CHAPTER I. INTRODUCTION.

**1.1 LOCATION:** Kolaba District lies between  $17^{\circ} 52'$  and  $19^{\circ} 30'$  north latitude and  $73^{\circ} 7'$  and  $73^{\circ} 21'$  east longitude. It forms part of the Bombay Konkan strip, which lies between the Sahyadri in the east and the Arabian Sea in the West. The district has a coastline of about 240 Kms. It is full of mountains and valleys interspersed with low lands separated by creeks on the sea side.

**BOUNDARIES:** On the North, it is bounded by Thana District, on the South, by Ratnagiri District, on the East, by Poona District and on the West, by the Arabian Sea.

**TOPOGRAPHY:** The district can be broadly divided into three zones viz. 1) the coastal zone, 2) The Central zone and 3) the hilly tract. The coastal zone has apart from rice cultivation, plantation of coconut and betelnut. This zone comprises of Alibag Taluka and Uran, Murud and Shriwardhan Mahals and covers about 18.8 percent of the total area of the district. A notable feature of this zone is the fishing industry.

The Central zone comprises of Talukas of Parvel, Pen, Roha and Western portions of Mangaon and Mhasala and occupies nearly 1/3rd of the district area. The low lying areas of this zone are more fertile and are used for Rice cultivation. Ragi and Vari are grown on hill slopes. Vegetables are grown and exported to Bombay Market from the Northern part of this zone. This area provides excellent opportunities for Industrialization due to transport and communication facilities and availability of electricity.

The hilly tract consists of the Eastern Part on Karjat and Khalapur Talukas and North east corner of Mangaon, Mahad Talukas and Sudhagad and Poladpur Mahals. This zone has good forests and receives heavy rainfall.

SOIL:- The sub soil stratum consists of Deccan trap rock which is completely impervious to percolation. There is, therefore, no retention of water in the soil and the district suffers from an acute shortage of water although it receives rainfall varying between 2000 to 3500 mms. in different parts.

On the hill slopes there is reddish soil, which has best value as grass land. The tract of shell sands near the sea shore is suited for the growth of coconut and betelnut trees.

The red type of soil with <sup>mixture of</sup> ~~large~~ shell sands is suited for growing rice. The dark soil with little shell sands is suited for garden crops. The brown and brownish black soils are excellent for rice cultivation and are capable of producing second crop.

RIVERS:- The important rivers of the district are Ulhas, Patalganga and Amba in the Northern portion of the district and Kundalika in the Central portion and Savitri, Goda and Kal in the southern portion.

Most of the rivers are seasonal and are dry for six months in the year. High altitudes of Sahadris in the basins of Peta river in Karjat Taluka, Kundlika in Mangaon Taluka and Khopoli river in Khalapur Taluka have provided good sites for these hydro electric power generating stations, viz. Bhivpuri, Bhira and Khopoli.

HILLS:- The main system of hills is the Sahyadri and its offshoots. Besides there are numerous minor ranges which are irregular and have many offshoots. One well marked rugged range runs along almost the whole west of the district. Kankeshwar and Sagargad are the leading peaks of the Central Zone of this range. Between <sup>western</sup> belts of the hills and the Sahyadris another broken and irregular line centres at the great plateau of Mirya Donger, few miles south east from Pen.

**MINERALS:-** Kolaba District is endowed with resources of Industrial minerals like bauxite, iron ore (Laterite) and / Low grade roofing tiles potteries etc. Iron was being produced has clays suitable for manufacturing of bricks, low grade on cottage industry basis by smelting the ore with charcoal in Janjira, in Mirya hills and ghats adjoining to Mahableshwar. The laterite which caps the hills, has traces of ore and where charcoal has been burnt, dumps of clay resembling iron are also found. Building stone of good quality is found every where. Shell lime is burnt in small quantities but is reported to be not suited for masonry and is chiefly used for white washing. Rice field clay is abundant and is mostly used all over the district for preparing pottery and cheap bricks, large quantity of reddish earth is found in Rasani hills near Vadgaon in Alibag Taluka and it is exported to Bombay. Aluminium bauxite is found in Murud and Shriwardhan Mahals from where it is exported to foreign countries. The bauxite found in this region is rich in Aluminium metal.

1.2 ADMINISTRATIVE SET UP: For administrative purposes the district is divided in eight talukas and six mahals. The following table gives their names, the area, number of villages, no. of towns and 1961 population.

The Zilla Parishad has 48 directly elected councillors. Out of these 48 seats 1 seat is reserved for Scheduled Caste and four for scheduled tribes. In addition, a woman councillor has been coopted by the elected councillors. There are five associated councillors who are chairmen of five federal cooperative societies conducting business in the district. The elected Chairmen of the Panchayat Samitis are also ex-officio councillors.

At Block level the Panchayat Samiti consists of all elected and coopted councillors from the area of the Block, and a chairman of a cooperative society conducting the business of purchase or sale of Agricultural produce in the area of the block as an associated member, and a chairman of a cooperative society as coopted member. Two Sarpanchs of Village Panchayats from each Electoral Division are members of Panchayat Samiti.

The Zilla Parishad functions through a standing committee presided over by the President and six subject committees for Finance, works, Agriculture, cooperation, education and Health. Two subject committees viz. Finance and Agriculture are presided over by the vice President and the remaining four by two Chairmen elected by the Zilla Parishad. The Deputy Chief Executive Officer, works as Secretary to the standing Committee and also Zilla Parishad while the District Heads of Departments work as Secretaries of the Subject committees concerned. The standing committee includes the chairmen of all the subject committees as members. The Panchayat Samities do not have subject committees.

The District & Sessions Judge is the head of Judicial Department in the district. He allowed to Civil & criminal work. The judiciary is entirely separated from the executive. The Collector continues to be the District Magistrate and the Deputy Collectors and Mamlatdars are

/ Sub-Divisional Magistrates and Taluka Executive Magistrates respectively vested with the magisterial powers. / These powers are however limited to executive matters and trial of Chapter cases only and none of them ever tries any criminal case.

The Police force in the district works under the (District) Superintendent of Police who is assisted by one Deputy Superintendent and two Circle Police Inspectors and one head police inspector. There are 15 Police Stations and 35 Sub-Inspectors in the district.

As far as Kolaba District is concerned the area under Forests is under the control of 1) Kolaba Forest Division under the control of Divisional Forest Officer, Alibag and 2) Roha Sub-Division, under the control of the Sub Divisional Forest Officer, Roha.

Poladpur	As in 1951	486.9
	Minus: 20 Villages transferred to Mahad Taluka	-106.7
	Total	380.2

It would be seen that changes are within the district only and there were no cases of villages either being added to the district or transferred from the district.

1.4 CLIMATE: The rainy season starts from the first week of June and lasts upto end of September. It is followed by damp hot weather in October and November. The winter starts from December and lasts upto March. The dry hot weather exists from March to June. There are no appreciable variations in the temperature. The maximum being 37.5 centigrade in the month of May and 13.5 centigrade in the January. The reason is that the air is cooled by sea winds during hot months and by south west monsoon during the rainy seasons. Within the district the seasons show local variations also. In the talukas lying on the coast, the sun is seldom oppressive and the nights are cool but not cold and the temperature does not vary much from month to month. In the interior parts of the district, except for a few weeks in January and February, the days are hot and nights cold.

Monthly maximum and minimum temperature at Alibag centre in 1963 and 1964 is shown below:

Month	1963		1964	
	Maximum	Minimum	Maximum	Minimum
1. January	29.6	18.7	27.5	16.3
2. February	30.2	18.8	27.9	17.3
3. March	31.1	22.0	30.7	21.3
4. April	30.9	24.0	31.6	24.5
5. May	31.7	26.3	32.8	27.1

11. November	31.8	22.1	31.2	21.1
12. December	30.0	19.7	29.1	18.1

Rainfall is not uniform in all the parts of the district. It is heaviest in the regions near the main range of Sahyadris. Matheran gets on an average 5,900 mms. of rain per year. The rainfall increases as we go from West to East. The Western or the coastal zone receives 2,115 mms of rain, the central zone 2,000 mms and the eastern zone bordering the Sahyadris 3,000 mms. \*The bulk of the rainfall i.e. about 95% is received from the south west monsoon. The rainfall not only varies from taluka to taluka but also from month to month. The District receives about 95% of the rainfall during monsoon.

The rain-fall during January to May and November to December is practically negligible.

\* And the eastern zone bordering the sahyadris 3900 mms.

## Chapter II

### EXPLANATORY NOTE

#### Agriculture and Animal Husbandry:

Agriculture is the main occupation of the district. About 77% of the total working population in the district is engaged in Agriculture as against 70% in Maharashtra.

There are two agricultural seasons, viz Kharif and Rabi in the district. This district has almost negligible area under cultivation in Rabi season. Winter (Vaingan) rice, val and Kulchi are grown in rabi season. Main crop in the kharif season is paddy.

The net area sown in the district is only 31.9% of the total geographical area. This is due to the large proportions of barren, uncultivable, forest and fallow lands. The 'warkas lands' have to be left fallow for four to five years for accumulation of soil which is washed away by heavy rains.

#### Cropping pattern:

Cropping pattern of the district is typical of the Konkan Region crops like wheat, Jowar, Bajra, cotton, tobacco are absent and rice is the principal crop with 58% of gross cropped areas. Next in order of importance are Ragi, Vari and other cereals which together occupy 41.8% of the gross cropped area.

#### Coconuts

The total area under coconut was 758 hectares i.e. 0.32% of the total cropped area in 1963-64.

#### Irrigation:

The total area irrigated in the district in 1963-64 was 4,083 hectares this was only 1.76% of the gross cropped

cont..

Wells irrigated was the largest area i.e. 2032 hectares next to wells the Govt. canals irrigated 1699 hectares. The other sources irrigated only 352 hectares.

The total livestock in the district as per 1961 census was 5.70 lakhs as against 5.46 lakhs in 1956. The livestock increased by 6%.

There were 15 dispensaries and 25 aid centres in 1964-65. 41,176 animals were treated at these places in 1964-65.

#### Forests:

The area under forests is 24.18% of the total geographical area. The forests are mainly situated on the hills but they are spread over in the district from the sea-shore to the high hills.

The most valuable species found is teak. It is associated with Ain, Bhavada, Kinjal, Khair, etc.

Timber and fuel are the major forest products. In 1964-65 684000 cft of timber valued at Rs. 1,351 and 1249 thousand cft of fuel valued at Rs. 3,37,000 were produced. Other forest products consist of Bomboo, grass etc.

#### Fisheries:

Industry is a vital economic activity in the district. The district has a long coastal belt of 240 kms having 46 fishing villages.

The marine fishery predominates over inland water fishery.

Majority of the fish caught is transported to Bombay <sup>Facilities</sup> for cold storage and for preservation of fish are lacking in the district. However, construction of one ice factory at Alibage is almost completed and the machinery is yet to be installed.

1967 boats were engaged in fishing in 1964-65. There were 323 mechanised boats in district. The total marine fish production during the year 1964-65 was 26000 m. tonnes.

The quantity of fish brought for curing at the Murud fish curing yard during 1964-65 was 33.15 m. tonnes. The quantity of cured fish removed was 24.86 tonnes.

To cater the needs of the community engaged in fishing two fishery schools one at Alibagg and other at Karanja in Uran Taluka, have been established.

There were 26 fisheries co-operative societies in 1964-65 and they handled fish valued at 254 thousand <sup>Rs.</sup> during the same year.

#### Industries and Electricity:

Industrially the district is very backward. Lack of transport facilities and power have hindered its industrial development. However, with the completion of the Diva-Dasgaon railway line and availability of cheap power from Koyana and because of the proximity of an industrially advanced city like Bombay there is a vast scope for rapid industrial development in the district in the near future.

There were 78 factories working in the district at the end of the year 1964 and 4186 employees got job in these factories. These factories were engaged in the

production of food stone dressing, metal products repairs to motor vehicles, etc.

#### Small Scale and Cottage Industry:

The traditional crafts are conducted as household or cottage industries. They are mostly serving and processing industries catering for the requirement of the local population. Manufacture of salt, soap coarse Mill baard, nails pins, bricks, <sup>carpentry</sup> cane and bamboo works, fishing, leather works etc. are some of the important industries in the district.

#### Electricity:

The main sources of electricity supply is the Maharashtra State Electricity Board and the Tata Hydro Electric Company. The hydro-electric generating stations owned by the State are located at Khopoli, Bhivapuri and Bhira and their installed capacity is 24,17,760 thousand K.W.Hs. However bulk supply of power from these stations is consumed by the industries in Greater Bombay and neighbouring area. 11,99,950 thousand K.W.Hs. of electricity had been generated and 17691 thousand K.W.Hs. had been purchased. 4,10,225 thousand K.W.Hs had been sold during the year 1964-65.

Against 1790 inhabited villages and towns in the district the total no. of towns and villages electrified stood at 149 at the end of 1964-65 as against 121 at the end of the year 1963-64.

#### Co-operation:

Since the introduction of the Five Year Plans and with the emphasis on the rural development the co-operative movement in the district has advanced at a rapid pace.

contd.,..

The no. of co-operative societies of all types and their membership increased from 884 and 1,06,124 in 1963-64 to 912 and 1,17,412 in 1964-65 respectively. The increase in share capital and working capital was from 8,661 thousand and 37,479 thousand Rs. to 10,899 Rs. and 51,557 thousand Rs. during the same period respectively.

As agriculture is the most important activity there is rapid development in the type of co-operative societies connected with the agricultural activities. There were 528 Agricultural credit, Sewa and Multi Purpose Societies at the end of 1964-65 to finance the various agricultural operations. The other societies connected with this sector are Agricultural Marketing collective and Joint farming Agricultural processing, poultry, cattle breeding and Dairy Societies. To mention specially there were 16 rice mills at the end of the 1964-65. The Industrial processing and production societies in the district consist of oil gharies Neera and palmgut cane and bamboo production, bricks wearing, had panning, etc. There were 36 Forest labourers and 36 Labour contract societies.

#### Medical and Public Health :

There were 6 hospitals, 8 Maternity homes and 11 dispensaries functioning in the district at the end of the year. The hospitals are situated at (1) Alibag, (2) Matheran, (3) Nangach, (4) Murud, (5) Poladpur and (6) Pui in Roha taluka. The last two are leprosy hospitals.

The maternity homes stated above are attached to the dispensaries run by the state Government and the Zilla Parishad.

Table no. L-5 gives an upto date list of hospitals, dispensaries and the primary health centres.

18 Family planning centres listed in L-6 were functioning in the district.

There were 49 doctors and 65 nurses working in the above medical institutions at the end of the year 1964. The total beds provided were 680. In all 3,43,025 patients were treated out of which 6034 were in-door patients.

#### Drinking Water Supply:-

As per survey conducted by the Bureau of Economics and Statistics out of 1778 villages in the district there were 237 i.e. 33.3% villages without any drinking water source and 638 villages i.e. 30.6% were having inadequate water supply on 1st June 1964. The sources of hygienic water supply in district were as under on the same data.

(1)	Piped water supply	127
(2)	Wells	4,304
(3)	Conservation tanks	187
(4)	Tube wells	5

#### Education:

The literacy percentages are lower in the district as compared to the state percentages in case of male as well as female population. The literacy rates both for males and females have steadily increased during 1951 to 1961. There were 36.37% literate males in 1961, as against 29.40% in 1951. Similarly 13.40% in 1951. The percentage of literacy for total population increased from 19.20% in 1951 to 24.56% in 1961.

To wipe out the illiteracy the Zilla Parishad had established new schools and there was an increase in the no. of primary schools from 1513 in 1963-64 to 1572 in 1964-65. The enrolment showed an increase from 1,52,247 students to 1,68,737 students.

contd.....

The table No. L-7 indicates the list of high schools and Colleges in the district. It will be seen that the no. of high schools increased from 61 to 70. There were increase in the no. of students and teachers as well.

The two colleges are situated at Alibag and Mahad.

There is one Industrial Training Institute at Panvel.

Out of 1778 villages and 12 towns 1271 villages and 12 towns have primary schools and 507 villages are without schools at the year ending 1964-65. <sup>out</sup> of 507 villages without primary schools 300 villages come under the population range of 1 to 199, 156 in 200 to 399, 32 in 400-599, 18 in 600 to 1999 and 1 in above 2000 population range.

#### Transport and Communications:

The district is connected by roads with the adjoining district of Thana, Poona and Ratnagiri. The District Head quarter Alibag is also connected by roads with all the taluka head quarters. The eastern part of the district is hilly and roads are fewer in that part.

The Bombay-Poona-Bangalore National High way of 51.50 kms in length passes through Panvel and Khalapur talukas.

The total length of State highway was 295.02 kms. The Bombay-Konkan-Goa State High Way of about 153 Kms in length passes through Panvel, Pen, Roha, Mangan, Mahad and Poladpur Talukas. This is most important road in this district as it connects the various taluka places to Bombay i.e. the life line of the Konkan region.

contd....

This district has got the other type of roads such as Major District Roads, Other District Roads, Villages Roads, etc. with the length of 2103.55 Kms.

The total Kilometrage of roads increased from 2329.51 Kms. in 1963-64 to 2450.07 Kms in 1964-65.

The surface classification of these roads in Kms as on 31-3-1965 was as under

	Kms.
(1) Current Concrete	193.90
(2) Black Topped.	166.93
(3) Water Bound Macadam	773.77
(4) Granular Material and Lower type	1315.47
<u>Total:-</u>	<u>2450.07</u>

#### Railways:-

Fairly large portion of the district is not served by rail communications. The total railway kilometrage which was 22.81 on 31-3-1964 increased to 95.81 at the end of the year 1964-65. This was due to the opening of Diva-Panvel rail road for passenger traffic. There were 13 railway stations in the district.

#### Sea Routes:

The district has a coastal line at about 240 kms and there are no. of minor ports like Uran, Rewas, Mandwa, Dighi Dharamatar, Murud, Janjira, Shriwardhan, etc. The transport of passengers is carried out mainly by motor launches from Rewas and Uran. Cargo traffic is also handled by almost all the parts on the coastal line.

#### State Transport:

This district is a part of Thana Region. The no. of routes and operating fleet increased from 90 to 98 and from 66 to 72 respectively from 1963-64 and 1964-65. Average daily earnings registered are increase from Rs. 14,748 to Rs. 18,519.

### Post and Telegraph:

This district is a part of the Thana Postal Division. The no. of post offices and the telegraph offices increased from 195 to 197 and from 38 to 40 in 1963-64 and 1964-65 respectively.

### Local self Government:-

The units of local self Government are

(1) Zilla Parishad, (2) Panchayat Samities, (3) Village Panchayats and (4) Municipal councils. Some important features of these bodies are noted below:-

#### (1) Zilla Parishad:-

In all there are 48 directly elected councillors out of which one seat is reserved for Scheduled Casts and 4 for Scheduled Tribes. In addition a woman councillor has been co-opted by the elected councillors. There are five associate federal co-operative societies. The elected chairmen of the Panchayat Samities are also - ex - officio councillors.

#### (2) The Panchayat Samiti:-

It is a Block (taluka) level body which consists of elected and co-opted councillors from the block area and a Chairman of a sale and purchase Co-operative societies of Agricultural produce in the block area. The sarpanchas elected by members of village panchayat are the elected members. There are 14 Panchayat Samities.

#### (3) The Village Panchayats:-

There are in all 517 Village Panchayats and all the villages are covered.

#### Municipal Councils:-

Nine out of 12 towns in the district have municipalities. The three towns which have no municipal councils are  
contd.

(1) Heral and (2) Karjat in Karjat Taluka and (3) Revedanda in Alibag Taluka.

Plan and Community Development:

Plan:

The agencies implementing the district level plan schemes are the Zilla Parishad and the offices under state Government. In all there are 73 district level schemes implemented by these agencies with an revised outlay of 525.70 lakhs Rs. Out of these schemes 26 schemes were implemented by Zilla Parishad 42 by the State Sector and 5 by the agencies.

In addition to the district level schemes there are some divisional level schemes implemented by the Zilla Parishad and state sector.

As against the revised provision of 525.70 lakhs Rs. the total expenditure incurred on all the district level schemes was of 372.98 lakh Rs. during the period from 1-4-1961 to 31-3-1965 i.e. the first four years of the Third Five year Plan. The percentage of total expenditure to total provision and per capital expenditure comes to 70.94 and 35 Rs. respectively.

The following table gives the information regarding the plan provision (revised) and expenditure incurred under each head of development.

Prices:-

Weekly price of important commodities at the District Head quarters are being collected regularly. The study of average retail prices from January 1964 to December 1964 reveals the following trends.

The price of fine rice of Kolum variety were increased from 1.00 Rs. per kg. to 1.22 per kg. from January to November while that of medium type of Kolum variety increased from Rs. 0.94 to Rs. 1.12 in November and decreased to 0.71 in December 1964. The prices of coarse rice of Bhadas variety which were at Rs. 0.65 per Kg. increased to Rs. 0.98 in October and declined to Rs. 0.65 in November and December 1964. There was also steady increase in the prices of other cereals such as wheat, Jowar and Bajra during the same period.

There was a steep rise in the prices of all pulses. For example gram dal increased from prices of Rs. 0.82 to Rs. 1.75 that of arhar from Rs. 1.19 to Rs. 1.69 and moong from Rs. 1.00 to Rs. 1.44 per kg.

The other important commodity i.e. edible oil registered an increase from Rs. 2.12 to 2.75 per kg. while the price of varaspati rose from Rs. 3.12 to Rs. 4.13.

There are no significant price fluctuations in case of meat, fish and eggs.

There was an increase in the prices of dry chillies from Rs. 2.80 in January to Rs. 3.00 in April. This price remained constant upto the month of September and then started declining and registered a price of Rs. 2.25 per kg. in December 1964

There was also a rise in the prices of potato tubers. In the former case the price rise was from Rs. 0.63 to 1.00 per kg.

In keeping with the trends of other commodities prices of dhoti and sari also registered rise.

There were no significant changes in the price trends of other commodities such as fruits, beverages, washing soap, fuels, cosmetics, etc.
