## I N T R O D U C T I O N

### LOCATION :

1.1 The satara district is situated partly in the Bhima river basin and partly in the Krishna river basin. The tahsils Khandala, Phaltan and Man are situated in the Bhima river basin, while the rest of the tahsils are situated in the Upper Krishna basin. The district has an area of 10,492 Sq. Kms.

The District lies between  $17^{\circ}5'$  and  $18^{\circ}11'$  north latitude and  $73^{\circ}33'$  and  $74^{\circ}54'$  east longitude.

### BOUNDARIES :

1.2 The district is situated on the west of Deccan plateau and is surrounded by the Pune district on the north by the Solapur district on the east, by the Sangli district on the south and by the district of Ratnagiri and Kolaba on the west.

### TOPOGRAPHY :

1.3 1) HILLS : There are two main systems of hills in the Satara district. The Sahyadri range and its off-shoots and the Mahadeo range and its off-shoots. The main range of Sahyadri with a length of about 96 Kilometres from north to south forms the western boundary of this district. The Mahadeo range starts about 16 Km. north of Mahabaleshwar and stretches east and south-east across the whole breadth of the district. From this main range of Mahadeo hills, three spurs stretch to the south. Hills in the district are very low, barren and ragged except near Mahabaleshwar and Koyana valley. The top of Mahabaleshwar the highest point in the district, is about 1,436 metres above mean sea level.

ii) RIVERS : The Krishna is the principal river of the district. The other important rivers are the Koyana, the Nira, the Man, the Venna, the Kudali, the Urmodi, The Vasna, the Yerla and the Tarali.

The Krishna rises in the eastern brow of Mahabaleshwar plateau with its source at about 1,371 meters above mean sea level. Several streams which flow from the valleys formed by the main hill ranges in the district make up the head waters of the Krishna river. The drainage system, of the Krishna river includes, besides the drainage of Central system, the drainage of seven feeders, namely, the Kudali, the Venna, the Urmodi, the Tarali and the Koyana on the right and the Vasna and the Yerla on the left. From the source, the Krishna flows for nearly 160 Kms. through the Satara district and enters thereafter into the Sangli district.

The Koyana is the largest feeder of the Krishna river in the district. It rises in the Mahabaleshwar plateau, runs towards south upto Helwak in Patan tahsil, where it changes its courses and flows towards east and falls into the Krishna at Karad.

The Nira river which flows on the northern boundary of the district and the Man river which flows in the South-east are tributaries of Bhima which itself meets the Krishna.

iii) SOIL : The Soils of the district are observed to be of varied textures. In the west, the soil in Mahabaleshwar, Wai, Jacli & Patan tahsils is formed from the red laterice of the ghats. It is thin and poor on the hill slope, but gets richer where natural or artificial terracing has accumulated soil with vegetable matter drained by rain waters.

Rich black soil is found in the low lands of the valleys of Krishna, Venna, Kudali, Koyana and Kole rivers in Wai, Jaoli and Patan tahsils.

The central portion of the district consists of medium to deep black alluvial soils. Krishna valley soils are said to be one of the richest in the Deccan and the portion which lies in Satara and Karad tahsils is reported as the richest in the Krishna Valley. For the most part it is the finest black alluvial soil highly retentive of moisture and very fertile.

The soil in Khandala and Phaltan tahsils is poor and stony in the vicinity of the hills, but there are good black soils along the Nira and its tributary streams. In the eastern part of Khandala tahsil, the soil is poor, shallow and whitish but is capable of growing wheat if adequate water is available.

Towards the east of the Krishna valley the soil is poor with the exception of wide stretches of good black soil along the numerous streams and rivers in Koregaon tahsil.

In the Khatav tahsil, soils are of intermediate depth and more widely spreading than that of Man tahsil but not as rich as in Koregaon tahsil. In Man tahsil, the soils are extremely poor and shallow. Good soil is found only in narrow strips along the streams.

#### RAINFALL IN GENERAL AND SCARCITY CONDITIONS :

1.4 1) RAINFALL : The rain starts by the middle of June and lasts till the end of September in the district. The rainfall is not uniform all over the district. It is very heavy in the western region and it goes on receding towards eastern part. The extreme west part gets over 5,000 mm. rainfall, while the eastern part of the Sahyadri zone gets the rainfall between 1,200 mm to 2,000 mm.

The normal rainfall recorded at Mahabaleshwar centre is 6,182mm. while at Pachagani it is 1,865 mm. The central zone gets rainfall between 600 mm. to 1,200 mm. The district head quarter Satara has normal rainfall of 1,025 mm. At other centres it is Koregaon 707 mm., Khandala 504 mm, Wai 710 mm., and Karad 713mm. In the eastern zone average rainfall is below 600 mm.annually. It is as follows : Phaltan 473 mm., Dahiwadi 462 mm,Vaduj 512mm.

ii) SCARCITY CONDITIONS : The eastern part of the district is prone to scarcity conditions. The Fact Finding Committee appointed by the Government of Maharashtra under the Chairmanship of Shri. S.R. Sukhatankar has opined that the tahsils of Khandala, Phaltan, Man, Khatav and Koregaon are the drought prone areas in the district. During the year 1980-81 no scarcity conditions prevailed in the district.

iii) MINERALS : Except for building stone, lime stone and little iron deposits in about 20 villages of Jaoli tahsils and 30 villages in Patan tahsil, deposits of important minerals are not known to have occurred in any part of the district.

Building stone sand of good quality and lime stone is found to be available all over the district. Good clay for bricks and tiles is found on the river banks.

iv) FORESTS : An area of about 1544 Sq.Kilometers or 14.7 percent of the total geographical area of the district is under forests. It is scattered over the entire district. These forests belong to three groups :(1) the overgreen Sahyadri forests (2) the plantation on the slopes of the off-shoots of Sahyadri hills that run east and (3) bush sprinkled hills to the east of Krishna.

The evergreen forests of Sahyadri ranges form a belt along the west of the district 10 to 22 kilometres broad. These forests extend without a break through the whole length of the district. They contain many trees valuable both as timber and firewood. The chief of these are Jambool, Anjan, Ain, Umbar, Kenja, Hirda, Phanas and Nara. Teakmixed with bush-wood is found in the second group of forest lands, i.e. ranges which branch east from the Sahyadries. These forests are much broken by patches of cultivated land. The forests of the third group are only sprinkled with bush and are very much scattered.

V) AREA :- The district has an area of 10,492.0 Sq.Kilometers out of which 10,109.6 Sq.Kilometers is rural and 382.4 Sq.Kilometers is urban area. The district ranks 16th in area among the 26 districts of the Maharashtra State.

vi) DEMOGRAPHY :- The Satara district ranks 13th in population among the 26th districts of the Maharashtra State, so far as population of 1971 census is concerned and now it ranks 15th as per 1981 Census.

The following table gives tahasilwise decadal variation for the last two decades.

SR: NO:	DISTRICT/ TAHSIL.	POPULATION			DECADAL PERCENTAGE VARIATION		DENSITY

10. JAOLI	80,091	91,939	1,05,287	+ 14.79	14.52	103	118	
11. MAHABALE-	24,370	30,191	36,475	+ 23.89	20.81	134	161	

From the above table it will be seen that the decadal variation (1961-71 and 1971-81) in Satara district is less than the State variation which is 27.45 and 24.36 respectively.

DENSITY : The density of the district as well as tahsils in 1981 as compared to 1971 shows increase, which is due to increase in population. The density of population is below the district density in Khandala, Man, Khatav, Phaltan, Patan, Jaoli and Mahabaleshwar tahsils, which in rest of the tahsils it is more than the density of the district.

#### 1.5 SPECIAL FEATURES :

i) SUGAR FACTORIES : At present six sugar factories, two each in Karad and Phaltan and one each in Patan and Wai tahsils are located in the district. The Krishna Sahakari Sugar Factory located at Rethare Bk. in Karad tahsil is one of the biggest sugar factory in Maharashtra.

Cooper Oil Engines at Satara Road in Koregaon tahsil and some Cement product Industries at Satara and Karad are located in the district.

The Maharashtra Seedco's Ltd. located at Satara has started its production during the year 1976-77.

Also there is a private seed production establishment viz. Nimbakar Seeds which produces various types of hybrid and high yielding seeds and distributes the same all over the State. During the year 1980-81 following new industries were started in Satara District.

iv) KRISHNA IRRIGATION PROJECT :

Krishna Irrigation Project envisages construction of two dams, one at Dhon across river Krishna and other at Kanher across river Venna alongwith their L.B.C. AND R.B.C. Canal system from each of these dams.

This project will provide irrigation facilities to 1,11,736 hectares of cropped area from Satara and Sangli district. Dhon Dam is 2,478 metres in length and maximum height of the Dam is 50 mtrs. Dhon Dam is completed in all respects in 1977.

Full storage was created for the first time during 1978 monsoon. Dhon Left Bank Canal will harness about 22,626 Hect. of land from Wai, Satara & Koregaon tahsils whereas Dhon Right Bank Canal will harness 6,866 Hect. of land from Wai, Jaoli and Satara.

Kanher dam is 1,955 mtrs. in length and maximum height is 50 mtrs. Earth work and Masonary work is in progress. After completion of Kanher left Bank Canal and Kanher Right Bank Canal to their full length, irrigation benefits to the extent of 7,716 Hect. and 1,466 Hect. respectively can be extended to Jaoli and Satara Talukas.

v) DROUGHT PRONE AREA PROGRAMME :

Out of total 11 tahsils in the District five are covered under drought prone programme. These tahsils are Man, Khatav, Khandala and Phaltan and Koregaon. The following items of development are included in the project.:

- i) Agril. Development Programme.
- ii) Allied Agril. Industries.
- iii) Supply of Agril. Implements.
- iv) Minor Irrigation.
- v) Supply of Milch Cattle.
- vi) Strengthening of Co-operative Societies.
- viii) I. R. D. PROGRAMME :

It is being implemented through S.F.D.A. in 3 tahsils viz. Patan, Satara and Mahabaleshwar.

ix) COMMAND AREA DEVELOPMENT AUTHORITY :

The jurisdiction covered by Satara Irrigation Project Circle in Satara District for construction viz. Wai, Jaoli, Koregaon and Satara tahsils comes under C.A.D.A. for administrative purposes. The main programme of this authority is to implement schemes on Agril. and Animal Husbandry for small and marginal farmers.

### EXPLANATORY NOTE

2.1 The data on different important sectors which have dominant effects on the economy are presented in this abstract for the year 1980-81. In case the data for the relevant year is not available, the data for the latest available years are presented. In most of the cases, the reference period of the data is the financial year. The data on Agriculture, however, relates to the Agricultural year, whereas the data on 'Co-operation' is for the Co-operative year (1st July to 30th June). The data on other important items like rainfall, temperature, Civil and Criminal cases, Vital statistics, is for the calendar year. The information as far as possible is presented tahsilwise for inter tahsil comparison.

#### DISTRICT AT A GLANCE :

2.2 Certain essential data in important spheres, such as,

- i) Population,
- ii) Agriculture,
- iii) Animal husbandry,
- iv) Industries,
- v) Co-operation,
- vi) Medical and public health,
- vii) Education,
- viii) Transport and Communication,
- ix) Plan expenditure etc.

pertaining to the district is presented alongwith the corresponding figures for the State for the comparison purpose.

## DISTRICT STATISTICAL ABSTRACT :

2.3 The data incorporated in the District Statistical Abstract have been presented in suitable tables, classified in appropriate groups. The concepts adopted in preparation of tables are summarised in the following paragraphs. The limitations of data are cited wherever necessary.

### AREA AND POPULATION :

2.4 The data of 1971 census mainly on population, area, houses and livelihood occupation, rural urban break-up etc. are presented in the first seven tables for all tahsils in the district. Data on population per square kilometre, decadal variations during 1951-61 and 1961-71, classification of villages and towns according to population ranges, number of workers and non-workers, population of scheduled castes and schedule tribes, distribution of population according to age group and religion are also given these tables.

#### 2.5 (A) URBAN AREA :

The following places have been treated as 'urban' areas (towns):-

1. Every place having a Municipality or Cantonment board irrespective of its population,
2. every other place which satisfies following three conditions :-
  - i) a population of at least 5,000,
  - ii) at least three-fourth of its male working population engaged in non-agricultural pursuits and
  - iii) a density of population of at least 400 persons per square Km.

3. ANY other place not falling under above two categories which possesses certain district characteristics to qualify to its being treated as urban such as its being a project area or a developing township.

(B) RURAL AREA :-

These areas which do not satisfy the criteria prescribed for recognising urban area are called 'Rural Area'.

A census village in Maharashtra has always been a revenue village. A revenue village has well-defined boundaries, a map and a separate set of land records irrespective of whether that defined area has any population or not.

(C) WORKER :

A worker is defined as 'a person whose main activity is participation in any economically productive work through his physical or mental activity. Work involves not only actual work but effective supervision and direction of work.

A public or social worker engaged actively in public or Social work or political aims of a party was also regarded as a 'Worker.' The indicators of different developmental Sectors are worked out to show the position of each tahsil in the district during the above periods.

3.2 AGRICULTURE : The development in the field of Agriculture can be assessed from six main indicators. They are (1) Percentage of gross area sown to net area sown (2) Percentage distribution of gross area under important crops to total gross cropped area. (3) Productivity of important crops. (4) Percentage of net area irrigated to net area sown. (5) Percentage of area under different irrigated crops to gross irrigated area. (6) Sourcewise net irrigated area.

Figures for 1978-79 are finally revised.

3.6 The production of any crop depends on various factors like use of improved seeds, irrigation facilities, use of fertilisers and much on timely rains. As such the yield rates show fluctuation from year to year. It can be said that the yield rates show downward fluctuation in 1977-78 while in 1978-79 again the yield rates show increase over 1977-78.

3.7 Tahsilwise percentages of net irrigated area to net area sown are given below :

In most of the tahsils except Phaltan, the irrigation mainly rely on wells by which nearly 50% of net irrigated area is covered. In Man and Khatav tahsils about 90% and 75% of the net irrigated area is covered by well irrigation. The source of Government Canal irrigation is mainly available in Phaltan Tahsil.

CO-OPERATION :

3.10. The Co-operative Societies Play an important role in the field of Agricultural Development by extending credit facilities on an extensive scale. The progress of facilities given by the Agricultural Credit Societies during the year 1960-61, 1970-71, 1978-79, 1979-80 and 1980-81 are given in the following table.

3.11 It will be seen from the above data that although there is no much change in the number of Agricultural Credit Societies functioning in this district during last 18 years, there has been considerable increase of 85% in their membership.

WAGE RATES :

3.12. The data on Agricultural Wage Rates in rural areas are collected in three rural centres in Satara District since July, 1963. The centres are Umbraj from Karad Tahsil, Koregaon from Koregaon Tahsil and Limb from Satara Tahsil.

The average wage rate during the year 1980 for male field labour at Umbraj was found to be Rs. 6.60 as against Rs. 5.75 in 1979. While the same at Koregaon and Limb were Rs. 4.01 and Rs. 6.33 respectively. The average Wage Rates for females at Umbraj, Koregaon and Limb during 1980 were Rs. 5.66, 2.71, 4.33 respectively.

LIVESTOCK :

3.13. Livestock makes a substantial contribution to the economy by providing subsidiary income to farmers, food to human population and provides avenues of employment to landless labourers. Livestock census has been recently conducted in 1978. The data of 1978 census are presented in the following table.

The following table gives tahsilwise details of Livestock per '00' Hectares of cultivable land.

3.1. Enrolment in the Employment Exchange and vacancies notified.

Following table gives the statistical data available in connection with Employment.

5. Candidates on Live Register at the end of the year	2,398	5,774	23,442	30,819	

3.15. Enrolment in 1979-80 is 257 percent higher than that in 1960-61. The percentage of placement to total Registration is decreased considerably from 18 percent in 1960-61 and 3 percent in 1980-81. This is due to the establishment of Divisional Selection Board through which most of the vacancies are filled in. The comparative figures of last three years of the number on live Register reflects the magnitude of the unemployment problem. This does not also include the unemployed persons seeking manual work and those who have not registered their names with the Employment Exchange.

3.17. MEDICAL FACILITIES: The following table gives the data on the Medical Facilities available in the district.

9.	Total Patients treated	3,00,095	6,55,000	7,50,000	9,07,000	8,32,000

The ratio of a doctor to population is one of the indicators of the progress of medical facilities. The ratio was one doctor per 24,237 population in 1961, which is now one doctor per 13,705 population. Number of private doctors are not considered while calculating the said ratio.

The ratio of No. of beds to population was one bed for 6,112 population in 1961, however it has considerably improved as one bed per 1,576 population.

3.18. The Medical facilities have increased substantially since 1961. This has enabled to treat large number of indoor and outdoor patients at public medical institutions.

3.19. EDUCATION : The Education facilities have also increased remarkably during last 10 to 15 years. At present almost all the villages have been provided with primary school facilities. The following table gives the number of Institutions, No. of Pupils and the No. of Teachers.

T A B L E NO. 12

Teachers	130	498	683	788	877

3.20. From the above data it would be seen that as against the 2,18,102 students in primary school there were 23,112 students in secondary schools (i.e.10.5%) in 1961 while in 1980-81 there were 1,21,052 students in secondary schools as against 3,42,717 in primary schools (i.e.35.32%). This shows that there has been considerable decline in drop out rate of students from primary to secondary education.

Similar percentages for enrolment of students in Secondary to Higher Institutions were 7.7% in 1961 and 15.79% in 1980-81. The substantial increase in these rates can be attributed mainly to a good network of higher educational facilities established even at tahsil places and big villages. This can also be vividly seen from the following rates.

The net work of banking offices is spread over different Tahsils of the district during the recent years and as a result the ratio of number of households served per banking offices is reduced from 6,755 in 1961 to 1,667 in 1978.

3.23. ROADS :

The Pune, Miraj, Kolhapur Broadguage Raily Route goes through Satara District with the total length of 124 Kms. At the end of the year 1979-1980 and 1980-1981 total length of all types of roads excluding the Municipal Roads was 7,164 Kms. and 7,126 Kms. The decrease in road length is due to transfer of road to Sangli and Solapur division and C.A.D.A. respectively. The road length at the end of the year 1960-61 was 2,481 Kms. Thus the road length per 100 Sq.Kms. of area is increased from 24 Kms. in 1960-61 to 68 Kms. in 1980-81.

Following tables gives the total road length in the district for B & C and Zilla Parishad.

3.25. Since November, 1962 the prices of important commodities are collected by the Directorate of Economics and Statistics through the District Statistical Offices at each District Head-Quarter on every Friday. As the prices are collected for selected commodities from selected shops they may not represent the district position but the data may still prove useful as a broad indicator of trend in changes in retail prices over the period of time in the district. The following table indicates the average prices of some important commodities collected at Satara town for the year 1962-63, 1970-71, 1978, 1979 and 1980.

## CHAPTER - IV

### INTRODUCTION :

4.1 Since the commencement of the Fifth Five Year Plan i.e. from 1974-75 the idea of Planning from below has started operating and the formulation of the District Plan was started. The new approach conceive that the formation of district plan is the only means for ensuing efficient use of local potential and resources as also for providing a firm basis for planning at the State Level. From 1974-75 the District Planning Bodies were constituted for each district and the district was adopted as a 'Unit' of Planning. The object of the district plan is to maximise the benefits of the plan expenditure by bringing in past experience, knowledge and local needs.

4.2 The District Planning Body which is called as the District Planning and Development Council is headed by the 'Palak-Mantri' of the District as Chairman. Other Ministers of the District and the Divisional Commissioner are Vice-Chairman and the Collector as the Member Secretary. The Members of the Council include all M.Ps, M.L.A's , M.L.C's, President, Zilla Parishad, Mayor, One president each from 'A' 'B' and 'C' Class Municipal Councils, Chairman of District Central Co-Operative Bank, Chief Executive Officer, Zilla Parishad, Director, Land Development Bank, Nine Non-Official Members etc. The Council generally meets twice a year for formulating and coordinating district development plans.

4.3 To assist the Council in its day to day planning & development activities, an Executive Committee is constituted at district level . The Chairman and Vice-Chairman of the Committee are the same as that of the Council. The Member Secretary is, however, the District Planning Officer.

The Committee consists of some selected Members from the Council. The Committee meets regularly for the Plan performance and to suggest ways and means for effective implementation of the Plan schemes.

In this Chapter a brief review of the Annual Plans 1979-80 and 1980-81 is taken.

The following table gives the consolidated information about the budget and expenditure figures under State Plan and Centrally sponsored schemes for Fifth Plan period and for the year 1979-80 and 1980-81.

From the above table, it will be seen that the total expenditure of Rs. 1915.48 Lakhs was incurred on State Plan Schemes during the Fifth Plan period as against the budget provision of Rs. 2290.11 Lakhs.

The performance of the State Plan and Centrally Sponsored Schemes during the year 1979-80 and 1980-81 is reviewed separately in the following paragraphs :-

## 1. STATE PLAN SCHEMES

The following table gives the percentage distribution of total expenditure incurred on different major heads of development.
