C H A P T E R - II N T R O D U C T I O N1.1 Location

Buldhana district has been named after Buldhana town which is the district head quarter since the year 1867. It is partly in Tapi basin and partly in the Godawari basin. The northern half of the district broadly called 'Pamghat' is drained by the Purna river which is a tributary of the Tapi. The southern half known as the 'Balghat' is drained by the Penganga and the Katepurna rivers which are tributaries of the Godawari.

1.2. Boundaries

The district lies between $19^{\circ}51'$ and $21^{\circ}.17'$ North latitudes and $75^{\circ}57'$ and $76^{\circ}.049'$ East longitudes. It is bounded on the north by the Nimar district of Madhya Pradesh, on the east by Akola district, on the south by Parabhani district, on the west by Aurangabad and Jalgaon district and on the north east by Amravati district. The district covers an area of 9745 square kilometers.

1.3 History and Administrative set up -

Up to 1863 Buldhana was a part of west Berar district. Tahsils of Malkapur, Chikhli, (Formerly Deulghat) and Mehkar were separated from west Berar district in 1864, to make what was at first called south west Berar district headquarters were shifted to Buldhana in 1867 and the district was renamed as Buldana district. -
Khamgaon tahsil had been formed in 1870 by separating some villages from Balapur tahsil of Akola district.

Consequent upon the reconstitution of district boundaries of Berar districts in 1905, Khamgaon and Jalgaon tahsils of Akola district were transferred to Buldana district.

There were no major changes in the boundaries of the district between 1911 and 1955. With the reorganisation of the state in 1956, the district was transferred from Madhya Maharashtra since 1st May 1960.

The district comprises of five sub-divisional or tahsils viz. 1. Jalgaon-Jamod 2. Malkapur 3. Khamgaon 4. Khikhli and 5. Mehkar. The collector of the district is incharge of General Administration, Law and order, Land revenue and Civil Supplies. He is also District Magistrate and District Registrar. He is assisted by a Resident Deputy Collector in his office and other Deputy Collectors who look after different branches. A Sub-Divisional Officer of the rank of the Deputy Collector has been put-up in-charge of the Administration of each of the five tahsils. He is assisted by a Tahsildar and Naib-Tahsildar. The tahsil has further been divided into revenue circles each in charge of a Revenue Inspector assisted by a number of Patwaris, whose number in each circle is determined by the size and volume of work therein.

Officers of the Government Departments and quasi Government institutions are also located at the district head quarter for facilitating the smooth and co-ordinated working of the administration at the district.

-3-

Officers of the Department of
Zilla Parishad and Panchayat Samitis

Under the Maharashtra Zilla Parishad and Panchayat Samities Act, 1961, a three-tier structure was established the zilla parishad at the intermediate level. The Zilla Parishad and Village Pchayats are both local bodies directly elected by universal suffrage at the district and village levels.

The panchayat santi, however, is a body at the block level constituted by the indirect elections. Each of these bodies has been given a clearly defined sphere of activities with major part of the funds transferred to it with the executive staff required for discharging its responsibilities.

The administration headed by the Chief Executive Officer is statutorily responsible for executing the decisions of non-official bodies at various levels. This administration being independent and yet responsible to the Government, ensures that the decisions are executed within the frame work. The local leadership can determine priorities within the overall frame work of Government rules and development policies.

The Zilla Parishad, Buldhana, comprises of 59 members of which 47 are elected from the constituencies with an average co-operative societies, Banks, Ladies representatives, Panchayat Samities etc. from among these members, the zilla parishad elects a president, a vic-president. There are six subject committees, which are distributed among four chairmen and the subject committees.

The spheres of development of district importance relating to Agriculture, Animal Husbandry, Minor irrigation, Community Development, Public Health, Public works, Education etc. have been transferred to the Zilla Parishad.

Thirteen panchayat samitis have been established in the district each having a chairman, with certain statutory functions, with a budget normally varying according to the stage of the Block panchayat Samiti. These bodies have limited powers of administrative sanction pertaining to the existing schemes implemented within their jurisdiction. The panchayat samiti is essentially responsible for granting financial aid to the village panchayats, which in turn provide basic amenities at the village level. The panchayat samiti is also responsible for providing technical guidance to the village level staff in educating the village in modern methods of agriculture, animal husbandry etc. Finally it is responsible for supervising the overall administration of the village panchayats in the district.

The Co-ordination with this elaborate structure is essential in two ways. The panchayat samiti consists of the persons elected by the members of the village panchayat also of the Zilla Parishad members of the village panchayat also of the zilla Parishad members elected from within its Jurisdiction. The chairman of the panchayat samiti is also ex-office co-opted member of the Zilla Parishad.

1.4 Area

The area, number of villages, population etc. according to 1971 census covered by each tahsil of the district is given in the following table.

Sr. No.	Tahsil	Area in Sq. Kms.	No. of villages including deserted villages	No. of Towns	Population according to census 1971
1.	Chikhali	2393.1	292	3	3,25,860
2.	Malkapur	1686.1	282	2	2,68,235
3.	Jalgaon	1227.7	232	1	1,39,829
4.	Khamgaon	1838.9	237	2	2,38,160
5.	Mehkar	2608.1	254	1	2,90,894
District		9745.0	1397	9	12,62,978

Note :- The tahsilwise area figures do not add up to the district total as the figures for district are taken from survey of General of India and total area tahsilwise it worked out by adding rural area and urban areas as communicated by Municipal Councils.

Out of a total population of 12,62,978 for the district in 1971, 10,41,170 persons or 82.4 percent and 2,21,808 persons or 17.6 percent reside in rural and urban areas respectively. The area of the district is 9745 sq.kms. as per the 1971 census which accounted for 9.98 percent and 3.18 percent of the total area of Nagpur Division and Maharashtra respectively in 1971.

1.5 Topography

Out of the five tahsils now forming the district the tahsils of Chikhali and Mehkar lie on the Balghat plateau, while rest of three tahsils of Malkapur, Khamgaon and Jalgaon are in the great plain below known as the payanghat. These are the two natural sub-divisions, which correspond closely to the administra-

-tive sub-divisions of the district. The edge of the plateau where it falls abruptly into the valley is intercepted numerous deep ravines.

The landscape is of varied character, fertile villages alternating with barren hillsides and deep ravines. Below the ghats, the land is flat, except where it is broken by spurs of hills putting out into a plain. The general slope of the district above the ghat is from north to south.

1.6. Hills, Rivers System, Soils etc.

The main system of hills in the Ajanta range which has formed a plateau called the Balaghat. It covers the southern portion of the district, comprising Chikhli and Mehkar tahsils, a ridge of low hills running from north-west to south east through the Balaghat from forms the water shed between the valleys of the Penganga and the Katepurna. The main Ajanta range forms the northern wall of the Deccan table land and the water shed between the Godavari and Tapi valleys.

There is also a branch of satapurna range in the north of Jalgaon Tahsil, which separates the district from the state of Madhya Pradesh.

The general slope of the district above the ghats is from north to south.

The elevation of the three plain tahsils of Malkapur, Khamgaon and Jalgaon varies from 264 to 278 meters above sea level. The elevation of Chikhli and Mehkar table land varies from 529 to 737 metres above situated at an elevation of 668 metres.

The principal river in the district is the Penganga. The other important rivers are the Purna, the Katepurna, the Nalganga the Vishwaganga, the Gyanganga and the Banganga.

The Panganga rises in the hills near Deulghat, runs, in a south easterly direction past Mehkar and then enters the Akola district. The poration of the river which lies in this district is almost dry in the hot weather.

The kate or lower purna rises in the Ajants hills to the west of the district, which enters a little to the north of Deulghat Raja and traverse the tahsil of Mehkar in a south easterly direction for a distance of about 48 kilometres its course running parallel to and south of that of the Penganga. It is dry in summer. Both the Penganga and the Katepurna are important rivers of the Godavari basin, but they do not acquire their importance till they come out of the district.

The purna rises in the lower slopes of the Gawilgad hills in the Amravati district and runs westward until it leaves the district at the northern most corner of malkapur tahsil. Its principal tributories within the district are the Nalganga, the vishwaganga and the Gyanganga from the south, and the Banganga from the north. There are two medium irrigation projects on the rivers of Nalganga and Gyanganga in this district.

The soils are derived from trap rock of volcanic origin. There are three main categories of soils in the district viz. i) Bhurkati, which is deep black soil of very fine texture and very retentive of moisture ii) morand, which is black cotton soil containing limed and less fertile than pure black cotton soil and iii) Barad, which is the shallow soil of the higher lands of the plateau and black, brown or reddish colour.

The soils in the northern tahsils viz. Jalgaon, Malkapur and Khamgaon are generally deep black, formed by transported material washed from the higher lands. cotton and Kharif Jower are the main crops. The largest stretches of such heavy soils are formed in strips of about thirteen kilometres on either side of the purna river.

The belt lying between the railway mainline and the purna river comprises some of the most fertile lands in Nagpur region.

To wards the south, the soil is light and stony but pockets and belts of rich soil are found right upto the hills particularly in Malkapur tahsil.

On the plateau i.e. in Chikhali and Mehkar tahsils, there are considerable areas of medium black soil interphersed amidst the light and shallow soils which grow cotton, Jower pulses and Bajari. The Chikhali and Mehkar tahsils are well known for their wheat which is grown in the low lands between the plateau. These soils have a murum substratum and are, therefore, well drained. The existence of rock sub-soil is also not

-2-

uncommon and the soils formed on such rocky beds - suffer both, during scanty and heavy rains.

The district is not known to have any mineral of outstanding importance, except some saline deposits and lead in the lake of Lonar. These saline deposits were exploited for some time past, but subsequently found unprofitable and hence further exploitation of these deposits was abandoned. However, the agates, chornelians and elacite formed in the trap in southern part of the district have some utility, the first two for ornamental purpose and the last for optical purposes.

1.7 Climate, Temperature and Rainfall

The climate of the district is dry and hot in general and considered to be generally healthy. The maximum and minimum temperature at Buldhana during 1974 was 37.8 centigrades and 15.1 centigrades respectively. After May, the temperature rapidly falls down. Then after June with the arrivals of Mansoons, starts the rainy season and lasts upto the end of September. It is followed by winter season, which is quite pleasant.

The above temperature figures are typical of the Balaghat plateau (i.e. Chikhali and Mehkar tahsils) where the hot season sets in late and the heat is not intense. The rainy season is pleasant and the winter is invigorating. Buldhana town itself is the coolest and the most pleasant district head quarters in Narmur division. The climate of the payanhat i.e. Malkapur -

Jalgaon and Khamgaon tahsils affords a great contrast. There the heat is intense and specially in the months of March to May it is perhaps as intense as in the hottest part of the country. The strong western winds, which then prevail become intensely heated and exercise their influence.

The rainfall is not uniform in all parts of the district. It is highest at Malkapur with a average of about 1680.0 mms. at Jalgaon. It rains come in time and are equitably spread over the entire monsoon period properly the average rain fall in the district proves to be adequate for good crops. The district gets rain from the south west monsoons during the period from June to September.

Small Saving

The district was allotted a target of Rs. 70.00 lakhs under small savings during the year 1974-75. The district has collected Rs. 60.30 lakhs as net collections.

-----***-----

Explanatory note on the scope and limitations of the Statistical data presented in the Part-II (Statistical Abstract)

I. Purpose

The abstract part of this publication gives exhaustive statistical data on important Socio-Economic indicators of development. Tables on almost all almost all important topics are presented in this part, so that the publication could serve as a reference book. Tahsilwise data have been displayed as far as possible for inter tahsil comparison. In most of the tables, data for 1974-75 have been indicated with the data for 1973-74 while in some of the tables data for 1973-75 could not be presented and the same for the latest year or for which they were available, have been shown. In case of population centres (1971), Livestock centres (1972) and census of government employees (1966) the data for latest census have been presented. All the data have been collected from the state and Central Government offices, Local bodies and other relevant agencies. The footnotes below each table indicate the source from which the data have been collected.

II. District at a Glance

This table presents a bird's eye-view of the Socio Economic indicators of development in Buldana District and Maharashtra State under different heads, such as area, population, agriculture and animal husbandary, education, transport and communication,

Plan and C.D. Programme, local bodies and other miscellaneous statistics. Reference year of the table is also indicated in the table.

III. Contents, Scope and Limitation.

The Statistical tables presented in the District Statistical Abstract are grouped in 13 parts. The contents of the tables and the scope and limitations of the data displayed under each group are explained below.

1. Area and Population

In all 7 tables i.e. table Nos.1 to 7 are included in this section. Data for 1971 census are indicated in all tables except table No.2 where in data for 1951, 1961 and 1971. Census are shown with decadal percentage variation. The reference period for 1971 census was sunrise of the 1st April 1971. The table No.1 gives area, density of population, number of villages and towns, number of occupied residential houses and house-holds and sexwise population separately for rural and urban.

For any place to be recognised as an urban area (town) for the 1971 census, it was to have a municipal corporation or an area under a municipal council or a cantonment or a civil line. If it did not have any of these urban local bodies to administer its affairs, the following empirical tests were applied, (a) a minimum population of 5,000 (estimated for 1971), (b) a density of not less than 400 per Km² (1,000 per

sq. mile), (c) 75 percent of the male working population pursuing occupations falling outside agriculture, (d) the place should have, according to the Director, of Census operations of the state, a few pronounced urban characteristics and amenities.

The term village (i.e. rural area) used, denotes a statutorily recognised village having a well defined boundary and separate land records. Hamlets wadies or padas have, therefore been not shown as separate villages. On the other hand, Statutorily recognised villages having no population have been shown separately as 'uninhabited' villages. Villages also include forest villages comprising mostly forest labourers and their families.

The Table No. 3 given classification of villages according to population ranges in 1971 census.

Table No.4 gives number to towns, according to 1971 census alongwith population. Table No.5 gives number of workers and Non-workers in Buldana district according to standard livelihood classes. The population according to livelihood classes is shown separately for rural and urban area and for the district as a whole. The concept of dependency has been abandoned for economic classification at the 1971 census. The emphasis is not on work and not on income or on economic dependence. A person is defined as worker if (a) in case of seasonal work like cultivation, live-stock, dairying, household industry etc, he has had some regular work of more than one hour a day throughout the greater part of the working season, and (b) in case of regular employment in any trade, a profession

-stock, dairying, household industry etc, he has had some regular work of more than one hour a day throughout the greater part of the working season, and (b) in case of regular employment in any trade, a profession, service, business or commerce, he has employed during any of the seven days preceding the day of the enumerator's visit to the household.

The table No.6 gives distribution of population according to (a) age group and (b) Religion, separately for rural and urban area and for the district as a whole as per the 1971 census.

The table No.7 gives tahsilwise details of scheduled caste, scheduled tribes and neo-Buddhist separately for rural and urban area and also for the district as a whole according to 1971 census.

The Scheduled castes notified for this district are as follows.

- | | |
|--------------------|----------------------------------|
| 1. Bhana | 11. Kaikadi |
| 2. Balohi | 12. Katia |
| 3. Basor | 13. Khatik |
| 4. Bedar | 14. Kori |
| 5. Bhangi or Mehar | 15. Khangar |
| 6. Chambhar | 16. Madari |
| 7. Dohar | 17. Mahar |
| 8. Domor Dumar | 18. Mang (including Mang Garudi) |
| 9. Ganda | 19. Sansi |
| 10. Ghari | 20. Kanera or Mirdha |

Scheduled Tribes

There are no scheduled tribes notified for this district in 1971.

2. Climate

Only two tables are included under this section pertaining to rainfall and temperature at the selected centres in Buldhana district.

-5-

The table No.8 gives monthly rainfall and number of rainy days in each month at selected centres for the year 1974. The data are collected through Revenue agency. A day is treated as a rainy day if during at the 24 hours the rainuage recorded minimum of 2.5 m.m. of rainfall. Annual rainfall for each centre is also indicated in the table. 'Normal rainfall' is the average rainfall over a period raning from fifty to eighty years.

The table No.9 gives monthwise maximum and minimum and also annual temperature as recorded at Buldhana for the year meteorological centre at Nagpur. The maximum and minimum temperature recorded any day during the month.

3. Agriculture

In all 12 tables i.e. table Nos. 10 to 21 are included in this section.

The table No.10 indicates tahsilwise figures of land utilisation under the standard heads of land uses for the year 1972-73 and 1973-74. Against each tahsil, the break-up of the total geographical area according to different types of land uses is shown. Major constituents of the Geographical area etc, forest, land put to non agricultural uses, barren and unculturable land, culturable wastes permanent pastures, land under miscellaneous tree crops not included in area shown current fallows, other fallows and net area sown.

Under 'Forests' are included all actually forest areas of lands classed or administered as forests under any legal enactment dealing with forests whether state owned or private. If any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or uncultivated land as the case may be. 'Land put to Non-Agricultural uses' stands for all lands occupied by buildings, roads and railways or under water e.g. rivers and canals and other lands put to uses other than agriculture. Barren and unculturable land covers all barren and un-culturable land like mountains, deserts etc. Land which cannot be brought under cultivation unless at a high cost, is classed as barren and unculturable and whether such land is in isolated blocks or within cultivable holdings. 'Culturable waste' includes all lands available for cultivation once but not cultivated during the current year and last five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may be assessed or not assessed and may lie in isolated blocks or within cultivated holdings. Permanent pastures and other grazing lands cover all grazing lands whether they are permanent pastures and meadow or not. Village common and grazing lands within forest are included under this head. Land under miscellaneous tree crops etc. not included in the eara sown are included all cultivable land, which is not

included under net area sown, but is put to some agricultural use. Land under casurina tree, thatching grass, bamboo bushes and other for fuel etc, which are not included under 'Orchards' are classed under this category current fallows comprise cropped areas, which are kept fallows during the current year. Other fallow land included all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than one year and more than five years. The net area sown consists of net area sown with crops and orchards, area sown consists more than once being counted only once. The gross cropped area represents the sub.total of area under all crops. The difference between the total or the gross cropped area and net area sown is accounted for by the area sown more than once during the same year with the same or different crops.

The table No.17 gives the information on major and medium projects in this district. Both completed and incomplete projects have been covered in this table. Position in this table is as it was on 30th June 1974. The cost of medium irrigation project ranges between Rs.20 Lakhs to 5 Crores, whereas that of a Major irrigation project it is 5 crores and above.

Table No.18 deals with monthly agricultural wage rates in 1973 and 1974. This data is collected fortnightly throughout the years from three selected rural centres in Buldana district viz. 1.Asalgaon 2. Deulghat & 3. Dongaon. Only one centre is selected from tahsil.

4. Animal Husbandry and Forest

A- Animal Husbandary:- In all 4 tables i.e. tables Nos. 22 to 25 are included in this section. Table No.22 gives tahsilwise numbers of various types of livestock census, 1972. The census conducted throughout the country on an uniform basis of concepts and methods of enumeration once in '5' years. During the livestock census operations, the livestock and poultry were enumerated by house to house enquiry, particular care was taken to enumerate livestock in slaughter houses, stray animals and animals in transit. Sex and age groupwise classification of the livestock is also indicated in the table.

Table number 23,24 and 25 gives tahsilwise veterinary statistics, diseasewise livestock mortality and number of slaughter houses and animals slaughtered in them for the year 1974-75.

B. Forest - The table number 26 (a) given details of area in different types of forests during the year 1974-75 data regarding forests under the control of the state government's forest department and those under the control of the state Govt.'s revenue deptt. are shown separately. The areas under forests are classified under according to legal status in the reserved forests, protected forests and unclassed forests. The legal status refers to classification of forests under the Indian forests Act. XVI of 1927.

Reserved forests are those that are intended mainly for timber production, wherein the right of grazing and cultivation are seldom allowed. In protected forests, the restrictions are not so rigid. Right of grazing and cultivation is allowed but certain limitations and restrictions are imposed. The unclassed forest refers to the inaccessible forest or unoccupied waste. The forests which are taken by Govt. from local bodies or private individuals for management on lease basis are called leased forests. There is no classification of expropriatory forests as such but in Nagpur division some private lands containing valuable forests are taken over by government under section 29 of the Indian forest Act. which are not yet classified as per tripartite classification and they are termed as expropriatory. The forest area shown in table No.26 (A) may not tally with the area under forest shown in table No.10. The two sets of figures differ due to the following reasons. i) In the Indian forest statistics returns, the whole area including non-wooden area under the control of forest department is taken as area under forest, while in Agricultural statistics, it is classified according to its actual utilisation (ii) The forest department returns are meant to serve a definite administrative purpose and indicate the ownership of the forest areas and the actual utilisation of these areas is not so important, from the point of view of forest department as it is in the land utilisation statistics under Agricultural Statistics. (III) The forest department returns relate to financial year and Agricultural statistics relate to the agricultural year.

utilisation statistics under Agricultural Statistics
 (III) The forest department returns relate to financial year and Agricultural statistics relate to the Agricultural year.

5. Employment, Industry and Electricity

In all 9 tables i.e. table Nos.27 to 35 are included in this section.

The factory statistics shown in table No.27, 28 & 29 cover following types of factories registered under the Fact. Act.1943.

- 1) Those employing ten or more workers working with the aid of power (section 2m (i).
- 2) Those employing twenty or more workers and working without the aid of power (section 2m(ii) and
- 3) Those registered under the section 35 of the act, under which the state government makes applicable the provisions of the Act, even though the above conditions are not fulfilled. However, statistics of the defence factories are excluded.

The table No. 31 & 32 gives occupational distribution of total registrations and placements in the employment exchange for the year 1974-75 according to standard National classification.

The table No.30 deals with the results of the Annual survey of Industries indicating industrywise working and reporting factories, employment, fixed working and productive capital, total value of production and value added for the year 1966. This survey is carried out by the Directorate of Economics & Statistics Bombay annually.

6. Co-operation

In all 8 tables i.e. table No.36 to 43 are included in this section.

The table No.38 gives tahsilwise number of primary agricultural societies, their membership, share capital, Reserve and other funds, working capital, loans advanced for the year 1974-75 'Working Capital' includes paid up capital, deposits and borrowings bill purchased or discounted. Overdues refer to amount of loan or instalments which were due for collection but which were not actually collected and fore the repayment of which no extension has been granted by a competent authority.

The table No. 43 gives tahsilwise number of registered money lenders in each tahsil and loans advanced to traders and non-traders have been furnished in this table. The transactions of money lending in the state are regulated under the provisions of Bombay money lenders Act, 1946. According to the Act, no money lender shall carry on the business of money lending except in the area for which he has been granted a licence, and except in accordance with the terms and conditions of such licence.

7. Medical and Public Health

In all five tables i.e. table Nos.44 to 48 are included in this section.

The table No.44 given in this section indicates tahsilwise number of hospitals, dispensaries maternity homes, health centres and primary health centres, doctors, nurses, vidyas, beds and total number of indoor and outdoor patients treated for the year 1974. The table covers all the state and central government medical institutions and also institutions owned by municipalities and local bodies engaged in providing medical facilities. Private clinics run by private bodies or individuals are, however, not included in the table.

The table No.45 gives vital statistics such as number of registered births and deaths in this district.

8. Education

In all 7 tables i.e. table No.49 to 55 are included in this section (including table No.50 & 51).

The table No.49 given sexwise number of literates and percentage of literacy separately for rural and urban areas of each tahsil according to 1971 population census. As per 1971 census definition, a person was classified as a literate if he was able to read or write a simple letter in any language. The table No.52 gives information regarding number of educational institutions according to types for the Year 1973-74. Sexwise enrolment and number of trained and untrained teachers in these institutions is also indicated in this table. The classification of -

of institutions according to type is slightly different from stage of education.

The table No.53 presents data on the number of beneficiaries among backward classed such as scheduled tribes and other backward classes for the year 1974-75. Beneficiaries for this table are persons who are getting educational concessions of either type such as scholarships, freeships etc, Table No. 54 presents data on concessions to the economically backward classes. The concessions of free enduction and amount incurred is given in this table for the year 1974-75. Under the category of 'economically backward' students whose parents guardians income is less than Rs.2400 are covered.

9. Transport and Communication

In all 7 tables i.e. table Nos. 56 to 62 are included in this section.

The table No.56 gives total railway length on 31st March 1975 according to the type of routes i.e. Broad, Metre Gauge, Narrow Gauge. The railway length is measured between the first and last stations within the district boundary. The figures of length of each type of route are, therefore, approximate and are not accurate.

The table No.59 deals with operational statistics of Nationalised road Transport in Buldana division for this table, S.T. division comprises of Akola and Buldana of Nagpur ~~xxx~~ revision.

The table No.60 presents the results of the traffic census on important roads conducted by building & communication department, Government of Maharashtra. Data on the number of vehicles is according to categories and location of count post. Type of surface and total traffic intensity in tonnes per 24 hours are also indicated in the table.

10. Local Bodies

In all 4 tables i.e. table Nos. 63 to 66 are included in this section.

The table No.63 gives abstract of Income and expenditure of local bodies such as village panchayat, Zilla Parishad and Municipalities for the years 1965-66 and 1968-69 to 1974-75. The number of village panchayats includes number of independent village panchayats as well as group village panchayats.

11. Plan and Community Development

In all 5 tables i.e. table No.67 to 71 are included in this section. These tables present data on sub-headwise expenditure incurred on district level plan schemes and C.D. Blocks and physical achievements during the year 1974-75.

12. Prices

In all 3 tables i.e. table Nos.72 to 74 are included in this section.

Table No.73 presents data on monthly whole-sale prices of important agricultural commodities in the district and hence they are limited to certain commodities marketed by these Market committees.

The table No.73 gives monthly average retail prices of various commodities at District head-quarter Buldhana. The average monthly prices of each commodity are shown in this table for the year 1974, alongwith units and varieties of commodities for which prices have been quoted. The data are regularly collected by the District Statistical Officer every week on Friday, by visiting the selected shops. The average price of each commodity for the year is also shown in the table. As the information collection for the given commodities is restricted to only one quotation and that too only from one shop at District Headquarter, the average price for individual commodity cannot be said to be fully representative, but the data may prove useful as broad indicator of the trend in changes in retail prices over period of time.

The table No.74 gives consumer price index number (revised series) for working class of Nagpur centre published by the office of Commissioner of Labour, Bombay. Monthwise data for the year 1974-75 commencing from April and also average for the year 1973-74 have been given in this table. The base year for calculating price index (New series) is 1960.

13. Miscellaneous

In all 11 tables i.e. table Nos.65 to 85 are included in this section. Table Nos.75 to 84 presents data on various subjects such as police, crime statistics cinema statistics, Banking, Joint Stock companies, L.T.C. small saving etc.

Table No.85 given trends in selected indicators for the year 1950-51, 1960-61, 1966-67, 1970-71, 1971-72, 1972-73, 1973-74 and 1974-75.

CHAPTER -IIIINDICATORS OF DEVELOPMENT

In this chapter, the progress of development covering the period at the end of second Five years Plan and the Annual Plans 1972-73 or 1973-74 has been reviewed by presenting tahsilwise sectoral trends based on certain important indicators of development. Comparative tahsilwise figures wherever available for 1960-61 and 1972-73, 73-74 or 1974-75 as the case may be have also been presented.

Indicator No.1 - Percentage of gross sown area

The extent of double cropping is solely related to the availability of irrigational facilities and soils capable of retention of moisture after the rains. The district accounted for a very low percentage of area sown more than once to the net area sown as compared to Maharashtra State.

The following table gives the percentage of gross sown area to net sown area in 1960-61 and 1973-74 in each tahsil in the district.

Sr.No.:	Tahsil	% of gross sown area to net sown area		Banking
		1960-61	1973-74	
1	2	3	4	5
1.	Jalgaon	100.27	101.06	4
2.	Malkapur	100.33	101.61	3
3.	Khamgaon	100.10	100.96	5
4.	Chikhli	105.10	112.92	1
5.	Mehkar	104.67	109.59	2
District		102.57	106.34	

It is seen from the above table that the percentage of gross cropped area has increased from 102.57 in 1960-61 to 106.34 in 1973-74. The percentage of double cropped area was highest in Chikhli tahsil followed by Mehkar tahsil. In other three tahsils the proportion was less than the district average. The proportion of double cropped area in Chikhli and Mehkar tahsils is higher as most of the cultivators grow Mung, Urid, Hybrid Jowar, groundnut etc. in Kharif Season and then gross crops like wheat, Safflower etc. as second crops in Rabi season.

Indicator No.2 -Productivity of important crop.

Sr.No.:	Crop	Production (in M.Tonnes)		% Increase (+) Decrease(-)
		1960-61	1973-74	
1.	2.	3.	4.	5.
1.	Rice	951	2900	(+) 204.94
2.	Wheat	18606	19600	(+) 5.34
3.	Jowar	123492	144900	(+) 17.34
4.	Total cereals	144358	172800	(+) 19.70
5.	Tur	6181	17400	(+) 181.50
6.	Gram	3472	2000	(-) 42.40
7.	Total pulses	17611	34800	(+) 97.60
8.	Total Food grains	161969	207600	(+) 28.17
9.	Cotton (bel)	196031	79100	(-) 59.65
10.	Ground nut	24607	9000	(-) 63.43

The above table gives the figures of out-turn of Important crops in the year 1960-61 and 1973-74. It will be seen that the production of all the crops except gram, Cotton and groundnut has increased in 1973-74 as compared to the production in 1960-61.

Indicator No.3 - Gross value of Agricultural production

As relevant price data required is not available, gross value of agricultural production could not be calculated.

Indicator No.4 - Percentage of irrigated area

The district Buldana is mainly dependent on well irrigation except the Nalganga project located in Malkapur tahsil and Gyanganga project located in Khamgaon tahsil and some minor irrigation tanks and bandharas located in different parts in the district. The percentage of irrigated area is very low as compared to other districts of Maharashtra.

The following table shows the percentage of gross irrigated area to net irrigated area in 1960-61 and 1973-74.

Sr.No.	Tahsil	Percentage of gross irrigated area to net irrigated area		Ranking
		1960-61	1972-73	
1	2	3	4	5
1)	Jalgaon	100.00	198.81	1
2)	Malkapur	100.00	160.60	3
3)	Khamgaon	100.00	168.66	2
4)	Chikhli	100.00	115.17	5
5)	Mehkar	103.66	116.10	4
District		102.15	132.61	

From the above table, it is seen that the percentage of gross irrigated area has increased from 102.15% in 1960-61 to 132.61% in 1973-74. The increase was remarkable in Jalgaon tahsil followed by Khamgaon tahsil.

The following table shows the percentage of net irrigated area to net sown area in 1960-61 and 1973-74.

Sr. No.	Tahsil	% of net irrigated area to net sown area		Ranking
		1960-61	1973-74	
1	Jalgaon	0.47	1.07	5
2	Malkapur	1.72	2.65	3
3	Khamgaon	0.50	1.40	4
4	Chikhli	3.14	4.17	1
5	Mehkar	2.25	3.10	2
District		1.85	2.74	

From the above table, it is seen that the percentage of net irrigated area to net sown area has increased from 1.85 in 1960-61 to 2.74 in 1973-74. The increase was in all tahsils. The percentage of area irrigated was highest in Chikhli tahsil followed by Mehkar tahsil. In other tahsils, the percentage was below the district average.

Indicator No.5 - Changes in Crop Pattern
(Total & irrigated)

The Cotton & Jowar (Kharif & Rabi) are the major crops grown in the district and these two crops share respectively 31.5 % and 35.2% of the total Gross cropped area in the year 1973-74 in Rabi season and pulses such as Urid, Mung, Tur are grown in Kharif season, which accounted respectively for 4.72 %, 4.82% and 15.5% of the gross cropped area during the year -

1973-74. The food crops are sown in majority of the cultivated area in the district and these crops share 58.74% of the total gross cropped area during the year 1973-74.

The following table shows the percentage of area under food and non-food crops to gross cropped area in 1960-61 and 1973-74 in the district.

Sr. No.	Tahsil	% of area under		% of area under	
		food crops to gross area sown	non-food crops to gross area sown	1960-61	1973-74
1	2	3	4	5	6
1)	Jalgaon	40.53	43.32	59.47	56.68
2)	Malkapur	55.56	61.98	44.44	38.02
3)	Khamgaon	47.54	58.35	43.46	41.65
4)	Chikhli	64.92	59.75	35.08	40.25
5)	Mehkar	66.71	62.04	33.29	37.96
District Average		57.51	58.74	42.49	41.26

The proportion of area under food crops has been increased in 1973-74 as compared to the area in 1960-61 as can be seen from the above table. The absolute increase is noted in Khamgaon, Malkapur and Jalgaon tahsils. On the contrary notable decrease is seen in Chikhli followed by Mehkar tahsils. The percentage of area under food crops was highest in Mehkar tahsil followed by Malkapur tahsil and Chikhli tahsil. In other tahsils, the percentage was below the district

The following table gives the percentage of irrigated area under food crops and non-food crops to total gross irrigated area in 1960-61 and 1973-74.

Sr. No.	Tahsil	% of area under irrigated food crops to gross irrigated area		% of area under irrigated non-food crops to gross irrigated area	
		1960-61	1973-74	1960-61	1973-74
1	2	3	4	5	6
1)	Jalgaon	78.8	88.6	21.2	11.4
2)	Malkapur	97.4	82.1	2.6	17.9
3)	Khamgaon	87.6	87.7	12.5	12.3
4)	Chikhli	87.5	87.8	12.5	12.2
5)	Mehkar	66.3	57.2	3.1	42.8
District Average		92.1	78.52	7.9	21.48

It is seen from the above table that the percentage of area under irrigated food crops to gross irrigated area has decreased from 92.1% in 1960-61 to 78.5% in 1973-74. The increase was in Jalgaon and Chikhli tahsils while the percentage was decreased in remaining tahsils. The percentage of irrigated food crops to gross irrigated area was highest in Jalgaon Tahsils, followed by Chikhli, Khamgaon and Malkapur tahsils. The percentage in Mehkar tahsils was below the district average. Among the non-food crops, cotton is the main irrigated crop grown while wheat, Sugarcane, banana and other fruits vegetables and Chillies are the main irrigated food crops.

Indicator No.6 - Increase in agricultural credit and outstanding dues.

The cooperative credit structure has been developed for financing the agriculturists according to their needs. Special facilities are also being made available to the agriculturists through the cooperative credit structure for participating in the schemes implemented by Govt. in the Five Year Plang period. The short and medium term loans are given by the District central Co-operative Banks through the primary agricultural credit societies and service cooperative long form finance is however advanced by the District Land Development Bank through its branches.

The following table shows tahsilwise primary agricultural societies amount of loan advanced and loan outstanding in 1963-64 and 1974-75.

Sr. No.	Tahsil	No. of credit societies		Loans advanced		Loans outstanding	
		1963-64	1974-75	1963-64	1974-75	1963-64	1974-75
1	Jalgaon	64	58	2825	4818	2240	1759
2	Malkapur	161	142	4700	5911	5172	1374
3	Khamgaon	98	92	4628	3304	5793	394
4	Chikhli	150	135	5313	12385	5931	2472
5	Mehkar	149	142	5189	14965	7025	2489
Dist. Total		623	569	22660	41833	26161	8488

From the above table, it is seen that the no. of credit societies decreased during the year 1974-75 over the

number during 63-64. The total amount of loan advanced has, however, increased by 54.8 percent in 1974-75 over the corresponding figure in 1963-64. The amount of loan outstanding has decreased by 67.6 percent in 1974-75 as compared to the loan outstanding in 1963-64.

Indicator No.7 - Agricultural Wage rates

The agricultural wage rates are collected from selected cultivators in selected centres-viz. Dongaon, Deulghat and Asalgaon in Mehkar, Chikhali and Jalgaon tahsils respectively. Generally, the skilled workers like carpenters, Blacksmith cobbler etc. are not employed on daily wages and hence wage rates for these categories are not available. The wage rates are collected fortnightly. As these centres do not represent the district position very correctly, these wage rates may be taken as broad indicator of wage level in the district. The following table gives average wage rates of above selected centres for the year 1963-64 and 1973-74 as the work of collection of these wage rates was started from June 1963.

Sr.No.:	Centre :	1963-64		1973-74	
		Male	Female	Male	Female
1	2	3	4	5	6
1.	Dongaon	1.12	0.65	3.00	2.00
2.	Deulghat	1.44	0.75	3.37	1.83
3.	Asalgaon	1.12	0.62	2.66	1.45
District average		1.23	0.67	3.01	1.76

The agricultural wage rates were highest at Deulghat for males and at Dongaon for Females in 1973-74, while the wage rates were lowest at Asalgaon for males and females. The agricultural wage rates have increased by 144.7 percent in case of males and by 162.6 percent in case of females in 1973-74 as compared to the wage rates in 1963-64.

Indicator No.8 - Livestock per hectare of Cultivable land

Animals besides providing most of the draught power required for Agricultural operations are an important source of organic manure and raw material.

The following table gives the Livestock population (ovine and bovine) per hectare of cultivable land in 1960-61 and 1972-73.

Sr.No. : Tahsil : Livestock per hectate of : Ranking
: : : cultivable land :
: : : 1960-61 : 1972-73 :

1	2	3	4	5
1) Jalgaon	1.04	0.92		5
2) Malkapur	0.99	0.99		3
3) Khamgaon	0.95	0.93		4
4) Chikhali	1.09	1.10		1
5) Mehkar	1.14	1.09		2
Dist. Average	1.05	1.02		

Note:- The above figures are based on the area in 1960-61 and Livestock in 1961 and are in 1972-73 and livestock in 1972. The cultivable area includes 1) Culturable waste 2) Land under misc. tree crops. 3) Current fallows 4) Other fallows and 5) Net area sown.

From the above table it is seen that the livestock per hectare of land has decreased from 1.05 in 1960-61 to 1.02 in 1972-73. The livestock percentage of land is highest in Chikhli followed by Mehkar Tahsil. In other tahsils it was below the district average.

Indicator No.9 - Poultry as compared to Population

The total poultry population in the district according to 1972 livestock census was 120343 which decreased by about 22.1 percent as compared to the corresponding number as per 1961 livestock census. The following table gives tahsilwise poultry population per 100 persons in Buldana district.

Sr. No.:	Tahsil :	Poultry per 100 persons :		Ranking
		1961	1972	
1	2	3	4	5
1)	Jalgaon	14	9	3
2)	Malkapur	7	6	5
3)	Khamgaon	7	9	4
4)	Chikhali	19	11	2
5)	Mehkar	23	13	1
District Average		14.6	9.53	

The poultry population in District has decreased by 22.1 percent during 1972, as compared to the poultry population in 1961. This decrease has been observed in all tahsil of the district. The poultry per 100 persons was found to be above the district average in Chikhali and Mehkar tahsils while it was below the district average in other tahsils in the district in 1972. It was highest in Mehkar tahsil and lowest in Malkapur.

Indicator No.10 - Per capita consumption of Electricity

The demand for electricity in the district is on rapid increase for boosting agricultural production. I all 615 villages and 9 towns were electrified by the end of 1974-75.

The following table shows the per capita consumption of electricity in 1961-62 and 1974-75.

Sr. No.	Purpose	Per capita consumption in		% Increase (+) or decrease (-)
		1961-62	1974-75	
1	2	3	4	5
1)	Domestic	1.09	3.29	(+) 201.8
2)	Commercial light and small power	0.94	1.58	(+) 68.1
3)	Industrial power	3.97	10.77	(+) 171.2
4)	Public lighting	0.46	0.86	(+) 86.9
5)	Other purposes including Agril. purposes	0.85	11.28	(+) 1227.1
Total		7.31	27.78	(+) 280.0

It is seen from the above table that the per capita consumption of electricity the corresponding consumption in 1961-62. The per capita consumption has rapidly increased in the consumption classified under other purposes due to increase in electric pump sets for agriculture. Industrial and domestic consumption have also shown remarkable increases in 1974-75 over the year 1961-62.

Indicator No.11- Increase in the number of candidates enrolled in Employment Exchange and vacancies

The following table gives the number of
1) Registrations 2) Vacancies notified and 3) Placements
in the district in 1960-61 and 1974-75.

Year	Registrations	Vacancies notified	Placements
1	2	3	4
1960-61	4,750	754	438
1974-75	5,792	473	432

It is seen from the above table that number of registrations has increased by 21.9 percent in 1974-75 as compared to 1960-61. However, the vacancies notified and placements decreased by 37.2 percent and 1.4 percent respectively. The number on live register in 1960-61 and 1974-75 was 2,049 and 9,438. The percentage of vacancies notified to the registration 1960-61 and 1974-75. The percentage of placements to the vacancies notified during the year 1960-61 and 1974-75 was 58.10 and 91.3 respectively.

Indicator No.12 - Increase in indoor and out-door patients treated in Hospitals

The general aim of the health programme is to expand the existing health services, to bring them within the reach of the people and to promote a progressive improvement in the level of natural health. Provision of adequate institutional facilities for organising -

health services, Family planning etc. were important health programmes included in the Annual plan 1974-75 for improving the health standard.

The following table gives number of indoor and outdoor patients treated in each tahsil of the district during 1960- and 1974 in the medical institutions available there.

Sr. No.	Tahsil	No. of indoor patients treated		No. of outdoor patients treated	
		1960	1974	1960	1974
1	2	3	4	5	6
1)	Jalgaon	114	319	63381	22152
2)	Malkapur	316	3163	74839	110538
3)	Khamgaon	12712	63960	131609	180406
4)	Chikhli	3302	69456	125305	230990
5)	Mehkar	117	513	79681	86499
District Total		16621	137411	474815	630585

Fram the above table, it is seen that the indoor patients treated in various public institutions has increased by 726.7 percent in 1974 as compared to the indoor patients treated in 1960. The increase is mainly due to the increase in the number of institutions (Public Health centres) treating indoor patients in rural areas. The number of outdoor patients treated in the public institutions has also increased in the year 1974 as compared to the year 1960. The increase in 32.8 percent.

Indicator No.13 - Increase in the number of students in different categories

According to 1971 population census 37.31% (51.3% males and 22.77 females) of the population of this district was literate as against the literacy percentage of 37.4 (49.577 males and 24.87 females) and 39.1 % (51.17 males and 26.4 % females) of Vidarbha and Maharashtra respectively.

In this district, the compulsory primary education was governed by primary Education Act. of 1950 and amended Act. of 1956 of the Ex. M.P. Govt. In 1955, the compulsion was introduced in Vidarbha for age group under the education Act. of the region. Due to compulsion, the No. of schools and enrolment rose very rapidly in all tahsils. At the end of the year 1973-74, every village in the district was within the vicinity of primary school or had a primary school

The following table gives the number of pupils enrolled in different categories of education for the year 1960-61 and 1973-74 in the district.

Year:	Enrolment in								
	Primary Schools			Secondary schools			Higher education		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
1	2	3	4	5	6	7	8	9	10
1960-61	61108	26388	67696	18284	4043	22327	1063	98	1161
1973-74	88451	51445	139896	34182	12336	46518	5175	718	5893

1.

From the above table, it is seen that enrolment in primary schools, secondary schools and higher institutions has increased by 59.57, 108.37 & 407.5 respectively in 1973-74 as compared to the enrolment in 1960-61. The increase in enrolment of girls was however more for all categories due to increase in educational institutions in rural areas and due to change in the outlook of people towards the female education.

Indicator No.14 - Increase in Road length per 100 sq. Kms.

The Road Development programme in the Fourth and Fifth Five year Plan has been formulated in accordance with the broad objectives laid down in the "Nagpur Plan" of 1961-81. The broad objectives of this plan were that no village in the developed and agricultural areas should remain more than four miles away from metal road and more than 1½ miles away from any type of road. The following table indicates road length per 100 square kilometers and per lakh of population in the district during 1960-61 and 1974-75.

Sr.No.	Year ending : 31st March	Road length per 100 Sq.Kms.	Road length per lakh of population in kms.
1	2	3	4
1.	1961	9.56	87.95
2.	1975	31.08	239.78

From the above table, it is observed that the road length per 100 sq. kms. has increased from 9.56

kms. in 1960-61 to 31.8 kms in 1974-75, while road length per lakh of population increased from 87.95 kms. in 1960-61 to 239.78 kms. in 1974-75.

Indicator No.15 - Increase in Banking Facilities in proportion to population

Since the nationalisation of the banking business, the various banking companies have brought the field of agricultural & industrial development in their operational hold and are advancing loans to the agriculturists & small units of industries. The co-operative banks also made a remarkable increase in their business in rural areas. There were 10 scheduled banks & 12 co-operative banks functioning in this district during 1960-61. At the beginning of the year 1974, the number of scheduled banks rose to 20 while there were 45 co-operative banks in Buldana district. The following table gives the number of banks & population per banking office during the year 1960-61 & 1973-74.

Sr.No.:	Year	No. of Banking Offices	Banking Offices per lakh of population	Population per banking offices
1	2	3	4	5
1.	1960-61	22	2.08	48168
2.	1973-74	65	5.14	19430

From the above table it is seen that the number of banking offices per lakh of population increased from 2.08 in 1960-61 to 5.14 in 1973-74. During 1974-74, a banking office could cater the needs of 19430 persons -

as against 48168 persons in 1960-61. The banking facilities were available at 37 places in various parts in the district covering a population of 343395 in 1973-74.

Indicator No.16 - Prices

Since the declaration of emergency in the country 1962, Price Quotations for some important commodities from all district headquarters are collected on weekly basis by the District Statistical Office. The prices of different commodities are collected from selected shops and for selected varieties on each Friday and do not fully represent the district position, but the data may still prove useful as a broad indicator of the trend in changes in retail prices over a period of time in the district. The table below indicates the average prices of some important commodities collected at Buldana town for the year 1963 and 1974.

Sr. No.	Commodity	Unit	Average prices for the year		% increase (+) or decrease (-) during 1974 over 1963
			1963	1974	
			Rs.0.00		
1	2	3	4	5	6
1.	Rice (Medium)	Kg.	0.80	3.76	370.00
2.	Wheat "	"	0.56	2.13	230.35
3.	Jowar "	"	0.39	1.90	387.17
4.	Bajra "	"	0.49	1.57	220.40
5.	Gram Dal	"	0.57	2.98	422.80
6.	Tur Dal	"	0.79	3.10	292.40
7.	Mung Dal	"	0.70	2.17	295.71
8.	Sugar	"	1.21	4.76	293.38
9.	Gur	"	1.07	2.44	228.03
10.	Groundnut oil	"	1.95	9.04	363.58
11.	Goat meat	"	3.00	7.33	144.33
12.	Eggs	Dozen	1.87	5.08	171.65

1	2	3	4	5	6
13.	Turmeric	Kg.	2.05	4.52	120.48
14.	Dry Chillies	"	2.88	7.60	163.88
15.	Patato	"	0.54	1.30	140.74
16.	Onion	"	0.36	0.52	44.44
17.	Salt	"	0.12	0.29	141.66
18.	Plantains	Dozen	0.38	1.20	215.78
19.	Tea leaf	Kg.	7.09	13.84	95.20
20.	Kerosane	Litre	0.46	0.90	95.65
21.	Firwood	40 Kg.	1.62	3.57	120.37
22.	Dhoti	Pair	14.33	39.94	178.71
23.	Sari	1 Piece	25.84	39.71	53.67
24.	Supari	Kg.	7.37	10.29	39.62
25.	Cigarette	10 Nos.	0.34	1.32	238.23
26.	Bidi	25 Nos.	0.14	0.41	192.85

From the above table it will be seen that prices of all commodities have increased upto 1974 as compared to the prices in 1963. The increase is remarkable in almost all commodities and particularly in all food grains, sugar, groundnut oil, chillies, potato etc.

CHAPTER -IV

ANNUAL PLAN 1974-75

Adverse climate conditions during 1970-71 and unfavourable monsoon in 1971-72, 72-73, 73-74 have adversely affected the agricultural production which necessitate the reorientation of plan priorities and programme. After careful re-appraisal of plan priorities, specific programme for securing social Justice, promoting the economic progress of weaker section of community, backward areas have been initiated during the year 1974-75.

During the year 1974-75, an amount of Rs.262.57 lakhs was utilised under different district level schemes in this district, out of which Rs.217.71 lakhs were expended in the state sector and Rs.43.86 lakhs were spent in local sector.

The table No.67 of this publication given plan expenditure utilised under different development scheme & head & sub-headwise during 4th five year plan and 1974-75 implemented in this district under state sector and local sector separately. The following, table gives amount spent under different heads of development during the year 1974-75 in this district.

(Rs.in 0.00 lakhs)

Sr. No.:	Head of development	Amount incurred in 1974-75		
		State Sector	Local Sector	Total
1	2	3	4	5
1.	Agricultural Programme	55.18	11.13	66.91
2.	Co-operation & Community Development	0.16	4.22	4.38

1:	2	3	4	5
3. Irrigation and Power	39.83	-	-	39.83
4. Industry and Mining	7.70	-	-	7.70
5. Transport & Communication	9.50	11.39	-	20.89
6. Social Services	21.33	16.517	-	37.847
7. Miscellaneous	84.015	-	-	84.015
Total	217.715	43.857	-	261.572

Agricultural and allied programmes have been given high priority in the programmes for 1974-75. Out of the total amount incurred in 74-75, about 25.58 per cent of the total amount incurred was spent under agriculture programme followed by irrigation & Power (15.23 per cent), Social Services (12.94), transport and Communication (7.98), Industry & Mining (2.94) percent, Co-operation and Community Development (1.67 percent) and remaining including Employment Guarantee Scheme (32.13 percent) was spent.

The achievement under different heads of development are summarised below :-

Agricultural Programme/ Agricultural production

Under this sub-head expenditure of Rs.3.32 lakhs was on schemes relating to seed farms. Development of local manurial resources, Plant protection and integrated area development programme including community wells.

2) Minor Irrigation

Under this sub-head minor irrigation, subsidy was given to 14 new wells and 17 pumping sets, under the M.I. works, local sector tank work and L.I. schemes are in progress under the M.I. work state sector 21 works are in progress.

3) Soil Conservation

Under the sub-head soil conservation bunding of 19122 hectares was completed and plantation in 25 hectares for afforestation for soil conservation was completed.

4. Ayacut Development

Under this Programme 1967 hectares of land was developed and made suitable for irrigation purposes.

5) Animal Husbandary

The amount incurred under this sub-head was mainly on veterinary dispensary and aid centres.

6). Forest

Under the sub-head forest plantation, plantation of General utility timber in 40 hect, pre-monsoon works in 30 hectares, Farmforastry in 45 hectares, fodder development 40 hectare and plantation of quick growing species in 60 hect. was completed.

7) Power Project

Under this sub-head R.E.C.II 191 pumps and under Normal Development 500 pumps were conected.

8. Co-operation and Community Development

Under this programme subsidy to 2 societies was provided.

9) Community Development

The amount under this sub-head was incurred mainly on Community Development Block and A.N.P. in three panchayat samiti.

10) Industry and Mining

Under this sub-head Industry and mining Rs.7.70 lakhs were spent during the year 1974-75.

11) Transport and Communication

Under the programme at Road Development the work of construction at about 23 k.m. of road under state and local sector was completed.

Social Services12) General Education

Under this programme construction of 12 rooms of primary schools was completed during this year. For dev. and expansion of Non-Govt. Secondary schools, 5 schools were granted financial assistance during the year 1974-75. In addition to this scholarship to 42 - pupils, upgradation of I.E.M. school into full fledged school and financial assistance to 2 secondary schools for improvement of science teaching was provided during the year 1974-75.

13) Water Supply and drainage

Under this programme 24 rural water supply schemes are under progress and under special measures one scheme was completed and 3 urban waters supply schemes are under progress during the year 1974-75.

14. Welfare of Backward Classes:- Under this programme various schemes for the benefit of backward classes were implemented during the year 1974-75.
