## INTRODUCTION

The Season and Crop Report is an important report published by the Department of Agriculture of Maharashtra State. The present report pertains to the year 1994-95.

The information on Centrewise and Seasonwise rainfall data, district level land utilization statistics, irrigation statistics, area, production and productivity of various crops, farm harvest prices, Agricultural Wages and Agricultural stock etc., is presented in the report. The information is collected through various agencies detailed below :

The rainfall data is based on daily rainfall figures received from Revenue Offices and Indian Meteorological Department for a few selected centres. The data on land utilization, source of irrigation, area irrigated as well as total area under different crops and agricultural wages are collected from District Collectorates through Season and Crop report where as the production estimates are worked out on the basis of Crop Estimation Surveys conducted on certain principal food and nonfood crops. The data on farm harvest prices are collected from Agricultural Development Officers. The data on Agricultural Census of Live-stock is collected from Live stock census conducted by Directorate of Animal Husbandry in the year 1992.

The State level figures are presented in summary tables A to I , while districtwise details are furnished in Table - I to Table - VIII.

*The main features of the report are summarised below,*

Though the onset of Monsoon was in time, there was a long stress for about a fortnight. Rain commenced in July again and continued for a very long period due to which sowing operations were held up. This resulted in decrease in area of Kharif crops. Similarly continous rains in September and unocassional rains in October resulted in loss of area and production of food grain crops.

The net sown area during the year under report was 180.53 lakh hectares or 58.7 % of Geographical area. The gross cropped area was decreased by 0.2% having gone down from 214.09 lakh hectares to 213.58 lakh hectares during the year under report i.e. 1994-95.

In case of Horticultural crops the area under fruit crops increased by 6.2% i.e. 3.09 lakh hectares similarly the area under vegetable crops increased by 2.6% i.e. 2.43 lakh hectares during the year 1994-95.

The net irrigated area was 27.78 lakh hectares where as the gross irrigated area increased by 7.3% i.e. 33.77 lakh hectares during the year under report.

The foodgrain production during 1994-95 in the State was 116.03 lakh tonnes, showing a decrease of 14.3% over the preceeding year due to unfavourable seasonal conditions. However Sugarcane production increased by 53.8% having gone up from 288.16 lakh tonnes to 443.16 lakh tonnes due to increase in area and productivity. Where as the Cotton (Lint) production showed a decrease of 9.7% as compared to the preceeding year having gone down from 26.26 lakh bales to 23.71 lakh bales during the year under report. Total oilseed production showed decrease of 22.6% having gone down from 23.08 lakh tonnes to 17.87 lakh tonnes during the year 1994-95.

The farm harvest prices as well as agricultural wages during 1994-95 were higher than those during 1993-94.

*The report may prove useful to the users of Agricultural Statistics.*

# SEASON AND CROP REPORT 1994-95

## CHAPTER I

### EFFECT OF RAINFALL ON SOWING AND CROP GROWTH

In the last week of May, 1994 light to medium premonsoon rains were received in parts of Konkan, Nasik, Pune, Kolhapur, Latur division and in parts of Aurangabad and Jalna districts of Aurangabad division. These rains were beneficial for undertaking preparatory tillage operations in parts of the State and to undertake "Dhulwaf" sowing of paddy in the nurseries in Konkan region and in Kolhapur district, "Dhulwaf" sowing of cotton was also undertaken in cotton areas of Jalgaon and Aurangabad districts. Sowing of cotton in irrigated areas was taken up in Amarawati division.

This year monsoon commenced in the State three to four days earlier of the scheduled date i.e. on 3rd June, 1994 it further advanced in Madhya Maharashtra and Marathwada on 6th June and spread over Vidarbha region by 12th June, 1994. Monsoon was active in Madhya Maharashtra and vigorous in Konkan region during second week of June. Due to timely onset and spread of monsoon in the State, farmers have immediately started sowing of paddy in nurseries and other kharif crops. However there was a break in rains during the third week of June, particularly in Ahmadnagar, Solapur, eastern parts of Satara and Sangli districts and in most parts of Marathwada region. In these areas, the sowing operations were withheld. However rains were again received in last week of June and 1st week of July in almost all parts of the State. However the intensity of rainfall was feeble in Marathwada. Due to these rains sowing operations were again resumed in 1st week of July.

Monsoon was active on 1st, 4th, 5th, 12th to 14th and on 20th July in Konkan, Madhya Marathwada and Vidarbha region. There was continuous rainfall for the first three weeks of July in Konkan region, western parts of Satara, Sangli, Kolhapur, Pune districts in most parts of Nasik, Amarawati and Nagpur division. Due to continuous and heavy rains, transplanting of paddy and sowing of other kharif crops were held up. Besides, due to floods to the rivers in Kolhapur, Pune and Nagpur divisions, the crops on banks of the flooded rivers were damaged. In other parts, the growth of the crops was

stunted and they were turned yellowish. In Kolhapur division, wafasa condition could not be available till the end of July. Due to continuous rains and unavailability of wafasa condition area under Kharif crops decreased. However these fallow land came under rabi crops particularly in Kolhapur division. In contrast to heavy and continuous rains in the above areas there were inadequate rains in the month of July in most parts of Ahmadnagar, Solapur, eastern parts of Pune, Satara, Sangli, parts of Jalna, Beed, Latur and Osmanabad district. Sowing operations could not gather momentum in these areas.

From 3rd August, there were very light showers in parts of the State and there was break in rains in most parts of the State. Due to break in rains, interculturing operations were taken in most parts of the State. The resowing in flood affected areas was started.

Light to medium rains were received in all parts of the State including Marathwada region during 10th to 14th August and again in 3rd and 4th week of August. Rains received during this period in Marathwada were beneficial for survival of kharif crops, which were withering away for want of rains in July and early August. However due to continuous and heavy rains in Nasik, Kolhapur, Amarawati and Nagpur divisions, growth of kharif crops was stunted and even crops turned yellowish in some parts of these divisions. Crop damages occurred in the fields on the banks of the flooded rivers in Amarawati and Nagpur division. Crop growth was also affected due to inadequate rains in Ahmadnagar, Solapur, Marathwada and eastern parts of Satara and Sangli districts.

In the first week of September widespread medium to heavy rains were received in most parts of the State. The rains received in Marathwada were beneficial to the standing kharif crops as well as to undertake preparatory tillage operations and sowing of rabi crops. But early pulse crops i.e. udid, mug were affected at maturity stage to some extent in parts of Marathwada due to these rains. By end of last fortnight of September sowing of kharif crops was completed and it was 97% of normal area at the State level. On 16th to 18th September light to

medium rains were received in Konkan region and in Dhule, Ahmadnagar, Solapur and Sangli districts. There was break in rains in almost all parts of the State during 19th to 30th September. This break in rains was beneficial to the standing kharif crops in Amarawati and Nagpur division. In general condition of kharif crops except cotton and tur was fair. Condition of cotton and tur crops was reported to be satisfactory. During September harvesting of bajra, kharif jowar, groundnut, udid, mug etc, was started in different parts of the State. Similarly harvesting of early varieties of paddy was started in parts of Konkan division, Nasik and Kolhapur districts. Sowing of rabi crops i.e. rabi jowar, sunflower and safflower was started in some parts of the State.

During the first week of October, light to heavy rains were received in many parts, particularly in Marathwada region, Solapur and Ahmednagar districts of Pune division which were beneficial for sowing of rabi crops and helped to improve the condition of standing kharif crops. Again during the third and fourth week of October, postmonsoon rains were received in many parts of the State and particularly in the drought prone areas of Marathwada region and Pune division. These rains were useful to gear up sowing of wheat, gram, sunflower etc.

During the first fortnight of November, light showers were received in few pockets of Marathwada, North Konkan and North Madhya Maharashtra region particularly on 15th November, light to heavy rains were received in most parts of Marathwada region. These rains were useful for growth of sown rabi crops. From 16th November, 1994 to first week of January weather was mostly dry and cold in the State. During second week of January weather was intermittently cloudy and light to medium rains were received in Konkan, Madhya Maharashtra, Marathwada and in Vidarbha region.

Hailstorm occurred in parts of Jalgaon and Jalna districts. Simultaneously there was cold spell in second week of January in parts of the State except in Konkan region. Early sown rabi crops were affected by the rains received in January. There was cold spell in third and fourth week of January.

Rabi sowing was completed in the State and it was 97% of the normal. Weather was dry in first fortnight of February and it was cold in third week. Light rains with hailstorm were received in last week of February in Morshi, Warud, Chandur railway tahasils of Amarawati district and in Kalamb, Bahulgaon and Ralegaon tahasils of Yeotmal district. Weather was hot and dry in first week of March. In second week of March weather was intermittently cloudy and light to medium rains were received in parts of Nasik, Pune and Aurangabad divisions, Latur and Nanded districts and all districts of Vidarbha region. Hailstorm also occurred during this week in parts of Jalgaon district, Marathwada and Vidarbha region. Due to these unoccasional rains and hailstorm matured tur, rabi jowar, wheat, gram, safflower and fruit crops were damaged to some extent. Rains were received during 3rd and 4th week of March in Madhya Maharashtra, Marathwada and Vidarbha regions. Again rains were received in parts of Madhya Maharashtra on 4th, 10th to 12th, 19th, 29th and 30th April in Vidarbha region on 10th to 12th and on 27th April in Konkan region, on 28th April and in parts of Marathwada region on 30th April, 1995. Sowing of Summer crops was completed by end of April. Due to lack of adequate irrigation the sowing of Summer crops was below normal. However the condition of summer crops was satisfactory, except in drought prone areas of Marathwada region, preparatory tillage operations for kharif crops were in progress in some parts of the State.

## CHAPTER - II

### LAND UTILISATION

(Table 'II'-A', Page 48 to 49)

(Summary Table 'A' and 'A-I' Pages 8 to 9)

The number of villages in the State was 44,180 as against 44,021 during the preceeding year. This increase was due to formation of new villages.

#### Geographical Area :-

Geographical area in the State was 307.50 lakh hectares. It can be seen from Summary Table A-I that out of total Geographical area 180.53 lakh hectares was net

cropped area which showed a slight decrease of 0.7% as compared to the preceeding year. The total cropped area during the year under report was 213.58 lakh hectares as against 214.09 lakh hectares in the preceeding year. This decrease of 0.2 per cent was mainly due to decrease in area of kharif and Rabi Jowar. The area sown more than once increased by 2.6% i.e. from 32.21 lakh hectares to

33.05 lakh hectares during the year under report i.e. 1994-95.

The area under current fallows showed a decrease of 6.8% over the last year. Where as the area under other fallow showed a increase of 14.3% over the last year. Similarly the area under miscellaneous trees and grooves showed an increase of 2.5% over the preceeding year. The area under non-agricultural use, culturable waste

land and permanant pasture showed slight increase of 2.8%, 0.5% and 0.1% respectively. The area under forest remained practically the same i.e. 51.47 lakh ha. showing no changes compared to the preceeding year 1993-94.

The Summary Table A-I gives the district wise details of percentage area under each of the category under nine fold classification in each district of the State.

### CHAPTER - III IRRIGATED AREA

(Table III, Pages 50 to 65)

Summary Table "B" and "C" Pages 10 to 12)

Sources of water supply and area irrigated therefrom is presented in Summary table - B.

**Sources of irrigation :-** During the year under report the number of wells used for irrigation purpose (other than tube wells) increased by 2.9% having gone up from 11, 63, 674 to 11, 97, 408 in 1994-95. The number of wells used for domestic purpose showed a slight increase of 0.3% as compared to the preceeding year.

The number of oil engines showed a slight increase of 0.3% where as the number of electric pump sets increased by 6.0% having gone up from 9, 29, 189 to 9, 85, 399 during the year under report i.e. 1994-95.

**Source Wise Net and Gross Irrigated Area :-** During the year 1994-95, the percentage of net irrigated area to net area sown in the State was 15.38% which was 14.11% in the last year 1993-94. While that of gross irrigated area to gross area sown was 15.81% which was 14.71% during the preceeding year.

The net irrigated area by surface irrigation increased by 2.1% during the year under report as compared to the last year. Where as the net area, irrigated by wells increased by 12.0% as compared to the year 1993-94.

The gross irrigated area by surface irrigation increased by 2.7%. Where as the gross irrigated area by wells increased by 9.8% during year under report.

The total irrigated area under surface irrigation constituted 34.1% of the total irrigated area while total area irrigated by wells was 65.9% of the total irrigated area.

The crop wise irrigated area during 1994-95 is presented in Summary Table "C" alongwith the corresponding area in 1993-94. It can be seen that out of the total irrigated area of 33.77 lakh hectares in the State the irrigated area under food crops occupied a larger share of 29.72 lakh hectares or 88.1% while the remaining area of 4.05 lakh hectares or 11.9% under non-food crops.

The Table III-A gives districtwise information regarding number of wells, oil engines, electric pump sets and percentage of net irrigated area to net area sown and gross irrigated area to gross area sown, while Table III-B gives cropwise irrigated area and percentage of area irrigated by surface irrigation and by well irrigation in each district of the State.

### CHAPTER - IV CROPPED AREA

(Table IV-A, IV-B & IV-C pages 66 to 87)

Summary table "D, D-I, D-II & D-III " pages 13 to 21)

Gross cropped area, area cropped more than once, and area under various food and non-food crops are shown in Summary Table-D. From this table, it can be seen that the gross cropped area decreased very slightly

i.e. by 0.2% during the year under report as compared to the previous year i.e. 1993-94 having gone down from 214.09 lakh hectares to 213.58 lakh hectares. This decrease was mainly due to break in rains during third

week of June due to which sowing operations were held up. Rains received during first week of July continued for three weeks of July. Due to continuous and heavy rains transplanting of paddy and other kharif crops were held up and hence area under kharif crops mainly kharif jowar decreased. Similarly the net cropped area decreased from 181.88 lakh hectares to 180.53 lakh hectares i.e. 0.7%. The area cropped more than once however increased by 2.6% having gone up from 32.21 lakh hectares to 33.05 lakh hectares during the year under report.

During the year under report the area under food crops decreased by 1.9% while nonfood crops increased by 3.9% as compared to the year 1993-94.

This decrease in area of food crops was seen in cereals showing a decrease of 6.2% having gone down from 107.40 lakh hectares to 100.78 lakh hectares. The decrease was seen in rice 1.4%, jowar 11%, kodra 13.7%, vari 42.0%, banti 37.9%, other cereals by 33.5%, masur 16.8%, wal 18.8%, chawali 2.2%. Total condiments and spices decreased by 1.2%, whereas fruits increased by 6.2% and vegetables increased by 2.6 per cent.

In case of non food crops, the area under cotton increased by 11.7%. The area under edible oil seed decreased by 3.9%, while only rape and mustard seed and soybean increased by 18.4% and 14.8% respectively. This decrease was due to unoccasional rains and hailstorms which affected matured tur, rabi jowar, wheat, gram, safflower and fruit crops were damaged to some extent.

Area under summer crops was also brought under cultivation in Madhya Maharashtra, Marathwada and Vidarbha region due to rains received in 3rd and 4th week of March and rains received during April in Madhya Maharashtra and Konkan region.

Out of the total cropped area in the State, the percentage covered by certain categories of crops is indicated below:

Crop	Area	Percentage area to Total cropped area.
Rice	15552	7.3
Kh. Jowar	22721	10.6
Rabi Jowar	31999	15.0
Bajri	17787	8.3
Wheat	8013	3.8
Total cereals	100781	47.2
Gram	7507	3.5
Tur	10408	4.9
Total pulses	36008	16.9
Total foodgrains	136789	64.1
Ground nut	6159	2.9
Total Oilseeds	27312	12.8
Cotton	27715	13.0
Sugarcane	6365	3.0

Thus, it can be seen that out of the total cropped area in the State 64.1 per cent area was covered under food grain crops.

Rabi jowar and cotton covered comparatively larger area of 15.0 and 13.0 per cent to the total cropped area. The above categories put together covered about 91.2 per cent area to the total cropped area, while rest of the crops i.e. Condiments, Spices, Fruits, Vegetables, Drugs, Narcotics and Fodder crops etc. covered remaining 8.8 per cent area.

Table "D-I" gives districtwise percentage of area under principal food grain crops to total area under food grains in each district of Maharashtra State.

Table D-II shows cropwise percentage of area to total cropped area in each district of Maharashtra State.

Table "D-III" gives districtwise percentage of area under principal crops to State level area under corresponding crop.

Districtwise area under food and nonfood crops are presented in Table IV-A and IV-B respectively while Table IV-C gives seasonwise classification of area in each district of Maharashtra State.

## CHAPTER - V

### AVERAGE YIELD AND OUT TURN OF CROPS

(Table V-A & V-B, Pages 88 to 99)

Summary Table "E" & "F", Pages 22 to 23)

The over all seasonal condition during the year 1994-95 was not as favourable as the preceeding year. This was due to stress given by the rains in the month of

June though the Monsoon onset was in time. As a result the production of food grains showed a decrease of 14.3% having gone down from 135.44 lakh tonnes to

116.03 lakh tonnes during the year under report.

This decrease was mainly seen in rice, jowar, bajri, maize, ragi, gram, tur, mug, udid, kulthi and masur by 4.3%, 21.3%, 8.4%, 7.3%, 1.6%, 4.4%, 30.5%, 34.3%, 27.9%, 24.9% and 21.9% respectively.

This decrease was mainly due to continuous rains causing floods to the rivers in Kolhapur, Pune and Nagpur divisions, damaging crops on banks. Due to continuous rains and unavailability of wafasa condition the area under kharif crops decreased. In contrast to the heavy rains inadequate rains in Ahamadnagar, Solapur, Eastern parts of Pune, Satara, Sangli and parts of Jalna, Beed, Latur and Osmanabad districts sowing operation did not gather momentum.

The table below gives the contribution of various crops in the production of foodgrains during the year under report.

From the table, it can be seen that the major contribution to foodgrain crops comes from Kharif and Rabi-Jowar which accounts to 40.5% being the most important crop of the State, followed by Rice (Total) 20.7 per cent.

In case of Sugarcane, the production in term of cane also showed remarkable increase of 53.8% having gone up from 288.16 lakh tonnes to 443.16 lakh tonnes during the year 1994-95. This increase was mainly due to increase in area and productivity during the year 1994-95.

However in case of Cotton the production decreased

Crop	Outturn	Percentage outturn to total outturn of foodgrain crops.
Rice (Total)	24070	20.7
Bajri	11072	9.5
Ragi	1705	1.5
Kharif Jowar	31202	26.9
Rabi Jowar	15751	13.6
Wheat	11498	9.9
Other cereal crops	3909	3.4
Gram	4564	3.9
Tur	5119	4.4
Other pulse crops	7137	6.2
<b>Total</b>	<b>116027</b>	<b>100.0</b>

by 9.7% as compared to the preceeding year i.e. from 26.3 lakh bales to 23.7 lakh bales. This decrease in production was mainly due to untimely rains and hailstorms occurring in madhya Maharashtra, Marathwada and Vidarbha region.

The total oilseed production also decreased from 23.08 lakh tonnes to 17.87 lakh tonnes showing decrease of 22.6% as compared to the previous year. This decrease was mainly due to decrease in area and productivity of kharif Groundnut, Sesamum, Nigerseed, Safflower and Sunflower.

## CHAPTER - VI PRICES

(Table VI, Pages 100 to 103)  
(Summary Table "G", Page 24)

The State level average farm harvest prices of all the commodities during the year under this report 1994-95 were increased than those of the preceeding year i.e. 1993-94.

Increase in demand appears to be the main reason for these higher prices of the commodities.

However prices of Maize, Tur dal, Gram, Cotton, Groundnut, Caster seed and Sesamum showed remarkable increase in prices.

The scheme for monopoly purchase of Cotton was

continued in the State during the year 1994-95 and average monopoly purchase price of Cotton during the year was Rs. 947.50 per quintal as against the preceding year's price of Rupees 860.90.

The price of tobacco was reported only for one centre in Kolhapur district and was higher than that of the last year.

The State level farm harvest prices are given in Summary table "G" and districtwise prices are shown in Table VI for the year 1993-94 and 1994-95.

## CHAPTER - VII AGRICULTURAL WAGES

(Table VII, Pages 104 to 115)  
Summary Table "H" & "H-1", Pages 25 to 26)

According to the Revenue accounts Manual Agricultural labour is classified under three categories viz. Skilled labour, Field labour and Other agricultural labour.

Skilled labour comprises of carpenters, black smiths and cobblers while field labour includes ploughmen, sower, transplanter, weeders, reapers, harvesters and other agricultural labour includes load carrying hamals, well diggers, assistants of masons and carpenters, earth workers etc. One more category of labour viz. herdsmen whose main work is to take the livestock owned by different owners to the woodlands of forests for grazing is also included in Table VII on Agricultural Wages.

Main Table - VII, of the report gives districtwise & monthwise figures of average daily wages of different classes of agricultural labours. Summary Table "H" gives the State level information on wages in the different months during the year 1993-94 and 1994-95. Summary Table "H-1" gives Average daily wages paid to agricultural and skilled labours in each district of State for the year under report.

The Table below gives the daily wages of different types of labours at the State level for the two years i.e. 1993-94 and 1994-95.

### AGRICULTURAL WAGES (DAILY)

Year	Skilled labour			Field labour			Other Agril labour		
	Carpenter	Black smith	Cobbler	Male	Female	Children	Male	Female	Herdsmen
1993-94	49.32	46.10	39.43	28.25	20.83	14.78	27.24	20.07	24.85
1994-95	56.37	52.48	43.21	32.88	24.82	17.13	31.66	23.37	27.54

It is seen from the above table that wages for all the categories of labour during 1994-95 were higher than those of 1993-94.

## CHAPTER - VIII AGRICULTURAL STOCK

(Table VIII, Pages 116 to 129)  
(Summary Table "I", Pages 27 to 30)

Table VIII of this report gives the details of livestock, Poultry, agricultural machinery and implements as per quinquennial census of livestock and agricultural machinery conducted in 1992 by the Director, Directorate of animal Husbandry, Government of Maharashtra.

Summary Table - I gives total number of livestock poultry, agricultural machinery and implements at State level and the comment on the same are briefly given below.

**1. Cattle :** The number of cattle increased to 1,74,41,008 from 1,69,83,266 in 1992 showing an

increase of 2.7 per cent. This includes cross breed and indigenous cattle both of which the cross breed cattle showed an increase from 12,04,574 to 17,69,333 i.e. by 46.9% during the year 1992, where as the indigenous cattle decreased by 0.7%. The total cross breed male increased from 3,11,990 to 3,83,992 showing an increase of 23.1 per cent. Similarly cross breed cows showed an increase of 55.2 per cent from 8,92,584 to 13,85,341. The cross breed cows in milk showed an increase of 56.6 per cent.

**2. Buffaloes :** The total number of buffaloes recorded an increase of 14.6% during 1992 having gone upto

54,47,238 from 47,55,317 in 1987. The number of male buffaloes also increased from 8,83,130 in 1987 to 10,01,820 or by 13.4 percent. Similarly female buffaloes showed an increase of 14.8 per cent. The female buffaloes in milk showed an increase of 12.5% from 15,99,556 to 17,99,093 during the livestock census conducted in 1992.

**3. Sheep and Goats :** The number of sheep and goats increased by 7.0 per cent and 8.1 per cent respectively as compared to the corresponding number in the previous census during 1987.

**4. Horses and Ponies :** The total number of horses and ponies declined by 5.9 per cent during 1992 as compared to that in 1987. The number of mules, donkeys and pigs showed an increase of 6.2% and 11.9% respectively. Whereas the number of cammels decreased by 48.1 per cent.

The number of total livestock recorded an increase of 6.2 per cent during the year 1992 over that of the census

year 1987.

**5. Poultry :** The total number of poultry showed an increase of 29.6%.

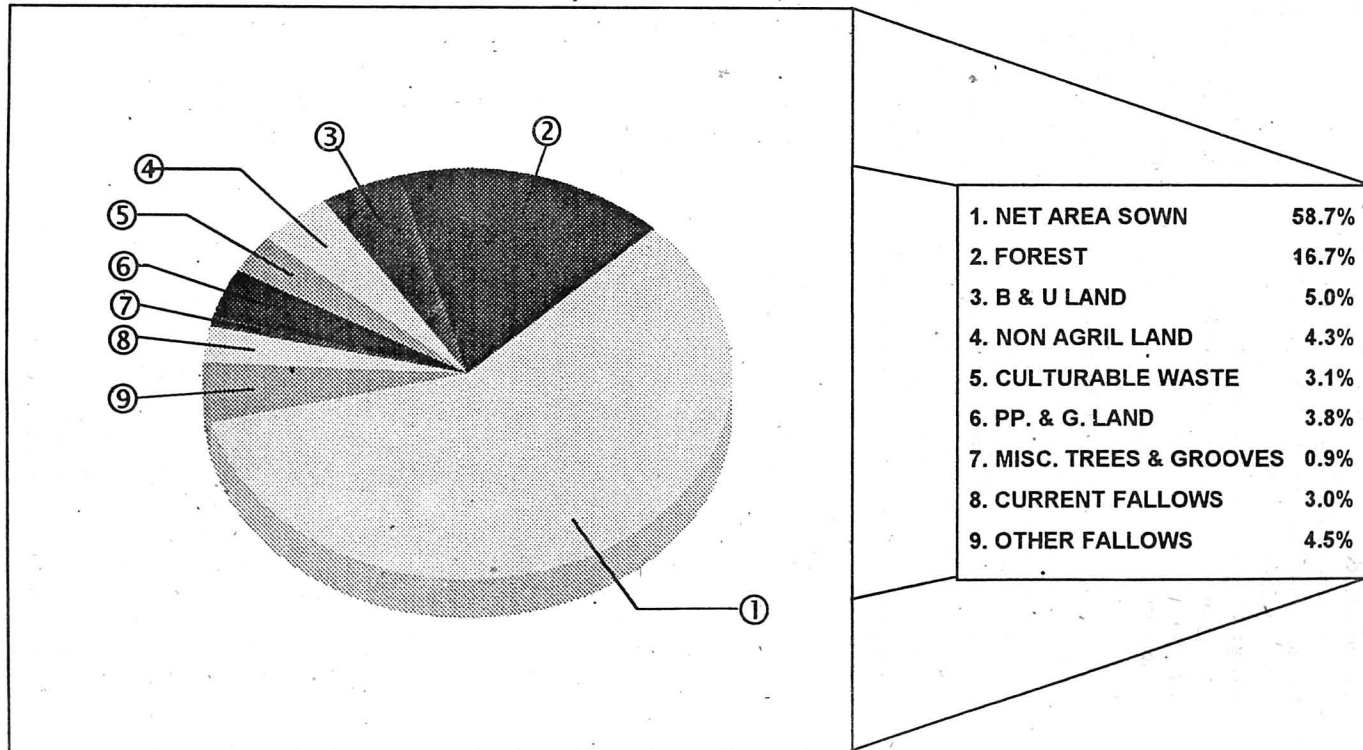

**6. Agricultural Machinery and Implements :** The number of tractors increased by 44.4 per cent so also the tractor operated implements increased by 32.1 per cent as compared to 1987.

There was an increase in Ghanis (both power and nonpower) by 48.8% over that of the previous census. The number of wooden and iron ploughs showed an increase of 5.6 per cent and 14.4 percent respectively.

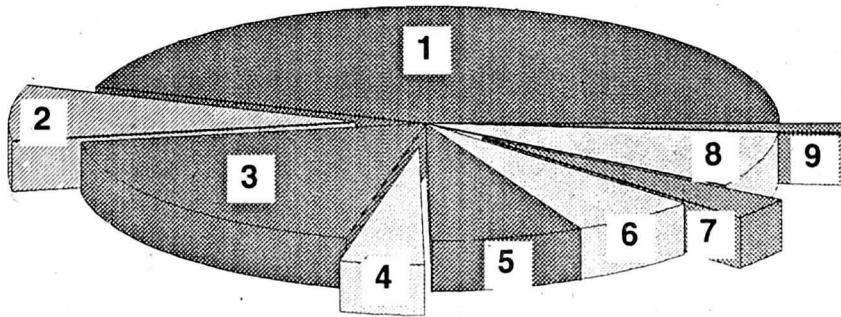

Sugarcane crusher showed an increase of 5.5 per cent while that of plant protection equipments increased by 48.2% and electrical pump sets used for irrigation purpose increased by 25.8 per cent as compared to the corresponding figures of the census year 1987.
