live register at the end of March, 1961, the figure rose to a staggering 26,332 at the end of March, 1980.

MEDICAL FACILITIES.

3.25 Comprehensive statistics on health coverage are not available. The availability of data on medical facilities is at present confined to public & public aided bodies only.

3.27 The extent of increase in the availability of these facilities can be seen from the following table.

TABLE NO. 11

3.27 The Health Survey & Planning Committee has recommended one Doctor for 3,000 population & 1 bed for 1000 population. The actual position shows that there is one Doctor in a public and public aided institution for a population of 13669. The bed population ratio is 2781 per beds. Thus though institutional health facilities have increased over the reference period and an increasing number of patients are availing of these facilities they fall very much short of the recommendation.

3.28 It also needs to be mentioned that though there are 9 hospitals in the district, they are not evenly spread over in the district. Out of the 9 hospitals, 5 are in Ahmadnagar tahsil and one each in Rahuri, Shrirampur, Sangamner, & Kopergaon tahsils. In other words, 8 tahsils have no public hospital facility at all.

EDUCATION

NUMBER OF STUDENTS IN DIFFERENT CATEGORIES.

3.29 Educational Development has made rapid progress during last two decades practically every village has a school now.

3.30 The following table presents the achievement in this regard .

TABLE NO. 12

2	Secondary	21,406	61,031	1,31,627
3	Higher	1,605	8,992	19,089

3.31 It is observed that the number of students in Primary School increased by 89 % in 1979-80 as compared to the base year 1960-61. The percentage increase in the number of students in Secondary & Higher institutions was 515% & 1089% respectively.

IMPORTANT RATIOS IN EDUCATION

3.32 For getting a correct & complete picture about the progress in education it is necessary to find out the ratios between different types of institutions and between teachers & pupils.

3.33 The following table presents the relevant statistics.

TABLE NO. 13

(CONTD)....

3.34 It is found that during 1960-61, for 17 Primary Schools, there was only one Secondary School and for 32 Secondary schools, there was one higher institution. As against this, the ratio was 8 in 1979-80 for both types institutions. Compared with the norms fixed the teacher pupil ratios show a satisfactory position.

During a period of 17 years, the banking facilities increased by about 7 times, covering all the tahsils. As a result while in 1961, one bank catered to the banking needs of 29,539 households in 1978, 4911 households were covered by one banking office.

R O A D S

3.36 Communication is the most important item among infrastructural facilities.

The Dound-Mannad Railway line passes through Ahmadnagar district which is a broad guage single line railway with a length of only 197 K.Ms. and connects 18 places in the district, by rail.

3.37 The total road length (extra municipal) in the district as on 31-3-1980 was 11,523 K.Ms. which works out 67 K.Ms. per 100 road length per 100 Sq. Kms. was only 18 Kms as on 31-3-61 Sq. area. The/since 1961,49 K.Ms.of new roads per 100 Sq.K.Ms. Thus area have been constructed in the district.

CHAPTER IV

ANNUAL PLAN 1979-80

4.1. Since the inception of the First-Five Years Plan, a great deal of effort was made to encourage economic growth through the provision of required inputs, extension of improved production techniques & building up of a net work, of infrastructural facilities and services throughout the country. However, plan formulation undertaken, at State level suffered to some extent from various drawbacks as it was rather difficult to make proper assessment of the following factors at the State level.

i) Wide disparities existing between the level of development attained by different areas & community groups.

ii) Underutilization of already available natural resources infrastructural facilities & productive capacities in different areas.

iii) Uniform application of development schemes resulting in inefficient utilization of physical & financial resources.

It was therefore, decided to adopt area development approach in the formulation of State Plan. Since the formulation of Area Development Plans requires integration and co-ordination of the activities of different sectors, considering the administrative apparatus available for the same, District has been adopted as unit of planning from the beginning of the Fifth Five Year Plan.

The area development approach embodied in the District Plan, envisages that the aspirations and requirements of specific local areas, communities and situations are fully reflected in the Plan document.

4.2 With a view to providing appropriate planning machinery at the District level for formulating co-ordinated development Plans and overseeing the performance, Government constituted a "District Planning and Development Council" for each district.

(CONTD)...

Ensuring co-ordinated action by various implementing agencies giving guidance in preparation and implementation of plans, approval of various district plans (subject to orders of the State Government) review of plan performance and making recommendations to the State Government and to consider and approve reappropriation savings excesses within the approved District Annual Plan are the functions of the District Planning & Development Council.

The District Planning & Development Council, is headed by "Palak Mantri" of the District as Chairman. Other Ministers of the District and the Divisional Commissioner are Vice Chairman & the Collector is the Member Secretary. The members of the Council include all MPs, MLAs, MLCs. President Zilla Parishad, Mayor, one President each from 'A', 'B', & 'C' Class municipal council, Chairman of District Central Co-operative Bank, Chief Executive Officer Zilla Parishad, Director of Land Development Bank, nine non official members etc. The Council generally meets twice a year.

4.3 To assist the council in its day to day planning and development activities an Executive Committee is constituted at district level. The Chairman and Vice Chairman of this committee are the same as that of the council. The Secretary is, however the District Planning Officer. The committee consists of some selected members from the council. The committee meets regularly for reviewing the plan performance and to suggest ways and means for effective implementation of the Plan Schemes.

4.4 In this chapter a brief review of the annual plan 1979-80 is taken.

Two separate plans, one for non tribal (General) and other for Tribal areas of the district, were formulated for implementation of the various plan schemes. Besides, Centrally Sponsored Schemes were also implemented during the reference period, in Ahmadnagar District.

In the table No.1 placed below, the consolidated information about the budget and expenditure figures under general (Non-Tribal) and Tribal Sub-Plan for ^{the} years 1978-79 & 1979-80 is given.

The information for the year 1978-79 is given for comparison.

TABLE NO.1

(Rs. in lakh)

Sr. No.	Plan	Annual Plan			
		1978-79		1979-80	
		Budget	Expenditure	Budget	Expenditure
1	2	3	4	5	6
1	General Plan (Non Tribal Area)	832.09	814.97	821.42	1595.55*
2	Tribal Sub Plan	93.33	81.08	76.71	83.46**
Total :-		925.42	896.05	898.13	1679.01

* Expenditure is inclusive of the amount of Rs. 449.16 lakh as the State Government share besides funds allotted to District Planning & Development Council.

** Expenditure is inclusive of Rs. 0.35 lakh which was received as an assistance of Central Government.

It will be seen from the above table, that the Expenditure incurred on general plan 1979-80 is 95.78 % more than that of general plan 1978-79, while expenditure incurred on tribal sub-plan during 1979-80 is just 2.93 % more than that of 1978-79.

The total expenditure on both the plans indicates 87.37 % increase during the reference year as compared to that in previous years.

4.5 The performance of general plan (Non-tribal) and Tribal sub plan, and Centrally Sponsored Schemes during 1979-80 is reviewed separately in the following paragraphs.

A) General Plan Schemes (Non -Tribal) :

The following table shows the budget provision and expenditure incurred under different major heads for the year 1978-79 & reference period (i.e. 1979-80) under review .

TABLE NO. 2

(Rs. in lakh)

Total :-		832.09	814.97 (98)	821.42	1595.55 (194)

The figures in bracket indicate the extent of utilisation of the budget provision under each head of development.

It will be seen from the above table that the budget provision were utilised to the required extent during 1978-79 while the expenditure is more than the budget provisions on all the development heads except Co-operation & Community Development and Transport & Communication during the annual plan period 1979-80.

The reasons for less or more expenditure on different major heads of development against the budget provisions, as stated in the monthly review of expenditure for March 1980 by the District Planning & Development Council is detailed below.

a) Agricultural Programme :- An additional provision of Rs. 24.58 lakh made by the Agricultural Department for Ayacut

{ CONTD.....

Development Scheme. So also some additional amount was released by the Dairy Development Department.

b) Irrigation and Power :- More grants were made available for medium projects, from the concerned department.

c) Industry and Mining :- Rs. 3.10 lakh were received more from the Department for the Scheme of Financial Assistance to seed money capital.

d) Transport and Communication :- An amount of Rs. 1.70 lakh was budgeted for the purchase of machinery, however no amount was spent on this scheme as the purchase of machinery comes under the powers of Superintending Engineer. This resulted in less expenditure by 1% against the budget provision.

e) Social Services :- The additional Departmental grant of Rs. 17.00 lakh for new tubewells was spent.

f) Miscellaneous : This major head of development includes Employment ^{Guarantee} scheme. During the year under review, Rs. 201.97 lakh were spent more on major irrigation works under employment guarantee scheme.

4.5(2): The percentage distribution of total expenditure incurred on different major heads of development during Annual Plan 1978-80 is presented below in table No.3.

TABLE NO. 3

: Sr. :	: Major Head of Development :	: Percentage distribution :	
		: ANNUAL PLAN :	
		: 1978-79 :	: 1979-80 :
: 1 :	: 2 :	: 3 :	: 4 :
1	Agricultural Programme	25.89	18.92
2	Co-operation & Community Development.	4.63	0.06
3	Irrigation & Power	12.33	10.72
4	Industry & Mining	2.94	1.66
5	Transport & Communication	12.75	3.53
6	Social Services.	21.30	8.76
7	Miscellaneous	20.16	56.35
Total :-		100.00	100.00

It is observed from the above table that there was notworthy decline in percentage distribution of expenditure on all heads of development except major head of development " Miscellaneous " which includes Employment Guarantee Scheme.

Since Ahmadnagar district is in Scarcity tract a large amount is required to be spent on Employment Guarantee Scheme every year. Hence the development head, " Miscellaneous " ranked first in the percentage distribution of expenditure .

PHYSICAL ACHIEVEMENTS :

4.6 The physical achievements under different schemes are given in detail in the table No.72 of part II of this publication. However the important physical achievements during 1979-80 Annual Plan under each sub head of development are noted in brief in the following paragraphs.

4.6(1) AGRICULTURAL PROGRAMME:

This major head of development covers important programme viz, Agricultural production, Soil Conservation, Animal Husbandry Minor Irrigation, D.P.A.P., Forest, Fishery and Warehousing.

a) Agricultural Production :- Under this sub head 'Rat eradication programme, covered area of 19279 Hectares as against the target of 12000 Hectares . The scheme of 'Plant protection' also covered area of 3360 hectares which is almost threetimes of the target. A target of 266 house-holds was fully achieved under the scheme of 'Resettlement of Agricultural Laboures on forest land '.
