PRÉFACE

La première édition de l'*Annuaire Statistique International* a été publiée comme l'un des documents de la Conférence économique internationale, au cours du printemps de 1927. Elle contenait des renseignements jusqu'à la fin de l'année 1925 ou de l'année 1926. Dans la présente édition, les chiffres ont été mis à jour jusqu'à la fin de 1927 ou de 1928.

Les principales sources auxquelles on a puisé sont indiquées dans les notes annexées aux tableaux. Ces sources, dans la majorité des cas, ont un caractère officiel. Lorsqu'on a eu recours à des renseignements de source non officielle, ou lorsqu'il y avait lieu de douter de l'exactitude des chiffres, les diverses administrations nationales ont, en règle générale, été priées de vérifier les chiffres en question. Il n'a toutefois pas été possible de faire vérifier de cette manière tous les chiffres les plus récents ou tous ceux qui se rapportent à des pays très éloignés du siège de la Société des Nations. Le fait que des chiffres obtenus à une source non officielle ont reçu l'approbation d'un gouvernement ne leur confère, toutefois, aucun caractère officiel. Les gouvernements eux-mêmes n'ont pu, de par la nature des choses, que confirmer que les sources non officielles les plus sûres avaient été employées et que les chiffres étaient conformes aux indications provenant des dites sources. Les lecteurs de cet *Annuaire* ne devront donc pas attribuer aux renseignements non officiels qui y sont reproduits une autorité plus grande que celle de la source dont ils sont tirés.

La plupart des renseignements groupés ci-après ont déjà été publiés ailleurs. Nous sommes redevables de toutes les statistiques agricoles à l'Institut international d'agriculture de Rome. Les tableaux publiés dans le présent *Annuaire* au sujet de l'agriculture présentent un caractère sommaire et les lecteurs qui s'intéressent à cet aspect de la documentation économique doivent se reporter à l'*Annuaire international de Statistique agricole*, que publie cet Institut et qui est beaucoup plus complet et plus détaillé. De même, tous ceux qui désirent étudier les diverses questions visées par les tableaux doivent se référer aux divers memoranda élaborés par la Société des Nations sur les finances publiques, les monnaies, les banques, le commerce international, la production, les prix, etc. On trouvera, à la fin du volume, une liste de ces memoranda.

Les statistiques sur les mouvements de migration, le chômage et les prix de détail ont été fournies, en totalité ou en partie, par le Bureau international du Travail.

Le *Bulletin mensuel de statistique*, établi par la Société des Nations (pour le contenu du *Bulletin*, voir page IV à la fin du volume), et le *Bulletin de Statistique agricole*, de l'Institut d'agriculture, publient mensuellement des chiffres concernant un certain nombre des catégories de statistiques comprises dans le présent volume.

Dans le *Mémorandum sur la production et le commerce* (1928), les statistiques relatives à la production des matières premières et des denrées alimentaires et au commerce mondial sont résumées de manière à donner une idée des mouvements

PREFACE

The first edition of the *International Statistical Year-Book* was published as one of the documents of the World Economic Conference in the spring of 1927 and contained data up to the end of the year 1925 or 1926. In this present edition, the figures have been brought up to the end of 1927 or 1928.

The main sources which have been employed are indicated in the notes to the tables. The majority of these sources are official. When unofficial sources have been employed or there have been any reasons for doubting the accuracy of the figures, the various national administrations have as a rule been asked to control the figures. It has, however, not proved possible to have all the most recent figures counter-checked in this manner or all of those relating to countries far distant from the seat of the League of Nations. The fact that figures obtained from an unofficial source have received the *visum* of a Government, however, does not render those figures in any way official. The Governments themselves have, from the nature of the case, not been able to do more than agree that the best unofficial sources have been employed and that the figures are in agreement with those sources. Users of the *Year-Book*, therefore, should not attribute to any unofficial compilations now reproduced any authority greater than that of the source from which they are obtained.

The greater part of the data now collected together has already been published elsewhere. For all the agricultural statistics, we are indebted to the International Institute of Agriculture at Rome. The agricultural tables here given are of a summary character, and those interested in this branch of economic knowledge should refer to the much fuller and more detailed *Annuaire international de Statistique agricole* published by the Institute. Similarly, reference should be made to the various memoranda prepared by the League of Nations on public finance, currency, banking, international trade, production, prices, etc., by those who desire to study the various subjects covered by the tables. A list of these memoranda will be found at the end of the volume.

The statistics on migration movements, unemployment and retail prices have been supplied in whole or in part by the International Labour Office.

In the *Monthly Bulletin of Statistics* compiled by the League of Nations (for contents, see page VIII at the end of the volume), and the *International Crop Reports* of the Agricultural Institute, are published monthly data for a number of the categories of statistics included in this volume.

In the *Memorandum on Production and Trade* (1928) the statistics of the output of raw materials and foodstuffs and of world commerce are summarised in such a manner as to portray the general movements in economic activity in different parts of the world. In the *Memorandum on International Trade and Balances of Payments, 1913 to 1927*, will be found figures much more detailed than those given here concerning

généraux de l'activité économique dans les différentes parties du monde. Le *Mémoire sur le commerce international et les balances des paiements* (1913 à 1927) renferme, au sujet du commerce mondial, des chiffres beaucoup plus détaillés que ceux du présent volume ; ce *Mémoire* contient, en outre, des exposés sur la balance internationale des paiements de vingt-cinq Etats.

Le tableau I qui contient des coefficients pour la conversion des diverses monnaies, poids et mesures, est destiné à servir de repère au lecteur. Les coefficients indiqués pour les changes ne sont pas absolument exacts dans tous les cas et ne visent pas à l'être ; toutefois, ils sont suffisamment précis pour permettre des comparaisons approximatives entre les chiffres donnés pour les différents pays. Lorsque l'on désirera obtenir une exactitude absolue et non pas un calcul rapide, il conviendra de se reporter, pour la conversion des monnaies, au tableau indiquant les cours des changes à New-York (N° 101).

Dans tout le volume, le signe « — » indique que le chiffre est zéro ou négligeable, le signe « ... », que les chiffres ne sont pas encore publiés et « . » que les renseignements ne sont pas accessibles. Dans tous les tableaux les chiffres décimaux sont précédés d'un point et non d'une virgule.

the trade of the world, and, in addition, statements of the international balance of payments of twenty-five States.

In Table I are given coefficients for converting various currencies and weights and measures. This table is designed as a sort of ready-reckoner for the use of the reader. The coefficients given for conversion of currencies are not, and are not intended to be, absolutely accurate in all cases; but they are sufficiently accurate for use when making rough comparisons between the figures relating to one country and those relating to another. When complete accuracy and not facility of calculation is the first consideration, reference should be made for the conversion of currencies to the table showing the New York rates of exchanges (No. 101).

Throughout this volume, the sign “—” indicates that the figure is nil or negligible, “...” that the figures are not yet published, and “.” that information is not available. Decimal figures are throughout preceded by a full-stop and not a comma.

NOTE. — Les coefficients ne sont pas précis et doivent être employés seulement en vue d'une conversion approximative. Ainsi la £ sterling, la £ égyptienne et a £ turque ont été considérées comme étant de valeur égale.

Les notes au tableau 101 indiquent la date d'entrée en vigueur des nouvelles parités. On a inséré dans le tableau C, en caractères italiques, les pays dont le système monétaire n'est pas définitivement ou entièrement rattaché à l'or.

Les monnaies utilisées dans les divers tableaux peuvent être converties d'une manière approximative, l'une dans l'autre pour une date quelconque en prenant la relation entre leurs cours du change exprimés en cents (ou les parités suivant le cas) tels qu'ils figurent dans le tableau 101.

Un tableau des parités réciproques exactes de presque tous les pays est publié régulièrement dans le *Bulletin mensuel de statistique* de la Société des Nations.

NOTE. — The coefficients are not exact and are only intended for use when rough approximation is required. Thus the £ sterling, the Egyptian pound and the Turkish pound are treated as of equal value.

The notes to Table 101 give the dates at which the new parities were established. In Table C, the countries whose monetary systems have not been finally or completely linked to gold have been inserted in italics.

The currencies used in the different tables of the Year-Book may be converted into any others for any date by taking the relation between their respective exchange rates expressed in cents (or their parities) as given in Table 101.

A table of exact reciprocal parities for almost all countries is published regularly in the *Monthly Bulletin of Statistics* of the League of Nations.

AFRIQUE.

NOTE. — Comme les évaluations plus récentes de la superficie de certains territoires diffèrent de celles d'avant-guerre, on a adopté généralement ces évaluations récentes en tenant compte des changements territoriaux depuis 1913. Ces changements étaient les suivants :

Afrique orientale allemande — à présent divisée en Ruanda-Urundi sous mandat belge et en Tanganyika sous mandat britannique. Une petite fraction du territoire a été incorporée au Mozambique.

Cameroun allemand — un territoire d'environ 380.000 km² a été incorporé en 1919 à l'Afrique équatoriale française. Le reste est en partie sous mandats britannique et en partie sous mandat français.

Togo allemand — à présent sous mandat britannique et français.

Kénia, appelé autrefois Afrique orientale britannique — environ 98.000 km² ont été détachés en 1919 en faveur de la Somalie italienne ; mais on y a incorporé 41.000 km² faisant partie de l'Uganda.

Afrique Sud-ouest allemande — a été placée en 1919 sous mandat de l'Afrique du Sud sans changement de territoire.

Quant à la population, elle est dans certains cas purement hypothétique, les recensements faisant défaut ou s'appliquant seulement à la population blanche. L'incertitude est particulièrement grande en ce qui concerne l'Éthiopie, le Liberia, le Congo belge, le Maroc espagnol et le Soudan et, en ce qui concerne plus spécialement les chiffres d'avant-guerre, dans le cas de l'Afrique équatoriale française, du Sahara et des colonies espagnoles et italiennes.

AMÉRIQUE.

¹ Les chiffres pour la population de certain pays, et spécialement ceux d'avant-guerre, sont très incertains. Ceci s'applique particulièrement à la majorité des pays de l'Amérique centrale, à la Bolivie, à la Colombie, au Brésil (chiffre d'avant-guerre), à l'Équateur et au Pérou. Aussi, dans certains cas, les écarts entre les chiffres de 1913 et ceux de 1927 s'expliquent-ils par la nature des estimations.

² Partie du Groenland libre de glace.

ASIE.

NOTE. — Les estimations sont très incertaines dans le cas de l'Afghanistan, de l'Arabie, de Khiva, de Boukhara, de la Chine, de la Perse et des Indes néerlandaises (recensement de 1905). Les totaux pour le continent sont, par conséquent dans une large mesure hypothétiques.

¹ Néjd, Oman, Koweït, Hedjaz, Yemen. Les deux derniers ont été exclus des chiffres pour 1913 vu qu'ils sont compris dans les chiffres d'avant-guerre pour la Turquie. Les chiffres pour la superficie en 1913 ont été calculés indirectement en tenant compte des changements de chiffres pour la Turquie et des données pour les territoires non-arabes n'en faisant plus partie. Toutes ces données sont incertaines.

² Estimation du Service des douanes maritimes chinoises. Les estimations des autres autorités compétentes varient considérablement.

³ Estimation citée dans *Statement exhibiting the Moral and Material Progress and condition of India, 1927-1928*.

⁴ Khiva et Boukhara qui étaient sous la souveraineté russe, font partie à présent de l'U. R. S. S. Le total continental de 1927 n'en tient pas compte, vu qu'elles sont déjà comprises dans celui pour l'Europe avec l'U. R. S. S.

⁵ Y compris le Labuan, les Iles Christmas et Cocos-Keel.

EUROPE.

NOTE. — Comme il n'est pas possible de répartir avec certitude entre les continents les données pour l'Union des Soviets (voir note ¹ ci-dessous), celles-ci et le total continental comprennent la Russie d'Asie. La différence entre les deux totaux pour la population en 1913, de même qu'entre les données d'après-guerre et d'avant-guerre pour la superficie, provient de divergences entre les estimations d'avant-guerre et celles faites à la suite des changements territoriaux survenus en Europe et du fait que Khiva et Boukhara qui appartiennent à l'U. R. S. S. (territoire d'Asie) ne faisaient pas partie de l'ancien Empire russe. Le territoire de ces derniers était de 277.000 km² et leur population en 1913, peut être évaluée à 2,5 millions.

La population de l'Europe sans la Russie d'Asie dans les limites de 1913, peut être évaluée à 460 millions en 1913 et approximativement à 487 millions en 1927.

¹ Y compris les superficies maritimes.

² D'après l'*Annuaire statistique de la Pologne 1920-21*, les chiffres russes d'avant-guerre auraient été surestimés ; le chiffre donné dans le tableau pour 1913 a été calculé en supposant pour la Pologne russe une population de 12 millions.

³ La division administrative de l'U. R. S. S. ne permet pas de faire une distinction entre les territoires d'Asie et d'Europe identique à celle de l'ancien Empire russe. La population des territoires européens de l'Empire russe peut être estimée pour fin 1913 à 135,3 millions et celle des territoires d'Asie à 25,9 millions. La population des territoires européens en 1913, déduction faite des territoires détachés à la suite de la guerre, peut être estimée à 111,3 millions. La population des territoires européens de l'U. R. S. S., non compris le Dagestan et la Transcaucasie, a été d'après le recensement 1926 de 115,3 millions.

Tous les chiffres pour 1913 ont été calculés en partant de l'estimation faite par les autorités soviétiques pour la population en 1913 du territoire actuel de l'Union. Ce chiffre de 139,7 millions publié dans le *Soviet Union Year-Book, 1928*, est de beaucoup inférieur à celui obtenu en déduisant des données d'avant-guerre, la population estimée des anciennes provinces russes n'appartenant pas à l'Union ; il comprend par contre Khiva et Boukhara qui ne faisaient pas partie de l'Empire russe.

Océanie.

¹ La diminution dans le chiffre de la population de 1911 à 1927 est due en grande partie aux différences dans les estimations de la population indigène.

² Mandat de l'Empire britannique, exercé à présent par l'Australie.

AFRICA.

NOTE. — Recent estimates of the area of certain territories differ from the pre-war estimates; the former have generally been adopted, account being taken of the territorial changes since 1913 which have been as follows:

German East Africa — now divided into Ruanda-Urundi under Belgian mandate and Tanganyika under British mandate, except for a small portion of the territory transferred to Mozambique.

German Cameroons — an area of 380,000 sq. km. was transferred to France in 1919 and incorporated in French Equatorial Africa. Of the remainder, part is under French and part under British mandate.

German Togoland — now divided into British and French mandated territories.

Kenya, formerly British East Africa — with the exception of approximately 98,000 sq. km. which were transferred to Italian Somaliland in 1919. It now includes, in addition, about 41,000 sq. km. previously forming part of Uganda.

German South-West Africa — the whole of this territory was placed under South-African mandate in 1919.

The population figures are in certain cases hypothetical in the absence of any census; in other cases, the censuses were either incomplete or applied to the white population only. The figures most affected are those for Ethiopia, Liberia, Belgian Congo, Spanish Morocco and the Sudan and, more especially for pre-war years, those for French Equatorial Africa, the Sahara and the Spanish and Italian colonies.

AMERICA.

¹ The population figures of certain countries, more especially for pre-war years, are subject to a wide margin of error. This applies in particular to the majority of the Central-American countries, to Bolivia, Colombia, Brazil (pre-war figure), Ecuador and Peru. In certain cases, the differences between the 1913 and the 1927 figures may be explained by the nature of the estimates made.

² Part of Greenland free from ice.

ASIA.

NOTE. — The estimates for Afghanistan, Arabia, China, Persia and the Dutch East Indies (1905 census) are subject to a wide margin of error. The totals for the continent are therefore to a great extent hypothetical.

¹ Nejd, Oman, Koweit, Hedjaz, Yemen. Hedjaz and Yemen have been excluded from the 1913 figures as they are included in the pre-war figures for Turkey. The estimates for the area in 1913 have been calculated indirectly, account being taken of changes in Turkish territory and of the area of non-Arabian territories no longer forming a part of Turkey. They are not more than rough approximations.

² Estimates of the Chinese Maritime Customs Service. The estimates of other competent authorities vary considerably.

³ Estimate quoted in *Statement exhibiting the moral and material progress and condition of India, 1927-1928*.

⁴ Khiva and Bokhara which were under Russian protectorate, belong at present to the U. S. S. R. The continental total for 1927 does not include them, their figures being included under Europe with U. S. S. R.

⁵ Including Labuan and Christmas and Cocos-Keeling Islands.

EUROPE.

NOTE. — As it is not possible to separate accurately the data for the U. S. S. R. relating to European and Asiatic territories (see note 3 below), the figures for the U. S. S. R. and the Continental total include Asiatic Russia. The differences between the two Continental totals for population in 1913 and between the post-war and pre-war area totals arise from discrepancies between pre-war estimates and those made after the territorial changes in Europe and from the fact that Khiva and Bokhara, which belong to the U. S. S. R. (Asiatic territory), were not included in the former Russian Empire. The area of these two provinces was 107,000 sq. miles and their population in 1913 is estimated at some 2¼ millions. The population of Europe, excluding Asiatic Russia (1913 territories), is estimated at approximately 460 millions in 1913 and approximately 487 millions in 1927.

¹ Including inland waters.

² According to the *Polish Statistical Year-Book 1920-21*, the Russian pre-war figures were over-estimates. The figure given in the table for 1913 has been calculated on the assumption that the population of Russian Poland was 12 millions.

³ The administrative divisions of the U. S. S. R. do not allow of a distinction being made between Asiatic and European territories identical with that of the old Russian Empire. The population of the European territories of the Russian Empire at the end of 1913 is estimated at about 135.3 millions and that of the Asiatic territories at 25.9 millions. The population of the European territories in 1913 less the areas detached as a result of the War was, it is believed, about 111.3 millions. According to the census of 1926, the population of the European territories of the U. S. S. R. excluding Daghestan and Transcaucasia was 115.3 millions.

All the figures for 1913 have been calculated on the basis of the estimate made by the Soviet authorities of the 1913 population of the present territory of the Union. This figure (139.7 millions), which is published in the *Soviet Union Year-Book 1928*, is very much lower than that obtained by subtracting from the pre-war figures the estimated population of the former Russian provinces which do not belong to the Union. On the other hand, it includes Khiva and Bokhara, which were not included in the Russian Empire.

OCEANIA.

¹ The drop in the population figure from 1911 to 1927 is largely due to differences in estimates of the native population.

² Mandate of the British Empire, at present exercised by Australia.

* Chiffre provisoire. — Provisional figure.

a) Moyenne de 1910-14 — Average for 1910-14.

¹ Non compris les bédouins.

² Il n'existe pas de relevés complets pour tout le pays. Le territoire d'enregistrement des naissances n'est pas identique à celui d'enregistrement des décès. Les deux territoires sont en outre en progression constante. La population du premier, en 1926, formait 76,8 % de la population totale, et celle du second, 89,8 % du total. Les décès sur le territoire d'enregistrement des naissances s'élevaient, en 1926, à 1,093,511.

³ Non compris les Etats indigènes. Territoire d'enregistrement légèrement inférieur au territoire total de l'Inde britannique.

⁴ Ancien territoire.

⁵ Territoire actuel, non compris le Burgenland.

⁶ A partir de 1925 y compris Eupen et Malmédy.

⁷ Non compris les provinces cédées par la Turquie.

⁸ A partir de 1921, y compris Slesvig.

⁹ Ancienne province estonienne russe.

¹⁰ Territoire actuel.

¹¹ Y compris Klaipeda (Memel).

¹² Le chiffre d'avant-guerre se rapporte à l'année 1912 et au territoire total d'avant-guerre, y compris l'Asie. Les chiffres donnés pour R. S. F. S. R. (République Soviétique Russe en opposition aux autres Républiques formant l'Union) se réfèrent à un territoire qui, sans constituer la totalité de la République Russe, est identique pour les différentes années; ils ne comprennent en outre pas les territoires d'Asie. Des chiffres approximativement complets pour l'Union ont pu être obtenus seulement pour l'année 1926 :

¹ Excluding bedouins.

² No statistics are available for the whole country, but the number of States for which statistics are available is continually increasing. The registration area for births is not identical with that for deaths. The population included within the former area in 1926 was 76.8 %, and that included within the latter 89.8 % of the total population. The number of deaths in 1926 was for the births registration area 1,093,511.

³ Excluding Indian States. Registration area slightly less than the total area of British India.

⁴ Pre-war territory.

⁵ Present territory, excluding Burgenland.

⁶ Since 1925, including Eupen and Malmédy.

⁷ Excluding provinces ceded by Turkey.

⁸ Since 1921, including Sleswig.

⁹ Former Russian province of Estonia.

¹⁰ Present territory.

¹¹ Including Klaipeda (Memel).

¹² The pre-war figure refers to 1912 and to the whole pre-war territory, including Asiatic Russia. The figures given for the R. S. F. S. R. (the Russian Federation, as distinct from the other republics composing the Union) refer to a territory which, although not comprising the whole of Soviet Russia, is identical for the different years. They do not include Asiatic territories. Approximately complete figures could only be obtained for the year 1926. [For these figures, see the French text of this note.]

Certains totaux du tableau diffèrent des données du tableau 2 par le fait que : pour l'Algérie, l'armée est exclue ; dans d'autres cas, le territoire envisagé est légèrement inférieur, par exemple pour l'Inde et l'U. R. S. S.

Les chiffres d'avant-guerre, à l'exception de ceux pour la Hongrie, la Tchécoslovaquie et l'U. R. S. S., se réfèrent aux territoires tels qu'ils étaient au moment du recensement. Dans certains autres cas, on a donné deux séries de chiffres se rapportant à l'ancien et au nouveau territoire.

Certain totals of the table differ from data given in Table 2 : for Algeria, the army is excluded ; in other cases, the area considered is slightly less, e.g., India and U.S.S.R.

All pre-war figures, with the exception of those for Hungary, Czechoslovakia and U.S.S.R., refer to the territories as they were at the moment of the census. For several countries, two series of figures are given, one for the former territory and another for the present territory.

SOURCE. — Recensements de la population des divers pays.

Notes. — Comme les classifications utilisées varient souvent d'un pays à l'autre et parfois pour le même pays d'un recensement à l'autre, les chiffres donnés dans le tableau ne présentent pas une comparabilité absolue. Les données originales ont été reclassées dans la mesure du possible afin de permettre une comparaison au moins dans les grandes lignes.

La plupart des recensements sont basés sur la classification par occupations et non pas par classes d'industries, c'est-à-dire que toutes les professions similaires sont groupées ensemble, sans égard à la destination finale ou à la classe d'industrie à laquelle elles s'appliquent. Plusieurs pays, entre autres les Etats-Unis d'Amérique, l'Union de l'Afrique du Sud, le Royaume-Uni, le Canada etc., publient à présent les résultats selon les deux classifications. La classification adoptée dans certains pays et surtout pour les recensements d'avant-guerre, tout en étant en principe une classification par occupation est de fait souvent hybride. Les chiffres donnés dans le tableau reposent, à l'exclusion de ceux pour le Chili, en principe sur la classification par occupations. Dans plusieurs cas on a inséré des chiffres élaborés suivant les deux classifications.

Les recensements portent tantôt sur la population entière à partir d'un certain âge, tantôt seulement sur les individus ayant une profession lucrative. Parfois, on prend en considération seulement la population active, ou bien on y ajoute la population passive c'est-à-dire la famille et les autres dépendants. Afin de rendre les chiffres plus aisément comparables entre eux, on a fait abstraction dans presque tous les cas : 1° des dépendants et 2° des individus n'exerçant pas une profession active et lucrative, par exemple, des rentiers, des étudiants, des détenus, etc., de sorte que les chiffres, sans être toujours absolument comparables, représentent dans la mesure du possible la population active ayant une profession lucrative.

La composition originale des groupes d'occupations varie selon les pays et dépend souvent non seulement du degré de développement économique, mais aussi de leur organisation administrative. Un pays centralisé, dont le gouvernement exerce des fonctions réservées ailleurs à l'initiative privée, groupera les professions de manière différente que ne le feront les autres pays. Là encore, on a cherché à rendre les données plus comparables en les regroupant.

Le groupe « autres transports et communications » du tableau contient l'exploitation des télégraphes, des téléphones et des postes, même dans le cas des pays où celle-ci figure dans les relevés sous « administration publique ». Pour toutes ces raisons, les chiffres relatifs à l'administration publique ne renseignent nullement sur le nombre d'individus au service de l'Etat. Le groupe « professions libérales » est particulièrement mal délimité et sa signification varie considérablement d'un pays à l'autre. Le groupe « Services domestiques » comprend généralement les domestiques proprement dits ainsi que toutes les personnes s'occupant du service personnel (par exemple, coiffeurs, infirmières, etc.).

¹ La rubrique « administration publique » comprend pour la Tunisie le service des postes, des télégraphes et des téléphones et pour l'Irlande (recensement de 1911) le service des postes.

² Pour le Mexique, l'Ecosse (recensement de 1921), et, dans une grande mesure, pour l'Etat libre d'Irlande (recensement de 1926), et pour les Etats-Unis d'Amérique, les commis figurent dans les relevés sous une rubrique spéciale et non pas séparément d'après les différentes branches économiques qui les occupent. Vu l'impossibilité de faire une répartition adéquate, les chiffres y relatifs ont été inclus dans la rubrique « autres et non spécifiés ». Pour les Etats-Unis, les chiffres de cette rubrique représentent exclusivement des commis non répartis; les commis de magasin sont toutefois incorporés sous la rubrique « commerce ». Pour le Mexique, les « commis » semblent comprendre des fonctionnaires.

³ Tous les chiffres pour le Chili et certains chiffres pour l'Angleterre et le Pays de Galles, la France, la Pologne, la Suède et la Nouvelle-Zélande se réfèrent à la classification par industries. Pour l'Angleterre et le Pays de Galles, les données ont été élaborées d'après les calculs du professeur A. Bowley dans *London and Cambridge Economic Service, Special Memorandum*, N. 17 A.

⁴ Changement de territoire.

⁵ Total de la population active et de la population passive aidant au chef de ménage.

⁶ Y compris les rentiers.

⁷ 1897 : Ancien territoire russe. En 1921 : territoire actuel moins la Haute Silésie et une partie de la province de Vilno.

SOURCE. — Censuses of population for the various countries.

Notes. — As the classifications employed frequently vary from country to country, and even from census to census in the case of one and the same country, the figures shown in the table are not strictly comparable. The original data have, as far as possible, been reclassified to allow of comparison at least on broad lines.

The basis taken in most censuses is classification by occupation and not by industrial groups, i.e., all similar trades and professions are grouped together irrespective of the industrial group in which persons following these trades or professions are actually employed. A number of countries, including the United States of America, the Union of South Africa, the United Kingdom and Canada, now publish results based on the two forms of classification. The classification adopted in certain countries, particularly for pre-war censuses, while in principle by occupation, is in point of fact frequently of a mixed type. The figures given in the table, except those for Chile, are in principle based on classification by occupation. In several cases, figures established according to two classifications have been inserted.

The censuses sometimes relate to the entire population over a certain age, and sometimes only to persons gainfully occupied. Occasionally only the "breadwinners" are considered, while in other cases the dependants, family or other, are included. In order to render the figures, as far as possible, comparable, (1) dependants and (2) persons not gainfully occupied, e.g., rentiers, students, inmates of prisons, etc., have been omitted in most cases. The figures are thus confined, as far as possible, to the gainfully employed, but are not absolutely comparable.

The original composition of the occupational groups varies from country to country, and often depends, not only on the degree of economic development, but also on the administrative organisation. Countries with a centralised administration and those in which the Government exercises functions left elsewhere to private enterprise will group occupations differently from the other countries. Again, in order to render the data more comparable, the figures have been regrouped.

The group "Other transport and communications" in the table covers the telegraph, telephone and postal services, even in the case of countries where these services are shown in the returns under "Public administration". For these reasons the figures relating to the public administration give no information as to the number of persons employed by the State.

The meaning given to the expression "liberal professions" (or professional service) varies greatly from country to country. The "domestic service" group generally includes servants strictly so called and also individuals performing personal service (e.g., hairdressers, nurses, etc.).

* The heading "Public Administration" includes the post office, telegraph and telephone services in the case of Tunis and the post office in the case of Ireland (census of 1911).

† For Mexico, Scotland (census of 1921), to a large extent the Irish Free State (census of 1926) and the United States of America, clerks are shown in the returns under a special heading, and not under the individual branch of business in which they are employed. As it was impossible to split up the figures, they have been included under the heading of "Other and unspecified". The figures for the United States under this heading embrace only these unclassified clerks; but "clerks in stores" are shown under "Trade". In Mexico, "clerks" include a proportion of officials.

‡ All the figures for Chile, and certain figures for England and Wales, France, Poland, Sweden and New Zealand refer to the classification by industries. Those for England and Wales are based on the calculations of Professor A. Bowley in the *London and Cambridge Economic Service, Special Memorandum, N.17.A.*

§ Change of territory.

¶ Total of breadwinners and dependants assisting head of household.

• Including rentiers.

† 1897: Former Russian territory. In 1921: present territory less Upper Silesia and some districts of Vilno.

SOURCES. — Statistiques officielles communiquées par le Bureau international du Travail.
 SOURCES. — Official statistics compiled by the International Labour Office.

NOTE. — Les migrations transocéaniques comprennent toute migration par voie de mer en provenance d'une des cinq parties du monde et à destination d'une autre, ainsi que les migrations entre l'Amérique du Sud et l'Amérique du Nord. Les migrations continentales comprennent toute migration par voie de terre à l'intérieur de chaque partie du monde, l'Amérique du Nord et l'Amérique du Sud étant prises séparément. Ainsi, l'émigration d'Australie vers la Nouvelle-Zélande ou de Malte vers un pays européen est considérée comme étant continentale.

Comme l'immigration des nationaux représente plus ou moins le rapatriement des nationaux émigrés temporairement, la balance entre les deux catégories de « nationaux » représente l'émigration nette. De même, la différence entre le nombre des immigrants étrangers et celui des émigrants étrangers donne l'immigration nette.

La balance des émigrations transocéaniques des nationaux par rapport à la population donnée dans la partie C du tableau a été calculée, d'une part, sur la base des chiffres donnés dans la partie A et, d'autre part, sur la base des chiffres relatifs à la population totale donnés dans les tableaux 2 et 6 du présent Annuaire et des tableaux correspondants de l'édition précédente.

Les chiffres moyens donnés sous la rubrique 1920-1924 représentent les moyennes des chiffres disponibles pendant cette période.

Pour plus de détails et de notes explicatives, voir *Les mouvements migratoires 1925-1927* publiés par le Bureau international du Travail, et l'introduction à la même publication pour 1920-1923. Des chiffres mensuels pour 37 pays et territoires sont publiés trimestriellement dans la *Revue internationale du Travail*.

NOTE. — Oversea migrations include all migration by sea from one of the five continents of the world to another, as well as migration between South and North America. Continental migrations include all migration by sea or by land within each continent, North and South America being taken separately. Thus, emigration from Australia to New Zealand or from Malta to a European country is considered as continental.

As the immigration of nationals represents mainly repatriation of nationals who had emigrated temporarily, the balance between the two categories of "nationals" represents the net emigration. In the same way, the difference between the number of foreign immigrants and of foreign emigrants gives the net immigration.

The balance of oversea emigrations of nationals, in relation to the population, given in part C of the table, has been calculated on the basis of the figures for migrations given in part A, and of the figures of whole population given in table 2 and 6 of the present Yearbook and the corresponding tables of the preceding edition.

The average figures given in the column 1920-1924 represent averages of figures available during this period. For details see *Migration Movements, 1925-1927* published by the International Labour Office and the introduction to the same publication for 1920-23. Monthly figures are published quarterly in the *International Labour Review*.

a) Année fiscale. Fiscal year. — b) 1926 — c) 31. V-31. XII.

¹ Passagers.

² Non compris une émigration clandestine assez considérable par Gibraltar et les ports portugais.

³ Jusqu'à 1922, y compris l'Irlande, à partir de 1923 seulement l'Irlande du Nord. Le chiffre donné, pour l'Etat libre d'Irlande, comme moyenne annuelle de 1920-1924 se réfère seulement à 1924.

⁴ En provenance directe de l'Espagne, de la France, de l'Italie et du Royaume-Uni.

⁵ Non compris Cambodge et Cochinchine.

¹ Passengers.

² Not including the considerable clandestine emigration via Gibraltar and the Portuguese ports.

³ Until 1922, including Ireland; since 1923, Northern Ireland only. The figure given for the Irish Free State in the column for the average of 1920-1924 refers to 1924 only.

⁴ Immigration direct from Spain, France, Italy and United Kingdom.

⁵ Excluding Cambodia and Cochln-China.

NOTES AU TABLEAU 10.

Source: *Annuaire International de Statistique agricole, 1927-1928* (Institut International d'Agriculture).

Note. — Les données se rapportent parfois globalement à plusieurs espèces de bétail. On a généralement attribué dans ces cas les données globales à l'espèce qui paraissait être numériquement la plus importante. Ainsi la rubrique des chevaux comprend parfois des ânes et des mulets, celle du bétail peut comprendre des buffles, etc.

Les estimations ou recensements des diverses espèces d'animaux ne se font pas toujours à la même date. Quand les colonnes relatives aux années contiennent plus d'un chiffre, cela indique que certaines données se rapportent à une année et certaines autres à une autre année.

¹ Non compris les chevaux appartenant à l'armée.

² Animaux soumis à l'impôt.

³ Seulement les chevaux appartenant aux Européens.

⁴ Y compris l'espèce caprine.

⁵ Animaux se trouvant dans des fermes.

⁶ Données se rapportant au 96 % du nombre total des communes.

⁷ Territoires d'Europe et d'Asie.

⁸ Les données d'avant-guerre se rapportent au territoire actuel. Toutefois le chiffre d'avant-guerre pour l'Autriche, l'Estonie et la Lettonie se rapporte à un territoire légèrement inférieur.

⁹ Chevaux employés dans l'agriculture.

¹⁰ Les chiffres d'avant-guerre se rapportent à l'ancien territoire.

¹¹ Non compris le territoire envahi.

FOOTNOTES TO TABLE 10.

Source: *International Year-Book of Agricultural Statistics, 1927-28* (International Institute of Agriculture).

Note. — Some of the figures given are aggregates of several species of live-stock. Whenever the preponderant species is known, the collective figure is assigned to that species. Thus the figures referring to horses may include mules and asses, those referring to cattle may include buffaloes, etc.

The estimates or censuses of the various species of live-stock are not necessarily made at the same dates. Whenever the columns referring to dates contain more than one figure, it means that some data refer to one year and some to another.

¹ Excluding horses belonging to the army.

² Animals registered for fiscal purposes.

³ Horses belonging to Europeans only.

⁴ Including goats.

⁵ Solely animals on farms.

⁶ Data relating to 96 % of the total number of communes.

⁷ Europe and Asia.

⁸ The pre-war data refer to present territory. The pre-war figures for Austria, Estonia and Latvia refer, however, to a somewhat smaller territory.

⁹ Horses employed in agriculture.

¹⁰ The pre-war data refer to the old territory.

¹¹ Excluding invaded territory.

* Données provisoires ou estimations.

¹ Rio-Grande-do-Sul seulement.

² Non compris la Chine.

³ Territoire d'avant-guerre.

⁴ Territoire d'après-guerre.

⁵ En tenant compte de la Chine ainsi que de quelques autres pays de moindre importance, on peut estimer la production mondiale en chiffres largement approximatifs entre 1.200 et 1.300 millions de quintaux.

⁶ Preliminary figures or estimates.

⁷ Rio Grande do Sul only.

⁸ Excluding China.

⁹ Pre-war territory.

¹⁰ Post-war territory.

¹¹ If China and certain other producing countries of minor importance are taken into account, the total world production may be very roughly estimated at 1,200 to 1,300 million quintals.

* Données provisoires ou estimations.

¹ Culture d'été seulement.

* Non compris la Chine.

* Cultures des Européens seulement.

* La moyenne de 1909/10 à 1913/14 se rapporte à 15 provinces.

* Territoire d'après-guerre.

* Territoire d'avant-guerre.

² En tenant compte de la Chine, on peut estimer la production mondiale en chiffres largement approximatifs entre 1.200 et 1.300 millions de quintaux.

* Preliminary figures or estimates.

¹ Summer crop only.

* Excluding China.

* Cultivation by Europeans only.

* The 1909/10 to 1913/14 average comprises 15 provinces.

* Post-war territory.

* Pre-war territory.

² Taking China into account, the total world production may be very roughly estimated at 1,200 to 1,300 million quintals.

* Données provisoires ou estimations.

¹ Cannes entrées dans les fabriques.

² Les chiffres pour la production de l'Inde, l'Indochine et les Philippines ne sont pas disponibles. La superficie totale plantée en canne à sucre pour ces pays représentait pour 1909-1913 une moyenne d'environ 85 %, pour 1920-1924 81 % et en 1925 80 % de la superficie totale de l'Asie plantée en canne à sucre à l'exclusion de la Chine pour laquelle elle n'est pas connue. La production globale de canne à sucre des autres pays asiatiques montrés dans le tableau était de 170,785,000 quintaux en moyenne pour 1909-1913, 219,435,000 quintaux en 1920-1924 et peut être estimée à 240,000,000 de quintaux pour 1925.

³ Données incomplètes.

• Preliminary figures or estimates.

¹ Sugar cane entered in factories.

² Production figure not available for British India, Indo-China and the Philippines, the aggregate cane sugar area of which represented on an average in 1909-1913 about 85 %, in 1920-1924 81 % and in 1925 80 % of the total sugar cane area of Asia, excluding that of China, which is not known. The aggregate sugar cane production of the remaining Asiatic countries shown in the table was 170,785,000 quintals on an average in 1909-1913, 219,435,000 quintals in 1920-1924 and may be estimated at 240,000,000 quintals in 1925.

a) 1914. b) 1911-1915.

* Estimations.

¹ Non compris la plus grande partie de la production de la Chine.

² Colza et moutarde.

³ On ne dispose pas de chiffres pour la production de l'Allemagne avant 1927. Des chiffres estimatifs établis d'après les surfaces cultivées ont été ajoutés aux totaux (milliers de quintaux) pour 1909-1913 : 400 ; pour 1920, 1.400 ; pour 1921, 1.250 ; pour 1922, 600 ; pour 1923, 750 ; pour 1924, 600 ; pour 1925, 550 ; 1926, 450.

⁴ Non compris la Russie pour laquelle on ne possède pas de chiffres relatifs à la période d'après-guerre. En 1913, la production de l'ancien territoire a été de 574.000 quintaux, dont une partie importante est portée à la Pologne dans le tableau.

⁵ Territoire d'après-guerre.

⁶ Territoire d'avant-guerre.

⁷ Seulement la variété d'hiver.

* Estimates.

¹ Excluding the greater part of the production of China.

² Including mustard.

³ No figures for German production before 1927 are available. The following estimates, based on area under cultivation, are included in the totals (quintals 000's) 1909/13 : 400 ; 1920, 1,400 ; 1921, 1,250 ; 1922, 600 ; 1923, 750 ; 1924, 600 ; 1925, 550 ; 1926, 450.

⁴ Excluding Russia, for which country no post-war figures are available. The 1913 production within the old frontiers was 574,000 quintals, a large portion of which is shown under Poland in the table.

⁵ Post-war territory.

⁶ Pre-war territory.

⁷ Winter rape-seed only.

* Estimation ou chiffre provisoire.

¹ Aux exportations de coprah ont été ajoutées les exportations d'huile de coco des pays producteurs de coprah, convertie en terme de coprah à un taux correspondant au rendement moyen de l'huile qui est d'environ 63 %. Les totaux pour les continents comprennent les exportations de certains petits pays producteurs non donnés séparément. Non compris le commerce de transit de certains de coco extraite du coprah importé.

² Excédent de l'exportation.

* Estimate or provisional figure.

¹ To the exports of copra have been added the exports from copra-producing countries of coconut oil converted into terms of copra at a rate corresponding to the average yield of oil, which is about 63%. The totals for the continents cover the exports and some Malay States, and the exports from other countries (e.g., Australia) of coconut oil pressed from imported copra have been excluded.

² Export surplus.

* Estimation. — Estimate. a) 1914. b) 1913.

¹ Chiffres estimatifs calculés d'après la production de cocons, les chiffres de production de la soie grège n'étant pas disponibles.
² On ne dispose pas pour ces pays de chiffres relatifs à la production. Tandis que leur exportation d'avant-guerre atteignait en moyenne environ 8.125 tonnes, leur production, évaluée sur la base de 1 kilo de soie brute par 12 kilos de cocons, atteignait probablement 75 à 80 mille tonnes. — La production de soie brute, au cours des années précédant la guerre, a ainsi probablement atteint 90 à 95 mille tonnes pour l'Asie seule, et 95 à 100 mille tonnes pour le monde entier. ³ Exportations du Bengale et du Kashmir. ⁴ Exportations des ports principaux. ⁵ Comprend l'Autriche, la Hongrie, le Royaume S.H.S., la Roumanie et la Bulgarie.

¹ Estimated on basis of production of cocoons, raw silk production figures not being available.

² Figures for production of these countries not available. Whereas their pre-war exports averaged about 8,125 tons, the production of these countries estimated at the rate of 1 kg. raw silk per 12 kg. of cocoons was probably between 75 and 80 thousand tons. The production of raw silk in the years preceding the war therefore probably reached 90 to 95 thousand tons for Asia alone and 95 to 100 thousand tons for the whole world. ³ Exports from Bengal and Kashmir. ⁴ Exports from principal harbours. ⁵ Includes Austria, Hungary, Kingdom of the Serbs, Croats and Slovenes, Roumania and Bulgaria.

* Estimation ou chiffre provisoire.

¹ Y compris papier de toiture, etc.

* Chiffres de recensement provisoires.

* Carton non donné séparément, compris dans le chiffre de papier.

* Estimation basée sur une indication générale de baisse de la production depuis 1925.

* Y compris l'estimation de la production de carton de construction, représentant environ 6.000 tonnes en 1927.

* Y compris l'estimation de la production de carton de paille qui n'est pas donnée dans les statistiques d'après-guerre.

* Production de 1924; des chiffres plus récents ne sont pas disponibles, mais la production ne paraît pas avoir augmenté beaucoup dans les années 1925-1927.

* Production dans les frontières d'après-guerre.

* La France est le principal producteur compris dans ce groupe; les chiffres donnés sont très approximatifs.

¹⁰ Non compris certains pays de faible production, et qui ne sont pas situés en Europe et dans l'Amérique du Nord et dont la production globale est négligeable.

* Estimate or provisional figure.

¹ Including building and roofing paper.

* Provisional census figures.

* Paper boards not shown separately; included in the column for paper.

* Estimate based on a general indication of a fall in the production since 1925.

* Includes estimate of the production of building boards representing about 6,000 tons in 1927.

* Includes estimates of the production of straw board not shown in post-war statistics.

* Production in 1924, figures for later years not available but production would appear not to have increased very substantially in the years 1925-1927.

* Production within post-war frontiers.

* France is the largest producer included in this group; the figures shown are rough estimates.

¹⁰ Excluding certain minor production countries outside Europe and North America, the production of which is negligible.

a) 1910.

* Estimations provisoires.

¹ Total estimé de la production dans diverses régions du continent.

² En plus du Brésil, le caoutchouc provient du Pérou, de la Bolivie et du Venezuela ; ces derniers pays ont probablement produit en 1913 de 6 à 7 mille tonnes environ et considérablement moins dans les années d'après-guerre. L'estimation de la production globale de ces pays est comprise dans les totaux du continent.

* Provisional estimates.

¹ Estimated total of the production in various regions of the continent.

² Apart from Brazil, rubber is obtained from Peru, Bolivia and Venezuela, which probably produced about 6 to 7 thousand tons in 1913 and considerably less in post-war years. An estimate of their aggregate production is included in the totals for the continent.

* Estimations ou chiffres provisoires.

¹ Production faible dans l'Union Sud-Africaine, dont les chiffres exacts ne sont pas disponibles.

² Pour les années 1920-1926, des chiffres incomplets de production sont seuls disponibles; les estimations sont comprises dans les totaux mondiaux.

³ Y compris Corée et Kouan-Toung. Non compris moulages (1922, 29; 1923, 30; 1924, 25).

⁴ La Sarre donnée séparément.

⁵ Production se rapportant au territoire d'après-guerre.

* Estimates or provisional figures.

¹ Small amount produced in Union of South Africa for which no figures are available.

² For the years 1920-1926, only fragmentary production figures are available, but estimates are included in the world totals.

³ Includes Korea and Kwantung. Excluding castings (1922, 29; 1923, 30; 1924, 25).

⁴ Saar Basin given separately.

⁵ Production within post-war frontiers.

* Estimation ou chiffre provisoire.

¹ Les chiffres de production de certains pays et tout spécialement les chiffres d'avant-guerre pour l'Allemagne et la Pologne comprennent une certaine quantité provenant du vieux métal.

² A partir de 1920, production de plomb raffiné tiré de minerais indigènes ou importés ; la production provenant du vieux métal est exclue.

³ Territoire actuel.

* Estimate or provisional figure.

¹ The production figures of certain countries and more especially the pre-war figures of Germany and Poland include certain quantities produced from old metal.

² Since 1920, production of refined lead from domestic and imported ore ; production from old metal excluded.

¹ Exportation d'étain en barres.

² Il n'est pas possible d'avoir des données sur la production réelle de fonderie dans tous les pays asiatiques. La plus grande partie du minéral est fondue à Singapour et réexportée sous forme de barres d'étain. Pour tous les pays asiatiques, à l'exception du Japon, on donne par conséquent des chiffres relatifs à l'exportation de l'étain en barres au lieu de la production de fonderie. Les chiffres d'exportation de la Malaisie britannique pour certaines années paraissent comprendre des doubles emplois.

³ Les chiffres donnés pour les années 1920-26 représentent l'exportation d'étain en barres ; le chiffre d'exportation pour 1913, soit 2,1 milliers de tonnes, pouvant induire en erreur, étant donné la production réelle de fonderie, l'extraction pour cette année a été estimée d'après la quantité d'étain mise aux enchères en Hollande.

⁴ Exportations moins les importations.

⁵ Exports of tin in bars.

⁶ Figures of actual smelter production are not obtainable for all Asiatic countries. Most of the ore is smelted at Singapore and re-exported as tin bars. Export figures of tin in bars are thus given instead of smelter production figures for all Asiatic countries except Japan. The export figures for British Malaya may involve certain minor double counting in some years.

⁷ The figures shown for the years 1920-26 represent exports of tin in bars ; the 1913 export figure, 2.1 thousand tons, being misleading in regard to the actual smelter production, the output for that year has been estimated from the quantity of tin auctioned in Holland.

⁸ Exports less imports.

¹ Comme il n'existe qu'un seul producteur canadien d'aluminium, il n'est pas publié de chiffres officiels de production. Les estimations disponibles varient dans des limites comparativement assez larges.

² La production exacte, en Autriche, en Allemagne et en Suisse, en 1913 et en 1920-22, est difficile à établir par suite du manque de spécification des chiffres de production de l'*Aluminium-Industrie-A.-G.*, laquelle possède des usines dans ces trois pays. La distribution donnée dans ce tableau est une estimation.

³ As there is only one Canadian producer of aluminium, no official production figures are published. The available estimates vary within comparatively wide limits.

⁴ The exact production in Austria, Germany and Switzerland in 1913 and 1920-22 is difficult to ascertain on account of lack of specification in the production figures of the *Aluminium-Industrie-A.-G.* which operates plants in all three countries. The allocation shown in the table is estimated.

¹ Les chiffres donnés pour le Canada et la Nouvelle-Calédonie, et, en 1913 et 1920, pour l'Europe, représentent le nickel fin contenu dans les mattes fondues provenant des minerais. Les chiffres donnés pour les Etats-Unis représentent surtout du nickel métallique obtenu comme co-produit dans le raffinage électrolytique du cuivre. Cette forme de production existe aussi en Allemagne et dans quelques autres pays d'Europe, quoique les chiffres détaillés ne soient pas disponibles. Les pays compris sous « Europe » sont la France, l'Allemagne, la Norvège et le Royaume-Uni.

² The figures shown for Canada and New Caledonia and, in 1913 and 1920, for Europe represent fine nickel contained in the matte smelted from the ores. The figures shown for the United States represent mainly metallic nickel obtained as by-product in the electrolytic refining of copper. This form of production also exists in Germany and some other European countries, though detailed figures are not available. The countries included under Europe are France, Germany, Norway and the United Kingdom.

¹ Non compris les broches pour le doublage et le filage des déchets.

² Y compris environ 1 1/4 million de broches alsaciennes.

³ Les chiffres pour 1924 et 1925 ne comprennent pas les broches détériorées pendant la guerre et non remplacées.

⁴ Les chiffres communiqués directement par la Pologne sont (en milliers) : 1.210 en 1913 et 1920 ; 1.230 en 1921 ; 1.341 en 1924 et en 1925.

⁵ Les chiffres comprennent un certain nombre de broches détériorées ; pendant le premier semestre de 1926, 5.163.000 broches étaient en activité, contre 4.203.056 l'année précédente.

⁶ Le chiffre de 1913 comprend la Chine. Au cours de la période d'après-guerre, la rubrique comprend surtout les pays européens, y compris la Lettonie, la Lithuanie, l'Estonie et la Hongrie.

¹ Not including doubling or waste spindles.

² Including about 1 1/4 million Alsatian spindles.

³ The figures for 1924 and 1925 do not include those spindles damaged in the war and not replaced.

⁴ Figures communicated direct from Poland give (in thousands) : 1,210 for 1913 and 1920 ; 1,230 for 1921 ; 1,341 for 1924 and 1925.

⁵ Figures include a number of damaged spindles ; in the first half of 1926, 5,163,000 were working, as against 4,203,056 in the previous year.

⁶ The figure for 1913 includes China. In the post-war period the heading covers chiefly European countries, including Latvia, Lithuania, Estonia and Hungary.

NOTE : The totals represent the sums of figures available.

* Gross tonnage, with the exception of sailing ships in 1913. Not including : (1) Most of the sailing-ships belonging to Greece, Turkey and Southern Russia ; (2) Japanese sailing vessels ; (3) vessels trading on the Caspian Sea, and wooden vessels trading on the Great Lakes of North America. For some other countries there appears to be likewise a lack of data as regards sailing vessels.

† Included in "Other Dominions".

‡ Since 1924, including Fiume. In comparing the pre- and post-war Italian figures, it must be remembered that the greater part of the former Austro-Hungarian yards have passed to Italy.

NOTES AU TABLEAU 85.

NOTES TO TABLE 85.

SOURCES : Statistiques nationales ; Informations directes de divers gouvernements. Les données sont publiées en partie régulièrement dans le *Bulletin mensuel de Statistique* de la Société des Nations.

SOURCES : National Statistics ; direct information from various Governments. Part of the data is published regularly in the *Monthly Bulletin of Statistics* of the League of Nations.

Note. — Les statistiques relatives au mouvement de la navigation ne sont pas homogènes. Les données du tableau se réfèrent dans la mesure du possible à la navigation internationale, non compris le cabotage. Comme la définition du cabotage diffère suivant les pays, on a considéré comme tel le cabotage le long de la côte nationale. La plupart des statistiques éliminent les doubles emplois résultant du fait que des navires touchent plus d'un port. Où ce n'est pas le cas, les chiffres se trouvent exagérés par rapport à ceux des autres pays. Certains pays font figurer la pêche, surtout celle de haute mer, mais dans la plupart des cas, il manque des indications à ce sujet. Le tableau ci-dessous résume la portée des statistiques en indiquant : 1. Si le cabotage national est exclu (—) ou inclus (x) ; 2. Si les navires touchant plusieurs ports sont comptés une fois (—) ou plus d'une fois (x) et 3. Si la pêche est exclue (—) ou incluse (x). Un (.) signifie un manque d'indications.

Note. — Statistics of overseas shipping are not uniform. The figures in the table refer, whenever possible, to shipping with foreign countries, and exclude coastal shipping. As the definition of coastal shipping varies from one country to another, only traffic along the national coast has been considered as coastal. In most of the statistics, duplication resulting from the fact that vessels enter several ports has been eliminated. Where this has not been done, the figures are exaggerated as compared with those of other countries. In some cases fishery, especially fishery on the high seas, is included, but generally there is a lack of information on this subject. The statement below, which summarises the scope of the statistics, indicates whether : 1. The coastal traffic is excluded (—) or included (x) ; 2. Vessels entering several ports are counted once (—) or more than once (x) ; 3. Whether fishery shipping is excluded (—) or included (x). A (.) means that information is not available.

* Chiffres provisoires. — Provisional figures.

¹ Non compris les voiliers. Pour les ports de Suez et de Port-Saïd, non compris les navires transitaires du Canal de Suez.

² Calculé d'après les données originales exprimées en tonnes de canal (= 0,8 tonne de jauge).

³ Y compris le trafic des lacs entre le Canada et les Etats-Unis.

⁴ Calculé d'après les données exprimées en mètres cubes au taux de 1 m³ = 0,353357 tonne de jauge.

⁵ Port de Bangkok.

⁶ Les chiffres pour 1913 se réfèrent aux ports de la mer Noire et de la mer Egée, mais ne sont pas complets.

⁷ Y compris le cabotage.

⁸ Ports de Gdynia et de Tczew (à partir de 1926). Gdynia seul : en 1927, 423 et 416, en 1928, 985 et 974.

⁹ Depuis le 1^{er} avril 1923, y compris la navigation de la Grande-Bretagne et de l'Irlande septentrionale avec l'Etat libre d'Irlande, mais non compris la navigation extérieure directe de l'Etat libre d'Irlande.

¹ Excluding sailing vessels. For the ports of Suez and Port Saïd, excluding vessels passing through the Suez Canal.

² Calculated from original data expressed in canal tons (= 0.8 Reg. ton).

³ Including lake traffic between Canada and U. S. A.

⁴ Calculated from original data expressed in cubic meters, at the rate : 1 m³ = 0.353357 ton.

⁵ Port of Bangkok.

⁶ The 1913 figures refer to Black Sea and Aegean ports, but are not complete.

⁷ Including coastal traffic.

⁸ Ports of Gdynia and of Tczew (since 1926). Only Gdynia : in 1927, 423 and 416, in 1928, 985 and 974.

⁹ Since April 1st, 1923, including shipping between Great Britain and Northern Ireland and the Irish Free State, but excluding direct foreign shipping of the Irish Free State.

NOTES AU TABLEAU 86. NOMBRES-INDICES DES FRETS MARITIMES.

Allemagne : Nombre-indice publié dans *Wirtschaft und Statistik* ; expliqué sommairement dans le numéro du 15 janvier 1926. Il se rapporte uniquement au trafic de provenance et à destination de l'Allemagne. Les moyennes calculées sont pondérées à l'aide de coefficients basés sur l'importance du trafic des marchandises dans les différentes directions pendant l'année 1925.

Danemark : Nombre-indice publié dans les *Statistiske Efterretninger* ; expliqué dans le numéro du 23 mai 1925. L'indice général représente la moyenne arithmétique simple des indices de 26 routes mondiales sélectionnées en vue d'une pondération indirecte et dont 17 aboutissent au Danemark, à la Finlande ou à la Suède.

Royaume-Uni : *Economist*. Nombre-indice expliqué dans le supplément mensuel de l'*Economist* de juillet 1923. Les données se rapportent à vingt-huit grandes routes maritimes à destination et en provenance du Royaume-Uni. L'indice représente la moyenne arithmétique non pondérée des six indices de groupes, lesquels sont eux-mêmes calculés de la même manière, tantôt d'après les pourcentages relatifs à chaque route maritime, tantôt d'après les moyennes calculées pour le trafic d'une part en provenance, et d'autre part à destination du Royaume-Uni. La période de base utilisée est 1898-1913, mais les données contenues dans le tableau ont été recalculées par simple division sur la base du niveau en 1913. Il est à remarquer que les fluctuations du fret ont été avant la guerre très fortes. Ainsi l'indice original de l'*Economist* a été de 135 en 1900, entre 80 et 90 pendant les années 1902 à 1910, de 97 en 1911, de 131 en 1912 et de 116 en 1913.

Statist : Indice publié dans le *Statist* et dans le rapport annuel de la Chambre de Navigation du Royaume-Uni ; expliqué dans le *Statist* du 29 octobre 1921. Les données se rapportent depuis 1922 à vingt et une grandes routes à destination et en provenance du Royaume-Uni, sélectionnées en vue d'une pondération indirecte. L'indice représente la moyenne géométrique simple de pourcentages calculés pour chacune des routes. La base originale employée est l'année 1920, mais les données du tableau ont été recalculées par simple division sur la base du niveau de 1913.

Department of Commerce des Etats-Unis : Indice trimestriel publié une fois par an dans les *Commerce Reports* et deux fois par an dans le *Survey of Current Business*. Expliqué dans les *Commerce Reports* du 28 août 1922. Cet indice, qui ne se rapporte pas uniquement aux Etats-Unis, est basé sur les frets maritimes du charbon, du froment, du bois, du riz, du sucre et du nitrate et comprend en tout douze grandes routes mondiales, la plupart à destination et de provenance du Royaume-Uni. L'indice est calculé à l'aide d'une moyenne arithmétique simple de douze pourcentages représentant la moyenne des cours maximum et minima, pour chaque route, durant la période envisagée.

NOTES TO TABLE 86. INDEX NUMBERS OF OCEAN FREIGHT RATES.

Germany : Index number published in *Wirtschaft und Statistik*, briefly explained in the issue of January 15th, 1926. It refers solely to Germany's sea-borne trade. The calculated averages are weighted by means of coefficients based on the volume of goods traffic in the different directions during the year 1925.

Denmark : Index number published in *Statistiske Efterretninger* ; explained in the issue of May 23rd, 1925. The general index represents the simple arithmetic average of 26 indices relating to 26 world routes selected with a view to indirect weighting and 17 of which converge on Denmark, Finland or Sweden.

United Kingdom : *The Economist*. The index number was described in the monthly supplement of *The Economist* of July 1923. The data refer to 28 principal maritime routes to and from the United Kingdom. The index represents the unweighted arithmetic mean of the 6 group indices, which are themselves calculated in the same way, either from the percentages relating to each maritime route or from the averages for traffic to and from the United Kingdom. The period taken as basis is 1898-1913 but the data contained in the table were re-calculated by simple division on the basis of the 1913 level. It should be noted that the fluctuations in freights before the war were considerable. Thus the original indices of *The Economist* were 135 in 1900, between 80 and 90 during the years 1902 to 1910, 97 in 1911, 131 in 1912 and 116 in 1913.

Statist : The index published in the *Statist* and in the Annual Report of the Chamber of Shipping of the United Kingdom was described in the *Statist* for October 29th, 1921. Since 1922 the figures refer to 21 main routes to and from the United Kingdom, selected with a view to indirect weighting. The index represents the simple geometric mean of percentages calculated for each route. The basic year taken is 1920, but the figures in the table have been re-calculated by simple division on the basis of the 1913 level.

U. S. Department of Commerce : quarterly index published once a year in *Commerce Reports*, and twice a year in the *Survey of Current Business*. Explained in the *Commerce Reports* of August 28th, 1922. This index number which does not refer to the United States only, is based on the maritime freights for coal, wheat, timber, rice, sugar and nitrate, and covers in all twelve main world routes, most of them converging on or starting from the United Kingdom. The index is calculated by taking the simple arithmetic mean of twelve percentages representing the average of the maximum and minimum rates, for each route, during the period in question.

¹ De mai à novembre 1926, non compris les transports de charbon.
¹ May-November 1926, excluding coal cargoes.

NOTES AU TABLEAU 87 : CHEMINS DE FER : LONGUEUR DES LIGNES.

SOURCES : Informations directes des divers gouvernements. Rapports des administrations de chemins de fer. Annuaire statistique ou documents officiels similaires. Rapports coloniaux. Rapports des Puissances mandataires. *Eisenbahnarchiv. Bulletin de l'Union internationale de chemins de fer.*

NOTE GÉNÉRALE : Les données du tableau représentent, d'une manière générale, la longueur exploitée à la fin de l'année de gestion. Parfois, on a fait figurer la longueur moyenne exploitée, qui est calculée en tenant compte de la longueur exploitée chaque jour dans le cours de l'année. La longueur réelle (ou possédée) figure, de même, seulement exceptionnellement. La longueur réelle comprend les tronçons non exploités ou des tronçons exploités par une autre administration. Le réseau exploité ne comprend pas les tronçons donnés à bail à une autre entreprise, mais comprend les tronçons appartenant à une autre entreprise et empruntés en vue de l'exploitation. Comme certaines lignes peuvent être coexploitées par plusieurs entreprises, l'addition des tronçons exploités risque parfois de donner des résultats trop élevés. Ceci s'applique, par exemple, aux Etats-Unis d'Amérique, avec leurs très nombreuses compagnies de chemins de fer. Dans d'autres cas, surtout dans les pays de l'Amérique latine, on ignore la nature exacte des chiffres.

D'une manière générale, les chiffres ne comprennent pas les embranchements privés, voies de garage et de service et les lignes purement industrielles. Dans les pays d'Europe, les lignes industrielles sont peu importantes. Toutefois, dans certains pays d'Amérique Centrale et dans certaines colonies, de telles lignes constituent, parfois, des réseaux indépendants, d'une importance considérable, transportant de grandes quantités de produits coloniaux. Sous réserve de ces considérations, les chiffres donnés dans le tableau sont sensés inclure pratiquement la totalité des chemins de fer des divers pays.

Dans la plupart des cas, on a fait abstraction de distinctions de caractère variable et plutôt administratif, faites entre lignes « d'intérêt général » et lignes « locales », lignes « principales » et lignes « secondaires », etc. La définition des termes « lignes d'Etat » et « lignes privées » varie de même considérablement d'un pays à l'autre.

Les données ont été divisées en premier lieu en lignes à voie « normale » et lignes à voie « étroite ». La notion de la voie « normale » varie beaucoup selon les pays. Seulement la voie de 1,435 m. (4 pieds 8 1/2 pouces) a été désignée dans le tableau comme voie normale. Les voies à écartement plus large telles qu'on les rencontre en Estonie, en Finlande, en Irlande, en Lettonie, au Portugal, en Russie, en Argentine, au Brésil, au Chili, au Panama, en Chine, à Ceylan, dans l'Inde, en Australie, et, dans une faible mesure, en Turquie, ont été désignées sous le terme de voies « larges ». Toute voie inférieure à 1,435 m. a été désignée comme « étroite ».

Les chiffres [provisoires, estimés ou s'appliquant soit à une année précédente ou ultérieure, ont été précédés d'un astérisque (*).

AFRIQUE

Note. — Pour plusieurs possessions africaines, il n'a pas été possible d'obtenir des renseignements concernant la nature exacte des chiffres. Il est à supposer que certains d'entre eux comprennent des voies de service et des lignes industrielles et sont, par conséquent, relativement trop élevés.

a) Fin mars de l'année suivante, à l'exception des chiffres de 1913 pour l'Afrique du Sud et l'Egypte qui se rapportent à l'année civile. b) 1912.

¹ Longueur réelle, légèrement supérieure à la longueur exploitée. Pour l'Union de l'Afrique du Sud, non compris le réseau dans le territoire sous mandat de l'Afrique Sud-Ouest exploité depuis 1922 par les chemins de fer de l'Union.

² Non compris un tronçon de 90 km. en Somalie française.

³ Le réseau du territoire sous mandat de l'Afrique Sud-Ouest correspond à celui de l'ancienne colonie allemande de l'Afrique du Sud-Ouest, le réseau du Tanganyika correspond à l'Afrique-Orientale allemande, et celui du Cameroun et du Togo sous mandat français à celui du Cameroun et Togo allemands. Il n'y a pas de chemin de fer dans le Cameroun et le Togo sous mandat anglais.

⁴ Y compris un tronçon de 148 km. exploité par les chemins de fer du Tanganyika, mais situé principalement dans le Kéni.

⁵ Y compris un tronçon de la « Central Africa Railway ».

⁶ Tronçon espagnol de la ligne Tanger-Fez.

⁷ Longueur moyenne exploitée.

AMÉRIQUE

Note. — Pour certains pays, notamment pour la plupart des pays de l'Amérique Centrale, il n'a pas été possible d'obtenir des données officielles. Les données pour ces pays varient beaucoup suivant les différentes sources. Les chiffres donnés dans le tableau diffèrent sensiblement de ceux publiés couramment par le fait qu'ils ne contiennent pas les lignes industrielles influencées par le caractère incertain des chiffres pour le Mexique.

a) VI. 1914. b) Fin 1914. c) 1912. d) Fin juin de l'année. e) 1928.

¹ Chemins de fer à vapeur, non compris les tramways interurbains électriques. Y compris des lignes situées aux Etats-Unis s'élevant, en 1927, à 560 km.

² Vu la multiplicité des cas où une ligne est exploitée par plusieurs compagnies, ce qui comporte des doubles emplois, les chiffres donnés pour les Etats-Unis d'Amérique représentent la longueur réelle et non pas la longueur exploitée. Quelques tronçons situés au Canada y sont inclus. Une faible proportion des lignes est à voie étroite.

* Non compris les lignes industrielles qui s'élèvent, pour le Costa-Rica, à environ 400 km., pour Cuba, à plus de 8.000 km., pour la République Dominicaine, à environ 450 km., pour Haïti, à environ 160 km., pour le Honduras, à plus de 1.000 km., pour le Panama, à environ 230 km., pour Porto-Rico, à 1.000 km. et pour le Paraguay, à environ 360 km.
 * Les lignes d'Etat comprenant les lignes privées exploitées par l'Etat. La distribution entre lignes d'Etat et lignes privées n'est pas toujours très nette, vu que de 1914 à 1926 presque toutes les lignes privées furent administrées par l'Etat. Les données sont incertaines et varient suivant les sources. L'exploitation d'une partie du réseau était interrompue à diverses reprises.

* Y compris les embranchements, les voies de service et les lignes industrielles. Les embranchements s'élevaient en 1925 à 11.912 km. et les voies de service à 874 km.

* Y compris les lignes industrielles.

* Longueur réelle supérieure à la longueur exploitée. Les données comprennent les lignes industrielles et les tramways.

ASIE

Note. — La comparaison entre les chiffres d'après-guerre et ceux de 1913 est rendue très malaisée à cause du caractère incertain des chiffres pour la Chine et l'absence de chiffres exacts pour la Turquie pour les années 1921-1926. Comme il n'est pas possible de faire une distinction nette entre les réseaux de l'U.R.S.S. situés en Europe et en Asie, le total continental a été calculé sans tenir compte des réseaux asiatiques de l'U.R.S.S. Ces réseaux, qui ont été très développés pendant la guerre, s'élevaient à plus de 10.000 km. en 1913, pour passer à environ 18.000 km.

a) Fin mars de l'année suivante. b) 1914. c) 1915. d) 30. IX.

* Y compris la Mandchourie. Les chiffres publiés pour la Chine varient beaucoup suivant les sources. Il paraît que les données relatives aux lignes privées sont incomplètes ; mais, d'autre part, on ignore si les chiffres publiés comportent des doubles emplois ou si les voies de service, les lignes industrielles, etc., sont comprises ou non. Une partie des lignes qui figurent dans les relevés, n'est pas exploitée ou a été détruite.

* Les chiffres donnés sous l'entête « Etat et privés », se réfèrent aux réseaux du Gouvernement, des provinces et à des réseaux chinois privés. Ceux donnés en concession représentent principalement des réseaux en Mandchourie.

* Y compris les lignes d'Etat exploitées par des compagnies.

* Non compris les tramways et les lignes locales dont le réseau, en 1926, s'élevait ensemble à 2.500 km.

* Le chiffre de 1913 pour la Turquie se réfère au territoire d'avant-guerre, c'est-à-dire aux anciennes provinces d'Asie Mineure, Arménie, Syrie, Mésopotamie et Arabie. Le chemin de fer du Hedjaz, a été détruit, à l'exception de tronçons situés en Palestine, en Transjordanie et en Syrie. Les données des années 1921 à 1926 ont été calculées approximativement à l'aide des statistiques de l'année 1927 en tenant compte des constructions faites dans chacune des années. Le chiffre d'après-guerre qui correspondrait à celui pour la Turquie d'Asie d'avant-guerre, peut être obtenu en additionnant les chiffres pour la Turquie d'Asie (territoire actuel), pour l'Irak, la Palestine et la Transjordanie et la Syrie.

* Non compris les tronçons des lignes indochinoises situés en Chine (464 km.).

* Y compris les tramways interurbains, dont beaucoup sont à voie normale et s'étendent sur une grande longueur et peuvent, par conséquent, être considérés comme des chemins de fer.

EUROPE

Note. — Le total continental comprend la Russie d'Asie (voir note sur l'Asie), mais ne comprend pas les lignes secondaires d'ordre local de l'Allemagne (« Kleinbahnen ») et de France (« lignes d'intérêt local »).

a) Fin mars de l'année suivante. b) VI. c) 1914. d) III. 1915.

* Le chiffre de 1913 pour l'Allemagne, se réfère à l'ancien territoire, y compris l'Alsace et la Lorraine. Le chiffre pour ces dernières en 1913 a été de 1921 km.

* Faute de données complètes, les réseaux d'intérêt local d'Allemagne (« Kleinbahnen ») situés surtout en Prusse) et de France n'ont pas été inclus dans le total pour le continent. Les statistiques allemandes et françaises n'en tiennent généralement pas compte. Les données françaises pour les lignes d'intérêt local contiennent les lignes de tramways qui s'élevaient en 1913 à 7.875 km.

* Pour 1913, longueur réelle, depuis, longueur moyenne exploitée des lignes principales et locales. Les réseaux secondaires d'intérêt local (« Kleinbahnen ») ajoutés dans le tableau ne figurent généralement pas dans les statistiques ferroviaires de l'Autriche.

* Pour la Belgique et le Luxembourg y compris une faible proportion de lignes à voie étroite.

* « Etat » comprend le réseau d'Etat proprement dit et à partir de 1921, le réseau d'Alsace-Lorraine, non compris le tronçon du Luxembourg. Les données pour les lignes privées comprennent les cinq grandes compagnies et les réseaux secondaires.

* Longueur réelle.

* Voici à titre d'indication, le détail des chiffres pour 1924 :

| | En Miles | | | Equivalent en km. | | |
|---|------------|--------------|-------|-------------------|--------------|-------|
| | Voie large | Voie étroite | Total | Voie large | Voie étroite | Total |
| ETAT LIBRE : | | | | | | |
| Lignes situées entièrement dans l'Etat libre . . . | 1.980 | 202 | 2.182 | 3.187 | 325 | 3.512 |
| Lignes situées en partie dans l'Etat libre et en partie en Irlande du Nord : tronçons situés dans l'Etat libre | 282 | 204 | 486 | 454 | 328 | 782 |
| Total | 2.262 | 406 | 2.668 | 3.641 | 653 | 4.294 |
| IRLANDE DU NORD : | | | | | | |
| Lignes situées entièrement dans l'Irlande du Nord | 282 | 120 | 402 | 454 | 193 | 647 |
| Lignes situées en partie dans l'Etat libre et en partie dans l'Irlande du Nord : tronçons situés dans l'Irlande du Nord | 350 | 5 | 355 | 563 | 8 | 571 |
| Total | 632 | 125 | 757 | 1.017 | 201 | 1.218 |

Pour l'Etat libre, les lignes d'Etat s'élèvent à 38,5 km.

* Les chiffres relatifs à l'Italie comprennent les lignes de service et les embranchements et sont, par conséquent, relativement trop élevés.

* A partir de 1924, y compris le territoire de Klaipeda.

* A partir de 1921, y compris Dantzig ; à partir de 1922, y compris la Haute-Silésie polonaise. La diminution dans les chiffres relatifs aux lignes d'Etat à voie étroite est due en partie au transfert de certaines lignes d'Etat à l'exploitation privée. Les lignes privées pour lesquelles il n'existe pas de données officielles ne sont pas importantes.

* Y compris les lignes locales, mais non compris les tramways.

* Le chiffre de 1913 pour le territoire actuel de l'U.R.S.S. a été estimé à 58.664 km. Les chiffres pour l'ancien territoire, ainsi que pour le territoire actuel, varient beaucoup selon les différentes sources.

L'augmentation dans les années postérieures à 1920 s'explique, non pas par de nouvelles constructions, mais par le fait que le réseau existant a été remis graduellement en état pour être mis en exploitation. Toutefois, les chiffres pour les dernières années

paraissent inclure plus de 2.000 km. de voies non exploitées. L'augmentation des lignes, par rapport au chiffre d'avant-guerre pour le même territoire, s'explique surtout par les constructions effectuées pendant la guerre. Ainsi, la longueur des lignes sur le territoire actuel de l'U.R.S.S., à la fin de 1917, aurait dépassé 74.000 km.

¹² Les totaux ne tiennent pas compte des doubles emplois. Les lignes d'intérêt local sont plutôt des lignes industrielles, mais certaines d'entre elles sont ouvertes au public.

¹³ Les totaux comportent certains doubles emplois provenant de l'exploitation en commun de certaines lignes par les chemins de fer fédéraux et par des compagnies privées. Non compris les lignes à crémaillère qui s'élevaient, pendant toute la période, à 109 km.

¹⁴ Les lignes étrangères représentent le total des lignes étrangères situées dans le territoire tchécoslovaque et des lignes tchécoslovaques situées dans le pays, mais placées sous administration étrangère.

Océanie

a) Fin juin de l'année. b) Fin mars de l'année suivante. c) 1915.

¹ L'écartement des voies australiennes n'est pas uniforme. Les voies « larges et normales » mesurent 1,600 m. et 1,434 m. (5 pieds 3 pouces et 4 pieds 8 ½ pouces). Les voies « étroites » sont celles de 1,067 m. au-dessous jusqu'à 0,508 m. (3 pieds 6 pouces à 2 pieds).

Les chiffres donnés sous l'en-tête « Etat », représentent le total des lignes fédérales et des lignes appartenant aux Etats particuliers du Commonwealth.

² Toutes les lignes de la Nouvelle-Zélande ont 1,067 m. (3 pieds 6 pouces) de largeur. Les chiffres ne comprennent pas les lignes industrielles privées.

³ Les lignes industrielles, non comprises dans le tableau, s'élèvent à 1.000 km.

NOTES TO TABLE 87 : RAILWAYS : LENGTH OF LINES OPERATED.

SOURCES : Information furnished by Governments. Reports of Railway Administrations. Statistical Year-books and similar official documents. Colonial Reports. Reports of the Mandatory Powers. *Eisenbahnarchiv*. *Bulletin de l'Union internationale de Chemins de fer*.

GENERAL NOTE : As a rule, the figures given in the table represent the length of track being operated at the end of the business year. In some cases, however, the average length of track operated, calculated on the basis of the length of track operated on each day throughout the year, is given. The real length (or length owned) is shown only in a few cases. The real length includes sections which are not operated and sections which are operated by other administrations. The operated length does not include sections leased, but does include sections belonging to other enterprises over which the enterprise concerned has running powers. As lines are sometimes operated jointly by several enterprises, the results obtained, if all the sections operated are added together, may be too high. This applies, for instance, to the United States, with its very numerous railway companies. In other cases, particularly in the Latin-American countries, the nature of the figures given is unspecified.

As a general rule, the figures do not include private branch lines, sidings and purely industrial lines. In European countries, industrial lines are of small importance. In Central-American countries and colonies, however, such lines sometimes constitute independent railway systems of considerable importance, on which large quantities of colonial products are carried. With the above reservations, the figures given in the table are believed to include in practically all cases the total of railways in the various countries.

In most cases no attention has been paid to the varying distinctions made mainly of an administrative character between lines "of general importance" and "local" lines, "main" and "secondary" lines, etc.

The definition of the terms "State" and "private" lines also varies widely from country to country.

The figures have been divided in the first place into standard-gauge and narrow-gauge lines. The conception of what constitutes a standard gauge varies greatly in different countries. For the purposes of the table, the gauge of 4ft. 8 ½ in. (1.435 meters) has been described as "standard". Lines with a wider gauge, such as those found in Estonia, Finland, Ireland, Latvia, Portugal, Russia, the Argentine, Brazil, Chile, Panama, China, Ceylon, India, Australia and to a small extent Turkey, have been described as "broad gauge". Any gauge below 4ft. 8 ½ in. has been described as "narrow".

Figures which are provisional, estimated or which refer to some earlier or later year are preceded by an asterisk " * ".

AFRICA

Note. — In the case of several of the African possessions, it has not been possible to obtain information concerning the exact nature of the figures. There is reason to believe that some of them include sidings and industrial lines and are therefore relatively too high.

a) End of March of the following year, with the exception of the 1913 figures for South Africa and Egypt which relate to the calendar year. b) 1912.

¹ Actual length, slightly greater than the length operated. For the Union of South Africa exclusive of lines in the mandated territory of South-West Africa, operated since 1922 by the railways of the Union.

² Excluding a sector of 90 km. in French Somaliland.

³ The lines of the mandated territory of South-West Africa correspond to those of the former German colony of South-West Africa, the Tanganyika lines correspond to those of German East Africa, and those of the Cameroons and of Togoland under French mandate to those of the German Cameroons and German Togoland. There is no railway in Togoland and Cameroons under British mandate.

⁴ Including a sector of 92 miles operated by the Tanganyika railways, but situated mainly in Kenya.

⁵ Including a sector of the Central Africa Railway.

⁶ Spanish sector of the line Tangier-Fez.

⁷ Average length operated.

AMERICA

Note. — In the case of certain countries, notably in Central America, it has not been possible to obtain official data. The sources for these countries vary appreciably. The figures here published differ materially from those generally quoted owing to the fact that they exclude private industrial lines. It proved not possible to exclude industrial lines in the case of Chile and Peru. The continental total is unfavourably affected by the uncertain character of the data for Mexico.

a) VI. 1914 ; b) End of 1914 ; c) 1912 ; d) End of June of each year ; e) 1928.

¹ Steam railways, excluding inter-urban electric tramways. Including lines in the United States, totalling 560 kilometers in 1927.

² Owing to the duplication resulting from the fact that in many cases a line is operated by more than one company, the figures given for the United States represent the actual length and not the length operated. The figures include a few sectors situated in Canada. A small proportion of the track is of narrow gauge.

³ Excluding industrial lines, which in Costa Rica amount to about 400 km., in Cuba to over 8,000 km., in the Dominican Republic to about 450 km., in Haiti to about 160 km., in Honduras to over 1,000 km., in Panama to about 230 km., in Porto Rico to 1,000 km., and in Paraguay to about 360 km.

⁴ State lines and private lines run by State. The distinction between State and private lines is not always clear as almost all private lines were administered by the State from 1914-1926. The data are uncertain and vary in different sources.

⁵ Including branch lines, sidings and industrial lines. The branch lines amounted in 1925 to 11,912 km. and the sidings to 874 km.

⁶ Including industrial lines.

⁷ Actual length greater than the length operated. Including industrial lines and tramways.

ASIA

Note. — A comparison between the post-war figures and those of 1913 is difficult owing to the doubtful character of those for China and the absence of exact figures for Turkey for the years 1921 to 1926. As it is impossible to distinguish accurately between U.S.S.R. lines in Europe and Asia, U.S.S.R. Asiatic lines have been excluded from the Continental figure. These lines, which were greatly extended during the War, total approximately 18,000 km. (10,000 km. in 1913).

a) End of March of the following year; b) 1914. c) 1915; d) 30. IX.

¹ Excluding Manchuria. The figures published for China vary a great deal according to the source. The data concerning private lines seem to be incomplete; moreover, it is not known whether the published figures overlap or whether sidings, industrial lines, etc., are included or not; a part of the lines included in the statistics is not operated or has been destroyed.

² The figures given under the heading "State and private" refer to the total of Chinese Government, provincial and private lines; the lines "under concession" refer mainly to Manchuria.

³ Including State lines operated by companies.

⁴ Excluding tramways and local lines, which together totalled 2,500 kilometers in 1926.

⁵ The 1913 figure for Turkey refers to the former territory, i.e. to the old provinces of Asia Minor, Armenia, Syria, Mesopotamia and Arabia. The Hedjaz railway has been destroyed with the exception of sectors situated in Palestine, Transjordan and Syria. The estimates for 1921-26 have been arrived at with help of 1927 statistics, taking into consideration new lines laid down each year. The post-war figure corresponding to the pre-war figure for Turkey in Asia may be obtained by adding together the figures for Turkey in Asia (present territory), Iraq, Palestine, Transjordan, and Syria.

⁶ Excluding the sectors of the Indo-Chinese lines situated in China (464 kilometers).

⁷ Including inter-urban tramways, many of which, being of normal gauge and of great length, may be treated as railways.

EUROPE

Note. — The continental total includes Asiatic Russia (see note on Asia), but excludes light local railways in Germany ("Kleinbahnen") and France ("lignes d'intérêt local").

a) End of March of following year; b) VI; c) 1914; d) III. 1915.

¹ The 1913 figure for Germany refers to former boundaries, including Alsace and Lorraine, in which the railway mileage was 1921, km. in 1913.

² Owing to lack of complete data light railways in Germany ("Kleinbahnen", situated mainly in Prussia) and France have not been included in the continental total. The German and French statistics as a rule leave them out of account. The data for French light railways include tramways (7,875 km. in 1913).

³ For 1913, actual length; since 1913, average length operated of main and local lines. The local light railways ("Kleinbahnen") given in the table are, as a rule, not included in Austrian railway statistics.

⁴ For Belgium and Luxemburg the figures include a small proportion of narrow-gauge track.

⁵ "State" includes the actual State line ("Ligne d'Etat") and, since 1921, the railways of Alsace and Lorraine, excluding the Luxemburg sector. The data for private lines include the five big companies and minor lines ("secondaires").

⁶ Real length.

⁷ The details of the 1924 figures are given below by way of illustration:

| | In Miles | | | Equivalent in km. | | |
|---|--------------|--------------|--------------|-------------------|--------------|--------------|
| | Broad gauge | Narrow gauge | Total | Broad gauge | Narrow gauge | Total |
| IRISH FREE STATE: | | | | | | |
| Lines situated wholly in the Free State | 1,980 | 202 | 2,182 | 3,187 | 325 | 3,512 |
| Lines situated partly in the Free State and partly in Northern Ireland: Sections situated in the Free State | 282 | 204 | 486 | 454 | 328 | 782 |
| TOTAL | 2,262 | 406 | 2,668 | 3,641 | 653 | 4,294 |
| NORTHERN IRELAND: | | | | | | |
| Lines situated wholly in Northern Ireland | 282 | 120 | 402 | 454 | 193 | 647 |
| Lines situated partly in the Free State and partly in Northern Ireland: Sections situated in Northern Ireland | 350 | 5 | 355 | 563 | 8 | 571 |
| TOTAL | 632 | 125 | 757 | 1,017 | 201 | 1,218 |

In the Irish Free State, the State-owned lines total 24 miles.

¹ The figures for Italy include sidings and branch lines and are therefore relatively too high.

² From 1924 onwards, including the Memel (Klaipeda) Territory.

³ From 1921 including Danzig; from 1922 including Polish Upper Silesia. The falling-off in the figures for narrow-gauge State lines is partly due to the transfer of certain State lines to private ownership. The private lines for which there are no official data are unimportant.

⁴ Including local lines, but excluding tramways.

⁵ The 1913 figure for the present territory of the U.S.S.R. has been estimated at 58,664 kilometers. The figures both for the former and for the present territory vary greatly according to the different sources.

The increase subsequent to 1920 is explained, not by new constructions, but by the fact that existing lines have been gradually restored and put into operation. But the figures for the last few years appear to include over 2,000 kilometers of unoperated lines. The increase as compared with the pre-war figure for the same territory is chiefly due to constructions effected during the war. Thus the length of track on the present territory of the U.S.S.R. at the end of 1917 is stated to have exceeded 74,000 km.

⁶ The totals take no account of duplication. The local lines are mainly industrial, but some are open to the public.

⁷ The totals contain certain duplications, due to the joint operation of lines by the Federal railways and by private companies, but do not include rack-and-pinion railways, which, during the whole period, totalled 109 km.

⁸ The foreign lines represent the total of foreign lines situated in Czechoslovak territory, and of Czechoslovak lines situated in the country but under foreign administration.

OCEANIA

(a) End of June of each year. (b) End of March of the following year. (c) 1915.

¹ The gauge of the Australian lines is not uniform. The "broad and normal" gauge lines measure 5 ft. 3 in. and 4 ft. 8 1/2 in. (1.600 meters and 1.434 meters). The narrow-gauge lines are those of 3 ft. 6 in. to 2 ft. (1.067 meters to 0.508 meters).

The figures given under the heading "State" represent the total of the Federal lines and lines belonging to the individual States of the Commonwealth.

² All the New Zealand lines have a gauge of 3 ft. 6 in. (1.067 meters). The figures do not include private lines, which are all industrial.

³ The industrial lines not included in the table total 1,000 kilometers.

NOTES AU TABLEAU 88. CHEMINS DE FER : TRAFIC DES VOYAGEURS.

SOURCES : Les mêmes que pour le tableau 87.

Note. — Les chiffres du tableau se réfèrent, dans la mesure où les données sont disponibles, aux lignes figurant au tableau 87. Les statistiques du trafic ne sont pas toujours comparables entre elles et ne pourront pas l'être. Pour la grande majorité des pays, elles ont trait uniquement aux résultats financiers et ignorent le trafic gratuit, tandis que, dans quelques cas, tout trafic est compris. Le trafic gratuit est représenté surtout par le trafic de service, mais peut inclure également des fonctionnaires d'autres administrations, des membres de Parlements, etc. Le trafic de service peut toutefois être en partie payant. Les réseaux privés ont naturellement moins de trafic gratuit que les lignes de l'Etat et la comparabilité des statistiques est dans une certaine mesure influencée par l'exclusion ou l'inclusion du trafic militaire.

De manière générale, les voyageurs ayant des abonnements sont comptés dans les statistiques pour un nombre spécifié de voyages.

Quatre colonnes ont été ajoutées au tableau pour résumer la portée des statistiques. Elles indiquent respectivement, si 1) le réseau entier ou pratiquement entier a été inclus (x) ou non (-); 2) si les passagers gratuits, 3) les billets d'abonnements, 4) les militaires sont inclus (x) ou exclus (-). Ces indications servent d'explication, surtout aux chiffres globaux donnés dans le tableau sans aucune subdivision. Ceci ne signifie pas nécessairement que les subdivisions n'existent pas dans les statistiques originales. Quand des subdivisions sont données dans le tableau, les signes indicatifs cités ci-dessus ont été mis seulement contre les totaux.

* Estimations ou chiffres se référant dans leur totalité ou en partie à l'année précédente.

a) Fin mars de l'année suivante. b) 1912. c) VI. 1914. d) 1912. e) 30. VI de chaque année. f) XII. 1914. g) 1915.

¹ Depuis 1921/22, y compris le territoire sous mandat de l'Afrique Sud-ouest.

² Les données pour les voyageurs-kilomètres des lignes privées et celles des lignes d'Etat avant 1925, ne sont pas complètes.

³ Y compris les chemins de fer privés.

⁴ Le réseau de la « Ferrocarril Central ».

⁵ Non compris les tramways.

⁶ Les chiffres pour 1913 et 1922 contiennent des doubles emplois et sont par conséquent trop élevés par rapport aux chiffres des années suivantes.

⁷ Y compris le tronçon situé en Chine.

⁸ Réseaux exploités par l'Etat japonais.

⁹ Non compris les tramways urbains, mais y compris les tramways interurbains.

¹⁰ Le chiffre correspondant de 1913 pour le territoire actuel de l'Allemagne est de 1.577 millions de voyageurs et de 36.599 millions de voyageurs-kilomètres. Les chiffres se réfèrent à la Reichsbahn et aux autres lignes privées.

¹¹ Pour l'Autriche et le Royaume des Serbes, Croates et Slovènes, y compris les réseaux privés exploités par l'Etat.

¹² Total des lignes d'Etat, d'Alsace et Lorraine, des cinq grandes compagnies et des réseaux secondaires. Pour 1913, y compris l'Alsace et la Lorraine avec 57 millions de voyageurs et 1.428 millions de voyageurs-kilomètres.

¹³ Pour les lignes privées, seulement la Compagnie Pirée-Athènes-Péloponèse.

¹⁴ Y compris le trafic dans les trains lettons en territoire étranger, mais non compris le trafic dans les trains étrangers à travers le territoire letton.

¹⁵ Les abonnements sont comptés au taux de 600 voyages par abonnement. Les relevés des voyageurs-kilomètres s'appliquent au mois de septembre de chaque année et seulement au réseau à voie normale. Vu l'arrêt dans les charbonnages, il n'a pas été fait de relevés en septembre 1926.

¹⁶ Y compris les réseaux en Asie. Le chiffre correspondant de 1913 pour le territoire actuel de l'U. R. S. S. aurait été de 185 millions.

¹⁷ Les données se réfèrent seulement à quatre Etats.

¹⁸ A. Non compris les abonnements. B. Y compris les abonnements.

FOOTNOTES TO TABLE 88 : RAILWAYS : PASSENGER TRAFFIC.

SOURCES : The same as for Table 87.

Note. — The figures in the table refer, as far as data are available, to the lines given in Table 87.

The traffic statistics are not always comparable and cannot be so rendered. In the great majority of countries, they refer solely to the financial results and ignore free traffic ; but in a few cases all traffic is included. Free traffic is chiefly service traffic, but may also include officials of other administrations, members of Parliament, etc. Service traffic, however, may be partly paid for. There is naturally less free traffic on private lines than on State lines and the comparability of the statistics is to some extent affected by the exclusion or inclusion of military traffic.

As a rule, season-ticket holders are reckoned in the statistics for a specific number of journeys.

Four columns have been added to the table which summarise the scope of the statistics. They indicate respectively whether (i) the whole or practically the whole railway system has been included (x) or not (—), (ii) whether free passengers, (iii) season-ticket holders, (iv) soldiers are included (x) or excluded (—). These indications serve chiefly as an explanation of the aggregate figures given in the table without subdivision. This does not necessarily mean, however, that the subdivisions do not exist in the original statistics. When subdivisions are given in the table, the signs mentioned above have been placed only against the totals.

* Estimates or figures referring entirely or in part to the preceding year.

(a) End of March of the following year. (b) 1912. (c) VI.1914. (d) 1912. (e) 30.VI. of each year. (f) XII. 1914. (g) 1915.

¹ Since 1921 /22, including the mandated territory of South-West Africa.

² The data for passenger-kilometers of the private lines and those of the State lines before 1925 are incomplete.

³ Including private railways.

⁴ The " Ferrocarril Central " system.

⁵ Excluding tramways.

⁶ The figures for 1913 and 1922 contain duplications, and are therefore too high compared with the figures for the following years.

⁷ Including the sector operated in China.

⁸ Lines operated by Japanese Government.

⁹ Excluding urban, but including inter-urban tramways.

¹⁰ The corresponding 1913 figure for Germany's present territory would be 1,577 million passengers and 36,599 million passenger-kilometers. The figures refer to the Reichsbahn and the other private lines.

¹¹ For Austria and the Kingdom of the Serbs, Croats and Slovenes, including private lines operated by the State.

¹² Total of State lines, of Alsace-Lorraine, of the five big companies and of local lines (secondaires). In 1913, including Alsace and Lorraine, with 57 million passengers and 1,428 million passenger-kilometers.

¹³ For private lines only the Piræus-Athens-Peloponnese Company.

¹⁴ Including traffic in Latvian trains on foreign territory, but excluding traffic in foreign trains across Latvian territory.

¹⁵ A season-ticket is reckoned to cover 600 journeys. The figures for passenger-kilometers refer to Sept. each year and to normal gauge lines only. In view of coal stoppage, no returns were made in Sept. 1926.

¹⁶ Including lines in Asia. The corresponding 1913 figure for the present territory of the U. S. S. R. would be 185 millions.

¹⁷ The data refer only to four States.

¹⁸ A. Excluding season tickets. B. Including season tickets.

NOTES AU TABLEAU 89. CHEMINS DE FER : TRAFIC DES MARCHANDISES.

SOURCES: Les mêmes que pour le tableau 87.

Note. — Les chiffres du tableau se réfèrent, dans la mesure où les données sont disponibles, aux lignes figurant au tableau 87. En ce qui concerne le manque de comparabilité de statistique et les questions relatives au trafic de service et au trafic militaire, les mêmes remarques générales s'appliquent comme pour le tableau 88.

Vu que le trafic en grande vitesse n'est pas compris dans les statistiques de plusieurs pays, on l'a exclu partout où cela a été possible. Son importance en comparaison avec le trafic en petite vitesse est du reste minime. Les transports de bagages et de colis postaux ont également été exclus. Le détail est très souvent donné dans les statistiques suivant le nombre de têtes sans être évalué en poids. Il n'est, par conséquent, pas compris dans les chiffres de beaucoup de pays.

Cinq colonnes explicatives, analogues à celles données dans le tableau 88, ont été ajoutées. Elles indiquent respectivement, si: 1) Le réseau entier ou pratiquement entier a été inclus (x) ou non (—); 2) si le trafic gratuit, 3) le trafic en grande vitesse, 4) le transport militaire et 5) le détail ont été inclus (x) ou exclus (—).

* Estimations ou chiffres se rapportant dans leur totalité ou en partie à l'année précédente.

a) Exercice financier finissant fin mars de l'année suivante. b) 1912. c) Exercice financier finissant fin juin 1914. d) 1914. e) 1921. f) Exercice financier finissant fin juin de l'année. g) 1915.

^{1, 2, 3, 4, 5, 6} : voir notes au tableau 88.

¹ Vu la multiplicité de directions ferroviaires en Allemagne en 1913, les chiffres calculés alors comportaient des doubles emplois et étaient, par conséquent, trop élevés en comparaison de ceux publiés depuis la centralisation de l'Administration. Des chiffres officiels ont toutefois été recalculés pour l'année 1913 et sont reproduits dans ce tableau. Ces nouveaux chiffres sont comparables avec ceux pour 1925 et 1926 en ce qui concerne les méthodes employées, mais se réfèrent cependant au territoire d'avant-guerre.

² Y compris l'Alsace et la Lorraine avec 49 millions de tonnes transportées. Le trafic de service ne comprend pas ces deux provinces. Les chiffres comprennent les réseaux secondaires.

³ Y compris les réseaux d'Asie. Le chiffre correspondant de 1913 pour le territoire actuel de l'U. R. S. S. aurait été de 132,4 millions pour les tonnes transportées et 65.696 millions pour les tonnes-kilomètres.

⁴ Les chiffres relatifs aux tonnes-kilomètres sont basés sur des kilomètres tarifaires, qui diffèrent de la longueur réelle des parcours. Les chiffres ne sont pas comparables avec ceux des autres pays et ont été omis.

FOOTNOTES TO TABLE 89. RAILWAYS : GOODS CARRIED.

SOURCES: The same as for Table 87.

Note. — The figures in the table refer, as far as data are available, to the lines given in Table 87.

As regards the lack of comparability in the statistics, and the questions of service and military traffic, see general remarks to Table 88.

As fast freight (" grande vitesse ") traffic is not included in the statistics of several countries, it has been excluded wherever possible. Its volume is small as compared with that of slow freight (" petite vitesse ") traffic. Luggage and postal parcels have also been excluded. As the statistics often give live-stock according to the number of head and not according to weight, this item is excluded from the figures for many countries.

Five explanatory columns similar to those given in Table 88 are added. They indicate respectively whether (i) the whole or practically the whole railway system has been included (x) or not (—), (ii) whether free traffic, (iii) fast freight traffic, (iv) military transport, (v) livestock have been included (x) or excluded (—).

* Estimate or figures referring entirely or in part to the preceding year.

(a) Financial year terminating end of March of the following year. (b) 1912. (c) Financial year terminating end of June 1914. (d) 1914. (e) 1921. (f) Financial year terminating end of June of the year named. (g) 1915.

^{1, 2, 3, 4, 5, 6} : See notes to Table 88.

¹ Owing to the multiplicity of railway managements in Germany in 1913, the figures calculated at that time often overlap and are therefore too high as compared with those published since the centralisation of the administration. Official recalculations of the figures for 1913 have, however, been made and are reproduced in this Table.

These new figures are comparable with those for 1925 and 1926 as regards methods employed, though they refer to the pre-war territory.

² Including Alsace and Lorraine, with 49 million tons carried. The service traffic does not include these two provinces. The data are inclusive of minor lines (" réseaux secondaires ").

³ Including Asiatic territories. The corresponding 1913 figure for the present territory of the U. S. S. R. is stated to have been 132,4 million tons carried and 65,696 million ton-kilometers.

⁴ The ton-kilometric figures are based on " tariff kilometers ", which differ from the actual distance travelled. The figures are not comparable with those for other countries and have been omitted.

a) Chiffres de 1925. — Figures refer to 1925.

Note. — Les chiffres représentent soit des données officielles, soit des estimations dont l'exactitude varie selon les pays. Dans certains cas il semble que la distribution en catégories n'est pas nette, les autobus étant parfois inclus dans l'une des deux autres rubriques. De même on ne connaît pas la répartition entre catégories des automobiles officielles des Etats-Unis. Les totaux donnés dans le tableau représentent l'addition des chiffres disponibles.

Voici, pour la fin de 1927, les chiffres indiquant pour quelques pays choisis le nombre d'habitants pour une automobile :

| | | | | | |
|----------------------------|----|-----------------------|----|---------------------|-----|
| Etats-Unis | 5 | France | 42 | Suède | 56 |
| Canada | 10 | Royaume-Uni | 43 | Suisse | 74 |
| Nouvelle-Zélande | 11 | Argentine | 44 | Pays-Bas | 103 |
| Australie | 15 | Danemark | 46 | Allemagne | 164 |
| | | Uruguay | 56 | Italie | 256 |

¹ On comprend généralement sous le terme « Afrique Occidentale britannique » les possessions suivantes : Cameroun, Côte de l'Or, Gambie, Nigeria, Sierra-Leone, Togo.

² Compris avec les camions.

³ Compris avec les voitures automobiles.

⁴ Le chiffre total calculé par le Département du Commerce est de 29.687.499.

Note. — The figures represent either official data or estimates, the exactitude of which varies with the respective countries. In certain cases the division by categories is not quite clear; for instance, omnibuses are sometimes included under passenger cars or lorries. Similarly, the distinction by categories of the motor-cars owned by public bodies in the U. S. A. is not known. The totals given in the table represent additions of figures available.

The number of inhabitants to each motor-car in a few selected countries was at the end of 1927 as follows :

| | | | | | |
|-------------------------|----|--------------------------|----|-----------------------|-----|
| United States | 5 | France | 42 | Sweden | 56 |
| Canada | 10 | United Kingdom | 43 | Switzerland | 74 |
| New Zealand | 11 | Argentine | 44 | Netherlands | 103 |
| Australia | 15 | Denmark | 46 | Germany | 164 |
| | | Uruguay | 56 | Italy | 256 |

¹ The following possessions are usually included under the heading "British West Africa": Cameroon, Gambia, Gold Coast, Nigeria, Sierra Leone, Togo.

² Included under lorries.

³ Included under passenger cars.

⁴ The total figure published by the Department of Commerce is 29,687,499.

SOURCE : Documents budgétaires officiels.

SOURCE : Official budgetary documents.

Note. — Les frais d'exploitation des monopoles fiscaux, du domaine de l'Etat et des entreprises publiques n'ont pas été compris ; seuls les déficits sont portés, s'il y a lieu. Les chiffres de ce tableau sont surtout destinés à indiquer les tendances qui se manifestent dans chaque pays particulier ; les comparaisons entre les chiffres relatifs aux divers pays ne devront être faites qu'avec beaucoup de circonspection.

* C. C. = comptes clos. C. Pr. C. = comptes provisoirement clos. P. = prévisions. P. (v.) = prévisions votées. R. = prévisions révisées.

¹ Y compris quelques frais divers d'administration.

² Dépenses brutes.

³ Frais d'exploitation.

⁴ Y compris les dépenses brutes du domaine de l'Etat et des entreprises publiques.

⁵ Les chiffres sont ceux des projets de budget.

⁶ Pensions de guerre seulement.

⁷ Depuis 1926, le service de la dette de guerre est effectué par une Caisse autonome.

⁸ Y compris une allocation de 1,800 millions de lires à une caisse pour le développement économique et la défense nationale.

⁹ Corps de gendarmerie et des volontaires.

¹⁰ Y compris les dépenses brutes de la Monnaie et de l'Imprimerie nationale.

¹¹ Non compris le service de la dette effectué par les entreprises publiques.

Note. — Working expenses of Fiscal Monopolies, Public domain and Public undertakings have been excluded and only net deficits, if any, included. The figures in this table are principally intended to show the tendency and development in each individual country ; comparison between the figures for the various countries should only be made with great care.

* C. C. = Closed accounts. C. Pr. C. = Provisionally closed accounts. P. = Estimates. P. (v.) = Voted estimates. R. = Revised estimates.

¹ Including some administrative charges.

² Gross expenditure.

³ Working expenses.

⁴ Including gross expenditure on Public domain and undertakings.

⁵ The figures are those of Draft estimates.

⁶ War pensions only.

⁷ Service of war debt has been effected, since 1926, through an autonomous fund.

⁸ Including allocation of 1,800 million lires to fund for economic development and national defence.

⁹ Gendarmerie and Volunteer Corps.

¹⁰ Including gross expenditure of Mint and Printing Office.

¹¹ Excluding service of debt effected by Public undertakings.

a) 30. VI. 1928.

¹ Non compris la circulation en dehors de l'Union.

² Données officielles révisées comprenant la petite monnaie dont la circulation a été estimée à partir de janvier 1914. Elle s'élevait alors à \$56,960,000 ; ce chiffre a été adopté pour décembre 1913.

³ Jusqu'à 1921 : circulation des « chèques circulaires ».

⁴ Les séries données ne représentent pas toute la circulation monétaire, qui consiste en grande partie en pièces métalliques dont le montant exact est inconnu.

⁵ Excluding circulation outside the Union.

² Revised official figures including minor coins. Estimates for minor coins begin with January 1914 (\$56,960,000). This figure has been adopted for December 1913.

³ Up to 1921 : circulation of "circular cheques".

⁴ The series given does not cover the total monetary circulation which largely consists of coins. The exact amount of coins in circulation is unknown.

Pour détails concernant la composition et la nature des Avoirs de Fonds d'Etat, des Prêts et des Avances, voir *Mémoire sur les Banques centrales, 1913, 1918-1923, et Mémoire sur les Monnaies et les Banques centrales, 1913-1924.*

* Chiffre provisoire. — Provisional figure.

(a) 31. III. de l'année suivante. — 31. III. of the following year. (b) 2. III. 1929. (c) 31. VII. de l'année suivante. — 31. VII. of the following year. (d) 30. III. 1929. (e) 7. I. 1928. (f) 30. VI. 1914.

¹ Détails complets concernant dette du Gouv^t, envers Banque n'étant pas connus, répartition entre A) et C) de certains postes des bilans en grande partie approximative, tout spécialement pour les années 1925, 1926, 1927 et 1928.

² Y compris faible quantité d'autres valeurs non indiquées séparément.

³ Montant brut de dette de l'Etat envers Banque. Dépôts du Gouv^t, auprès de la Banque se montent à 14 millions de sucres au 31. XII. 1927 et à 8 millions au 31. XII. 1928.

⁴ A partir de 1923, marks-or.

⁵ Jusqu'à fin 1922: Service autrichien (Geschäftsführung) de la Banque d'Autriche-Hongrie.

⁶ Y compris certaines avances au Trésor, qui ne sont indiquées séparément que depuis commencement mai 1926.

⁷ Balance nette, déduction faite du fonds d'amortissement de la dette d'Etat envers la Banque.

⁸ Depuis 1927, Festikroon (1 Ekr = 100 Emk).

⁹ Pour la plus grande partie, billets du Trésor, retirés de la circulation.

¹⁰ Y compris une somme garantie par le Gouv^t, et ne dépassant pas 15 millions de Ekr.

¹¹ Y compris fonds d'Etat finlandais négociables à l'étranger. Montant indiqué à fin 1928 se compose exclusivement de ces titres.

¹² En 1928, Banque de Grèce.

¹³ Jusqu'à fin 1923: Office national d'émission.

¹⁴ Jusqu'à 1925, trois banques d'émission.

¹⁵ Non donnés séparément.

¹⁶ Y compris effets commerciaux sur l'étranger et les valeurs et placements autres que fonds d'Etat.

¹⁷ Jusqu'à fin 1923, Caisse nationale polonaise de Prêts.

¹⁸ Dette du Gouv^t, pour circulation fiduciaire, s'élevant à 10,679 millions de lei au 31. XII. 1928, réduite à 4,000 millions de lei par suite de réforme monétaire en fév. 1929. Forte proportion des sommes indiquées sous B représente avances à l'Etat dont montant exact n'est pas indiqué dans rapports de Banque. Environ 1,300 millions de lei de ces avances également annulés en fév. 1929.

¹⁹ Chiffres donnés sous A) indiqués dans bilans de Banque comme « Fonds et Placements », sans spécification. Prêts à long terme accordés à l'industrie et à l'agriculture sur « Fonds spéciaux » fournis par Commissariat des Finances, ne sont pas compris dans ce tableau.

²⁰ Montant brut de la dette de l'Etat.

²¹ Montant net de la dette-billets de l'Etat.

²² Y compris la Caisse d'Épargne bancaire (depuis 1928 Caisse d'Épargne du Commonwealth).

For details regarding the composition and the nature of the securities holdings, loans and advances, see *Memorandum on Central Banks, 1913, 1918-23, and Memorandum on Currency and Central Banks, 1923-24.*

¹ Full details of Govt. indebtedness to Bank not being known, the distribution between (A) and (C) of certain items of the balance-sheet is largely approximate, more especially for the years 1925, 1926, 1927 and 1928.

² Including small amount of other securities not separated.

³ Gross indebtedness of Govt. to Bank. Govt. deposits with the Bank amounted to 14 million sucres on 31. XII. 1927 and 8 million on 31. XII. 1928.

⁴ Since 1923, gold marks.

⁵ Up to the end of 1922, Austrian Section (Geschäftsführung) of the Austro-Hungarian Bank.

⁶ Includes certain advances to the Treasury shown separately from beginning of May 1926.

⁷ Net balance after deduction of the sinking fund for the State debt to the Bank.

⁸ Since 1927, Estikroon (1 Ekr = 100 Emk).

⁹ Mainly Treasury notes withheld from circulation.

¹⁰ Including a sum not exceeding Ekr. 15 millions, guaranteed by the Government.

¹¹ Including Finnish Govt. bonds in foreign currency. The 1928 amount given consists exclusively of such bonds.

¹² In 1928, Bank of Greece.

¹³ Up to the end of 1923, Nat. Office of Note Issue.

¹⁴ Up to 1925, three banks of issue.

¹⁵ Not shown separately.

¹⁶ Includes foreign commercial bills, securities and investments other than Government.

¹⁷ Up to the end of 1923, National Loan Bank.

¹⁸ The Govt. debt for fiduciary notes of 10,679 million lei on 31. XII. 1928, was reduced to 4,000 million lei as result of currency reform in Feb. 1929. Large proportion of sums under B represent advances to the State; exact amount not shown in Bank reports. About 1,300 million lei of these advances likewise cancelled in Feb. 1929.

¹⁹ The figures given under (A) are shown in the balance-sheets of the Bank as " Securities ", without further specification; long-term loans to industry and agriculture from special funds supplied by Finance Commissariat are not included in the table.

²⁰ Gross indebtedness of the State.

²¹ Uncovered net balance of the State note debt.

²² Including the savings bank department (since 1928, Commonwealth Savings Bank).

NOTES TO TABLE 98. — COMMERCIAL BANK DEPOSITS.

SOURCES : sauf avis contraire, bilans de banques ou compilations officielles. Des notes plus détaillées ont été données dans les diverses éditions du *Memorandum sur les monnaies et les Banques centrales*, de la Société des Nations.

SOURCES : Unless otherwise stated balance sheets or official computations. More detailed notes were given in the League of Nations *Memorandum on Currency and Central Banks*.

Afin d'éviter des doubles emplois avec le tableau 99, les dépôts pour le compte des caisses postales d'épargne ont été exclus des dépôts du Gouvernement. Les dépôts à vue comprennent les chèques certifiés, les chèques de caisse et les dividendes dus. Les dépôts à terme des banques nationales comprennent les dépôts d'épargne. Les correspondants représentent ceux du pays et ceux à l'étranger. Les « autres banques » comprennent également les caisses mutuelles d'épargne.

- * Banques commerciales et anciennes banques d'émission.
- * A la suite de la réforme monétaire, il n'y a plus de comptes or opposés aux comptes papier. A partir de 1926, les statistiques bancaires étant devenues plus détaillées, les chiffres ne sont plus entièrement comparables aux chiffres précédents.
- * Jusqu'à fin 1920 : trois « Presidency Banks ».
- * Yokohama Specie Bank, Industrial Bank of Japan, Bank of Taiwan.
- * Depuis 1923 : millions de Rentenmarks — ou Reichsmarks (1 Reichsmark = 1.000.000.000.000 de marks papier).
- * Depuis 1924 en schillings (1 schilling = 10.000 couronnes papier).
- * D'après le *Moniteur des Intérêts Matériels*.
- * Banque Nationale : A la suite de la réorganisation de la Banque, les chiffres pour 1927 ne sont pas strictement comparables à ceux des années précédentes.
- Banques d'Etat : Banque centrale coopérative et Banque agricole.
- Banques commerciales : Banque bulgare de commerce, Banque de crédit, Banque Balkanique, Banque Franco-Bulgare, « Banca Commerciale Italiana e Bulgara ».
- * Le chiffre de 1927 pour les correspondants dans le pays était de 201 et pour les correspondants à l'étranger de 120 millions.
- * D'après l'« Anuario Financiero y de Sociedades anónimas de España ».
- * Depuis 1927, millions de E. Kroons (1 E. Kroon = 100 E. Marks).
- * Jusqu'à la fin de 1923, y compris les comptes courants de certaines Institutions d'Etat.
- * Les chiffres pour 1924 ne sont pas comparables avec ceux des autres années, vu le manque de données pour une banque en réorganisation.
- * Banque d'Athènes, Banque Populaire, Banque d'Orient ; Banque Commerciale. La Banque Ionienne a dû être omise, vu que ses bilans ne font pas de distinction entre les comptes en drachmes et en livres.
- * Comptes courants dans 13 banques à Budapest, non compris les dépôts exprimés en monnaie étrangère. Le chiffre de 1913 a été converti en pengó au taux de 1 pengó = 0,863 couronne-or.
- * Jusqu'à fin 1921 : Banca Commerciale Italiana, Credito Italiano, Banco di Roma et Banca di Sconto. Pour 1922 les mêmes banques, moins la Banca di Sconto en liquidation. A partir de 1923, y compris la Banca Nazionale di Credito qui lui a succédé.
- * Compilations du Ministère des Finances. Les données de l'Office central de Statistique ne comprennent pas tous les comptes courants et ne sont donc pas comparables avec les statistiques de la plupart des autres pays.
- * Amsterdamsche Bank, Rotterdamsche Bankvereniging, Twentsche Bank, Incasso Bank, Bank-Associatie, Nederlandsche Handel-Maatschappij. Les dépôts dans les colonies ont été déduits des chiffres de cette dernière banque.
- * Série de l'Office de Statistique englobant toutes les banques.
- * Les « 5 Banques » sont : Banco Nacional Ultramarino, Banco Comercial de Lisboa, Banco Lisboa e Açores, Banco Portuguez e Brasileiro, Banco Comercial de Porto. Comme les données de 1926 et 1927 pour cette dernière manquent, on a utilisé les chiffres de 1925. Les dépôts dans les colonies ont été déduits des chiffres du bilan du Banco Nacional Ultramarino.
- La « Caixa Geral de Depositos » est une banque d'Etat. La majorité de ses dépôts sont des dépôts privés. L'importance des dépôts s'explique par le fait que leur remboursement est garanti par le Gouvernement.
- * Les chiffres représentent en principe les dépôts portant intérêt d'après les statistiques officielles. Les « comptes courants créditeurs » ont été omis, vu qu'ils contiennent une forte proportion de correspondants dans le pays, ce qui implique des doubles emplois. Une exception a été faite pour la Banca Româneasca dont les comptes créditeurs, qui sont parmi les plus importants, ont été ajoutés, afin d'éviter que les chiffres donnés ne soient trop incomplets.
- * D'après les compilations du *Statist*, y compris l'Etat libre d'Irlande. Les dépôts dans les banques de ce dernier pays s'élevaient en 1913 et 1922-1927, en millions de £, à : 70,7 ; 153,1 ; 149,7 ; 147,1 ; 140,6 ; 133,0 ; 127,6.]
- * Les chiffres pour les années 1925-1927 sont ceux publiés par l'Association de Banques de la Voïvodine ; on ne sait pas si ces données sont strictement comparables à celles des années précédentes.
- * Non compris les crédits non utilisés qui s'élevaient à la fin de 1927 à 313 millions.
- * D'après les compilations de la Banque nationale Suisse. Non compris les banques hypothécaires et les Sociétés financières.

* To avoid any overlapping with Table 99, deposits on account of Post Office Savings banks have been omitted from the Government deposits. The sight deposits include certified cheques, cashiers' cheques and dividends due. The time deposits of the National Banks include Savings Accounts. "Correspondents" represent home and foreign correspondents. The "other banks" include Mutual Savings Banks.

* Commercial banks and former banks of issue.

¹ As the result of the currency reform, there are no longer any gold accounts as opposed to paper accounts. As banking statistics have become more detailed since 1926, the figures are not altogether comparable with previous figures.

² Up to the end of 1920 : three Presidency Banks.

³ Yokohama Specie Bank, Industrial Bank of Japan, Bank of Taiwan.

⁴ Since 1923 : millions of Rentenmarks or Reichsmarks (1 Reichsmark = 1,000,000,000,000 paper marks).

⁵ Since 1924 in schillings (1 schilling = 10,000 paper crowns).

⁶ According to the figures of the *Moniteur des Intérêts Matériels*.

⁷ National Bank : Owing to the reorganisation of the Bank, the figures for 1927 are not strictly comparable with those of preceding years.

State Banks : The Central Co-operative Bank and the Agricultural Bank.

Commercial banks : Banque Bulgare de commerce, Banque de credit, Banque Balkanique, Banque Franco-bulgare, Banca Commerciale Italiana e Bulgara.

⁸ For 1927, correspondents at home represented 201 millions and foreign correspondents 120 millions.

⁹ According to the *Anuario Financiero y de Sociedades anónimas de España*.

¹⁰ Since 1927, millions of E. Kroons (1 E. Kroon = 100 E. marks).

¹¹ Up to the end of 1923, including the current accounts of certain State Institutions.

¹² The figures for 1924 are not comparable with those for the other years, as the data for one bank undergoing reorganisation are not available.

¹³ Bank of Athens, Banque Populaire, Banque d'Orient ; Banque Commerciale. The Ionian Bank had to be omitted, as there is no distinction in its balance sheets, between accounts in drachmas and sterling.

¹⁴ Current accounts in 13 banks at Budapest, not including deposits in foreign currency.

The 1913 figure has been converted into pengós at the rate of 1 pengó = 0.863 gold crown.

¹⁵ Up to the end of 1921 : Banca Commerciale Italiana, Credito Italiano, Banco di Roma and Banco di Sconto. For 1922, the same banks, with the exception of the Banco di Sconto, which was then in liquidation and was taken over by the Banca Nazionale di Credito. The latter bank is included as from 1923.

¹⁶ Statistics compiled by the Ministry of Finance. Statistics prepared by the Central Statistical Office do not include all the current accounts and are not comparable, therefore, with the statistics for most other countries.

¹⁷ Amsterdamsche Bank, Rotterdamsche Bankvereniging, Twentsche Bank, Incasso Bank, Bank-Associatie, Nederlandsche Handel-Maatschappij. The Colonial deposits have been deducted from the figures of the last-named bank.

¹⁸ Series of the Statistical Office referring to all banks.

¹⁹ The " 5 banks " are : Banco Nacional Ultramarino, Banco Comercial de Lisboa, Banco Lisboa e Açores, Banco Portuguez e Brasileiro, Banco Comercial de Porto. As the 1926 and 1927 figures for the latter are not available, the figures for 1925 had to be utilised. Deposits in the colonies have been deducted from the figures in the balance sheet of the Banco Nacional Ultramarino. The " Caixa Geral de Depositos " is a State bank. The amount of its deposits which are mostly private is explained by the fact that their repayment is guaranteed by the Government.

²⁰ In principle, the figures represent the interest-bearing deposits, according to official statistics. Creditor's current accounts have been omitted, because they include a large proportion of home correspondents, which means that the figures overlap. An exception has been made in the case of the Banca Româneasca, whose credit accounts, which are among the largest, have been added to make the figures more complete.

²¹ According to the statistics compiled by the *Statist* ; including the Irish Free State. The deposits in the Irish Free State banks were as follows for 1913 and 1922-1927 : (€,000,000's omitted) : 70.7 ; 153.1 ; 149.7 ; 147.1 ; 140.6 ; 133.0 ; 127.0

²² The figures for the years 1925-1927 are those compiled by the Banks' Association of the Voivodine ; it is not known whether these data are strictly comparable with the previous years.

²³ Excluding credits not utilised, which, at the end of 1927, amounted to 313 millions.

²⁴ According to the statistics compiled by the " Banque Nationale Suisse ". Excluding mortgage banks and trust companies,

NOTE: La distinction entre les dépôts d'épargne donnés dans ce tableau et les dépôts commerciaux du tableau 98 est loin d'être uniforme. Pour beaucoup de pays, une partie des dépôts donnés dans le tableau 98 représente en fait des dépôts d'épargne et aurait dû figurer plutôt dans le tableau 99. Dans certains cas où les chiffres de ce tableau diffèrent de ceux publiés dans le *Bulletin mensuel de Statistique*, la différence est due au fait qu'ils sont basés sur des statistiques annuelles, tandis que ceux du *Bulletin* se réfèrent à des données mensuelles portant parfois sur un nombre restreint d'établissements.

NOTE: The distinction between the savings deposits given in this table and the commercial deposits of Table 98 is far from being uniform. For many countries a part of the deposits given in Table 98 are, in point of fact, savings deposits and should therefore be given rather in Table 99. In certain cases where the figures in this table differ from those published in the *Monthly Bulletin of Statistics*, the difference is due to the fact that they are mainly based on annual statistics and those in the *Bulletin* sometimes on monthly returns covering a limited number of institutions.

• Chiffres provisoires.

SOURCE : Compilations officielles, à l'exception de celles relatives à la Belgique (1922-1926 — Banque d'Outremer ; à partir de 1927, Banque Nationale), aux États-Unis (*Commercial and Financial Chronicle*), à l'Italie (*Confederazione Generale Bancaria Fascista*), au Royaume-Uni (*Midland Bank Ltd.*) et à la Suisse (*Société de Banque Suisse*). La plupart des données sont publiées mensuellement dans le *Bulletin mensuel de Statistique* de la Société des Nations.

Sauf indication contraire, les chiffres représentent les émissions autorisées d'actions de sociétés anonymes nouvelles du pays et les augmentations de capital des sociétés existantes. Les données pour l'Allemagne, la Belgique (jusqu'à 1926), les États-Unis, le Royaume-Uni et la Suisse représentent la valeur d'émission, les autres se réfèrent à la valeur nominale. Les actions distribuées à titre gratuit ne sont pas comprises dans les chiffres pour la Belgique, le Danemark, les États-Unis, les Pays-Bas, la Roumanie, le Royaume-Uni, la Suisse et la Tchécoslovaquie et les conversions ne sont pas comprises dans ceux relatifs à la Belgique, au Danemark, aux États-Unis, aux Pays-Bas et au Royaume-Uni.

(a) Année commençant le 1^{er} avril. † Jusqu'à 1924, en kronen.

¹ Sociétés par actions, ordinaires et en commandite. Depuis 1924, non compris les conversions et les fusions. Le chiffre pour 1913, y compris les sociétés à responsabilité limitée (G. m. b. H.) était de 1,234,400 au lieu de 720,000.

² Depuis 1927, y compris les sociétés en commandite par actions et y compris les apports en nature.

³ Appel au public danois pour le compte de sociétés du pays.

⁴ A. Dans le pays, non compris les émissions du Gouvernement des États-Unis ; B. pour l'étranger. Les chiffres pour 1928 se composent de :

| | | |
|------------------------|---------------------|---------------|
| | (en milliers de \$) | |
| Sociétés par actions : | a) dans le pays. | b) Étranger. |

| Municipalités | 1,379,904 | 41,214 |
| | Total 6,724,986 | Total 774,747 |

Les statistiques publiées dans *Bradstreet's* et calculées d'après des principes un peu différents, donnent \$1,645,736,200 pour 1913 ; \$5,970,297,005 pour 1927 et \$7,243,182,523 pour 1928.

⁵ Non compris les grandes compagnies de chemins de fer ; depuis 1921, non compris les actions d'apport.

⁶ Jusqu'à la fin de 1923, émissions de sociétés anonymes nouvelles seulement.

⁷ Émissions excédant 100,000 gulden, y compris les émissions coloniales, et depuis 1925 les émissions étrangères ; non compris les bons du trésor.

⁸ Non compris les départements de l'Ouest.

⁹ A. Dans le pays ; B. pour les possessions anglaises ; C. pour l'étranger. Émissions lancées sur le marché intérieur, non compris les émissions faites par le Gouvernement britannique pour des buts nationaux, celles des gouvernements locaux dont le total n'est pas limité d'avance et les obligations à échéance de moins de douze mois.

¹⁰ Appels au marché suisse. Y compris les obligations et les emprunts des gouvernements locaux.

SOURCE : Official compilations excepting those for Belgium (1922-1926 — Banque d'Outremer ; since 1927, Banque Nationale), the U.S.A. (*Commercial and Financial Chronicle*), Italy (*Confederazione Generale Bancaria Fascista*), the United Kingdom (*Midland Bank Ltd.*) and Switzerland (*Société de Banque Suisse*). Most of the current data are published in the *League of Nations Monthly Bulletin of Statistics*.

Unless otherwise stated, the figures represent authorised share issues of new joint-stock companies at home and the increase of capital of existing companies. The data for Germany, Belgium (up to 1926), the U.S.A., the United Kingdom and Switzerland represent the issue value, the others refer to the nominal values. Bonus shares are excluded from the figures for Belgium, Denmark, the U.S.A., the Netherlands, Roumania, the United Kingdom, Switzerland and Czechoslovakia, and conversions are excluded in the case of Belgium, Denmark, the U.S.A., the Netherlands and the U.K.

(a) Year beginning April 1st. † Until 1924 in kronen

¹ Ordinary and "Kommandit" Joint-Stock Companies. Since 1924 excluding conversions and amalgamations. The 1913 figure, including Limited Liability Companies (G.m.b.H.), is 1,234,400 instead of 720,000.

² Since 1927, including Limited Liability Companies and including contributions in kind.

³ Subscriptions invited on home market by domestic companies.

⁴ A. Domestic excluding U.S. Government issues ; B. foreign. The composition of the 1928 figures is :

| | | |
|-------------------------|--------------------|---------------|
| | (\$ 000's omitted) | |
| Joint-Stock Companies : | (a) Domestic | (b) Foreign |
| bonds | 2,380,088 | 624,583 |

| Municipal | 1,379,904 | 41,214 |
| | Total 6,724,986 | Total 774,747 |

The data published in *Bradstreet's* and calculated somewhat differently are \$1,645,736,200 for 1913, \$5,970,297,005 for 1927 and \$7,243,182,523 for 1928.

⁵ Excluding the Railway Companies ; since 1921 excluding vendors' shares.

⁶ Until the end of 1923 issues of new Joint-Stock Companies only.

⁷ Issues exceeding 100,000 gulden, including colonial and, since 1925, foreign issues ; excluding Treasury bills.

⁸ Excluding the Western Departments.

⁹ A. Domestic, B. British possessions, C. Foreign subscriptions invited on home market ; excluding issues made by the British Government for national purposes, loans by municipal and county authorities, except in cases where there is a specified limit to the subscription, and bonds of less than 12 months' currency.

¹⁰ Invitations for subscription on Swiss market, including bonds and local government loans.

NOTES AU TABLEAU 101. — COURS DES CHANGES A NEW-YORK.

NOTES TO TABLE 101. — NEW YORK EXCHANGE RATES.

SOURCES : Société des Nations : *Mémoire sur les monnaies et les Banques Centrales ; Bulletin Mensuel de Statistique.* — *Federal Reserve Bulletin.*

League of Nations : *Memorandum on Currency and Central Banks ; Monthly Bulletin of Statistics.* — *Federal Reserve Bulletin.*

Les chiffres représentent des moyennes mensuelles et annuelles exprimées en cents des Etats-Unis pour une unité monétaire du pays d'après les cours d'achat à la bourse de New-York. Les chiffres annuels donnés sous a) représentent en règle générale la moyenne des douze chiffres mensuels, ceux sous b) représentent le coût du dollar en monnaie nationale exprimé en pourcentage de la valeur au pair.

Faute de données relatives aux changes du dollar par rapport au kran persan et au baht (tical) siamois, on a inséré le change par rapport à la livre sterling. Les pourcentages donnés pour chaque année sous b) indiquent le coût de la livre sterling en kran et en bahts exprimé en pourcentage du coût en 1913.

The figures represent monthly and yearly averages expressed in United States cents for one monetary unit of the respective country according to the buying rates in New York. The yearly figures under (a) are as a rule the average of the twelve monthly figures, those under (b) show the percentage which cost of dollar is of its cost at par.

Owing to the lack of exchange quotations between the dollar and the Persian kran and the Siamese baht (tical), the £ exchange has been used. The yearly percentages given under (b) show the percentage which cost of £ expressed in the national currency was of its average cost in 1913.

** Chèques.

† Calculé d'après les changes sur New-York. Pour l'Estonie, cours d'achat à Reval.

† Calculated from rates on New York. For Estonia, buying rates in Reval.

¹ Depuis 1928 change du peso-or.

² Parité introduite le 11 juillet 1928. Le change est au pair seulement à partir de septembre 1928.

³ D'après la parité introduite en décembre 1926 : 5 ⁰⁰/₁₀₀ pence = 1 milreis. L'ancienne parité était de 16 pence par milreis.

⁴ D'après le taux conventionnel d'avant-guerre.

⁵ D'après la parité introduite en septembre 1925.

⁶ D'après la parité introduite en 1924.

⁷ D'après la parité introduite en mars 1927.

⁸ Les cours de 1923 et en partie ceux de 1924 ne se rapportent pas toujours au marché libre.

⁹ Faute de parité du peso-papier, avant novembre 1924, taux moyen de 1913. Depuis novembre 1924, la parité légale a été fixée à 1 quetzal (= 60 pesos), pour 1 \$, ce qui correspond à 1,666 cents pour 1 peso.

¹⁰ Cours moyen de 1913.

¹¹ La relation de 48,665 cents pour 1 roupie a été calculée d'après la parité introduite en février 1920 (24 pence = 1 roupie) ; avant cette date, la parité a été de 16 pence pour 1 roupie. La relation de 36,499 cents pour 1 roupie est basée sur la nouvelle parité introduite le 1^{er} avril 1927 (18 pence = 1 roupie).

¹² Le kran ayant un étalon argent, le chiffre utilisé au lieu de la parité représente le change moyen de 1913. Les chiffres donnés dans la colonne représentent le nombre de pence pour 1 kran.

¹³ Le taux de 18,289 pence est calculé d'après le taux en vigueur en 1913 (13,123 ticals = 1 £). En avril 1927, le taux a été fixé à 11 ticals pour 1 £ (= 21,318 pence par tical). Les chiffres donnés dans la colonne représentent le nombre de pence pour 1 tical. En avril 1928 le terme « tical » a été remplacé par celui de « baht ».

¹⁴ Fin de l'année. Pour l'Allemagne, le pourcentage du coût du dollar en décembre 1923 est : 106.490.789.546.400.

¹⁵ Pour 1.000.000 de marks-papier.

¹⁶ Nombre de cents pour un Reichsmark. (1 Reichsmark = 1.000.000.000 de marks anciens).

¹⁷ Le « schilling », introduit en décembre 1924, vaut 10.000 couronnes-papier.

¹⁸ Unité introduite en octobre 1928, le Belga = 5 francs-papier.

¹⁹ La loi du 22. XI. 1928 fixe une nouvelle parité de 0,7223 cents pour 1 lev.

²⁰ D'après la nouvelle unité, le Kroon (= 100 marks), créée en avril 1927, légalement introduite le 1^{er} janvier 1928. Le taux de 23,821 représente la parité conventionnelle d'avant-guerre.

²¹ D'après la parité légale introduite en décembre 1925.

²² D'après la nouvelle parité introduite le 25. VI. 1928 (1 ancien franc-or = 4,925 nouveaux francs). Les chiffres annuels pour 1928 se réfèrent à la seconde moitié de l'année.

²³ D'après la parité introduite le 14 mai 1928. Les chiffres annuels de 1928 se réfèrent aux huit derniers mois de l'année.

²⁴ Unité monétaire légale introduite à partir de 1926 (1 pengö = 12.500 couronnes-papier).

²⁵ Nouvelle parité introduite le 21 décembre 1927.

²⁶ Cours de vente. Depuis fin 1922, nombre de cents pour 1 lat. Avant cette date, nombre de cents pour 1 rouble letton.

²⁷ Jusqu'à juillet 1925, chèques ; à partir d'août, cours moyen pour billets.

²⁸ Parité en vigueur d'avril 1924 à septembre 1927 (1 zloty = 1.800.000 marks).

²⁹ D'après la nouvelle parité introduite en octobre 1927 (1,719 zloty ancien = 1 zloty nouveau).

³⁰ Nombre de cents pour 1 zloty.

³¹ Par décret du 7 février 1929, la Roumanie a adopté une nouvelle parité de 32,26 nouveaux lei = 1 leu-or ancien (0,598 cents = 1 leu).

³² D'après la parité de la couronne austro-hongroise d'avant-guerre. La valeur légale de la Koruna a été fixée, en mars 1925, entre 2,90 et 3,03 cents.

- ¹ Since 1928, quotations for the gold peso.
- ² Parity in force since July 11th, 1928. The exchange has been at par only since September 1928.
- ³ According to the parity in force since December 1926 (5 "mil" = 1 milreis). The old parity was 16d. per milreis.
- ⁴ According to the conventional pre-war rate.
- ⁵ According to the par fixed in September 1925.
- ⁶ According to the parity in force since 1924.
- ⁷ According to the parity in force since March 1927.
- ⁸ The quotations for 1923 and in part also those for 1924 do not always refer to the free market.
- ⁹ As there was until November 1924 no legal parity of the paper peso, the average rate in 1913 has been used. In November 1924 a legal parity of 1 quetzal (= 60 pesos) for 1 dollar was established which rate corresponds to 1.806 cents for 1 peso.
- ¹⁰ Average rate in 1913.
- ¹¹ The relation of 48.665 cents per 1 rupee has been calculated from the legal parity fixed in February 1920 (24d. = 1 rupee); before that date, the parity was 16d. = 1 rupee. The relation of 36.499 cents per 1 rupee has been based on the new parity in force since April 1st, 1927 (18d. = 1 rupee).
- ¹² The kran being based on a silver standard, the figures used as parity represent the average exchange in 1913. The figures given in the column represent the number of pence per kran.
- ¹³ The rate of 18.289d. has been calculated from the rate in force in 1913 (13.123 ticals = £1). In April 1927, the rate has been fixed at 11 ticals for £1 (= 21.818d. per 1 tical). The figures given in the column represent the number of pence per tical. In April 1928 the term "baht" was substituted for the term "tical".
- ¹⁴ End of year. For Germany the percentage of cost of dollar in December 1923 is : 106,490,789,546,400.
- ¹⁵ For 1,000,000 paper marks.
- ¹⁶ Number of cents for 1 Reichsmark (1 Reichsmark = 1,000,000,000,000 old marks).
- ¹⁷ The "schilling" introduced in December 1924 equals 10,000 paper kronen.
- ¹⁸ Unit in force since October 1926, the belga = 5 paper francs.
- ¹⁹ The law of November 22nd, 1928 established a new parity of 0.7223 cents per 1 lev.
- ²⁰ According to the new unit, the kroon (= 100 marks), created in April 1927, legally introduced on January 1st, 1928. The rate of 23.821 represents the conventional pre-war parity.
- ²¹ According to the legal par fixed in December 1925.
- ²² According to the new parity fixed on June 25th, 1928 (1 old gold franc = 4.925 new francs). The annual figures for 1928 refer to the second half of the year.
- ²³ According to the new parity fixed on May 14th, 1928. The annual figures for 1928 refer to the last eight months.
- ²⁴ Since 1926 legal unit of currency (1 pengö = 12,500 paper kr.).
- ²⁵ Parity in force since December 21st, 1927.
- ²⁶ Selling rates. Since the end of 1922 number of cents for 1 lat. Before that date, number of cents per 1 Latvian rouble.
- ²⁷ Until July 1925, cheques; since, mean rate for notes.
- ²⁸ Parity in force from April 1924 to September 1927 (1 zloty = 1,800,000 P. M.).
- ²⁹ According to the new parity in force since October 1927 (1.719 old zloty = 1 new zloty).
- ³⁰ Number of cents for 1 zloty.
- ³¹ By decree of February 7th, 1929, Roumania adopted a new parity of 32.26 new lei = 1 old gold leu (0.508 cents = 1 leu).
- ³² According to the pre-war parity of the Austro-Hungarian krona. The legal value of the koruna was fixed in March 1925 between 2.90 and 3.03 cents.

NOTES AU TABLEAU 102. — NOMBRES-INDICES DES PRIX DE GROS.
 NOTES TO TABLE 102. — INDEX NUMBERS OF WHOLESALE PRICES.

SOURCES : Société des Nations : *Mémorandum sur les Monnaies et les Banques Centrales*, Bulletin mensuel de Statistique.
 SOURCES : League of Nations : *Memorandum on Currency and Central Banks*, Monthly Bulletin of Statistics.

Tous les indices du tableau sont exprimés en pourcentages des prix en 1913 ou 1914 (= 100).
 Dans certains cas le fait de ramener directement un indice à une base nouvelle, sans le calculer d'après les prix initiaux, donne des résultats différents de ceux qui auraient été obtenus si l'on avait fait un nouveau calcul d'après les prix absolus.
 Le *Mémorandum sur les monnaies et les Banques Centrales*, 1913-1923, contient une série de notes détaillées expliquant la méthode donne ces notes de manière plus abrégée (*Mémorandum sur les monnaies et les Banques Centrales*, 1913-1924; vol. II). Toutes les éditions du *Mémorandum* contiennent en dehors des séries ramenées à 1913, également les séries originales. Parmi les séries publiées dans le tableau toutes ont comme base originale l'année 1913 ou 1914 à l'exception de l'Afrique du Sud (base : année 1910), des États-Unis (1926), du Canada (1926), du Japon (1900), du Royaume-Uni : *Statist* (1867-1877) et *Economist* (1927), de l'Australie (1911) et de la Nouvelle-Zélande (1909-1913).

* Ajoutez trois zéros. ** Ajoutez six zéros. † Ajoutez neuf zéros.

a) Moyennes mensuelles ; b) Avril, juillet, octobre et janvier de l'année suivante ; c) 15 du mois ; d) Dernier mercredi du mois ; e) Fin du mois ; f) Les chiffres annuels se réfèrent à la fin des années ; g) Début du mois suivant ou fin du mois donné ; h) Moyenne des cinq derniers mois ; i) Moyenne de la seconde quinzaine du mois ; j) Début du mois suivant ; k) Décembre ; l) Les cours se rapportent au 10 et au 20 de chaque mois ; m) Fin juillet de chaque année ; n) Moyenne des huit derniers mois.

¹ La série originale de ce nouvel indice, basé sur l'année 1926 = 100, est donnée au bas de cette page. La méthode en a été exposée dans le *Bulletin mensuel de Statistique* N° 8, 1928.

² Le nouvel indice pour l'Argentine, calculé par la Direction générale de la Statistique de la République Argentine, est publié dans la *Revista de Economía Argentina* ; celui pour le Chili est calculé par la Direction Générale de la Statistique du Chili et publié dans *Estadística Chilena*.

³ A partir de 1927, indice calculé d'après la nouvelle parité monétaire de 18 d. par rouble au lieu de 24 d. par rouble en vigueur précédemment.

⁴ Indice or.

⁵ L'indice de *Finanstidende* (Danemark) et celui du Dr Lorenz (Suisse) ont été discontinués ; leurs chiffres annuels sont donnés au bas de cette page.

⁶ Indice du Bureau central de Statistique. La méthode en a été exposée dans le *Bulletin mensuel de Statistique* N° 4, 1927, et N° 4, 1928.

⁷ Moyennes mensuelles basées sur le chiffre du mois correspondant en 1913.

⁸ Depuis juillet 1924, modification de la liste des marchandises.

⁹ Série recalculée sur la base du zloty actuel.

¹⁰ Nouvel indice géométrique, avec 1927 comme base originale. Voir *Bulletin mensuel de Statistique* N° 12, 1928.

¹¹ Jusqu'à fin 1926, indice calculé par le « Gosplan » ; depuis 1927, par l'Office central de Statistique.

The indices given in the table are all expressed in percentages of 1913 or 1914 (= 100).

In certain cases, the conversion of an index on to a new base without recalculating it from the original quotations yields results which are different from those which would have been obtained by recalculating the index on the new base from the original quotations.

Detailed notes on the computation of the most important index numbers were given in the *Memorandum on Currency and Central Banks*, 1913-1923, and repeated in a summarised form in the *Memorandum on Currency and Central Banks*, 1913-1924, Vol. II. All the issues of the *Memorandum* contain the original basic series in addition to the calculated series.

The original basic years of the series given in the table are 1913 or 1914, with the exception of the Union of South Africa (1910), the United States (1926) ; Canada (1926) ; Japan (1900) ; the United Kingdom : *Statist* (1867-77), *Economist* (1927) ; Australia (1911) and New Zealand (1909-13).

* 000's omitted. ** 000,000's omitted. † 000,000,000's omitted.

(a) Monthly averages ; (b) April, July, October and January of following year ; (c) 15th of month ; (d) Last Wednesday in month ; (e) End of month ; (f) The yearly figures refer to the end of the years ; (g) Beginning of the following month or end of the month given ; (h) Average of last five months ; (i) Average of second half of month ; (j) Beginning of following month ; (k) December ; (l) The quotations refer to the 10th and 20th of each month ; (m) End of July of each year ; (n) Average of last eight months.

¹ The original series of this new index, based on the year 1926 = 100, is given at the bottom of this page. The method of computation was explained in the *Monthly Bulletin of Statistics*, No. 8, 1928.

² The index for Argentine, compiled by the General Statistical Office of the Argentine Republic, is published in the *Revista de Economía Argentina* ; that for Chile is compiled by the Chilean General Statistical Office and published in the *Estadística Chilena*.

³ Since 1927 index calculated according to the new parity of 18d. per 1 ruppee instead of the former parity of 24d. per 1 ruppee.

⁴ Gold index.

⁵ The index of the *Finanstidende* (Denmark) and that of Dr. Lorenz (Switzerland) have been discontinued. Their figures for the back years are given below.

⁶ Index of the Central Bureau of Statistics. The method of computation was explained in the *Monthly Bulletin of Statistics*, No. 4, 1927 and No. 4, 1928.

⁷ Monthly averages based on the figure for the corresponding month of 1913.

⁸ Since July 1924, modification of the list of commodities.

⁹ Series recalculated on the basis of the present zloty.

¹⁰ New geometric index based originally on 1927. See *Monthly Bulletin of Statistics*, No. 12, 1928.

¹¹ Until end of 1926 index calculated by the « Gosplan » ; from 1927 by the Central Statistical Office.

NOTES AU TABLEAU 103 : NOMBRES-INDICES DES PRIX DE DÉTAIL.
FOOTNOTES TO TABLE 103 : INDEX NUMBERS OF RETAIL PRICES.

SOURCES : La plupart des chiffres ont été fournis par le BUREAU INTERNATIONAL DU TRAVAIL. Les données sont publiées régulièrement dans sa *Revue internationale du Travail* et dans le *Bulletin mensuel de Statistique* publié par la Société des Nations.

SOURCES : The figures were mainly supplied by the INTERNATIONAL LABOUR OFFICE. Current data are published in its *International Labour Review* and in the *Monthly Bulletin of Statistics* published by the League of Nations.

* Ajouter trois zéros. ** Ajouter six zéros.

a) Moyennes annuelles. — b) Décembre. — c) Juin-Juillet. — d) 16 du mois courant au 15 du mois suivant. — e) Juillet. — f) Janvier de l'année. — g) Première moitié de l'année. — h) Moyennes trimestrielles (second trimestre pour les chiffres annuels). — i) Juin. — j) Avril, juillet, octobre et janvier de l'année suivante. — k) Les chiffres annuels se réfèrent au mois de juin ; à l'exception de 1917 (août) et 1918 (août-septembre), la période de base est 1911-13. — l) Moyenne des sept derniers mois. — m) Semaine du milieu de mois. — n) Février, août et novembre. — o) 15 du mois.

1. Indice-or.

* Les chiffres pour octobre et novembre 1923 sont de 365.700.000.000 et 65.700.000.000.000 respectivement.

* Les indices mensuels comprennent des articles d'alimentation, de chauffage et d'éclairage. Les moyennes annuelles comprennent également des articles d'habillement et se rapportent à toutes les villes départementales.

* Série révisée.

* Depuis 1922 en zloty. Depuis octobre 1927 calculé sur la base du nouveau zloty.

* Les moyennes annuelles et les chiffres mensuels depuis janvier 1925 se réfèrent à une série révisée comprenant le logement.

* Indice basé sur un budget de famille de fonctionnaire, y compris le logement. La série publiée dans le *Bulletin mensuel de Statistique* diffère entre autres par le fait qu'elle se réfère à une famille ouvrière.

* Avant 1926, seulement Amsterdam.

* Pour les années 1921 à 1924, y compris le combustible et le savon ; depuis 1925, nouvel indice pondéré sans combustible et savon.

* Groupe « Alimentation » de l'indice général donné dans la partie a) du tableau.

* 000's omitted. ** 000,000's omitted.

a) Yearly averages. — b) December. — c) June-July. — d) 16th of the current to the 15th of following month. — e) July. — f) January. — g) First half of the year. — h) Quarterly averages (second quarter for annual figures). — i) June. — j) April, July, October and January of following year. — k) The yearly figures refer to June, except 1917 (August) and 1918 (August-September), the base period is 1911-13. — l) Average of last seven months. — m) Middle week of the month. — n) February, August and November. — o) 15th of month.

1. Gold index.

* The figures for October and November 1923 are 365,700,000,000 and 65,700,000,000,000 respectively.

* The monthly indices include foodstuffs, heating and lighting. The yearly averages include also clothing and refer to all country towns.

* Revised series.

* Since 1922, in zloty. Since October 1927 calculated on the basis of the new zloty.

* The yearly averages and the monthly figures since January 1925 refer to a revised series, including rent.

* Index based on a budget of a middle-class family, including rent. One of the points of difference between this index and the series published in the *Monthly Bulletin of Statistics* is that the latter refers to a working-class family.

* Prior to 1926, Amsterdam only.

* For 1921-24 including fuel and soap ; since 1925 new weighted index without fuel and soap.

* Group "Foodstuffs" of the general index given in part a) of table.
