RECENT PUBLICATIONS
OF THE ECONOMIC INTELLIGENCE SERVICE

STATISTICAL YEAR-BOOK
OF THE LEAGUE OF NATIONS 1939/40

(Ser. L.o.N. P. 1940.II.A.3.)

A complete and authoritative compilation of demographic, economic and financial statistics relating to all states, colonies and other statistical areas throughout the world. The national data are rendered internationally comparable as far as possible.

This fourteenth edition covers broadly the 1930-1939 decade and the early half of 1940. Like its predecessors, it gives comprehensive data on population conditions, primary and industrial production, trade and transport, employment and unemployment, wages and prices, money and banking, Government receipts and expenditure and public debt.

The population statistics given depict not only the present position of the various countries but also their past and prospective demographic evolution. Currency and exchange measures introduced since the outbreak of war are reviewed in detail, while the effects of the war are clearly discernible in most of the statistical series given, and more especially in those of European countries.

285 pages in wrappers 10/- \$2.50
bound in cloth 12/6 \$3.50

MONEY AND BANKING, 1939/40:
MONETARY REVIEW

(Ser. L.o.N. P. 1940.II.A.2¹)

A volume on war finance.

Describes and analyses the transition from peace to war in the field of currency and credit and traces the monetary repercussions of war finance up to the spring of 1940.

Presents, in particular, a systematic analysis of various far-reaching measures adopted by Governments to control exchanges; to mobilise foreign assets; to regulate the capital markets; and to insure the flow of funds into the national treasuries.

Currency measures introduced in occupied countries such as Czecho-Slovakia and Poland are summarised in a special note.

The essential monetary statistics of over forty countries are tabulated in a substantial appendix.

101 pages 3/- \$0.75
