SEASON AND CROP REPORT
1960 - 61

No. Stat/I/SCR/5 of 1963.
DIRECTORATE OF AGRICULTURE AND
ANIMAL HUSBANDRY,
Gujarat State, Ahmedabad.
Ahmedabad, Dated March, 1963.

FROM

G. A. PATEL, PH. D. (CORNELL),
Director of Agriculture,
Gujarat State.
Ahmedabad.

TO

THE SECRETARY TO THE GOVERNMENT,
Revenue and Agriculture Department,
Sachivalaya, Ahmedabad.

Sir,

I am to submit herewith the Annual Season and Crop Report of Gujarat State for the year ending 31st July, 1961.

I give below very briefly my remarks on the general agricultural conditions.

1. The agricultural season of 1960-61 has been on the whole, a disappointing one over the greater part of the State. The Season was characterised by inadequate rains with uneven distribution. Substantial and widespread rains were received during the months of July and August. Prolonged drought condition that prevailed during the months of September and October, however, arrested the growth of the standing crops and caused reduction in the crop yields.
2. Crop pests and plant diseases, were reported from all over the State. Prompt remedial and preventive measures were taken in the affected areas.
3. The mileage of Government canals was 1,162 and that of private canals was 35. The total irrigated area during the year under report was 18,13,400 acres showing an increase of 6.5 per cents. over the corresponding figures of 17,01,900 acres during 1959-60.

(Bk) Q-2—1 (Lino)

4. The decrease in the area under food crops was noticed in all parts of the State, while there was an increase in the area under non-food crops in all parts of the State.

The area under food crops was 1,18,60,600 acres as against 1,32,06,200 acres in 1959-60 showing a decrease of 10.2 per cents. The area under non-food crops was 1,22,75,900 acres as against 1,13,41,500 acres in 1959-60 showing an increase of 8.2 per cents.

5. The average yield per acre of crops, at the State level was lower than what it was in the preceding year in the case of Rice, Rabi-Jowar, Ragi, Gram and Sugarcane, while it was higher in Wheat, Kh. - Jowar, Bajri, Barley, Maize, Cotton, Groundnut and Tobacco crops.

6. The prices of agricultural produce ruled higher during the year under report as compared to those of the preceding year in the case of Barley, Gram, Groundnut, Castor, Rape, Mustard and Sesamum, while lower in case of Rice (Paddy), Wheat, Jowar, Bajri, Ragi, Kodra, Tur, Cotton (unginned) Sugar Raw (Gul) and Tobacco. There was a slight increase in the wages of Carpenters, Blacksmiths, Cobbler, field labour and other agricultural labours while there was decrease in the case of Herdsmen.

7. As per quinquennial census of livestock conducted in March, 1961, there was an increase in the number of cattle and buffaloes by 7.6 and 10.0 per cents. respectively. The number of breeding bulls, however, went down by 16.0 per cents. The number of sheep and goats has decreased by 15.6 and 15.8 per cents. respectively, the number of horses and ponies and mules went up by 10.8 and 60.7 per cents. respectively. The poultry showed an increase of 10.1 per cents.

8. The number of tractors, oil engines, electric pumps, ploughs, carts and sugarcane crushers has increased by 144.1, 135.5, 459.8, 17.9, 12.0 and 61.2 per cents. while ghanies showed a decrease by 28.9 per cents. (compared with 1956 census figures).

Yours faithfully,
G. A. PATEL,
Director of Agriculture,
Gujarat State,
Ahmedabad.

SEASON AND CROP REPORT OF GUJARAT STATE FOR THE YEAR 1960-1961

CHAPTER I

SEASON

The Agricultural season of 1960-61 has been on the whole a disappointing one over the great part of the State disappointment was more keenly felt as the season of 1959-60 was also not satisfactory one. The season was characterised by inadequate rains with uneven distribution. The season set in at the appropriate time with commencement and rains during the third week of June, 1960, and substantial rainfall was recorded. It was 154.1, 143.8, 127.0 445.4, 126.7, 109.7, 166.8, 266.1, and 140.2, M. M. at Ahmedabad, Godhra, Himatnagar, Surat, Amreli, Bhavnagar, Jamnagar, Rajkot and Surendranagar, respectively which were above the normal, while it was 23.6, 75.0, 102.6, 94.9, 38.6, 66.6 and 7.6, at Palanpur, Baroda, Ahwa, Kaira, Mehsana, Junagadh and Bhuj respectively which were below the normal and in Broach it was about the normal. Sowing of crops commenced immediately after receipts of rains and continued up to first week of July. Crop growth and development was good up to middle of August due to showers at short intervals and sunshine and thereby required agricultural operations were possible as and when needed. There were heavy rains at the end of June in the some areas of the State as a result, Kharif sowing could not be proceeded with smoothly while the crops already sown were damaged by excessive rainfall. Crops were damaged by heavy rains in parts of Amreli, Ahmedabad and Kaira districts during July. But after the middle of August there was dry spell for about 21 days which lasted upto 2nd week of September. During this period the crop growth and its development was affected considerably for want of rains. Cultivators could not get enough water for transplanting of Paddy at some places from natural sources. Hence area under Paddy could not be transplanted completely, and cultivators had to sow either Cotton or Jowar due to in adequate rains in latter parts of monsoons. Crops like Paddy, Bajri, Jowar etc. suffered to a considerable extent. If one good last rain would have been received then it would have been one of the best year for agricultural production. However, Cotton crop was most satisfactory in yield at majority of the places, but due to lack of one last rain, season was early by about one and half month. Other crops like Pulses etc. had suffered and resulted in poor yield per acre.

In several districts rainfall was low from beginning as a result Kharif crops gave poor yields.

Due to unfavourable late rains, area under Rabi crops was consequently reduced and performance of dry crops was also not satisfactory except where irrigation facilities existed. There was practically no rainfall in the month of October except at a few places and hence second crop in Kharif lands could not be taken. There was untimely rainfall at many places in the first week of February 1961.

Distribution of Rainfall.—Table I compares the rainfall during the year under report with the normal rainfall at each district headquarters Station in the State.

Following observations are made from a study of this table.

Pre-monsoon rains.—The pre-monsoon rains recorded were 12.3, 63.5 and 25.0 M. M. at Baroda Ahwa and Surat respectively in Baroda Division and 54.6 and 61.0 M. M. at Amreli and Surendranagar respectively in Rajkot Division which were above the normal 1.8 and 2.5 M. M. at Palanpur and Kaira respectively in Baroda Division and 0.8 M. M. at Rajkot of Rajkot Division which were below the normal at other places in the State these rains were absent.

Monsoon rains.—The monsoon rains recorded were 442.5, 450.5, 538.7, 711.9, 1,178.1, 445.2, 320.5, 484.6, 565.8 and 983.9 M. M. at Ahmedabad, Palanpur, Baroda, Broach, Ahwa, Kaira, Mehsana, Godhra, Himatnagar, and Surat respectively of Baroda Division and 351.4, 461.0, 295.1, 84.5, 565.3 and 366.8 M. M. at Amreli, Bhavnagar, Jamnagar, Bhuj and Surendranagar respectively of Rajkot Division which were below the normal, 496.2 M. M. in Junagadh district of Rajkot Division which was above the normal.

Post-Monsoon rains.—The post-monsoon rains recorded were 7.0, Nil, 24.8, 0.8, 9.8, Nil, Nil, 8.9, Nil, Nil M. M. at Ahmedabad, Palanpur, Baroda, Broach, Ahwa, Kaira, Mehsana, Godhra, Himatnagar and Surat respectively of Baroda Division and Nil at all districts headquarters of Rajkot Division which were below the normal.

Winter rains.—The winter rains were 1.5, Nil, 0.5, Nil, Nil, 3.8, 2.4 M. M. at Ahmedabad, Palanpur, Ahwa, Kaira, Mehsana, Godhra, Himatnagar and Surat respectively of Baroda Division and Nil, Nil, 4.3 and Nil M. M. at Amreli, Jamnagar, Rajkot, Surendranagar of Rajkot Division which were below the normal, 11.5, 12.3 M. M. at Baroda and Lroach of Baroda Division and 38.4, 27.9 and 16.9 M. M. at Bhavnagar, Junagadh and Bhuj respectively of Rajkot Division were above the normal.

Total Rainfall for the season 1960-61.— The total rainfall for the season 1960-61 were 451.0, 452.3, 575.0, 737.3, 1,251.9, 447.7, 320.5, 493.5, 569.6 and 1,011.3, M. M. at Ahmedabad, Palanpur, Baroda, Broach, Ahwa, Kaira, Mehsana, Godhra, Himatnagar and Surat respectively of Baroda Division and 406.0, 499.4, 295.1, 101.4, 570.4 and 427.8, M. M. at Amreli, Bhavnagar Jamnagar, Bhuj, Rajkot and Surendranagar, respectively of Rajkot Division which were below the normal respectively, 524.1, M. M. at Junagadh of Rajkot Division was above the normal.

3. *Baroda Division.*—In Baroda Division the total rain received was below the normal throughout the Division. Sowing operation was completed in time and sufficient time was available for carrying out all the normal operations viz. weeding etc. Hence the fields were clean and whatever little moistures was available could be preserved. The condition of *Khariif* crops were good till the middle of August, 1960. The rainfall in the latter part of monsoon was scanty and unevenly distributed. The cultivators could not get enough water in Kyari land for transplanting of Paddy at places from natural source. Hence full area under Paddy could not be transplanted completely and cultivators had to sow either Cotton or Jowar. Due to inadequate rains in later part of monsoon crops like paddy, Cotton, Groundnut etc. suffered to a considerable extent. The Cotton crop was most satisfactory in yield at majority of the places, but due to lack of one last rain, season was early by about one and half month.

The other crops like groundnut, Pulses etc. had suffered and resulted in poor yield per acre.

In several districts of Baroda Division, rainfall was low from the beginning, as a result *Khariif* crops gave poor yield.

In some places, of Broach, Banaskantha, Sabarkantha and Panchmahals scarcity conditions akin to famine were prevailing.

Due to unfavourable late rains and less over all precipitation during monsoon, area under Rabi crops was consequently reduced and performance of dry crop was also not satisfactory except where irrigation facilities existed in the Division. There was practically no rainfall in the month of October at Palanpur, Kaira, Mehsana, Sabarkantha and Surat and hence second crop in *Kharif* land could not be taken. There was, untimely rainfall at many places in the first week of February 1961.

Attack of aphids and Jassids on groundnut and other pulses were reported to some extent from places. The sporadic appearance of swarming Catterpillar in Navsari Block of Surat district in July, 1960 was reported in surrounding Paddy field of 3,100 acres. It was checked by spraying BHC 50 per cent. and Endrin 20 EC etc. The Hairy Catterpillar was observed in Jagadia taluka of Broach district. Appropriate control measures were taken. Army worm appeared in epidemic form in Meghraj taluka of Sabarkantha district in the month of August 1960 and 5,000 acres affected, was controlled by timely dusting and spraying of BHC Phrilla was observed in Bardoli taluka of Surat district and necessary control measures were taken. Woolimites in Cotton was especially reported in many parts of Broach district. Pink and spotted Bollworms were also reported but did not damage the crop very much. Earrot in Bajri was reported in month of October, in Banaskantha, Mehsana, Panchmahals and Baroda districts. Control measures were taken. Due to untimely rainfall in the month of February, 1961 at the stage of flowering in cumin, and subsequently it was effected with cumin blight. The damage was done upto 40 to 50 per cent. in parts of Vijapur and Kalol taluka of Mehsana district, while in other area the damage was upto 20 per cent. The attack was sporadic and sudden. The Locusts swarms invasion was reported in the month of October and November 1960 throughout the Division. Practically very little damage was done. During winter no severe cold and frost was reported except at very few places. The supply of food, fodder and water was almost satisfactory except in few places of scarcity areas where Government had to take necessary steps to ease the situation. No serious disease was reported.

4. *Rajkot Division.*—In Rajkot Division, sowing of crops was commenced immediately after receipt of rains and continued upto first

week of July. Crop growth and development was good upto middle of August due to showers at short intervals and sunshine and thereby required agricultural operations were possible as and when needed. But after the middle of August there was a dry spell for about 21 days which lasted upto 2nd week of September. During this period the crop growth and its development was affected considerably for want of rains. Thus the crop growth remained stunted and poor ultimately resulting in poor harvest. Apart from this, there were no late rains and hence the grain formation remained poor and the grains remained under-developed. The setting of groundnut pods remained poor and the developments of pods also poor. Cotton crop was affected to a great extent. The season was early in Cotton as the growth of the crop ceased due to less rainfall and want of late rains. Crops in Kutch and Surendranagar districts failed and scarcity was declared in these two districts. The failure of *Khurif* season also affected the Rabi crops. Due to less rainfall the area under crops was reduced to a considerable extent. Apart from this, the seasonal conditions were unfavourable for *Rabi* crops as whether remained moderate. No proper cold was experienced during season and as such it affected the germination of Wheat crop in its initial stages. Thus the crop growth remained poor for want of favourable seasonal conditions. Proper cold was felt only during the month of February. Thus due to this the maturity of crops was affected resulting in low yields. The fodder supply was unsatisfactory in some parts of the Division. The fodder shortage was acute in parts of Surendranagar and Kutch districts and the *maldharies* (Cattle owners) had to migrate from these areas in search of fodder and water. Locusts were reported in Kutch district in month of October, 1960.

CHAPTER II

AREA CULTIVATED AND UNCULTIVATED

(Table II)

(Summary table A)

5. *Number of villages*.—During the year 1960-61 the number of villages in the State was 19,050.

6. *Total area:—Reporting and non-reporting area*.—The total area *i. e.* the Geographical area of the Gujarat State was 4,42,67,500 acres during the year under report as against 4,52,99,100 acres during the previous year, thus showing a small decrease of 2.3 per cent. of the

total-area of the State. This was due to survey corrections. The reporting area was 3,23,59,300 acres and non-reporting area was 1,19,08,200 acres.

7. *Cropped area.*—The total cropped area *i.e.* the gross cropped area in the State showed a slight decrease of 4,11,200 acres having gone down from 2,45,47,700 acres during 1959-60 to 2,41,36,500 acres during 1960-61 or by 1.7 per cent. The net cropped area showed an increase of 0.1 per cent. it being 2,32,20,800 acres during the year under report as against 2,31,86,600 acres during previous year. The area under forests was 22,79,400 acres during the year under report as against 25,57,100 acres during 1959-60 or less by 10.9 per cent. During the year under report, the acreage under land put to non-agricultural uses, culturable waste and other fallows recorded an increase of 11.0, 38.3 and 4.1 per cent. respectively as compared to that of 1959-60. On the other hand the acreage under barren and unculturable land, permanent pastures and other grazing lands, land under miscellaneous tree crops and groves not included in area sown and current fallows recorded a decrease of 2.8, 4.4, 90.2 and 6.8 per cent. respectively as compared to that of the year 1959-60. The decrease by 90.2 per cent. in land under miscellaneous tree crops and groves not included in area sown was due to incorrect reporting during previous years in Kutch and Bhavnagar districts. It has been corrected during the year under report.

CHAPTER III

IRRIGATED AREAS

(Table III-A and III-B)

(Summary table B and C)

8. *Sources of water supply.*—During the year 1960-61 the number of Government canals reported was 259 as against 188 reported during the year 1959-60, thus recording an increase of 37.8 per cent. There was also an increase in the mileage of these canals from 918 to 1,162 or by 26.6 per cent. The number of private canals was almost stationary being 21 during the year, under report as against 21 during the previous year, while the mileage of these canals showed an increase by 118.7 per cent. or from 16 in 1959-60 to 35 in 1960-61. The number of Government tube-wells showed a slight increase from 552 to 589 or by 6.7 per cent. The number of private tube-wells showed an increase from 15 to 21 or by 40.0 per cent. The number of Government masonry wells used for irrigation purposes

showed a decrease of 11.0 per cent. having gone down from 5,959 in 1959-60 to 5,306 in 1960-61, while the number of Government non-masonry wells used for irrigation purpose recorded an increase 52.6 per cent., it being 1,894 in 1959-60 as against 2,890 during 1960-61. The number of private masonry wells used for irrigation purposes recorded an increase from 2,71,659 in 1959-60 to 2,78,771 in 1960-61 or by 2.6 per cent. while the number of private non-masonry wells used for irrigation purpose recorded a decrease from 1,34,271 in 1959-60 to 1,32,528 in 1960-61 or by 1.3 per cent. The number of wells used for domestic purposes went up from 75,522 in 1959-60 to 79,114 in 1960-61 or by 4.8 per cent. The number of wells not in use showed a slight increase of 0.8 per cent. The number of wells having independent ayacut showed a decrease of 13.9 per cent. The number of wells supplementing recognised sources of water supply showed an increase of 7.6 per cent. The number of reservoirs went down by 14.1 per cent. or from 184 in 1959-60 to 158 in 1960-61. The number of tanks with ayacut 100 acres or more and less than 100 acres recorded a decrease of 51.1 and 17.2 per cent. or from 970 and 20,044 in 1959-60 to 474 and 16,602 in 1960-61 respectively. The decrease was noticed mainly in Ahmedabad, Banaskantha, Mehsana and Bhavnagar districts due to incorrect reporting during previous years which has been corrected during the year under report. The number of oil engines showed an increase from 32,090 during 1959-60 to 37,995 during the year under report or by 18.4 per cent.

9. *Irrigated areas.*—The total area irrigated in the State was 18,13,400 acres during the year under report as against 17,01,900 acres during 1959-60 thus recording an increase of 6.5 per cent. This increase was noticed mainly in the case of Bajri, Green Gram, Sugarcane, Chillies. Groundnut and Tobacco crops.

During the year under report, the percentage of net area irrigated to the net area sown was 6.8 as against 6.7 in 1959-60, and that of the gross area irrigated to gross area sown was 8.5 as against 6.3 in 1959-60.

10. *Area Irrigated under different sources of irrigation.*—The area irrigated by private canals, wells and other sources recorded increase by 87.5, 9.1 and 81.7 per cent. respectively. On the other hand, the area irrigated by Government canals and tanks recorded a decrease by 0.6 and 38.7 per cent. respectively.

11. *Irrigated areas under food and non-food crops.*—The total area irrigated by all sources was 18,13,400 acres as against 17,01,900 acres during the year 1959-60 thus recording an increase of 6.5 per cent. The area irrigated under food crops during 1960-61 was 12,12,000 acres as against 12,04,800 acres during the previous year, thus recording an increase of 0.6 per cent. The irrigated area under non-food crops also recorded an increase of 21.0 per cent. it having gone up from 4,97,100 acres during 1959-60 to 6,01,400 acres during the year under report.

CHAPTER IV

CROPPED AREA

(Table IV-A, IV-B and IV-C)

(Summary table D)

12. *Total area under crops.*—During the year under report, the gross cropped area of 2,41,36,500 acres showed a slight decrease of 4,11,200 acres or 1.7 per cent. to the corresponding area of 2,45,47,700 acres during the preceding year of the gross cropped area, 1,35,64,300 acres were in the Rajkot Division, 1,05,72,200 acres in the Baroda Division, the percentage increase and decrease in area over the corresponding figures of the previous year in each Division being 26.3 and 23.5 respectively. For the State as a whole, food crops occupied 1,18,60,600 acres or 43.8 per cent. while non-food crops occupied 1,22,75,900 acres or 56.2 per cent. of the total sown area. During the year under review, the area under food crops showed a decrease of 10.2 per cent. or 13,45,600 acres, while area under non-food crops recorded an increase of 8.2 per cent. or by 9,34,400 acres.

The table below gives the acreage under food and non-food crops in two Divisions of the State, during the years 1959-60 and 1960-61 : —

Division	Food crops			Non-food crops		
	1959-60	1960-61	Percentage increase (+) or decrease (—)	1959-60	1960-61	Percentage increase (+) or decrease (—)
Baroda ..	83,650	74,944	—10.4	54,455	60,699	+11.5
Rajkot ..	48,412	43,662	—9.8	58,960	62,060	+5.3
State ..	1,32,062	1,18,606	—10.2	1,13,415	1,22,759	+8.2

It will be seen from the above table that under food crops there was decrease of 8,70,600 and 4,75,000 acres or 10.4 and 9.8 per cent. in the Baroda and Rajkot Divisions respectively. On the contrary, area under non-food crops showed an increase in both the Divisions. In area under non-food crops, there was an increase of 6,24,400 and 3,10,000 acres or 11.5 and 5.3 in the Baroda and Rajkot Divisions respectively.

13. *Food crops*.—Among the main food crops, as compared to the corresponding figures of the previous year, the area under rice recorded a decrease of 6.9 per cent. or 97,200 acres. This decrease was shared by Baroda Division by 1,12,300 acres or 8.3 per cent., while Rajkot Division recorded an increase of 15,100 acres or 25.8 per cent. At the State level, the acreage under wheat declined by 6,72,300 acres or 43.2 per cent. This decline was shared by both the Divisions by 5,74,600 and 1,51,700 acres or 50.0 and 24.1 per cent. in Baroda and Rajkot Divisions respectively. The acreage under the kharif Jowar went down by 0.9 per cent. or by 23,300 acres. This decrease was shared by Baroda Division where it was 31,100 acres or by 2.8 per cent. while in Rajkot Division showed an increase of 7,800 acres or by 0.5 per cent. The acreage under Rabi Jowar went down by 1,55,800 acres or by 23.7 per cent. at the State level. This decrease was shared by both the Divisions by 1,09,300 and 46,500 acres or 21.2 and 33.2 per cent. in Baroda and Rajkot Divisions respectively. The area under Bajri showed an increase of 2,00,100 or 6.0 per cent. at the State level. This increase was shared by both the Divisions by 1,77,800 and 22,300 acres or 10.7 and 1.3 per cent. in Baroda and Rajkot Divisions respectively. The area under Ragi recorded an increase of 4,900 acres of 2.6 per cent. Ragi was sown in Baroda Division only. The area under maize showed an increase by 56,100 acres or 11.4 per cent. at the State level. The area under gram, at the State level, showed a decrease of 68.0 per cent. or 3,02,100 acres. This decrease was 66.8 and 73.5 per cent. or 2,46,900 and 55,200 acres in Baroda and Rajkot Divisions respectively. The area under tur increased slightly 5.4 per cent. or by 10,800 acres. The area under sugarcane recorded an increase by 43.5 per cent. or 19,400 acres. This increase was shared by 24.3 and 51.9 per cent. or 3,300 and 16,100 acres by Baroda and Rajkot Divisions respectively. The total area under kharif food crops showed an increase of 15.5 per cent. and under Rabi food crops showed the decrease by 57.5 per cent. for the State as a whole.

14. *Non-food crops*.—In the case of cotton, there was an increase by 7,62,700 or 20·7 per cent. This increase was shared to the extent of 6,21,600 and 1,41,100 acres or 26·7 and 10·4 per cent. by Baroda and Rajkot Divisions respectively. The area under groundnut recorded an increase of 5·7 per cent. or by 2,63,900 acres. This increase was 9·4 and 4·7 per cent. or 93,700 and 1,70,200 acres in Baroda and Rajkot Divisions respectively. The total area under sesamum recorded slight increase of 1·1 per cent. or by 2,900 acres. Baroda Division showed an increase of 15·5 per cent. or 13,300 acres while Rajkot Division showed a decrease of 6·0 per cent. or 10,400 acres. The area under tobacco showed a decrease of 12,400 acres or 5·1 per cent. This decrease was in Baroda Division. The total area under kharif and Rabi non-food crops for the State as a whole showed an increase of 17·5 and 8·2 per cent. respectively.

15. On the whole during the year under review, the gross cropped area went down by 1·7 per cent. or 4,11,200 acres as compared to the corresponding figures of the previous years. The accompanying table gives the gross cropped area, double cropped area, net cropped area and the area under principal crops in the two Divisions of the State during the years 1959-60 and 1960-61.

up by 1·8 per cent. in the Rajkot Division when compared to that of the previous year. The price of Jowar viz., Rs. 14·66 per maund was lower by 4·9 per cent. The decline in price was noticed as 5·1 per cent. and 3·1 per cent. in Baroda and Rajkot Divisions respectively. At the State level the price of Rs. 16·84 per maund of Bajri was lower by 0·8 per cent. as compared with that of the previous year. The price went up by 0·6 per cent. in Baroda Division while in Rajkot Division it remained stationary. The average price of Ragi viz., Rs. 10·65 was lower than that of the previous year by 4·5 per cent. at the State level. The price decreased by 4·5 per cent. in Baroda Division. The prices of Maize, viz., Rs. 15·00 per maund was stationery. The price of Kodra viz., Rs. 9·72 per maund was lower by 16·6 per cent. at the State level. The decrease of 16·6 per cent. was noticed in Baroda Division. Among Pulses, the average price of Rs. 27·95 per maund of the Turdal at the State level was lower by 7·2 per cent. This decrease was noticed in Baroda Division. The price of Gram, viz., Rs. 16·04 per maund was higher by 1·8 per cent. It went up by 11 per cent. and 8·6 per cent. in Baroda and Rajkot Divisions respectively. The average price of Gul, viz., Rs. 12·49 per maund was lower 45·1 per cent. at the State level. It decreased by 59·5 per cent. in Rajkot Division. The average price of Groundnut at the State level, viz., Rs. 23·60 per maund was higher by 12·6 per cent. than that of the previous year. It was higher by 10·7 and 6·8 per cent. in Baroda and Rajkot Divisions respectively. The price of Rs. 41·44 per maund of Tobacco was lower by 17·5 per cent. at the State level as compared with that of the previous year. The price decreased by 17·5 per cent. in Baroda Division. The average price of Cotton (Unginned) of Rs. 40·88 per maund was lower by 5·6 per cent. at the State level. The decrease in price was noticed as 2·8 and 19·4 per cent. in Baroda and Rajkot Divisions respectively. The average price of Potatoes of Rs. 8·21 per maund was lower by 1·0 per cent. at the State level. The average price of Castor-seed of Rs. 23·07 per maund was higher by 1·4 per cent. The increase in price was noticed as 2·6 and 13·4 per cent. in Baroda and Rajkot Divisions respectively. The average price of Rape of Rs. 34·25 per maund was higher by 24·5 per cent. The average price of Mustard of Rs. 29·82 per maund was higher by 32·9 per cent. The average price of sesamum of Rs. 36·14 per maund was higher by 9·1 per cent. The increase in price was noticed as 14·2 and 10·5 per cent. in Baroda and Rajkot Divisions respectively.

CHAPTER VII

AGRICULTURAL WAGES

(*Table VII*)

(Summary table G)

24. According to the Manual of Revenue Accounts, Agricultural Labour is classified under three categories viz. (a) Skilled, (b) ordinary and (c) field labour. Skilled labour comprises of carpenters, blacksmiths and cobblers. Ordinary labour consists of load carrying coolies, well-diggers, mason's or carpenter's assistants, earth workers, etc., while field labour comprises of ploughmen, showers, reapers, harvesters, weeders and transplanters, etc. In the present report (in Table VII Agricultural Wages) in addition to the above three categories, one more category is added viz., herdsmen, whose main work is to collect live-stock from different owners and to feed them in the jungle during the day and to bring them back in the evening to the owner's places.

25. Table VII of the report gives district-wise figures of wages of different classes of agricultural labour. Perusal of Summary Table 'G' shows that during year 1960-61, the average rates of wages of carpenters showed a slight rise from Rs. 4.55 during the year 1959-60 to Rs. 4.61 during the year under report, that of blacksmiths from Rs. 4.29 to Rs. 4.32, of cobblers from Rs. 3.89 to Rs. 4.00, of field labours from Rs. 1.92 to Rs. 1.93, of other agricultural labours from Rs. 1.68 to Rs. 1.85 while of herdsmen decreased from Rs. 1.49 to 1.39.

CHAPTER VIII

AGRICULTURAL STOCK

(*Table VIII*)

(Summary table H)

26. Table VIII of this report gives the details of Livestock, Poultry and Agricultural Machinery and Implements as per quinquennial census of Livestock conducted in March, 1961, by the Director, Bureau of Economics and Statistics. Summary Table 'H' gives the total number of Livestock, Poultry, Agricultural Machinery and implements, under each main head.

The number of bovine animals increased from 87,38,976 to 94,68,068 during five years *i. e.*, by 8·3 per cent.

Cattle.—There is an increase in the number of cattle from 60,89,415 to 65,53,485 or by 7·6 per cent. over that of the preceding quinquennial census of livestock taken in April, 1956. The number of breeding bulls over three years went down from 17,537 to 14,723 or by 16·0 per cent. This decline was due to the general tendency to utilise the bulls kept for breeding purposes, for other work also. It is, therefore, likely that a substantial number of the breeding bulls might have been enumerated as “working bulls” and consequently included in that category. On the other hand, the number of other males over three years recorded an increase from 27,14,767 to 30,30,243 or by 11·6 per cent. The number of breeding cows over three years recorded an increase from 16,34,407 to 18,21,353 or by 11·4 per cent. while the number of other cows over three years went down from 26,376 to 14,957 or by 43·3 per cent. The number of young stock showed a decrease from 16,96,328 to 16,72,209 or by 1·4 per cent. over that of 1955-56.

Buffaloes.—The total number of buffaloes increased from 26,49,561 to 29,14,583 or by 10·0 per cent. over that of 1955-56. The number of breeding bulls over three years increased from 9,873 to 10,046 or by 1·8 per cent. The number of other males over three years increased from 19,495 to 29,631 or by 52·0 per cent. The number of breeding cows increased from 14,74,699 to 16,82,497 or by 14·1 per cent. The number of other cows over three years increased from 14,380 to 18,761 or by 30·5 per cent. The number of young stock increased from 11,31,114 to 11,73,648 or by 3·8 per cent. over that of 1955-56 census.

Sheep and goats.—The number of sheep decreased from 17,53,880 to 14,81,024 or by 15·6 per cent. The number of goats also decreased from 26,37,706 to 22,21,900 or by 15·8 per cent. as compared with the corresponding number of the year 1955-56.

Horses and ponies.—The total number of horses and ponies increased from 1,02,060 to 1,13,118 or by 10·8 per cent. The number of males over three years decreased from 28,269 to 24,744 or by

12.5 per cent. while the number of females over three years increased from 46,223 to 56,010 or by 21.2 per cent. The number of young stock increased from 27,568 to 32,364 or by 17.4 per cent. as compared with the corresponding number of the 1955-56 census.

Mules, Donkeys, Camels and Pigs.—The number of mules increased from 524 to 842 or by 60.7 per cent. The number of donkeys decreased from 1,21,805 to 1,13,331 or by 7.0 per cent. The number of camels increased from 43,664 to 44,088 or by 1.0 per cent. while the number of pigs considerably increased from 415 to 5,190 or by 110.6 per cent. as compared with the corresponding number of the year 1955-56.

Total livestock.—The total number of livestock increased from 1,33,99,030 to 1,34,47,561 or by 0.4 per cent. as compared to 1955-56 census.

Poultry.—The total number of poultry increased from 18,59,371 to 20,47,061 or by 10.1 per cent. The number of Fowls (Hens, cocks and chicken) increased from 18,54,211 to 20,35,037 or by 9.8 per cent. The number of Ducks (Ducks, Drakes and Ducklings) increased from 3,923 to 5,460 or by 39.2 per cent. as compared to 1955-56 census.

Agricultural Machinery and Implements.—The number of ploughs, carts, sugarcane crushers, oil-engines, electric pumps and tractors increased from 13,27,167 to 15,64,947 or by 17.9 per cent., 6,32,315 to 7,08,296 or by 12.0 per cent., 3,912 to 6,307 or by 61.2 per cent., 19,097 to 44,982 or by 135.5 per cent., 1,112 to 6,225 or by 459.8 per cent. and 819 to 1,999 or by 144.1 per cent. respectively, while Ghanis decreased from 5,760 to 4,097 or by 28.9 per cent. as compared with the corresponding number of the year 1956 census.

CHAPTER IX

AGRICULTURAL OUTLOOK

27. As mentioned in Chapter I of the report, the season under review was disappointing one over the greater part of the State.

SUMMARY TABLE—F

Farm prices of Principal Crops (State averages)

(Price per maund of 82 2/7 lbs.)

Crops		1957-58	1958-59	1959-60	1960-61	Percentage increase(+) or decrease(—)
1	Rice (Paddy) ..	15.98	15.38	16.46	16.13	—2.0
2	Wheat ..	19.06	20.65	20.29	19.42	—4.3
3	Jowar ..	13.90	13.66	15.41	14.66	—4.9
4	Bajri ..	15.61	16.27	16.98	16.84	—0.8
5	Barley ..	12.96	12.30	12.33	13.66	+1.08
