Notice to Mariners.

Floating Light off the Roman Rocks in False Bay.

Rear Admiral the Honorable JOSCELINE PERCY C. B., Commander in Chief of Her Majesty's Ships and Vessels on the Cape of Good Hope Station, hereby gives notice, that, in pursuance of Instructions from the Lords Commissioners of the Admiralty, a floating light is moored off the Roman Rocks, in 7½ fathoms water, distant therefrom one cable's length, due North, (by Compass.)

It is a bright revolving light, 37 feet above the level of the Sea, and may be seen in clear weather at a distance of 10 miles from a ship's deck. It will be lighted at Sun-set all the year round, and extinguished half-an-hour after day light.

The Light Vessel is painted red, and during day light will hoist a red flag when a Sail is in sight.

The following remarks made by Mr. BROWN, Master of H. M. Ship *Winchester*, are herewith subjoined, for the guidance of Ships navigating False and Simon's Bay.

By Command of the Commander-in-Chief,

WILLIAM DYER, *Secretary.*

H. M. S. *Winchester*, Simon's Bay,
10th January 1845.

REMARKS FOR SHIPS BOUND INTO

SIMON'S BAY.

The Light Vessel is moored on the North side of the Roman Rocks, and distant therefrom one cable's length. It is a bright revolving light, 37 feet above the level of the Sea, and may be seen in clear weather at a distance of 10 miles from a ship's deck.

From this light the Compass bearings are, Whittle S. S. E. distance 7 miles, on which there is only 12 feet water.

Miller's Point, S. ¾ W. distance 4 miles.

Seal Island, E. ¼ S. distance 6½ miles.

Dock Yard Jetty, W. ¼ N. distance 1¼ miles.

Ships steering or beating into False Bay from round the Cape of Good Hope, will open the Light clear of Miller's Point, (which is the point 7 miles and ¼ from Cape Point, off which, but close to, are some rocks above water,) when it bears N. ¼ E.; and if intending to beat up inside the Whittle, the light should not be brought to the Westward of N. by W. ¼ W., or to the Eastward of North, until you are certain of being within 5 miles of the light, when you must be Northward of the Whittle, and may bring the light, in standing to the Northward, to bear N. W. by W., working up towards her by short tacks, and passing to the North, leaving her on your Larboard hand, distant ¼ of a mile.

If outside the Whittle do not bring the light to the North of N. N. W. ¼ W. or to the Westward of N. W. by W. ¼ W., on ac-

count of Seal Island, and the rocks which lay off $1\frac{1}{2}$ miles to the Southward, turn up by short tacks until you are certain of being within 5 miles of the light, which will insure your being Northward of the Whittle, and may bring the light in standing to the Westward to bear North. With a leading wind bring the light to bear N. by W., you will be well inside the Whittle, and may run up keeping it on that bearing until within $\frac{1}{2}$ of a mile of the light, when you must open it on your Larboard side, and round it not less than $\frac{1}{2}$ a mile distant; when the light bears S. S. W. steer in West for the anchorage, and come to in 14, 12 or 10 fathoms according to the weather. If a fine night, you may choose a berth among the shipping; if otherwise, anchor in an outside berth for the night.

Ships rounding Hanglip must bear in mind, that the Whittle lies nearly in a direct line between that Cape and the Light Vessel, from which it bears, S. S. E.; therefore, if coming up with a fair wind outside the Whittle, bring it to bear N. N. W. $\frac{1}{2}$ W., or N. W. and by N., and run for it.

These remarks are principally intended for seamen not acquainted with Simon's Bay; of course, those who know the passage between Roman Rocks and Noah's Ark need not pass to the North of the former, but I would call their attention to the Phoenix Rock, and recommend their running for the anchorage at all times by a bearing of the light.

As I am aware of the great difficulty in judging of distances at night, and this Light Vessel being moored on the North side of the rocks to protect her from the S. E. gales,— I do recommend it as a fixed rule, that all Ships should at night pass to the Eastward, and haul round the North side of the Light Vessel.

If you pass to the Southward bear in mind the passage between Noah's Ark and the Roman Rocks is barely $\frac{1}{2}$ of a mile; and as the light is to the Northward of these rocks two cables' length, do not come within full $\frac{1}{2}$ a mile of the light; but I do not recommend this passage to strangers.

The following Compass bearings were taken from the Light Vessel,—

Miller's Point,	S. 8 W.
Outer Roman Rock,	S. 15 E. distant 100 fathoms.
Elsey Peak,	N. 5 W.
Noah's Ark,	S. 47 W.
Dock Yard Jetty,	W. 3 N.
Hanglip,	S. 23 E.
Seal Island,	S. 85 E.
Whittle,	S. 25 E.

Master, H.M.S. Winchester.

PROSPECTUS.

In the Press and preparing for publication, a Compilation entitled "ORIENTAL ERAS," comprising the various annual divisions or eras in use amongst Christians, Hindoos, Mahomedans, Parsees, Arabians, &c. commencing from the Christian era, and continued to A. D. 1900, the whole arranged in juxta-position, and accompanied by chronological notices of important events connected with India and the East.

To every one engaged in the service of the Government of India, the utility of the above work will be great, especially, should their employment or recreation render it necessary to refer to the corresponding dates in other eras, than such as happen to appear on the face of public or other records; as treaties, grants, bonds and engagements. To make the work more easy of reference to such as have occasion to refer to sunnuds, grants of lands, &c. under the Marhatta Dynasty, an era, commencing with the reign of Sivaji, will be inserted with the corresponding years in other modes of reckoning time. The reader will be enabled at a glance, to ascertain the corresponding years of 8 different eras all, more or less, used in the east, and to which there is frequent occasion to refer by most persons engaged in public departments, or in the pursuit of historical researches of eastern nations, or in the minor matters more particularly connected with the transactions of Government. The Compiler has endeavoured to make the work complete, and deserving of the patronage and support now solicited for it.

Great care will be used in the manual department of the publication, which will be printed on fine English paper, and will consist of about 200 pages octavo, neatly bound in cloth. In addition to the chronological notices, the work will contain some introductory remarks in explanation of the various eras that follow.— Price of each copy Rs 7, which it is hoped will not be considered a heavy price, considering the nature and importance of the work, and the heavy charge that necessarily attends the printing of tabular matters.

Early applications are solicited, and all communications are requested to be addressed to Jeejeebhoy Byramjee, Printer, Courier Press.
