## CHAPTER I

### I N T R O D U C T I O N

#### 1.1 Location:

Kolaba district lies between  $17^{\circ} 52'$  and  $19^{\circ} 30'$  north latitude and  $73^{\circ} 7'$  and  $73^{\circ} 2'$  East longitude. It forms part of the Bombay Konkan strip, which lies between the Sahyadri in the east end the Arabian Sea in the west. The District has a coast line of about 240 Kms. It is full of mountains and valleys interspersed with low lands separated by creeks on the sea side.

#### 1.2 Boundaries:

On the North it is bounded by Thana District, on the South by Ratnagiri District, on the East by Poona District and on the West by the Arabian Sea.

#### 1.3 Topography:

The District can be broadly divided into three zones viz 1) The Coastal zone 2) The central zone and 3) The hilly tract.

1.31 The coastal zone has apart from Rice cultivation, plantation of Coconut and betlenut. This zone comprises of Alibag, Uran, Murud and Shriwardhan Talukas and covers about 18 percent of the total area of the District. A notable feature of this zone is the fishing industry.

1.32 The Central zone comprises of Talukas of Panvel Pen, Roha and Western portions of Mangaon and Mhasala and occupies nearly  $\frac{1}{3}$  of the district area. The low lying areas of this zone are more fertile and are used for Rice Cultivation. Ragi and Vari are grown on hill slopes. Vegetables are grown and exported to Bombay.

1.33 The hilly tract consists of the Eastern part of Karjat and Khalapur Talukas, North east portions of Mangaon and Mahad Talukas, and Sudhagad and Poladpur Talukas. This zone has good forests and receives heavy rainfall.

#### 1.4 Soils:

The sub soils stratum consists of Deccan trap rock which is completely impervious to percolation. There is, therefore, no retention of water in the soil and the district suffers from an acute shortage of water although it receives rainfall varying between 2000 to 3500 mms. in different parts.

1.41 On the hill slopes there is reddish soil, which has best value as grass land. The tract of shell sands near the seashore is suited for the growth of Coconut and betelnut trees. The red type of soil with mixture of shell sands is suited for growing rice. The brown and brownish black soils are excellent for rice cultivation and are capable of producing second crop.

#### 1.5 Rivers:

The important rivers of the district are Ulhas, Patalganga and Amba, which flow through the Northern part of the District, Kundalika through the central part, and Savitri, Goda and Kal through the Southern part of the District.

1.51 Most of the rivers are seasonal and are dry for about six months in a year. Some of the rivers have provided good sites for hydro electric power generating stations, viz Bhivpuri, Bhira and Khopoli.

#### 1.6 Hills:

The main system of hills is the Sahyadri and its offshoots. Besides there are numerous minor ranges, which are

irregular and have many offshoots. One well marked rugged range runs along almost the whole west of the district. Kankeshwar and Sagargad are the leading peaks of the Central Zone of this range. Between western belt of the hills and the Sahyadries, another broken and irregular line centres at the great plateau of Mirya Donger few miles South East from Pen.

#### 1.7 Minerals:

Kolaba District is endowed with resources of industrial minerals like bauxite, iron ore (Laterite) and clays suitable for manufacturing of bricks, low grade roofing tiles, potteries etc. Iron was being produced on cottage industry basis by smelting the ore with charcoal. The laterite which caps the hills has traces of ore. Building stone of good quality is found every where. Shell lime is burnt in small quantities and is chiefly used for white washing. Rice field clay is mostly used all over the district for preparing pottery and cheap bricks. Large quantities of reddish earth, found in the hills of Alibag Taluka and are exported to Bombay. The bauxite mines are situated in Murud and Shriwardhan Talukas of the District. Bauxite is primarily used as a source of Aluminium.

#### 1.8 Climate:

The rainy season starts from the month of June and lasts upto the end of September. It is followed by hot weather in October. The winter starts from November and lasts upto February. The dry hot weather exists from March to May. There are no appreciable variations in the temperature. The maximum being 37.5 centigrade in the month of May and 23.5 centigrade in January. The reason is that the air is cooled by the sea winds during hot months and by south west monsoon

during rainy seasons. Within the district the seasons show local variations. In the Talukas lying on the coast, the Sun is seldom oppressive and the nights cool but not cold. The temperature does not vary much from ~~month~~ to month. In the interior parts of the district, except for a few weeks in January and February, the days are hot and nights cold.

1.9 Rainfall:

the  
Rainfall is not uniform in all parts of the district. It is heaviest in the region near the main range of Sahyadries. Mathdran gets on an average 5900 mms. of rain per year. The rainfall increases as we go from West to East. The western or the coastal Zone receives 2115 mms. of rain per year, the central Zone receives 3000 mms of rain per year, and the eastern zone bordering the Sahyadries received 3900 mms. of rain per year. The bulk of the rainfall i.e. about 95% is received from South west Monsoon between June to September. The rainfall in the remaining months is practically negligible.

1.10 Area:

The total Geographical area of the District is 7024.9 Sq. K.M. covering 1957 villages (1778 inhabited + 179 deserted) and 12 towns with a population of 10.5 lakhs as per 1961 Census.

1.11. Administrative Set up:

For Administrative purposes the district is divided in fourteen Talukas. The following table gives their names, the area, number of inhabited villages, no. of towns and population as per 1961 census.

Sr. No.	Name of the Area in Taluka	No. of inha- Sq. Kms. ted Villages.	No. of Popu- lation as Town., per 1961 Census		
1.	2.	3.	4.	5.	6.
1.	Karjat	625.5	170	3	87,288
2.	Panvel	557.6	177	1	1,15,378
3.	Uran	194.8	42	1	56,462
4.	Khalapur	406.1	140	-	53,376
5.	Alibag	507.4	172	2	1,24,274
6.	Pen	517.0	136	1	83,201
7.	Sudhagad	455.1	94	-	41,794
8.	Roha	669.0	154	1	79,648
9.	Murud	345.0	67	1	44,453
10.	Mangaon	954.7	231	-	1,24,370
11.	Shriwardham	270.9	78	1	54,821
12.	Mhasala	332.8	70	-	38,898
13.	Mahad	808.8	167	1	1,16,139
14.	Poladpur	380.2	80	-	38,753

1.12 After 1951 Census there were certain territorial changes within the district as detailed below.

1.13 10 Villages were transferred from Roha Taluka to Sudhagad 5 Villages from Mhasala to Mangaon Taluka 20 Villages from Polapur Mahal to Mahad Taluka. All the above changes were within the district and there were no cases of villages either being added to the District or transferred from the district.

1.14 <sup>a</sup> With/view to promote development of democratic institutions and to secure greater measure of participation by people in Development plans and in local and Government

affairs by decentralization of powers one Zilla Parishad and 14 Panchayat Samities have been established in the District in the year 1962. The areas under the Zilla Parishad and the Panchayat Samities correspond to the District and Taluka boundaries respectively except in case of Municipal towns which are not covered by them. 1) Karjat, 2) Neral and 3) Revdanda are the 3 towns, which do not have municipal councils, are under the jurisdiction of the Zilla Parishad. The Zilla Parishad covers about 98-8% of the area and 91.62 % of the total population of the District. The population covered by the Zilla Parishad includes all Rural Population and about 16 % of the Urban Population.

1.15 The Zilla Parishad has 48 directly elected Councillors. Out of these 48 seats, one seat is reserved for Scheduled Castes and 4 for scheduled Tribes. In addition a woman councillor is coopted by the elected councillors. Chairmen of Five Cooperative societies conducting business in the district, are also councillors. The elected chairmen of the Panchayat Samities are also ex officio Councillors.

1.16 The Zilla Parishad functions through a Standing Committee presided over by the President and six Subject Committees for Finance, Works, Agriculture, Co-operation, education and Health. Two subject committees viz Finance and Agriculture are presided over by the Vice President and the remaining four by two chairmen elected by the Zilla Parishad. The Deputy Chief Executive Officer works as Secretary to the Standing Committee, and also Zilla Parishad, while the Dist. Heads of Departments work as Secretaries to the Subject Committees concerned.

1.17 Nine out of 12 towns in the District have Municipal Councils. They : are as under :

1. Matheran, 2. Panvel, 3. Uran, 4. Alibag,
5. Roha (Ashtami), 6. Pen, 7. Murud, 8. Mahad,
9. Shriwardhan.

## CHAPTER II

### Explanatory Notes.

#### POPULATION:

The population of Kolaba District as per 1961 Census, is 10,58,855. This is 2.7 % of the population of Maharashtra State. The Urban population of the District is 1,06,681 which is 10.08 % of the District population as against 28.22 % Urban population in the State. The Rural population is 9,52,174, and is 89.92% of the District population, as against 71.78% of the rural population in the State. The population rise in the decade 1951 to 1961 is 16.48%

The density of the population in the district works out to 151 per sq. km. as compared to the density of 130 persons per sq. km. in the State. The density of rural population is 137 per sq. km. which in urban area it is 996 per sq. km.

The sex ratio in Kolaba District is 1058 females per 1000 males. In urban area it is 945 females per 1000 males, which in rural areas it is 1052 females per 1000 males.

As per 1961 census, there were 4.95 lakh workers (46.6% of the total population) and 5.63 lakh non-workers (53.4% of the total population). Out of 4.95 lakh workers, 4.59 lakh workers were in rural area and only about 36 thousand in urban area.

There were 13,887 scheduled castes persons in the district as per 1961 census. Out of the above only 2415 resided in urban areas and the rest in rural areas. Similarly scheduled Tribes population as per 1961 census was 95,354. Out of this 93,613 were in rural areas and the remaining 1741 in urban areas.

#### AGRICULTURE:

Agriculture is the main occupation of the District. About 77% of the total working population in the district is engaged in Agriculture as against 70% in the State.

There are two agricultural seasons in the District viz Kharif and Rabi. The district has almost negligible area under cultivation in Rabi season. Winter Rice, Val and Kulith, are grown in Rabi season. Main crop in the Kharif season is paddy. The area under paddy is 1.35 lakh hectares, which is 51.9% of net cropped area.

The net area sown during 64.- 65 in the district is 2.2 lakh hectares, which is 22. % of the total geographical area. This is due to the large proportions of barren, uncultivate, forest and fallow lands. The warkas lands have to be left fallow for 4 to 5 years for accumulation of soil which is washed away by heavy rains.

The cropping pattern of the district is typical of the Konkan region. Crops like wheat, Jowar, Bajara, Cotton, etc. are absent and Rice is the principal crop with about 58% of the gross cropped area. Next in order of importance are Ragi, vari and other cereals, which together occupy about 42% of the gross cropped area. Additional area of 76 hectares has been brought under Rice during the period 1961-62 to 1964-65. The increase in net area sown during this period was 5.6 thousand hectares. The double cropped area increased by 1302 acres.

As regards the area under betle nut, cash crop of the Konkan tract the area increased by 400 hectares, and under coconut by 7 hectares. Through Agricultural Department, under plan schemes about 41 thousand fruit trees were planted in the District. They included mainly mango, coconut, cashewnut etc.

As far as irrigation is concerned, the District lags behind.- At present irrigated tract under Rajnala lies in Karjat.

During third Plan the work of Kal Project has started and after its completion it would bring another 12450 hectares under irrigation in Mangaon and Roha Talukas. The total area irrigated by all sources was only about 2% of the Gross cropped area. The Zilla Parishad have recently taken up construction of Vasant Bandharas to bring more area under irrigation.

#### FOREST:

Forests occupy about 24% of the total geographical area. The forests are mainly situated on the hills, but they are also spread over in the district from the sea shore to the high hills.

The most Valuable species found in the district is teak. It is associated with Ain, Bhavada, Kinjal, Khair etc. Timber and fuel are the major forest products, during 1965-66 was 25.44 Lakh. Rs.

#### FISHERIES:

Fishing is a vital economic activity in Kolaba District. The District has a long coastal belt of 240 Km. having 46 fishing villages. The marine fishery predominates over inland water fishery. Majority of the fish caught is transported to Bombay as there is no local market. Sofar there were no storing and preserving facilities in the District. During the IV Plan an ice factory has been constructed at Alibag.

1967 boats were engaged in fishing in 1965-66, out of which 323 mechanised. The total fish production was 0.29 lakh tonnes. There is fish curing yard at Murud. The fish cured in this yard during 1965-66 was 36 M. tonnes.

Two fishery schools are run in the District. One is at Alibag and the other at Karjanja in Uran.

INDUSTRIES:

Industrially the District is backward. Lack of transport facilities and power have hindered its industrial development. However with the completion of the Diva-Dasgaon line and availability of cheap power from Koyna and due to proximity of a city like Bombay, there is a vast scope for rapid industrial development in the District near future.

There were 70 factories in the District at the end of the year 1964-65 and 4186 persons were working in these factories

( continued on the next page)

### ELECTRICITY:

THE main source of Electric Supply in the District is Maharashtra State Electricity Board. There are 3 hydro electric generating stations at Khopoli, Bhivapuri and Bhira. Their installed capacity is 24,17,760 thousand KWHs. Bulk supply of power from these stations is consumed by industries in Greater Bombay and neighbouring area.

Out of 1789 inhabited villages and towns in the Dist. 249 have been electrified upto the end of 1965-66

### CO COPERATION:

Since the introduction of the Five year plans and with the emphasis on the rural Development, the co-operative movement in the District has advanced at a rapid pace.

The number of co-operative Societies of all types and their membership increased from 747 and 83,114 in 1961-62 to 961 1,31,785 in 1965-66. The increase in share capital and working capital was from Rs. 55 lakhs and 249.68 lakhs in 1961-62 to 93.89 lakhs and 590.24 lakhs in 1965-66.

As agriculture is the most important activity in the district, there is rapid development in the type of Societies connected with agricultural activities. In 1965-66, there were 528 agricultural credit, Seva, or Multipurpose societies. A special mention could be made of 26 cooperative Rice mills. There were 26 fishry co-operative societies. The role played by jungle Kangar Societies is also significant. Recently stress has also been laid on cooperative poultry and cooperative Dairy Societies.

### MEDICAL AND PUBLIC HEALTH:

13 Primary health centres and a cottage hospital at Mangaon have been started during the period 1961-62 to 1965-66.

Table L-1 gives names of the hospitals, dispensaries and primary health centres. An extension to the present building of the Civil Hospital was constructed, resulting in increase the heddded capacity from 28 to 40. An X - Ray machine, which was a due necessity to the Hospital, was also added. The operation theatre was equipped with necessary amenities.

It would be seen that though the no. of hospitals etc. has not chaged much, the no. of beds increased. Similarly the no of patients treated also increased. This year private aided hospital at Pajvel has been added in the Table.

The family planning programme was carried out through the centres in the District.

The no. of beds in 1961-62 was 620, which increased to 706 in 1965-66. There was reduction in number of births during the period under review. In 1961-62 33.64 births were registered per 1000 population the corresponding figure for 1965-66 was 22.56 births per thousand.

#### EDUCATION:

The percentage of literacy in the district is lower as compared to the State as per 1961 census. The growth of literacy during 1951-50 1961 has shown upward trend. There were 19.20% literates in 1951, it increased to 24.56 % in 1961. As per 1961 Census 36.37% of the total male population was literate, in the case of female population the perzentage of literacy was only 13.40%. The growth of literacy in urban areas was much higher than that of rural areas.

A special drive has been initiated by the Education Dept. of Kolaba Zilla Parishad to wipe out, illiteracy.

The no. of primary schools increased from 1408 in 1961-62 to 1586 in 1965-66. (12% increase). Similarly the no. of Secondary schools increased from 41 to 77 (87% increased). Consequently the no. of schools serving children increased by 24% in primary section and 54 % in Secondary Section.

As regards higher education there were two colleges in the District, one at Alibag and the other at Mahad.

#### COMMUNICATIONS:

Fairly large portion of the district is not served by the rail communications. The railway lines exist in Karjat, Panvel & Khalapur Uran/Talukas. Recently the work of Diva Panvel line was completed. Passenger Traffic started in December 1964. In addition to the rail lines have been constructed between above Panvel-Apta, and Panvel-Uran Panvel Uran line is 27 KM. and Panvel apta is 16 KM. These lines are not yet open for passenger traffic. The Diva Panvel line is to be extended upto Dasgaon in Mahad Taluka.

The Road Communications in the District are better. Every Taluka Head Quarter is connected by Road with district H.Q. The Bombay-Poona-Banglore National Highway passes through Panvel and Khalapur Talukas. The Bombay Konkan Goa State High way passes through the District.

The work of Mandava port has been started. The work of construction of Jetties at some minor ports was also in progress. The passenger traffic by Sea between Bombay -Rawas is very large as it is the shortest route as compared to route by land.

#### STATE TRANSPORT:

Uptil now Kolaba District was part of Thane Division. Recently separate division has been opened for Kolaba District with Head Quarter at Pen.

### CHAPTER III

#### REVIEW OF THE SECTORIAL TRENDS.

Agriculture is the main occupation of the District. About 77% of the total working population is engaged in Agriculture as against 70% in the State. The contribution of State income of Maharashtra by Agriculture is little more than <sup>ONE</sup> third of the total income. The pattern of Agricultural economy in the District which is a part of Konkan Tract, is different from the rest of the part of the State. Cropping pattern of the district is also typical of the Konkan region. Jowar, Bajara, Cotton, Tobacco etc are not at all grown in the district. However attempts are being made to grow wheat wherever possible in the district. Rice is the principal crop, occupying 58% <sup>of</sup> the Gross cropped area. Ragi and other pulses occupy about 41% of the cropped area.

The net area under crops in 1960-61 was 2.18 lakh hectares which was 31.5% of the total Geographical area. The double cropped area has increased from 12256 hectares to 13637 hectares i.e. by about 11%. The gross irrigated <sup>area</sup> in 1961-62 was 3855 hectares which increased to 4368 hectares i.e. by about 13%. The notable increase of irrigated tract is under Rajnala in Karjat Taluka. The same taluka also accounts for taking of two crops of rice in a /Kal Project the irrigation potential of year. After the completion of the /district is likely to increase considerably. Roha and Mangaon Talukas will be mainly benefitted. At present the irrigation facilities exist in only 2% of the gross cropped area.

The District has a considerable <sup>area</sup> under Khar lands. Out of about 70,000 acres of Khar land, so far about 15,000 <sup>acres</sup> have been reclaimed by construction of bunds, etc. Recently, from 1963-4 programme of terracing of land under hill slopes has also been undertaken. So far about 2,000 acres of land have been brought under this programme.

The production of Coconut and arecanut is restricted mainly to coastal talukas, viz Alibag, Murud, Shriwardhan. The vegetable and fruit growing area lies mainly in Panvel, Karjat, Khalapur, Pen, Alibag Talukas. The vegetables produced in the district are mainly exported to Bombay market.

The total rice production in Kolaba District in 1961-62 was 2042 M.tonnes. It reduced to 1850 in 1964-65. In Maharashtra State, Kolaba district is a rice producing tract and stands very high as far as rice production is concerned. The following table gives Talukawise area <sup>under rice</sup> and percentage distribution during 1964-65.

Sr.No.	Name of the Taluka	Area in Hectares	Percentage distributio
1.	Karjat	13,088	9.69
2.	Panvel	15,947	11.81
3.	Uran	6,698	4.96
4.	Khalapur	7,620	5.64
5.	Alibag	17,341	12.84
6.	Pen	13,588	10.06
7.	Sudhagad	5,122	3.79
8.	Roha	11,893	8.81
9.	Murud	4,294	3.18
10.	Mangaon	15,818	11.72
11.	Shriwardhan	3,997	2.96
12.	Mhasala	3,535	2.62
13.	Mahad	12,512	9.27
14.	Poladpur	3,577	2.65
Total		1,35,030	100.00

The table on next page presents the changes in cropping pattern in 1960-61 i.e end of the Second Plan. and 1964-65.

(area in hectares)						
Sr. No.	crop	Area under the crop 1961-61	% to total gross cropped area 1960-61	Area under the crop 1964-65	% to total gross cropped area 1964-65	% Increase (+) or Decrease (-) over 1960-61
1.	2.	3.	4.	5.	6.	7.
1.	Rice	1,34,234	57.78	1,35,030	57.77	(-) 0.01
2.	Ragi	18,283	7.87	18,533	7.93	(+) 0.06
3.	Total Cereals	1,63,099	70.21	1,64,748	70.46	(+) 0.25
4.	Total pulses	11,221	4.83	11,971	5.12	(+) 0.29
5.	Fruits and Vegetables	2,036	0.88	2,386	1.02	(+) 0.14
6.	Total food Crops	1,77,559	76.43	1,80,212	77.08	(+) 0.65
7.	Coconut	756	0.32	762	0.33	(+) 0.01
8.	Total Non-Food crops	54,754	23.57	53,598	22.92	(-) 0.65
9.	Total gross cropped area	2,32,313	100.00	2,33,810	100.00	--

It will be clear from the above table that except area under rice and non-food crops area under the other crops has increased.

As regards the cropping pattern of irrigated crops the following table shows the area irrigated under various crops and increase or decrease in irrigated area of the year 1964-65 over 1960-61.

(Area in hectares)				
Sr. No.	Crop	Area under the crop 1960-61	Area under the crop 1964-65	Percentage Increase (+) or Decrease (-) over 1960-61
1.	2.	3.	4.	5.
1.	Rice	991	1913	(+) 93
2.	Total Cereals	991	1913	(+) 93
3.	Total Pulses	--	--	
4.	Total food crops	2129	3338	(+) 57
5.	Total non-food	1223	1030	(-) 16
6.	Total Gross irrigated area	3352	4368	(+) 30

From the above figures it becomes clear that the percentage increase of area under rice is very high. As stated previously it is mainly due to the completion of Rajanala scheme

The co-operative movement is increasing at a rapid pace in this district. The following table gives the position of co-operative societies in 1960-61 and 1965-66.

(working capital in ' 000 Rs.)

Type of Society	1960-61			1965-66		
	No.	Member	Working Capital.	No.	Member	Working Capital.
1.	2.	3.	4.	5.	6.	7.
1. Central Bank	1	727	285	1	1,074	22,394
2. Land Development Bank.	-	-	--	1	3,614	828
3. Agricultural Credit & M.P.	459	48,809	5,600	560	83,740	15,596
4. Non-Agricultural credit	23	10,229	4,703	32	12,849	7,638
5. Agricultural Non-credit	58	5,760	754	130	15,808	7,289
6. Non-Agricultural Non-credit	157	9,490	1,185	237	12,557	4,389
<b>Total</b>	<b>692</b>	<b>78,015</b>	<b>12,527</b>	<b>961</b>	<b>1,29,642</b>	<b>58,134</b>

The loans advanced by the Agricultural credit and M.P. societies were 4,569 thousand Rs. In 1965-66 the advances of these societies increased to 9,618 thousand Rs. i.e. 110% increase over the last year of the Second Plan. In 1960-61, 4,516 thousand Rs. were outstanding. <sup>As</sup> against this the outstanding in 1965-66 were 11,611 thousand Rs. The amount of overdues of Agricultural credit and M.P. societies increased from 907 thousand Rs. to 4,758 thousand Rs.

4. Table No. 3.8 in the Abstract part gives data regarding the agricultural wage rates at three centres viz. 1) Neral, 2) Nagothana,<sup>and</sup> 3) Borli Panchatan in Karjat, Roha and Shriwardhan Talukas respectively. This table shows that the average wages paid to Black Smith at Nagothana centre were the highest i.e. <sup>Rs.</sup> 5.83 in 1966 whereas the lowest rate paid to <sup>these</sup> labourers was <sup>of</sup> Rs. 3.12 at Borli Panchatan centre in the same year. The wage rate paid to carpenters <sup>at Neral</sup> was rather high i.e. Rs. 5.50 as compared to the rates paid at the other two centres. There is no much difference in the wages paid to the unskilled labour at these centres.
5. The livestock population as per 1956 census was 5.46 lakhs. It increased to 5.70 lakhs in 1961. However there has been a slight decrease in the live stock wealth. It stood at 5.68 lakhs as per 1966 census. The net cropped area per pair of bullock was 2.72 hectares.
6. The poultry birds as per 1961 census were 5.87 lakhs. It increased to 6.81 lakhs in 1966. The increase in poultry during the five years was about 16%.
7. As far as industrial growth is concerned, there has been a substantial increase in Panvel, Khalapur,<sup>&</sup> Uran Talukas. At Khoroli in Khalapur Taluka, most of the heavy industries are concentrated due to availability of cheap power, water facilities and vicinity to Bombay and Poona. The average daily employment was 2,943 in 1961-62. It rose to 4,673 in 1965-66.
8. Consumption of electricity is considered as the indicator of industrial progress. In terms of per capita consumption of electricity the year 1965-66 recorded growth of about 45% over the consumption in 1960-61. The per capita consumption during the year 1960-61 and 1964-66 was 7.55 and 34.41 KWA respectively.

As stated in the above para rapid industrial progress in Panvel and Khalapur talukas can be attributed to this increase in consumption of electricity.

9. No. of registrations and vacancies in Employment Exchange/were in 1960 4028 and 893/ respectively. The same increased to 4713 and 1143 in 1965-66.

10. With the increase in the number of primary schools, the number of school going children increased from 1.41 lakhs to 1.75 lakh. In the Secondary Schools the number of students increase from 11,770 students to 18,214 students. There has been a similar rise in College going student population. It increased from 261 in 1961-62 to 589 in 1965-66.

11. The Beded capacity during 1961-66 increased from 620 to 706. The number of outdoor patients treated shown increase. It was 2.70 lakhs in 1961-62 and 4.24 lakhs in 1965-66. The number of indoor patients treated in 1961-62 was 5,997. It rose to 25,630 in 1965-66.

12. The total road length in the District was 1710 km. in 1961-62. It increased to 2517 in 1965-66. The length of road per 1000 sq. km. in 1961-62 was 245. It increased to 353 in 1965-66. Panvel, Pen Khalapur, Mahad and Alibag are some of the Talukas where road facilities are more.

The banking offices in Kolaba District were only 19 in 1961-62. The number increased to 33 in 1965-66. Every Taluka Head Quarter has a banking facility.

## CHAPTER IV

### Third Five Year Plan

4.1 The third Five Year Plan was aimed at building up of an Agric-Industrial Society. Its object was to remove the imbalances that existed in different parts of the State. In order to achieve this end schemewise details even at the District level were worked out, and agencies were fixed. The Panchayat Raj institutions were started during the Third Plan period. Investment of time, effort and money on local development plans can not yield the expected results, unless the people primarily affected are fully involved through their representative institutions, in formulating and implementing plans for their welfare.

4.2 There were 70 District level schemes implemented during the Third Five Year Plan in Kolaba District. The following table gives sub head wise expenditure incurred during the third plan period.

<u>Main Head/Sub Head</u>	<u>Expenditure in Rs.(Lakhs)</u>
<u>I      <u>Agricultural Programme:</u></u>	
Agricultural Production	40.18
Soil Conservation	45.20
Minor Irrigation	10.46
Animal Husbandry	2.05
Dairy Development	2.45
Forests	6.93
Fisheries	57.14
Ware Housing & Marketing	2.38
Total Agricultural Programme:	<u>166.79</u>

II.	<u>Co-Operation and Community Development:</u>	
	Co-operation	25.36
	Community Development	119.59
	Total Co-op. and C.D.	<u>144.95</u>
III.	<u>Irrigation and Power:</u>	Nil
IV.	<u>Industries and Mining:</u>	2.14
V.	<u>Transport and Communications:</u>	
	Road Development	69.43
	Ports and Harbours	6.01
	Inland Water Ways	0.03
	Total Transport & Communication	<u>75.47</u>
VI.	<u>Social Services:</u>	
	General Education	58.92
	Technical Education	--
	Medical and Nursing	0.63
	Public Health	24.70
	Water Supply and Drainage	67.15
	Housing	9.59
	Social Welfare	0.45
	Labour and Labour welfare	5.49
	Total Social Service:	<u>166.93</u>
VII.	<u>Miscellaneous:</u>	Nil
	<u>GRAND TOTAL:</u>	<u>556.28</u>

4.3 It may be pointed out here that an expenditure of Rs. 556.28 lakhs was incurred against a provision of Rs. 515.93 lakhs in this district during III Five Year Plan ~~on~~ District level Schemes. The expenditure was 107.82% of the Plan outlay.

4.4 Out of Rs. 556.28 lakhs spent during the Plan Rs. 166.93 lakhs (30 % of the total expenditure ) was under Major Head Social Services. Even under this main head the highest expenditure was <sup>on</sup> Water Supply and drainage schemes amounting to Rs. 67.15 lakhs. Then next in order was under General education totalling to Rs. 58.92 lakhs. The next in order under main Head, under which the expenditure was almost equal to Social Services, was Agricultural Programme. Under Agril. Programme the total expenditure was the order of Rs. 166.79 lakhs. (30 % of the total expenditure). Under the main Head the expenditure under schemes of Fisheries Dept. was the highest i.e Rs. 57.14 lakhs. This was followed by Soil Conservation, which accounted for Rs. 45.20 lakhs. The next in order was Agril Production which registered an expenditure of Rs. 40.18 lakhs.

4.5 The expenditure under Main Head Co-operation and C.D. was third in order amounting to Rs. 144.95 lakhs ( 26 % of the total expenditure ). Under this main head the major share was on the schemes pertaining to Community Development amounting to Rs. 119.59 lakhs. The expenditure under major head Transport and Communications was only 75.47 lakhs ( about 14 % of the total expenditure. ) The major portion under this main head was for the schemes pertaining to Road Devp.

4.6 The expenditure under main head Industries and Mining was negligible i.e only Rs. 2.14 lakhs (0.38 % of the total expenditure). There were no District level schemes in this District under Irrigation and Power. The following table in short gives an Abstract showing expenditure under Various heads.

Sr. No.	Head of Development	Exp. in lakhs.	% to the total Exp.
1.	2.	3.	4.
1.	Agricultural Development	166.79	29.98
2.	Co-operation of Community Development	144.95	26.06
3.	Industry and Mining	2.14	0.38
4.	Transport and Communication	75.47	13.57
5.	Social Services	166.93	30.01
	Grand Total	556.28	100.00

4.7  
Agriculture:

Cropping Pattern of the District is typical of the Konkan Region. Crops like Wheat, Jowar, Bajra Cotton etc. are absent. Rice is the principal Crop of the District, The area under Rice increased during the Plan period from 1.34 lakhs of hectares to 1.36 lakhs of hectares. Efforts were also made to bring more and more area under improved variety. 14,524 quintals of paddy seed was distributed during the Plan period. Improved varieties of paddy for this district are Kolamba 42, Kolamba 540, Bhadas 1303 and Early Kolapi 70-

4.8 As regards Horticultural Development in the Dist. there were schemes under III Five Year Plan and a good start had been made in this regard. About 41,000 fruit trees such as mango, coconut, Cashew nut etc. were planted. Rs. 7.55 lakhs

were given a loan to the cultivators for plantation of mango, Arecanut, Coconut, Banana etc.

4.9 During the Plan period the Kolaba Zilla Parishad had undertaken Summer and Rabi campaign with the help of the Government under this scheme they purchased 45 oil engines and 72 Electric Motor pumps from the funds placed at their disposal by the Government. These were given on hire to cultivators on a nominal rent of Rs. 1/- per day. In addition to the above the Zilla Parishad and the Panchayat Samities purchased 50 oil engines and 3 High Power Electric Motors for bringing additional area under double crop. Due to various efforts made during the Plan the double cropped area increased from 11,600 hectares to 11,700 hectares.

4.10 Schemes to reclaim Khar and Khajan lands in the District were in progress during the III five year plan. 5,354 hectares of Khar land was reclaimed during the plan period. This scheme is meant to make the lands fit for paddy cultivation.

4.11 Efforts were made to convert lands on hill slopes in heavy rain fall areas into paddy fields by means of terracing. The area thus brought was 1,864 hectares.

#### 4.12 Irrigation:

The main source of irrigation in the District is wells. The total area irrigated is 3,819 hectares. out of the above, the area irrigated by canals is 1,897 hectares. The area irrigated is 1.4% of the gross cropped area. To increase the irrigation facilities in the District the work of Kal Project has been undertaken during the Third Five Year Plan period.

The project is likely to be completed in 1970-71. The Gross area con-manded under this project would be 12,450 hectares. The Talukas, which would be benifitted by the Project, are Mangaon and Roha.

#### 4.13 Fishery:

The District has a coast line of 240 Km. Fishing is a predominant occupation in the coastal Talukas of the Dist. There are 46 Marine fishing Villages in the District. During 1965-66 the fish netted was 1,25,818 Kg. For preserving the fish cought, an Ice factory has been constructed at Alibag.

#### 4.14 Forest:

The area under Forests was 1.65 lakh hectares. It was about 24% of the total Geographical area. There were various schemes for improving the Forest wealth of the Dist. implemented during the III five year Plan. 2,013 hectares were brought under plantation of valuable trees. Afforestation was carried out in 202 hectares. The total Forest produce was 48,435 thousand cft. and the value realised by the sale of these products was 25.440 thousand Rs.

#### 4.15 Co-operation:

There were 961 co-operative societies in the Dist. at the end of plan period.

Kolaba is a Rice producing area and 26 Rice mills were working at the end of the plan period.

#### 4.16 Communications:

Fairly large portion of the District is not served by rail communications. There was 48.68 Km. of

broad gauge line and 2013 Kms. of narrow gauge line. During Third Plan a new line was constructed from Diva to Panvel. It was opened for passenger traffic in December 1964. The length of the new line constructed was 11 Km. in the District. In addition to the above a railway line has also been constructed from Panvel to Uran. The work of the Panvel Apta line is in progress.

4.17 The District has a number of minor ports. During the third plan construction of Mandva port was in progress. In addition to the above work of construction of Jetties at same of the Ports was in progress.

4.18 Medical Facilities:

A cottage hospital has been established at Mangaon during the Plan. It has 25 beds. More over 13 primary health centres have also been opened during the Plan period .

4.19 Water Supply:

Under Regional Water Supply Schemes, Two Schemes namely Tinvira and Shapada were completed during the plan period. The total villages benefitted by these schemes were 106
