INTRODUCTION

The Season and Crop Report is an important publication brought out by Department of Agriculture of Maharashtra State which presents facts and figures pertaining to Agriculture.

The present report gives districtwise data on area, production of agricultural crops and also rainfall data, farm harvest prices, agricultural wages and summary tables on these topics.

The rainfall data presented in the report is based on the daily rainfall figures received from revenue offices and from Indian Meteorological Department for few selected centres.

Data on Land Utilisation, sources of irrigation, areas under crops is received from the District Revenue Offices. The results of production estimates are based on the crop estimation surveys conducted on certain principal food and non-food crops. Particulars relating to agricultural wages are based on the data supplied by Revenue Offices, while the data pertaining to Farm harvest prices are based on the information collected from Agricultural Development Officers.

The report contains districtwise figures and also some summary tables which may prove helpful to the users of agricultural data.

SEASON AND CROP REPORT OF THE MAHARASHTRA STATE FOR THE YEAR 1982-83

CHAPTER I

EFFECTS OF RAINFALL ON SOWING AND CROP GROWTH

During the year, the South west monsoon entered the South Konkan Region on 11th June and spread in the interior parts of the State by the 17th June. At this stage the monsoon was active only in Konkan and South Deccan region and the sowing of paddy nurseries in Konkan was undertaken. In the remaining parts of the State, the rains received were isolated, scattered and inadequate. On account of erratic behaviour of monsoon, major kharif sowing operations in the State received a considerable set back.

Further from 24th June onwards till 8th July there was almost a complete cessation of rains all over the State. The affected areas were Pune, Ahmednagar, Solapur, Satara and Sangli districts; parts of Nasik, Nagpur, Bhandara and Chandrapur districts from Vidarbha region; Sillod, Paithan, Vaijapur and Gangapur talukas of Aurangabad district; Bhokardan and Jafarabad talukas of Jalna district; Ashti & Patoda talukas of Beed district; Bhoom and Paranda talukas of Osmanabad district. In these parts the sowing operations were totally held up from 9th July, onwards, however, there were good rains in Konkan, Vidarbha and Marathwada regions which helped in transplanting of paddy in Konkan and large scale sowing of cotton, kharif jowar, groundnut, bajara and pulses in Vidarbha and Marathwada regions. However, in parts of Nasik district, whole of Pune, Ahmednagar and Solapur districts, eastern part of Satara and Sangli districts and parts of Aurangabad, Beed and Osmanabad districts; the rains received continued to be ineffective for completion of kharif sowing which resulted in large areas remaining unsown. In Chandrapur and Bhandara districts where paddy nurseries were sown earlier under conditions of intermittent sporadic showers, were showing signs of withering and transplanting of paddy was held up.

On account of good rains in second week of July the condition of paddy nurseries in Chandrapur and Bhandara districts improved and transplanting could be undertaken on a small scale.

Between 10th August to 18th August, there were good rains all over Konkan and parts of Vidarbha Division which helped in improving the condition of standing kharif crops. Condition of crops in western parts of Satara, Sangli and Kolhapur districts and parts of Jalgaon and Dhulia districts was satisfactory at this stage. In the remaining parts of the State the rains received were scanty resulting in stunted growth of standing kharif crops. The situation was more serious in the districts of Pune, Ahmednagar, Solapur, eastern parts of Satara, Sangli and parts of Nasik district and few pockets in Jalgaon, Aurangabad, Jalna, Beed and Osmanabad districts where the standing

kharif crops were showing signs of withering. From 24th August onwards there was almost complete cessation of rains particularly all over the State except Konkan region and parts of Chandrapur and Bhandara districts. The dry spell prevailing in the State for such a long period had adversely affected the condition of standing crops of Vidarbha, Nanded, Parbhani, Jalgaon, Dhulia, Kolhapur and western parts of Satara and Sangli districts where prior to the dry spell, the crop condition was otherwise satisfactory. The situation worsened in the already affected areas.

However from 6th September onwards, till 12th September widespread rains were received all over Konkan and Vidarbha and parts of Marathwada region which helped in improving the condition of kharif crops in these regions. In the second fortnight of September again much awaited widespread rains were received in Deccan and Konkan regions, and parts of Marathwada and Vidarbha region thus giving a great relief to the cultivators. Due to these rains, condition of standing kharif crops improved to some extent and sowing of rabi crops particularly rabi jowar and safflower was done in Pune, Ahmednagar, Solapur, Satara, Sangli districts and parts of Nasik, Dhulia and Jalgaon districts by the end of September.

In Marathwada and Vidarbha regions the sowing of rabi crops was undertaken in the first fortnight of October. However, more rains were urgently needed in different parts of the State for satisfactory growth of already sown rabi crops and for completing the remaining sowing. Fortunately widespread light to moderate rains were received in parts of Deccan, Marathwada and Vidarbha region during the second fortnight of October and first fortnight of November. These rains were beneficial for improving the condition of late kharif crops and already sown rabi crops to some extent. Sowing of rabi crops was completed in the most parts of the State in the first fortnight of November and that of irrigated wheat and gram crops by the end of November. The condition of rabi crops was reported to be generally satisfactory except drought prone areas of the State where the standing rabi crops on light soil were affected adversely for want of adequate soil moisture particularly the crop of rabi jowar on light soil was adversely affected in parts of Deccan and Marathwada region due to moisture stress resulting in considerable reduction in yield of these crops.

On the whole, it may be stated that the seasonal conditions during 1982-83 were not favourable and hence the production of different crops were considerably gone down.

CHAPTER II

LAND UTILISATION

(Table II, pages 52 & 53)

(Summary Table 'A' page 6 and Summary Table 'A-I' page 7)

Number of Villages

The number of villages in this State was 40,166 as against 39,974 during the preceding year. The increase was due to formation of new villages.

Total Geographical area-

The Geographical area in the State was 307.58 lakh hectares.

It can be seen from the Summary Table 'A' that out of total geographical area 177.11 lakh hectares was under net cropped area which has decreased by 2.3 percent as compared to the

net cropped area in preceding year. The total cropped area during the year under report was 192.17 lakh hectares as against 200.08 lakh hectares in the preceding year having decreased by 4.0 percent. The area sown more than once also decreased by 19.8 percent having gone down from 18.78 lakh hectares in 1981-82 to 15.06 lakh hectares in 1982-83. The area under all other categories of land use however remained almost same as compared to the preceding year.

The Summary Table 'A-I' gives the districtwise details of percentage area under each of the categories under ninefold classification in each district of the State.

CHAPTER III

IRRIGATED AREA

(Table III Pages 54 to 69)

(Summary Table 'B' and 'C' pages 8 to 10)

3.1. During the year under report the number of wells used for irrigation purposes (other than tube wells) was 8,32,885 as against 8,22,024 in the preceding year thus showing an increase of 1.3 percent over preceding year. The number of wells used for domestic purposes also showed an increase of 1.3% over preceding year.

3.2. The number of oil engines decreased from 1,29,856 in 1981-82 to 1,23,410 showing decrease of 4.5% over the preceding year while the number of pump sets remained almost the same as in 1981-82.

3.3. The net irrigated area in the State decreased by 2.9 percent having gone down from 19.84 lakh hectares in 1981-82 to 19.26 lakh hectares in the year under report. The gross irrigated area also decreased from 24.92 lakh hectares in 1981-82 to 23.94 lakh hectares in 1982-83 showing decrease of 3.9 percent.

3.4. During the year under report, the percentage of net irrigated area to the net area sown in the State was 10.9 while that of gross irrigated area to gross area sown was 12.5 percent. The corresponding percentages for the preceding year was 10.9% and 12.5% respectively.

Sourcewise net and gross irrigated area

3.5. The net irrigated area by surface irrigation showed a slight increase of 2.9% during the year under report as compared to the preceding year. The net area irrigated by well showed decrease by 6.7% during the year under report.

3.6. The gross irrigated area by surface irrigation in the State showed an increase of 1.5 percent and the gross irrigated area by wells showed decrease by 7.3% as compared to the preceding year.

3.7. The total irrigated area under surface irrigation constituted 40.3 percent of the total irrigated area while the total irrigated area by wells was 59.7% of the total irrigated area. The Table III-A gives percentage of net irrigated area to net area sown and gross irrigated area to gross area sown in each district of the State. While Table III-B gives percentage area irrigated by surface irrigation and by well irrigation in each district of the State.

3.8. The cropwise irrigated area during 1982-83 is presented in summary Table 'C' along with the corresponding area in 1981-82. It can be seen that out of total irrigated area of 23.94 lakh hectares in the State the irrigated area under food crops occupied a larger share of 21.70 lakh hectares or 90.6 percent while the remaining area of 2.24 lakh hectares or 9.4 percent under non-food crops.

3.9. In the year under reference the irrigated area is decreased by 3.9% as compared to the preceding year. This decrease was noticed under almost all food and non-food crops excepting certain minor crops like minor pulses and vegetable crops.

CHAPTER IV CROPPED AREA

(Table IV-A, IV-B and IV-C pages 70 to 93)

(Summary Tables 'D' pages 11 to 25)

4.1. Gross cropped area, area cropped more than once and area under various food crops and non-food crops are shown in Summary Table 'D'.

4.2. From this table, it can be seen that the gross cropped area is decreased by 4.0 percent during the year under report as compared to the preceding year, having gone down from 200.1 lakh hectares to 192.2 lakh hectares. The net cropped area also decreased by 2.3 percent during the year 1982-83. The area sown more than once decreased by 19.8 percent as it decreased from 18.8 lakh hectares in 1981-82 to 15.1 lakh hectares in 1982-83.

4.3. Out of the total decrease in the gross cropped area during 1982-83 the area under food crops decreased from 148.3 lakh hectares in 1981-82 to 141.9 lakh hectares in the year under report or by 4.3 percent. As compared to the preceding year the area under non-food crops also decreased from 51.7 lakh hectares in 1981-82 to 50.2 lakh hectares in 1982-83 or by 2.9 percent in 1982-83.

4.4. Though the area under food crops showed decrease in the year 1982-83, it is seen that the area under sugarcane and soyabean showed increase by 6.9 and 50.0 percent respectively so also the area under chillies, ginger and garlic showed increase by 2.4, 40.0 and 5.6 percent respectively.

4.5. In case of non-food crops it was seen that the area in 1982-83 showed decrease of 2.9% over 1981-82.

4.6. Out of total cropped area in the State the percentage area covered by certain categories of crops is indicated below :

Crop	Percentage area to total cropped area
Rice	7.5
Kharif Jowar	15.6
Rabi Jowar	18.0
Bajari	7.7
Wheat	5.1
Total Cereals	56.2
Gram	1.9
Tur	3.3
Total Pulses	13.3
Total Foodgrains	69.5
Groundnut	3.2
Total Oilseeds	8.2
Cotton	13.5
Sugarcane	2.0

Thus it can be seen that out of the total cropped area in the State 69.5% area is covered under foodgrain crops. The cotton crop also occupies comparatively larger area of 13.5% of the total cropped area.

CHAPTER V

AVERAGE YIELD AND OUTTURN OF CROPS

(Table V-A and V-B pages 94 to 105)

(Summary Tables 'E' and 'F' pages 26 to 27)

Kharif Foodgrains

The over all seasonal condition during the year 1982-83 was found to be unfavourable as compared to the year 1981-82. As a result of this the production of foodgrains decreased by 11.5% percent during 1982-83, as compared to the preceding year, having gone down the same from 103.3 lakh tonnes to 91.4 lakh tonnes. This decrease in production of foodgrain crops was due to decrease of production of all main crops in kharif and rabi seasons like Paddy by 20.7%, Wheat 7.5%, Rabi Jowar 23.2%, Bajri by 40.3%, Maize by 35.7%, Ragi by 10.6%, other cereals by 14.1%, Gram by 17.9%, other pulses by 8.2%, Red-gram (Tur) by 2.6%, little millets by 11.8% and Horse gram by 0.2 percent. Kharif jowar, Barley, Italian millets, Kodra, green-gram, black gram, and Masur however showed an increase in production by 4.4 percent, by 17.6%, 8.9%, by 11.3%, by 12.9%, 9.3% and by 13.0 percent respectively.

The decrease in production was observed during 1982-83 as compared to the year 1981-82 due to unfavourable seasonal conditions to the crops in the State during the year under report.

Table below gives the contribution of various crops in the production of foodgrains during the year 1982-83.

Crop	% Outturn to total outturn of foodgrain crops
1) Rice	21.2
2) Bajari	5.1
3) Ragi	2.1
4) Kharif Jowar	37.3
5) Rabi Jowar	13.9
6) Wheat	8.5
7) Other cereal crops	1.2
8) Gram	1.4
9) Tur	4.2
10) Other Pulses	5.1
	100.0

From the above table, it can be seen that the major contribution to foodgrain crops comes from Jowar (both kharif and rabi) and which accounts for 51.2% followed by Rice which accounts to 21.1%.

In case of Sugarcane the production in terms of Gur decreased by 3.6 percent during 1982-83 having gone down the same from 31 lakh tonnes in 1981-82 to 30 lakh tonnes in 1982-83.

The cotton production increased from 14.1 lakh tonnes in 1981-82 to 16.1 lakh tonnes in 1982-83 showing an increase by 14.2 percent.

The total oilseed production however showed decrease of 10.1% in 1982-83, as compared to 1981-82. This was due to decrease in the production of almost all edible and non edible oilseeds except sesamum.

CHAPTER VI

(Table VI pages 106 to 109)

(Summary Table G page 28)

The districtwise farm harvest prices of the principal crops during the peak harvesting period in the year 1982-83 together with the corresponding prices of the last year are given in the main table i. e. Table No. VI.

The State level average prices during the five years from 1978-79 to 1982-83 are given in the summary table. There was increase in prices of Wheat by about 12.6%, Paddy 13.4%, Jowar 4.7% and Bajari 5.3%, Ragi 6.1%, Tur 4.2%, Maize 7.6%. As against this there was slight decrease in prices of Gram by 1.5% and Chillies by 3.4% than the prices in the preceding year 1981-82.

The price of paddy crop at State level was Rs. 164.90 per quintal i. e. higher by 13.4% than that of preceding year, same in the case of wheat the price of wheat was Rs. 229.95 as against Rs. 204.14 in the preceding year, the increase was of 12.6%.

while the prices increased by Jowar 4.7%, Bajri 5.3%, Ragi 6.1%, Tur 4.2% and Maize by 7.6% than the prices of preceding year.

The noticeable decrease in the prices of raw sugar continued from last year. This year the decrease was 1.1 percent. It was observed this year also. The main reason for this decrease is the considerable increase in the sugarcane production during the year under report as compared to the last four years. The same happened with the Gram, Cotton and Chillies the prices of these crops gone down because of the reasons mentioned above.

The scheme for monopoly purchase of cotton was continued in the State and average monopoly purchase price during the year was nearly the same as that was in the preceding year 1981-82.

CHAPTER VII

AGRICULTURAL WAGES

(Table VII pages 110 to 121)

(Summary Table 'H' pages 29 to 31)

According to the Revenue Accounts Manual Agricultural labour is classified under three categories viz. (i) Skilled labour (ii) Field labour (iii) Other agricultural labours. Skilled labour comprises of carpenters, black smiths, and cobblers while field labour includes plough man, sower, transplanters, weeders, reapers, harvesters. Other agricultural labour includes load carrying hamals, well diggers, assistants of masons and carpenters, earth workers etc. One more category of labour viz. herdsmen whose main work is to take the livestock owned for grazing is also included in the table VII on Agricultural Wages.

Main table of report gives districtwise and monthwise figures of average daily wages of different classes of Agricultural labours. Summary table 'H' gives the State level information for wages in the different months during 1982-83 along with the corresponding information for the year 1981-82.

The table below gives the daily wages of different types of labours at the State level for two years i. e. 1981-82 and 1982-83.

Agricultural Wages (Daily)

Year	Skilled Labour			Field Labour			Other Agri. Labour		Herdsmen
	Car-penter	Black-Smith	Cobbler	Male	Female	Children	Male	Female	
1	2	3	4	5	6	7	8	9	10
1981-82 ..	16.17	14.54	12.24	7.38	5.13	3.73	6.87	4.86	5.39
1982-83 ..	19.77	17.91	15.19	9.05	6.24	4.46	8.52	5.85	7.98

It is seen from the above table that wages for all the categories of labours during 1982-83 were higher than those of 1981-82.

CHAPTER VIII
