SOCIO - ECONOMIC REVIEW OF

PUNE - DISTRICT

1977-78 AND 1978-79.

CHAPTER NO. I

INTRODUCTION PUNE DISTRICT

Location

1.1 Pune District lies between $17^{\circ} 54'$ and $19^{\circ} 24'$ North latitude and $73^{\circ} 19'$ and $75^{\circ} 10'$ East longitude.

Boundaries :-

1.2 It is bounded on the North by Ahmednagar District, on the East by Ahmednagar and Solapur Districts, on the South by Solapur and Satara Districts and on the West by Kolaba and Thana Districts.

Topography :-

1.3 Hill ranges :- The main range of Sahyadri runs North and South for a length of about 117 km. Also narrow ridges with flat tops stretch eastwards and gradually sink into the plain. The following leading peaks lie in the extreme North of the Sahyadri ranges.

1) Harischandra Gad (2) Jivdhan, (3) Dhak and (4) Ahupe

1.4 Rivers :- The Bhima is the main river of the District. It rises in the Sahyadri at Bhimashankar (Taluka - Ambegaon) in the west of the District. It flows south-east through the central part of the District and then enters into Solapur District. The main tributaries of Bhima are Vel and Ghod on its left and Indrayani, Mula, Mutha and Mira on the right. Mira forms the southern boundary of the District for a considerable distance. Karha, Kukadi, Pawana, Mula-Mutha, Meena, Gunjavani, Pushpawati, Shivganga and Velvandi are the other rivers flowing in the District. All of these rivers flow with the magnificent volume of water during the rainy season and shrink into a narrow thread during the hot season.

1.5 Soil :- The soils of the District are lighter in the west than in the east. They broadly belong to three classes black, red and brown. In some places one class of soil blends with another in varying proportions and is in turn modified by sand grains, lime salts and other ingredients.

1.6 The technical survey team set up by Govt. of Maharashtra has recommended that the Pune District be divided into the following four Agro-climate zones. The coverage with reference to type of soil and crops grown in respective zones are also described below :-

a) Ghat Zone :- It covers only a small portion of Haveli Tahsil. The area is extremely rugged and covered by Sahyadri mountain ranges. The soils in this area are (1) High level red to reddish brown laterite soil and (2) light brown to dark brown forest soils. The hill tops and slopes are covered with forest trees and grasses. Small strips of land on hill slopes are used for cultivation, where hill millets like nagli, wari are grown. On some land paddy is grown. The soils are inferior and have poor fertility.

b) Transition I :- This is formed by the western portion of Junnar, Western half of Ambegaon, Khod and Bhore and Western and Central portion of Haveli, Mulshi and Velhe tahsils. The area is extremely rugged. The soils are red to reddish brown in colour, varying in depth and texture. Paddy is the main crop in valleys and nagli, wari etc. are grown on hill slopes. Major portion of area is under forest and pastures.

c) Transition II :- The zone comprises of the mid western part of Junnar, Khod eastern half of Ambegaon and eastern stripes of Velhe, Mulshi, Bhore and western portion of Haveli Tahsil. This lies on the eastern side of Sahyadri mountain ranges. The following brown to dark brown soils of varying depth are found in this zone.

- 1) High Level :- Low lime, Shallow reddish brown loam.
- ii) Intermediate :- Medium deep brown Black clay loam.
- iii) Low level :- Deep low lime brown clay.

The soils are alkaline. Major crops grown are Bajri, Jowar, Wheat and variety of fruit crops and vegetables.

d) Scarcity zone :- This zone covers the eastern corner of Junnar, South eastern portion of Khed, eastern half of Naveli and entire portion of Shirur, Purandhar, Daund, Baramati and Indapur Tahsils. This zone covers nearly 50% area of the District. The soils are brown to black calcareous soils with varying depth and textures. Main crops grown are Rabi, Jowar, Cotton, Wheat, Gram, Groundnut and Safflower as well as Sugarcane in canal areas.

Rain fall :-

1.7 The District receives its rain mostly from the South-west monsoon, during June to October. A few erratic showers are received from the North east monsoon by the Eastern part of the District. The annual rainfall varied from 3000 m.m. to 4000 m.m. in the Ghat zone. The western portion of the transition-I zone gets rainfall varying from 2000 m.m. to 3000 m.m. whereas the eastern portion receives 1250 m.m. to 2500 m.m. The rainfall in the transition II zone ranges from 700 m.m. in the east to 1250 m.m. in the west, as one proceeds from east to west. The scarcity track receives rainfall ranging from 600 to 700 m.m.

Scarcity Conditions 1971-79 :-

1.8 The fact finding committee (1975) has recommended that at least some part of the following Tahsils is drought prone area.

<u>tal</u>	<u>Area in Sq.Km.</u>
Shirur	1557
Daund	1290
Indapur	1468
Karanati	1382
Purandhar	1109
Total :-	<u>6806</u>

Important crops grown in these tahsils are Bajri and Rabi ar. Due to good and timely rains during the year i.e. 1977-78 1978-79, agricultural conditions were satisfactory and hence area of the District was declared as affected by scarcity itions.

Soils :-

The rocks in Deccan Trap basalt of the District are found the varieties of (i) Vesicular and (ii) Non-Vesicular. The ular types are comparatively more soft and break more easily. non vesicular types of rocks are hard, tough and compact. s used as building stones for roads and as an aggregate in nt concrete. Kankar and Gypsum are found at a number of es especially in the eastern part of the District. Kankar sed for lime burning. There are some deposits of lime and uite in the District. The deposits of lime are found in dhar and part of Daund Tahsils, but due to its inferior lity it is not used for cement.

Flora :-

Forest area is in the western and hilly part of the ict. The types of forest area are (i) Scrub (ii) mixed uous and (iii) evergreen which are found respectively in rea of low, medium and high rainfall. The main produce the forests are teak (in Junnar, Purandhar, Bhor and Tahsil), kirda (in Khod and Ambegaon Tahsils) bamboo

and shikekai (in Maval and Mulshi Tahsils). The total value of Forest produce during the year 1977-78 and 1978-79 was Rs. 5.19 and Rs. 6.81 lakhs respectively.

Area and Demography :-

1.11 As per 1971 census, population of the District is 31,78,029 and covers the area of 15,640 Sq. Km. Out of this, urban area constitutes 578 Sq. Km. which is 3.69 % only. All the Tahsils except Mulshi and Ambegaon have some portion of Urban area

Decadal Variations :-

1.12 The population of the District during 1971 Census increased by 28.8 % over the population of 1961 Census. The following table gives the area and population of the Tahsils in Pune District.

TABLE No. 1

Tahsilwise area and population.

Total	15,640	24,66,880	31,78,029	28.8

The increase in population varies from 1.1 in Velhe Tahsil to 47.0 in Haveli Tahsil. The high rate of increase in population of Haveli Tahsil can be attributed to the rapid industrialisation in the outer corden area of Pune City.

Special Features :-

1.13 Since ancient time Pune City is well known for its historical background as well as educational facilities. Now also "University of Pune" with its faculties in Arts, Science, Commerce, Engineering and Medicine attract, the students not only from our country but from abroad too.

1.14 Being nearer to State capital, Pune has the status of Second Capital of Maharashtra, and also a very good road and rail link with State Capital as well as other Districts in the State. Besides above importance, many of the State level Departments i.e. Agriculture, Animal Husbandry, Education, Health Services, Social Welfare, Town Planning, Sports and Youth Services, Tribal Welfare, Co-operation and G.S.D.A. are stationed at Pune alongwith respective Regional and District Head Quarters. Further some important Central Government Offices like Income Tax, Observatory, National Chemical Laboratory etc. are also situated at Pune.

1.15 Pune is also a Head Quarters for southern command of the Military. Other important defence wings such as H.D.A., Air Port at Longaon, H.C.C. Officers acedemy at Purandhar Fort, Ordinance Depot at Dehu Road etc. also enriches the glory of Pune District.

1.16 Government's Industrial policy resulted in centralising major industries at Pune. Presently Industries at Pune has the honour of supplying all sorta of machinary requirements for sugar factory, scooters, diesel vehicles, oil engines, compressors as well as modern electrical equipments. Besides this number of small and cottage industries and five sugar

factories, are functioning in the District, and adding its share to the gross income of the State. Government decision of providing seed money Assistance to educated unemployed, to encourage them to start their own enterprises resulted in benefitting 381 and 435 persons during 1976-77 and 1977-78 respectively.

1.17 Economy of our country is still based mainly on Agriculture. The Government has been adopting various measures for the development of modern agricultural techniques. The establishment of Maharashtra Agro Industries Development Corporation is one of such important achievements. Pune District has the privilege of having the important activities of the Maharashtra Agro Industries Development Corporation located at Chinchwad near Pune. Various activities of above Corporations as well as massive electrification programme, energising 1033 and 1294 additional pumpsets for Agriculture during the year 1977-78 and 1978-79 are helping to boost the Agricultural production.

1.18 Due to timely rains, the crop conditions were generally good and hence no major price fluctuations or shortage of the essential commodities were experienced in the years 1977-79. On the contrary due to decentralising of the supply of sugar, prices of sugar came down to about Rs. 2.00 per kg. probably the lowest record price during the decade .

1.19 Drought Prawn Area Programme has been launched in nine talukas of Pune District and has completed its first phase for the period of five years commencing from the year 1974-75. The programme is mainly aimed at "to bring about an integrated development with a view to enhance drought resistant capacity, optimising the use of land and water resources, thus providing gainful occupation particularly to weaker sections in the area".

An allocation of Rs. 400.00 lakhs was made available for the period of 1974-75 to 1978-79, as against which the total amount of Rs. 406.72 lakhs was spent by effective implementation all the schemes. Major achievements are as follows -

a) 763 milch cows and 48 milch buffaloes were distributed.

b) Two chilling plants one each at 'Otur' and 'Baramati' were installed where daily milk collection is 6000 Ltr. and 23000 Ltrs. respectively.

c) due to effective implementation of programme daily milk collection in D.P.A.P. area is increased from 800 Ltr. to 3595 Ltr.

d) 26 Minor Irrigation works were completed during the period, and 36 works are in progress.

e) total households are covered under D.P.A.P. programme.

f) besides, number of works under Soil Conservation Forestry, Dry farming etc. were undertaken and completed.

The Govt. has undertaken the 'Integrated Rural Development programme Scheme' in five blocks in Pune District.

1) Haveli 2) Daund 3) Shirur 4) Purandhar 5) Indapur since January 1978.

1.20 Major Irrigation Project "Kukadi" is in progress in Pune District with its head works at Yedgaon, Dimbhe, Manikdoh, wada] and Pimpalgaon Jog. Out of these work at Yedgaon has been completed and works at remaining four centres are in progress. All the works are expected to be completed by 1987 and on completion of it about 2 lakhs Hect. of land will be commanded by this project from Pune, Ahmednagar and Solapur District.

Gram Gaurav Pratishthan - Naigaon -

1.21 Shri. Vilasrao Salunkhe an Engineer from Pune has executed a Project at 'Naigaon' Taluka Purandhar. This project is aimed at maximum utilisation of the rainfall water by constructing percolation tanks, Nala bunds, farm-ponds etc. The project is widely acclaimed, since large number of small farmers in the area have been benefited. The Pratishthan authorities have proposed to implement the project in many more villages.

CHAPTER-II

EXPLANATORY NOTE.

2.1 The data on different important sectors which have dominant effects on the economy are presented in this abstract for the years 1977-78/1978-79(combined issue). In case the data for the years 1977-78/1978-79 is not available, the data for the latest available year are presented. In most of the cases, the reference period of the data is the financial year. The data on Agriculture, however, relates to the agricultural year, whereas the data on 'Co-operation' is for the co-operative year(1st July to 30th June).The data on other important items like rainfall, temperature, civil and criminal cases,vital statistics, is for the calendar year. The information as far as possible is presented tahsilwise for inter tahsil comparison.

District at a glance:-

2.2 Certain essential data in important spheres,such as,

- i) Population,

- iii) Animal Husbandry,
- iv) Industries,
- v) Co-operation,
- vi) Medical and public Health,
- vii) Education,
- viii) Transport and Communication,
- ix) Plan expenditure etc.

pertaining to the district is presented along with the corresponding figures for the State for the comparison purpose.

District Statistical Abstract :-

2.3 The data incorporated in the District Statistical Abstract have been presented in suitable tables,classified in appropriate groups. The concepts adopted in preparation of tables are summarised in the following paragraphs.

The limitations of data are cited wherever necessary.

Area and population :-

2.4 The data of 1971 Census mainly on population, area, houses and livelihood occupation, rural urban breakup etc. are presented in the first seven tables for all tahsils in the district. Data on population per square kilometre, decadal variations during 1951-61 and 1961-71, classification of villages and towns according to population ranges, number of workers and non-workers, population of scheduled castes and scheduled tribes, distribution of population according to age group and religion are also given in these tables.

2.5 (A) Urban Area :-

The following places have been treated as 'Urban Areas' (Towns)....

1. Every place having a municipality or cantonment board irrespective of its population,
2. Every other place which satisfies following three conditions.

i) a population of at least 5,000

ii) at least three fourth of its male working population engaged in non-agricultural pursuits &

iii) a density of population of at least 400 persons per square km.

3. any other place not falling under above two categories which possesses certain distinct characteristics to qualify to its being treated as urban such as its being a project area or a developing township.

(B) Rural Area :-

These areas which do not satisfy the criteria prescribed for recognising urban area are called 'Rural area'.

A census village in Maharashtra has always been a revenue village. A revenue village has well defined boundaries

a map and a separate set of land records irrespective of whether that defined area has any population or not.

(c) Worker :-

A worker is defined as ' a person whose main activity is participation in any economically productive work through his physical or mental activity. Work involves not only actual work but effective supervision and direction of work. A public or social worker engaged actively in public or social work or political worker actively engaged in furthering the political aims of a party was also regarded as a 'worker'. In case of perennial work, such as, cultivation, livestock, plantation, some type of household industries, a person was treated as a 'worker' by ascertaining whether he had participated any time during the last one year, even if, he was not economically active in the week prior to enumeration. In case of regular work in trade, profession, service or business, a person is considered as ' worker' if he had participated in such regular work on any one of the days during the week preceding the date of enumeration and that work has been returned as his main activity.

(D) Non-Worker :-

Non-workers are 'those who are not mainly engaged in any economically productive work'.

Persons primarily engaged in household duties or those who were students and helped in the family economic activity, but not on full time scale were treated as 'non-worker' in respect of their main activity.

Climate :-

2.6 The rainfall and temperature have pronounced effects on climate. The rainfall data presented in table no.8 gives normal rainfall, monthly rainfall and number of rainy days during the calendar year 1977 / 1978 for the selected centres. Normal rainfall figures are worked out on the basis of actual

rainfall for the ^{periods} ranging from a minimum of five years and a minimum of 80 years. A day was treated as a 'rainy day' if during the twenty-four hours the rain gauge recorded a minimum of 2.5 mm. of rainfall. The table No.9 gives actual maximum and minimum temperatures recorded during each of the month of the calendar year 1977/1978 in respect of three centres in Pune District.

Agriculture :-

2.7 Important tahsilwise statistics on agriculture, such as

i) Land utilisation.	ii) Area under different crops.
iii) Yield per hectare and outturn of principal crops.	iv) Irrigated area under different crops, and
v) Sourcewise irrigated area and	

are given in table no. 10 to 14.

2.8 The basic definitions adopted are given below:-

a) Geographical area :- It is, according to village papers, calculated from village returns prepared for revenue purposes and as such it may be different from that according to Surveyor General.

b) Forests :- It includes all actually forested areas or administered as 'forests' under any legal enactment dealing with forests, whether State owned or private. If any portion of such land is not actually wooded but put to some agricultural use, that portion is included under appropriate heading of cultivated or uncultivated land.

c) Land put to non-agricultural uses :- It stands for all lands occupied by buildings, roads and railways or under rivers, canals etc. and other land put to uses other than agricultural.

d) Barren and unculturable land :- It covers land which cannot be brought under cultivation unless at a high cost, whether in isolated blocks or uncultivated holdings. Land like mountains, deserts etc. is classified under this

category.

e) Permanent Pastures and other grazing land :- It covers all grazing lands. Village common grazing lands and grazing lands within forest area are included under this head.

f) Culturable waste land :- These may be either 'fallow' or covered with useless shrubs and jungles which are not put to any use and include all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession.

g) Miscellaneous tree crops and groves not included in the net area sown :- This category includes all cultivable land which is not included in Net area sown but put to some agricultural use.

h) Current fallow lands :- These are lands which are kept fallow during the current year. If any seedling area is not cropped again in the same year, it is also treated as 'current fallow'.

i) Other fallows:- All lands which were taken up for cultivation but are temporarily out of cultivation for a period not less than one year and not more than 5 years are classed as 'other fallow.'

j) Net area sown :- This consists of net area sown with crops and orchards, area sown more than once being counted only once.

k) Gross cropped area :- Total of area under all crops including area under crops sown more than once is taken as 'Gross cropped area'.

Cultivable area is a sum of areas under :-

a) Miscellaneous tree crops and groves not included in the net area sown.

b) Current fallows.

c) Other fallows.

d) Culturable Waste land and

e) Net area sown.

Irrigation Statistics:-

2.9 Important irrigation statistics regarding.

i) number of irrigation wells,

ii) activities of ground water survey and development agency.

iii) minor irrigation works,

iv) major and medium irrigation projects and

v) area irrigated under major and medium projects are given in table nos. 15,16,17 and 18.

Allied Agriculture :-

2.10 Agricultural wage rates at the selected centres viz.

i) Nira (Taluka Purandhar)

ii) Bhigvan (Taluka Indapur)

iii) Ghodagaon(Taluka Ambegaon).

collected by the District Statistical Officer through the Block Statistical Assistants are given in table no.19.No.of operational holdings as per Agricultural Census 1970 are given in table in 20. Final figures of agricultural implements enumerated during the eleventh livestock census are given in table no. 21. The tahsilwise data on 'famine and scarcity are given in table no.x 22 for the year 1977-78/1978-79 and in table no.23 for the year 1971-72 to 1978-79.

Animal Husbandry and Forests :-

2.11 Population of livestock and poultry as per livestock census 1972(final data) is shown tahsilwise in table no.24. Statistics on veterinary facilities existed, animals treated in such centres and diseasewise mortality of livestock are given in table nos. 25 and 26. Table no.27 furnishes data on animals slaughtered in recognised slaughter houses in the district.

2.12 The data on 'area under forests' and major and minor forest produce for the year 1977-78/1978-79 have been shown in tables 28(a) and 28(b) respectively. Area under forests with a classification into

- 1) reserved
- ii) protected and
- iii) Unclassed forests under the control of State Revenue department and under State Forests Department.

has been shown. These areas may not tally with the area under forests shown in table no.10 due to different concepts of classification into above three heads. Reserved forests are intended mainly for timber production of which rights of grazing and cultivation are seldom allowed. "Grazing and cultivation" under certain limitation and restrictions are allowed in protected forests. The unclassified forests refer to "inaccessible forests" or "unoccupied waste."

Inland fisheries :-

2.13 The statistics relating to total area suitable for fish culture, ponds, lakes and reservoirs, area under pisciculture, inland fish production and carp fry used for pisciculture are given in table no. 29(a).

Employment, Industry and Electricity:-

2.14 The statistics relating to working factories under different groups with average daily employment, mandays worked, classification of factories according to working strength and number of days worked are given for the years 1975 and 1976 in table nos. 30,31 and 32. The term 'Factory' includes....

- a) those employing ten or more workers working with the aid of power.
- b) those employing 20 or more workers and working without aid of power and

c) those registered under the Factory Act 1948, even though the above conditions are fulfilled, the Defence factories are excluded." Statistics regarding no. of registered factories, productive capital investment, output and employment provided under different industries based on Annual Survey of Industries for the year 1971 / given in table no. 32. Monthwise registration, vacancies notified, placements done, number of employment seekers on the live register at the end of the month occupationwise and sectorial, other data of employment exchange have been shown in table nos. 34, 35 and 37. The information regarding the employment generated under Employment Guarantee scheme works is also given in table no. 36.

2.15 Data on consumption of electricity by different categories during the year 1977-78/1978-79 is given in table no. 38 and number of towns and villages electrified during and upto the end of selected years is shown in table no. 39. The data are collected from Maharashtra State Electricity Board, Private Electric Supply companies and Sugar factories in the District.

Co-operation :-

2.16 Statistical information on the co-operative institutions and their activities have been given for the year 1977-78/1978-79 on the following items...

i) Loan advanced by cooperative banks and primary agricultural credit societies different types of Societies, their membership,

ii) Total value of purchase and sales by the central and primary cooperative marketing societies and

iii) Annual arrivals in the regulated markets in each Tahsil of Pune District in tables 40 to 46. Tahsilwise data regarding no. of members, capital structure, loans advanced and recovered etc. have also been given.

Working Capital :-

It includes paid-up capital, deposits and borrowings. Loans outstanding includes outstanding in respect of loans, cash credits and overdrafts and the amount of the outstanding bills purchased or discounted. Overdues refer to the amount of loans or instalments which was due for collection but which was not actually collected and for the repayment of which no extension has been granted by the competent authority. Information of registered money lenders and loans advanced by them is given in table no. 47.

The main functions of Agricultural credit societies are to help members by way of providing short and medium term loans for meeting their agricultural necessities like improved seeds fertilisers, agricultural improved implements etc. The help is also extended in the matters of storage, transportation and sales of the agricultural produce.

2.17 The agricultural non-credit societies look after the work of better farming by way of educating the agriculturists in the adoption of improved agricultural practices, crop protection etc. The societies also undertake educational, economical, cultural and house building activities so as to uplift the standard of living of the agriculturists.

2.18 The main function of the Urban Bank, urban credit cooperative Societies and salary earners cooperative societies is to promote the qualities of economy and cooperation among the members and also to make them industrious. They also augment the saving habits of the people by way of making the banking facilities easily available. They give loans to the members on the securities like gold, immovable property, Government securities, commercial goods, etc. They also provide loans to the Artisans and small traders.

2.19 The main functions of non-agricultural non-credit societies are to run printing presses, to provide electricity

to members and consumers for domestic, industrial and agricultural purposes, to run Montessorios, primary schools and educational institutions for educational spread and things of the kind.

The main function of primary cooperative marketing society is the purchase and sale of agricultural produce grown by its members or member cooperative societies in its area of operations.

Medical and Public Health:-

2.20 In this section, data on medical and public health for the year 1977-78/1978-79 is given. Table no. 48 gives medical facilities available through public and public-aided bodies in each tahsil alongwith indoor and outdoor patients treated. Data on 'Vital Statistics' e.g. tahsilwise births and deaths and infant deaths registered in the year 1976 with break-up into male and female and number of deaths due to important causes, from the year 1971 to 1978 is given in tables no. 49 and 50 respectively. Vaccination statistics and cholera inoculation done in each tahsil during 1977/1978 is given in table no. 51. Table no. 52 gives statistics on family planning during the year 1977-78/1978-79.

Education :-

2.21 The data on tahsilwise number of literates and percentage of literacy as per 1971 census are shown in table no. 53. The data on education level of people in rural and urban areas are given in table no.s 54 and 55. The data regarding pupils and teachers with no. of institutions in pre-primary, primary, secondary and higher categories are presented in table no. 56. The data on backward class enrolment and concessions granted to economically backward class and expenditure incurred under normal and plan grants on primary education in the district is shown in table no.s 57 to 62.

Transport and Communications:-

2.22 Length of railway routes according to gauge is shown in table no.60. The table no. 61 gives road length according to category and surface classification. Roads maintained by municipal councils / cantonment boards are also shown separately in this table. The data of number of motor vehicles in operation in Pune Region covering Pune, Ahmednagar, and Solapur districts together are shown in table no. 62. (Districtwise figures are not available). Important operational statistics relating to Pune division of Maharashtra State Road Transport Corporation are given in table no. 63 (Pune State Transport division comprises of Pune district). Results of traffic census conducted in May 1974 on important roads in district are given in table no. 64. Statistics on Postal, Telegraphs and Telephone facilities and on rural broadcasting are depicted in the table nos. 65 and 66 respectively.

Local Bodies :-

2.23 The financial position of Village Panchayats, Municipal Councils and Zilla Parishad is shown in this section for the year 1977-78/1978-79.

2.24 The number of village panchayats includes number of independent village panchayats as also group village panchayats, Income and Expenditure of Village Panchayats are exclusive of opening and closing balances respectively. Grants include grants from Government as well as from Zilla Parishad and Panchayat Samities for developmental activities. Government grants to village panchayats are mainly land revenue grants, equalisation grants and local cess grants. Government grants, in respect of municipal councils, are mainly grants on account of dearness allowances, grants for roads, for water supply, for educational purposes, for medical purposes and on account of percentage in land revenue. The receipts of Zilla Parishad are shown under four sub-heads viz.

- i) Self - raised resources,
- ii) Government grants,
- iii) Grants for agency scheme and
- iv) Debt. section.

The expenditure is shown under two heads.... Revenue Expenditure and Debt Section.

3.25 The data are collected from the Zilla Parishad, Pune and all the municipal councils in Pune District.

Plan and Community Development :-

2.26 Data on Plan expenditure under State and Local sectors and physical achievements in important fields during the year 1977-78 and 1978-79 are given respectively in table nos. 71 and 72. Statistics in respect of coverage of community development programme stagewise expenditure of various blocks and blockwise physical achievements under community development programme are shown in table nos. 73 and 75.

Prices :-

2.27 The table no. 76 gives monthly average wholesale prices of agricultural commodities transacted in regulated markets. The district average for each variety and for each month is also given.

2.28 The table no. 77 gives the monthly average retail prices of important commodities at Pune head-quarters during 1977/1978. As the information collected for the given commodities is restricted to only one quotation and that also from only one shop in the district head-quarter, the averages shown for individual commodities cannot be said to be fully representative but the data may prove useful as broad indicator of the trend in changes in retail prices over the period time. The table no. 78 gives consumer price index number of working class of Solapur and Pune Centres for the year 1977-78/1978-79. For the calculation of index, the years 1959 and 1961 are taken as 'base years' for Solapur and Pune

Centres respectively.

Miscellaneous :-

2.29 Statistical data pertaining to police force, crime statistics, cases disposed of in civil and criminal courts, cinema statistics regarding seating capacity in different types of theatres, no.of banking offices, no.of scheduled banks, their deposits and advances and no.of Joint stock companies, insurance policies and amount insured, collection of small savings, land revenue collections, no. of presses, newspapers and periodicals published etc., are given in the table no.s 79 to 89. Table no. 90 gives information about the quantity of rice, wheat and sugar issued to fair price shops. The demand and procurement of levy in Pune district are indicated in table no. 91.

2.30 A table showing trends in selected indicators in the fields of development such as...

- i) Agriculture
- ii) Livestock
- iii) Industry
- iv) Education
- v) Health etc...

is appended at the end. These selected indicators are very useful for assessing progress in various fields over important periods in the recent past.

CHAPTER - III

ANALYTICAL REVIEW OF SECTORIAL TRENDS.

3.1 In this chapter, an attempt is made to analyse the trends observed in the various statistical data presented in Part-II of this Abstract. A comparative picture of the tahsil in the district, as far as possible for the year 1977-78 and 1978-79 or the latest year, with reference to the preceding year is studied.

AGRICULTURE.

3.2 The percentage of gross cropped area to net area sown is one of the important indicator to show the trend of use of agricultural lands. In the following table talukawise percentages are given for the years 1960-61, 1970-71, 1976-77 and 1977-78.

TABLE NO.1

* :- Figures are provisional.

Actual figures of area cropped more than once during the years 1960-61, 1970-71 and 1975-76 were respectively, 10,74 , 11,72 and 12,12 thousand hectares. There is a gradual increase in the double cropped area. The district average of percentage of gross cropped area to net area sown, as given in the above table show downward trend for 1976-77¹ and 1977-78 but it may be noted here that the data pertaining to these years is provisional and subject to scrutiny. The correct picture in this respect will, however, be available when the data for these years are finalised.

TABLE NO.2

13.	Total non-food crops.	24.13	23.07	24.78	25.36

3.3 It will be seen from the above table that a large portion of gross cropped area (about 35 percent) is covered

by the crop Jowar, which is the main crop of the district. The cropping pattern of the district does not show any considerable change over the period of years. There is, however, increasing trend in the area sown under sugarcane and groundnut.

3.4 Agricultural production is dependent on many factors, out of which natural conditions, type of soil, use of improved seeds and fertilisers and area can be considered as important since these factors have direct bearing on production. Hence, the yield rates of the crop may vary from year to year. The following table gives yield per hectare and out-turn for some selected crops.

TABLE NO.3

Yield rates and out-turn of principal crops in
PUNE District.

Sr. No. of Crop	Yield rate per hect. in Kg.					Out turn in '00' Metric tonnes.				
	60-61	70-71	76-77	77-78	60-61	70-71	76-77	77-78

1. Rice	1075	816	2118	2191	466	365	1040	1098		
2. Wheat	358	649	1267	1156	75	156	536	538		
3. Jowar	458	530	508	558	1151	663	2381	2571		
4. Bajra	356	375	365	382	591	659	660	701		
5. Total Cereals	484	287	649	690	2464	2030	5008	5349		
6. Gram	326	246	471	293	79	40	115	77		
7. Total Pulses	350	195	418	343	214	158	299	250		
8. Sugar-cane (in terms of Gur)	8075	10396	8128	13195	738	1601	1908	2122		
9. Groundnut	975	1036	865	709	175	285	308	276		

It is observed from the above data that yield rates in respect of some of the crops show much variation and they are not comparable for the different periods of years, for the same crops. On an examination of the data of out-turn and area under different crops for the past few years, it is revealed

that the area figures are, more or less, the same during each of the years under reference. However, the figures of out-turn of crops, in particular for Rice and Jowar have shown abnormal increase from the year 1973-74 as compared to that of previous years (excluding 1972-73 which was a famine year). The figures of yield rates for the years 1976-77 and 1977-78 are 'provisional' and hence no remarks are offered.

3.5 Tahsilwise percentages of net irrigated area to net area sown are given below :-

TABLE NO.4

Tahsilwise percentage of net irrigated area to net area sown in Pune District.

Sr. No.	Tahsil	Percentage of net irrigated area to net area sown during			
		1060-61	1970-71	1973-74	1974-75

14.	Neval	0.23	0.34	0.69	0.88
Dist. Total		10.35	12.68	13.05	14.15

The tahsils, namely, Pune City, Barasati and Indapur have good irrigation facilities by which more than 20% of net area sown has been brought under irrigation, whereas the tahsils Velhe, Maval and Mulshi which are located in hilly tracts have less than 2% net irrigated area of net area sown.

3.6 The area under different irrigated crops is compared with the gross irrigated area in the following tables:-

TABLE NO.5

Percentage of area under different irrigated crops to gross irrigated area in PUNE District.

Sr. No.:	Crop	Y E A R S			
		1960-61	1970-71	1973-74	1974-75

10.	Groundnut	4.15	0.79	1.70	2.06
11.	Total non-food crops.	15.04	9.78	8.05	8.53

It is seen from the above data that area irrigated under the crops Jowar, Wheat, Sugarcane and Bajra constitute more than 60 percent of the gross irrigated area in the district.

3.7 The distribution of irrigated area by different sources is as follows :-

TABLE NO. 6

Sourcewise net irrigated area.

The major sources are government canals and wells which constitute more than 80 percent of the total area irrigated. Well irrigation facilities are used in all tahsils in the district. The source of Government canal irrigation is mainly available in Baramati, Indapur Shirur, Daund and Haveli Tahsils.

CO-OPERATION.

3.8 Investment by way of improved seed fertilisers etc. at appropriate time is highly essential for the increased agricultural out-put however, due to financial conditions it rather becomes difficult to all the cultivators to use fertilisers etc. sufficiently.

Agricultural credit societies pay a key role in helping to increase agricultural production by way of advancing loans at appropriate time. The following table gives the relevant details of co-operative societies.

TABLE NO.7

6.	Overdues (Rs. '000')	N.A.	5,29,32	12,28,72	13,24,24

Although there is not much change in the total number of agricultural credit societies functioning in the district during the last eighteen years, there is a substantial increase in their membership. However, large amounts of loans outstanding and overdues offer very discouraging picture.

WAGE RATES :-

3.9 Agricultural wage rates of skilled and unskilled labourers are collected from three centres, viz. Ghodegaon, Bhigvan and Meer in Pune district, twice a month. The data of wage rates paid to unskilled labourers at these centres during the year 1977-78 show that the average daily wage rate for a male and a female worker was Rs. 3.50 and Rs. 2.50 respectively. Other labourers were also receiving similar wages. Skilled labour like carpenters, black-smiths, cobblers generally do not work on daily wages. However, data about their

earnings were collected from the same centres. It was observed that the carpenters and black-smiths were earning on an average Rs. 8/- every day, while a cobbler was getting Rs.6/- daily. The agricultural wage rates are observed to be on higher side in the centre Neera which is situated in an irrigated track.

LIVE STOCK :-

3.10 Livestock census has been recently conducted in the year 1978. However, the finalised figures are not yet made available. Therefore, the data of 1972 census are presented.

The bovine and ovine population per 100 hect. of cultivable land works out to be 128 for the District. This

ratio is more than 125 for Khed, Haveli, Ambegaon, Junnar, Baramati and Purandhar tahsils which have comparatively higher irrigated area and cash crops. This ratio is low for Mulshi, Velhe and Naval tahsils.

CONSUMPTION OF ELECTRICITY:-

3.11 Out of 1,481 villages in the district 884 villages have been electrified till the end of March 1979. Tahsilwise distribution of these villages alongwith number of agricultural pump sets energised in each tahsil is given in the following table.

Note :- Data in col.No.6 and 7 is as per Livestock Census and in Col.No.8 is obtained from K.S.E.B.

From the above table it is seen that large number of villages from Velhe, Mulshi and Naval are yet to be covered

under the Rural Electrification programme. They might have reminded so because of peculiar topographical situation and population size of villages. For example, in Valhe Tahsil there are 43 villages having less than 200 population each.

With the expansion of rural electrification programme activities, the use of electric pumpsets for irrigation purposes is on increase. Out of total 29,260 agricultural pumps energised till March, 1979 under the scheme, nearly 60% pumps are installed in four tahsils, viz., Baramati, Indapur, Junnar and Haveli.

Total electricity consumption per capita for different purposes is indicated below :-

TABLE NO. 9 (A)

During the last 20 years, per capita consumption has substantially increased. It was 42 in 1960-61 which rose to 204 in 1978-79.

Itemwise consumption of electricity for different purposes is given in table No. 38 of Part II of this publication. A high proportion of electricity (about 68 per cent) is consumed for industrial purposes.

3.12 EMPLOYMENT EXCHANGE

3.13 Following table shows number of candidates enrolled and

vacancies notified in Pune district during reference years.

5.	Candidates on the live Register at the end of the year	21,202	36,831	78,712	75,141

There is no sizeable difference in number of candidates approaching the Employment Exchange for enrolling their names or in number of vacancies/placements. But the number of candidates on live register of employment exchange has, however, swelled to 75,141 in the year 1978-79 from 21,202 in 1960-61, This speaks about the magnitude of unemployment problem. These figures do not include unemployed persons seeking manual work and those who have not registered their names with the employment exchange.

3.12 MEDICAL FACILITIES

The data about medical facilities are present^{ed} in the following table - i.e. table no.11.

TABLE NO. 11

9.	No. of outdoor patients treated ('000')	17,56	18,11	22,20	32,49

Note :- * = Maternity homes attached to P.H.C.
 @ = Incomplete data.

The ratio of Doctor to Population is one of the indicators of the progress of medical facilities. In 1961 this ratio was one doctor per 14,000 population which is now one doctor per 5,000 population.

With the establishment of medical institutions in the rural areas of the district, the death rate of the district is reduced to 8 per 1,000 population in 1978 from 13 per 1,000 population in 1961.

On the front of family welfare programme also the district has made a spectacular progress because of very good response from the people, even in rural areas. The impact can very well be seen from the birth rate which has come down in the vicinity of/per 1,000 population from about 31 in 1961 (registered).

EDUCATION.

3-14 Education facilities have reached to almost all villages in the district. From the following table it will be seen that the number of primary and secondary institutions is now almost double that in 1960-61. Higher education facilities are also now easily available at least at tahsil level.

TABLE NO. 12

With the increase in the number of educational institutions, there has been corresponding increase in teaching staff strength. Hence, the teacher-pupil ratio, either for primary or for secondary or for higher institutions, has been ^{maintained} / nearly about the standard norms as is evident from the following table :-

following table:-

	c) Higher	N.A	1:19	1:18	1:21

The progress of education can also be assessed from the percentage of children from different age-groups studying in schools/colleges. It is presumed that the students in secondary schools and in higher institutions are covered by age-groups 5 to 14 years, 10 to 19 years and 15 to 24 years respectively. Here the age group 10 to 14 years is included in primary as well as in secondary and that the age group 15 to 19 years is included in secondary as well as in higher education. This has been done with the consideration that the children from the said age-groups are generally found in either of the respective standards especially in rural areas. On the basis of this presumption, the percentage of students in the said age-groups to total children in population are worked out in the following table:-

		: Population (in '00)			: Number of students (in '00)		
Age group:-		: 1961 : 1971 : 78-79:Standard:			: 1961 : 1971 : 1978-79

15 to 24	4177	6356	7404	Higher	30 (0.72)	320 (5.03)	520 (7.02)

The bracketted figures in the above table denote the percentages of students to the population in the respective age groups. These percentages distinctly reveal increasing trend of school going population. It is noteworthy that there is an appreciable rise in the percentage of students studying in higher education during last 10 years. This may be attributed to the establishment of higher institutions at Tahsil level.

BANKING.

A net work of banking offices is spread in rural areas during the reference years. A number of branches of various banks are opened in all over the district since 1971. As a result the ratio of one bank to households has declined from 4,947 households per banking office in 1960-61 to 1,335 households per banking office in 1977.

ROADS.

3.16 The total length of road mileage which was 2626 Km. during 1960-61 rose to 9,084 Km. during 1978-79, percentage increase in road mileage is 245 %. About 82 percent of total road length belongs to Zilla Parishad and remaining to the Building and Communication Department. The Zilla Parishad looks after Major District Roads and Other District Roads, villages and other roads. Out of the total road length, the roads of 1214 km. (13.39 %) are either cement concrete or black topped. The surface of roads of 1,444 is of water bound macadam. The remaining length of 6,404 km. is of granular material or lower types and this accounts for 70.65 % of the total road length.

3.17 The road length per 100 sq. Km. area during the year 1978-79 was 56.80 km. as against 16.83 in 1960-61.

The data collected in Village Indux Cards during 1976 about the villages connected by all weather roads and other roads is tabulated below :-

Out of 1,498 villages in the district, 766 villages were connected by all weather roads upto the year 1976. The tahsilwise figures given in the above table show that more than 50 percent villages from the tehsils Velhe, Mulshi, Ambegaon are not connected by all weather roads. This may be because of the fact that many of such villages are situated in the hilly tract of the respective tehsils.

PRICES.

3.18 The retail prices of essential consumer articles are collected by the District Statistical Office on every Friday from the selected shops at the district head-quarters. The information is restricted to only one quotation. However, the rates of certain commodities which fluctuate frequently are confirmed from other few shops also. The data may, therefore,

be useful as a broad indicator of the trends in retail prices. The following table gives the prices of certain important commodities during the selected years.

The above price table reflects that the prices of all commodities have increased frightfully during the last 15 years.

Price index is worked out by the Commissioner of Labour. The consumer price index for working class for Pune Centre has reached the mark of 310 in 1978-79 with the base year 1961.

CHAPTER - IV

ANNUAL PLAN - 1977-78 AND 1978-79.

4.1 Since the inception of the first five year plan a great deal of effort was made to encourage economic growth through the provision of required inputs, extension of improved production techniques and building up of a net work of infra-structural facilities and services throughout the country. However, plan formulation undertaken at the State level suffered to some extent from various drawbacks as it was rather difficult to make proper assessment of the following factors at the State level:-

- i. wide disparities existing between the level of development attained by different areas and community groups,
- ii. under-utilization of the already available natural resources, infrastructural facilities and productive capacities in different areas,
- iii. uniform application of development schemes resulting in inefficient utilisation of physical and financial resources.

It was, therefore, decided to adopt area development approach in the formulation of State plans. Since the formulation of Area Development Plans requires integration and co-ordination of the activities of different sectors, considering the administrative apparatus available for the same, district has been adopted as a unit of planning from the beginning of the Fifth Five Year Plan.

The area development approach embodied in the District Plan envisages that the aspirations and requirement of specific local areas, communities and situations are fully reflected in the plan document.

4.2 With a view to providing appropriate planning machinery at the district level for formulating co-ordinated development plans and overseeing the performance, Government constituted a District Planning and Development Council for each district.

Ensuring co-ordinated action by various implementing agencies, giving guidance in preparation and implementation of plans, approval of various district plans (subject to orders of the State Government) review of plan performance and making recommendations to the State Government and to consider and approve reappropriation of savings/ excesses within the approved District Annual Plan are the functions of the District Planning and Development Council.

The District Planning and Development Council is headed by the 'Palak Mantri' of the District as 'Chairman'. Other Ministers of the District and the Divisional Commissioner are Vice Chairman and the Collector is the Member-Secretary. The members of the Council include all MPs, MLAs, MLCs, President Z.P. Mayor one President each from 'A', 'B' and 'C' class Municipal Councils, Chairman of District Central Co-operative Bank, Chief Executive Officer, Zilla Parishad, Director of Land Development Bank, nine non-official members etc. The Council generally meets twice a year.

4.3 To assist the council in its day to day planning and development activities an Executive Committee is constituted at District level. The Chairman and Vice-Chairman of this committee are the same as that of the council. The Member-Secretary is, however, the District Planning Officer. The Committee consists of some selected members from the Council. The Committee meets regularly for reviewing the plan performance and to suggest ways and means for effective implementation of the p-plan schemes.

4.4 In this chapter a brief review of the Annual Plans-1977-78 and 1978-79 is taken.

Two separate plans - one for tribal area (Tribal sub-plan) and the other for the rest of the district - were formulated for the implementation of the various plan schemes. Besides, Centrally - Sponsored schemes were implemented during the reference period in the Pune District.

The following table gives the consolidated information about the budget and expenditure figures under State Plan(Non-Tribal) and Tribal Sub-Plan schemes for the years 1977-78, Fifth Plan period and for 1978-79.

TOTAL	1375.38	1345.15	3517.67	3198.85	1554.32	1683.90	

Note :- * Formulation of separate tribal sub-plan was started from the year 1975-76.

From the above table it will be seen that the total expenditure of Rs. 3198.85 lakhs was incurred on State Plan schemes during the fifth plan period as against the budget provision of Rs. 3517.67 lakhs. Out of this, an amount of Rs. 120.88 lakhs was spent on schemes implemented under Tribal Sub-Plan.

4.5 The performance of State Plan (Non-tribal), Tribal sub-plan and Centrally- sponsored schemes during the years 1977-78 and 1978-79 is reviewed separately in the following

paragraphs.

(A) STATE PLAN SCHEMES : (NON TRIBAL)

4.5.1 . The following table shows the budget and expenditure figures under different major heads for the reference period under review.

TABLE NO.2

In the above table, the bracketted figures show the extent of utilization of the budget provision under each major head of development. From the data it is seen that the budget provisions were not fully utilised during the Fifth Plan period. The expenditure was, however, exceeded by about 10% in the year 1978-79. A comparison of expenditure incurred under different major heads during the two annual plan periods- 1977-78 and 1978-79, reveals that there was an overall increase in the expenditure during the year 1978-79 under all major heads except Co-operation. In fact, the expenditure under Co-operation and

Community Development during the year 1977-78 was on much higher scale as compared to the amount spent during any of the previous annual plans. The reason for maximum expenditure on Co-operation can be attributed to the large amount of share capital contribution (Rs.70.00 lakhs) extended to Bhima Sahakari Sakhar Karkhana.

There was also significant increase in the expenditure during the year 1978-79 on Agricultural Programme as compared to that in the year 1977-78 or in any other previous years. This increase is mainly due to intensive implementation of D.P.A. . Programme activities.

4.5.2 . The following table gives the percentage distribution of total expenditure incurred on different major heads of development :-

TABLE NO. 3

Sr. No.:	Major head of Development	Annual Plan : 1977-78	Fifth Plan : 1974-75 to : 1977-78	Annual Plan : 1978-79
1	2	3	4	5
1.	Agril. Programme	22.35	24.57	26.36
2.	Co-operation and C.D.	6.11	3.49	2.65
3.	Irrigation and Power.	13.20	13.56	11.80
4.	Industry and Mining.	1.53	3.37	2.08
5.	Transport and Communication.	12.11	9.75	10.89
6.	Social Services	31.11	30.21	31.84
7.	Miscellaneous.	13.59	15.06	14.38
TOTAL		100.00	100.00	100.00

It is observed that there is no significant variation in the percentage distribution of expenditure incurred during the reference periods under review except as

Co-operation during 1977-78. In the total expenditure, the share of the major head 'Social Services' is maximum i.e. about 30 percent. Agricultural Programme comes next with about 25 percent share.

PHYSICAL ACHIEVEMENTS : STATE PLAN (Non Tribal)

4.6 The details of physical achievements under different schemes are given in table No.72-A of Part II of this publication. However, a brief review of the important achievements under each sub-head of development is taken in the following paragraphs :-

4.6.1 Agricultural Programme :- This major head of development covers important programmes, viz. Agricultural Production, Soil Conservation, Animal Husbandry, Minor Irrigation, D.P.A.P. , Forest, Fishery and Warehousing.

(a) Agricultural Production :- Under this sub-head, plant protection activities were intensified during the year 1978-79 as compared to the previous year. The achievements under this scheme included spraying on paddy fields in 1,153 hectares and Rat Eradication programme in 13,226 hectares during the year 1978-79.

The Integrated Area Development Scheme for small holders aimed at distribution of pesticides, improved implements etc. Under this scheme 369 milch cattle in 1977-78 and 133 in 1978-79 were distributed to small holders.

(b) Soil Conservation :- Under the soil conservation programme, rectification of old bunds, construction of new bunding and nala bunding and Ayat Development Programme were implemented. The achievements under new bunding and nala bunding programme were comparatively much more in 1978-79 than in 1977-78. (New bunding in 3338 hectares in 1978-79 and in 1403 hectares in 1977-78, Nala bunding in

1,003 hectares in 1978-79 as against 181 hectares in 1977-78).

c) Minor Irrigation :- Under the scheme of Minor Irrigation works, construction of 8 tanks in 1977-78 and 7 tanks in 1978-79 was undertaken. Besides, 3 percolation tanks (One in 1977-78 and Two in 1978-79) were constructed. Number of pump sets installed was 44 in 1977-78 and 54 in 1978-79. Subsidy was given for construction of 94 irrigation wells in the year 1977-78 and for 64 irrigation wells in 1978-79.

d) Animal Husbandry Programme :-

This programme includes the scheme of providing additional amenities to the existing veterinary dispensaries and opening of new dispensaries. During the reference period, four livestock aid centres were opened.

e) Draught Prone Area Programmes:-

D.P.A. . Programme covers 110 villages from Nine Talukas in Pune District. Various Schemes under Soil Conservation, Minor Irrigation, Dry Land Farming, Forest Development , Livestock, Fishery Development etc. are included in this programme. The total expenditure of Rs. 83.56 lakhs in 1977-78 and Rs. 194.73 lakhs in 1978-79 was incurred on this Programme. Out of this, an amount of Rs. 18.76 lakhs in the year 1977-78 and Rs. 57.61 lakhs in 1978-79 was spent on Soil Conservation Programme. On Minor Irrigation Works, expenditure to the tune of Rs.29.62 lakhs in 1977-78 and Rs. 65.40 lakhs in 1978-79 was booked. In 1978-79 drinking water supply scheme was undertaken and Rs. 21.12 lakhs were spent.

Important achievements under D.P.A. . Programme are given in the following table :-

Forest :- This sub-head of development includes scheme of new plantation, establishment of nurseries, road side plantation etc. The major expenditure under this sub-head is booked under D.P.A. Programme.

Co-operation and Community Development :-

4.6.2 . Under 'Co-operation' the expenditure was mainly done on assisting the co-operative societies of different types including urban and rural consumers co-operative stores by way of subsidy, loans etc. The highest expenditure under this :

Sub-head was incurred during 1977-78 mainly for granting share capital contribution of Rs. 70.00 lakhs to the Bhima Sahakari Sakhar Karkhana.

Under the sub-head 'Community Development Programme' only one scheme relating to 'Bhangi Mukti' Programme was implemented and Rs. 29,000/- in 1977-78 and Rs. 14,000/- in 1978-79 were spent for giving assistance to the village Panchayats for purchase of latrine utensils.

Irrigation and Power :-

4.6.3 . Two medium irrigation projects, one at Nazare and other at Vadivale were implemented during the reference years. Project at Nazare is completed and at Vadivale is in progress.

Rural Electrification:-

4.6.4 . Under this programme, 12 villages in the year 1977-78 and 6 in 1978-79 were electrified. Number of agricultural pumps energised was 1033 in 1977-78 and 1294 in 1978-79.

Industry and Labour :-

4.6.5 . Under the scheme of Package Incentives, seed money assistance was given to 381 educated unemployed persons in 1977-78 and 435 in 1978-79. Under Employment Promotion Programme 1,502 persons in 1977-78 and 492 persons in 1978-79 were provided employment. In all 18 small industries in 1977-78 and 35 in 1978-79 benefitted by the programme of package Incentives available under S.A.I. Rules.

Transport and Communication :-

4.6.6 . Under the scheme of Road Development in hilly tracks, new roads of 8.40 kms. of length in 1977-78 and 30 Kms. of length in 1978-79 were constructed. Under the same scheme 4 new bridges were constructed in each of the years under reference. Under the "Crash Scheme of Rural Roads" new roads

of 249 Kms. length in 1977-78 and 94 Kms. length in 1978-79 were constructed.

Social Services.

4.6.7 The programmes under Social Services assume special importance for uplift of the community.

(a) General Education :-

In all eight schemes were implemented under this sub-head. The achievements under these schemes are as follows :-

Number of class rooms constructed was 30 in 1977-78 and 36 in 1978-79. A total number of 16,325 sets of books in 1977-78 and 19,800 sets in 1978-79 were distributed by the book banks. Two Balbhavans were established during each of the two years under review. The other schemes were relating to the grant of scholarships and concessions in fees to school children of primary teachers.

(b) Health and Water Supply :-

The major achievements under this sub-head were construction of 60 tube wells in 1977-78 and 67 in 1978-79 and provision of piped water supply in rural areas (4 villages in 1977-78 and 5 in 1978-79), Five drinking water wells were also constructed in 1978-79. Under Public Health Programme, two public health units were established during each of the years under report.

(c) Housing :-

Under the scheme of housing, major expenditure was incurred on providing amenities to slum areas and for giving assistance to landless labourers for construction of houses. Total expenditure of Rs. 42.65 lakhs in 1977-78 and of Rs.31.52 lakhs in 1978-79 was incurred on the scheme of housing.

(d) Urban Development :-

Under this sub-head financial assistance to municipal councils for implementation of their development plans is granted. Such assistance was granted to six municipal councils in 1977-78 and eight in 1978-79.

(e) Labour and Labour Welfare :-

Under this development head 'Advanced Vocational Training system at I.T.I.(Aundh) has been established. One hostel building at Aundh was also under construction. Besides this, three industrial/^{training}centres located at Lonavala, Chinchwad and Malogaon were assisted for development of their activities.

(f) Welfare of Backward Classes :-

Total expenditure of Rs. 12.09 lakhs in 1977-78 and Rs.28.30 lakhs in 1978-79 was incurred on various schemes for backward class welfare. The schemes related to grant of scholarship to backward class students studying in different courses, establishment of Ashram shalas, Balwadis, construction of irrigation wells and giving assistance to cultivators for land development etc.

(g) Social Welfare :-

The schemes under Social Welfare aimed at giving financial assistance to social institutions for handicapped persons, lepers and hostels for working women etc. The total expenditure during 1977-78 and 1978-79 was Rs. 4.74 lakhs and Rs. 4.99 lakhs respectively.

Miscellaneous Programs :-

4.6.8 . Only two schemes, namely - Information and Publicity and Employment Guarantee scheme were implemented under this programme. The expenditure incurred on Employment Guarantee Scheme works was to the tune of Rs. 171.17 lakhs in 1977-78 and Rs. 286.84 lakhs in 1978-79. During 1977-78 and 1978-79 the number of E.G.S. works undertaken was 689 and 275 resp.

From these works 13276 and 33880 persons were provided with the employment.

(B) TRIBAL SUB PLAN :-

4.7 The tribal sub-plan of Pune district covers 140 villages from Khed, Junnar and Ambegaon talukas. A separate tribal plan is being prepared from the year 1975-76. In the first year i.e. 1975-76, an expenditure of Rs. 17.05 lakhs was incurred since then the amount of expenditure incurred under Tribal sub-plan has rapidly increased every year as is indicated in the following Table :-

TABLE NO.5

(Rs. ' Lakhs')

3) 1977-78	98.04	76.50	78.03
4) 1978-79	103.46	94.34	91.18

During the years 1977-78 and 1978-79 the expenditure incurred on different major heads is shown in the following tables-

TABLE NO.6

TOTAL		98.04	76.50 (100.00)	103.46	94.34 (100.00)

Note :- Figures in bracket indicate percentage distribution of total expenditure.

The shortfall in utilisation of full budget grants during 1977-78 was due to less expenditure booked under the programme of Social Services.

The percentage distribution of total expenditure during both the years indicates comparatively more emphasis given on the schemes relating to Social Services and Transport and Communication.

PHYSICAL ACHIEVEMENTS.

4.8 The physical achievements of different schemes implemented in Tribal Sub-plan are given separately in table No. 72 B of the Part II of this publication.

C) CENTRALLY - SPONSORED SCHEMES.

4.9 Besides the State Plan Schemes, some Centrally-sponsored schemes were implemented under the heads . Agricultural Programme and Social Services. Out of the total expenditure of Rs.36.11 lakhs in 1977-78 and Rs. 50.28 lakhs in 1978-79, the relevant share of Social Services was as big as Rs.34.21 lakhs and Rs.45.32 lakhs during the years 1977-78 and 1978-79 respectively. The expenditure under Social Services was mainly on the implementation of Medical and Health Programme like Family Welfare programme, Cholera control and Leprosy control schemes.

Under Family Welfare Programme, 5,330 sterilisation operations in 1977-78 and 6,866 sterilisation operations in 1978-79 were carried out in the Pune District.
