CHAPTER - I1.1 LOCATION :

The Nashik District lies between 19.33' and 20.53' North latitude and 73.16' and 75.16' East longitude. It is Rhomboidal in shape with longer diagonal of about 170 Km from South West to North East. The Head Quarter of the district is Nashik itself.

1.2 BOUNDARIES :

Nashik district is surrounded by Jalgaon District in the East and the North-East, Dhulia in the North, Dang and Surat Districts of Gujrat State on the North-West. While Thane District is on the West and South-West, Ahmadnagar District is to the South and Aurangabad District to the South-East.

1.3 ADMINISTRATIVE SET-UP :

The Nashik District was in Bombay region but since Feb-1981 New Nashik Revenue Division Comprising of four districts viz., Nashik, Dhule, Jalgaon and Ahmednagar is established and Nashik is included in this new division. For administrative purposes the district is divided into three sub-division covering all Tahsils.

The details are as follows;-

1.4 TOPOGRAPHY :

The District is partly situated in Tapi Basin and partly in the Upper Godavari Basin. The Tahsils Nandgaon, Kalwan, Baglan and Malegaon are drained in the North and North-East by the Girna river and its tributories. These Tahsils lie in Tapi Basin. Nashik and Niphad Tahsils are drained by the Godavari and its

tributories while the Satmala Range of Hills provide a fine water shed between the above two basins.

1.5 HILLS AND RIVERS :

1.5.1 HILLS : The main system of Hills is the Sahyadri and its off shoots. The main sahyadrian range runs from North to South on the Western portion of district covering Igatpuri, Peth Surgana and Western portion of Kalwan, Nashik and Baglan Tahsils. From the main Sahyadrian range three prominent spurs stretch out to the East. In the extreme North, the Selbari range approximately forms the boundary between Nashik and Dhule Districts. The Satmala or Ajanta range runs right across the district. It differs from the rest of the mountains in North by the number and shape of the peaks and by the absence of flat summits. Most of these ranges are rocky, flat topped and regular in height whereas some are conical and irregular.

1.5.2 RIVERS : The district has two main rivers, viz., the girna and the Godavari and their tributories. Apart from these rivers, there are large number of Small Kokan Rivers draining West-Wards into the Arabian Sea among which the Vaitarna is the only useful river which has been harnessed for generating electricity in Igatpuri Tahsil. The other important rivers are the Darna, Mosam and Kadva.

In the following table the important rivers and their length etc., are given.

TABLE NO.1  
IMPORTANT RIVERS IN THE NASHIK DISTRICT.

Except in uplands, Black soil is found mostly in the plain country near beds of rivers such as the Girna and the Mosam. Red Soil is stiffer and shallower and is found briefly on hill slopes or plateaus. Red and Black Soil is found occasionally in hilly tracks. Light brown, the lightest of all soil is found on hilly lands.

TAHSILWISE CLASSIFICATION OF SOILS IS MENTIONED IN THE FOLLOWING

TABLE NO.3  
DECADAL VARIATION IN NASHIK DISTRICT.

Year	Population Ø Lakhs Ø	Decadal percentage variation.	
1	2	3.	
1901	8.20	-	
1911	9.16	(+)	11.25
1921	8.46	(-)	7.64
1931	10.09	(+)	19.37
1941	11.28	(+)	11.69
1951	14.30	(+)	26.81
1961	18.55	(+)	29.70
1971	23.69	(+)	27.70

1.12.3 Villages Classified by Population :- According to 1971 Census, rural population of the district is 16.91 lakhs residing in 1,628 inhabited villages. Highest percentage (32.86) of villages are in group having population between 500 to 999 while maximum population (30.83) percent is accounted for villages in the population group 1,000 to 1,999.

The corresponding figures for the rural areas only are 111 for the district and 113 for the state. Tahsilwise variation shows that Tahsil Nashik, Malegaon and Niphad are having comparatively higher density of population than the district ratio. The lowest density is 83 persons in Surgana. The density of urban area is 1741 persons per Sq.Km. as against 2554 persons per Sq.Km. for the state as a whole.

1.12.5 Sex-Ratio :- Since 1901, the sex ratio (Females for 1000 males) of the population of Nashik district varies between 984 to 940 while that of Maharashtra varied between 978 to 935. (1) 1.12.6 Literacy :- Much progress has been made in literacy in Nashik District since 1961. The district ranks fifth in the state in respect of literacy. According to 1971 census about 36 percent are literate in the district as against 39 percent in the state as a whole. The literacy in rural areas of the district is relatively low viz., 29 percent as against 31 percent of the state as a whole.

The percentage of workers which stood at 49 percent at the time of 1961 census decreased to 38 percent in 1971 and this decrease appears to be due to change in the concept of workers in the census of 1971. The analysis of livelihood pattern gives some interesting features of the district.
