No. 77 OF 1857.

Notice

Is hereby given, that a small supply of ADHESIVE ENVELOPES, referred to in the undermentioned Notice of the Officiating Director General of the Post Office in India, dated Calcutta, the 29th November 1856, have been received by this Department from Calcutta. Officers in charge of Local Depôts, requiring any, should prefer their Indent to this Department, as directed in the above notice.

"NOTICE.

"The Officers in charge of Treasuries and Depôts or the custody and sale of Postage Stamps are informed that Adhesive Envelopes, stamped with the value of One Anna, have been received from England, and, being now in charge of the Superintendent of Stamps, Calcutta, are now available on Indent.

"2. These Envelopes are in packets of 16, and each packet is enclosed in a wrapper, on which is marked the price, Rs. 1-2-0.

"3. The Rules for the sale of Postage Stamps are applicable to the sale of the Stamped Envelopes; but discount is allowed on the actual value of the latter, and not the extra charge of 2 annas on every 16 Envelopes, which is added to cover the cost of the paper and manufacture.

"4. The Superintendent of Stamps will not supply the Stamped Envelopes in a smaller quantity than one Ream at a time, which consists of 30 Packets, and is of the value of Rs. 33-12-0, including the extra charge of 2 annas on each Packet."

OPINIONS OF THE PRESS.

"We like the racy prose of "My Walk to the Office;" the poems contained in the volume are genuine transcripts of feeling, and the verses cleverly constructed. The "Lost Notes" is an able paper; and the volume is evidently the production of a pen well schooled in style, and a mind well stored with knowledge."—*The London City Press.*

"In style and spirit alike the Sketches and Tales are good. They exhibit considerable graphic power, exercised with much taste and judgment; and they display warm feeling, always of the right sort."—*Bombay Gazette.*

"A genial and kindly spirit breathes through the pages. The author is an observer of men and manners, meditative, imaginative, and with a faculty for sketching in words the pictures that occupy his mind."—*Bombay Guardian.*

"The author is a writer of considerable ability. His versification is extremely elegant and harmonious, and his imagery beautiful and chaste from its exquisite simplicity."—*Telegraph and Courier.*

"Ignorant for a time as to who their author was, we considered them so excellent as to be reprints from some English work of name which had not happened to fall into our hands, and were not a little astonished to find that the writer was in the midst of us."—*Bombay Times.*

"We cannot doubt but that the work will meet with the most complete success."—*Poona Observer.*

"Its typography, printing, and binding is so elaborately and excellently executed that we may fairly say it is one of the best and neatest works that has been issued from the Presidency Press."—*Sind Kossid.*

"The Author seems to be a man of genuine talent. We do not often meet with so much good writing in Anglo-India publications."—*Bengal Hurkaru.*

"A very clever volume."—*Madras Spectator.*

In their last Report, dated 13th August 1856, the Municipal Commissioners observed that many sanitary improvements, the execution of which was desirable, had to be postponed in consequence of the crippled state of the Municipal Fund. The Commissioners regret to have to state, that for the same reason, various works of improvements, which they hoped to have undertaken during the past year, have not been executed; and, indeed, if it were not for the *Loan*, by several Native gentlemen, of a Lac of Rupees to Her Majesty's Justices, it would have been out of the power of the Commissioners to have carried on, beyond the ordinary Conservancy duties, any work of improvement involving any considerable expenditure.

The enforcement, as far as has been practicable, of the provisions of the New Conservancy Act (No. XIV. of 1856) has tended to render the general state of the Island more cleanly than it has been heretofore, especially the Native Town. Until, however, the inhabitants themselves co-operate more generally than they do at present with the Commissioners in this matter, any very marked improvement in the sanitary condition of the Island cannot be expected.

The want, experienced in former years, of legal authority to check practices which caused nuisances, injurious to public health, has, in some respects, been supplied by that Act; but full effect cannot be given to many of its provisions until the requisite Bye-Laws are passed and arrangements are made to insure their due observance. These matters are now under the consideration of the Municipal Commissioners.

In addition to the ordinary Conservancy duties performed, *i. e.* the Watering of the Public Roads and Streets (the principal thoroughfares twice, the others once a day) during eight months of the year,—the Scavenging of the Town and Island throughout the whole year,—and the usual Repairs to the Roads and Streets, including a layer of Metalling, the following new Works of improvement have been executed during the past year:—

The Public Lamps have been supplied with Burners of the pattern of those used at Calcutta; these have been found to give a brighter light than the old burners.

The Parell Tank has been improved; wicket gates have been constructed to prevent cattle entering it and polluting the water; a washing-place, with suitable drainage, has also been provided for the use of Dhobies, thereby preventing the nuisance caused by the washing of clothes in the Tank itself. Thus the water in this Tank has been rendered pure and useful for domestic purposes, which is a great advantage to the inhabitants of Parell Village.

The Pier at Lovegrove (a temporary measure for disposing of the Night Soil from the Western side of the Island) has been repaired, and a wooden pipe laid within it, and a smaller pipe continued as far as low-water mark. A wooden hopper for receiving the contents of the Night Soil Carts has been provided at the inner end of this pipe, and by keeping up a supply of water, and flushing the pipe daily, the whole of the soil is sent through the wooden pipe as far as low-water mark. This mode of disposing of the Night Soil has been found to be tolerably inoffensive.

Thirty-five Night Soil Carts, of an improved pattern, lately constructed for removing the soil at the several depôts, have been brought into use; they are air-tight and lined with zinc-plates, and as they are drawn by Horses instead of Bullocks, the nuisance, inseparable from their passage, lasts a much shorter time than formerly.*

The Masonry work of the Pier at Chinch Bunder, for discharging the Night Soil from the Eastern side of the Island into the Harbour, is nearly finished, and the Tanks, Pipes, and other Iron-works which had been ordered from England, have now arrived.

* Since this Report was prepared, the Superintendent of Repairs has reported that it has been found necessary to revert to Bullocks.

7/3

Masonry walls have been constructed to three Tanks at Worlee. These Tanks were formerly surrounded with loose stone walls, which used to tumble down every year. By the Masonry work now executed, the water in the Tank is kept in a clean state, and the convenience and safety of persons drawing water are generally increased.

A Drain from the General Hospital Cross-road to New Sonapoor has been arched over. The smell emitted from it, while it was open, was highly offensive and prejudicial to the health of this thickly-populated part of the Town.

Two Burial-Grounds on the Flats, one for the interment of Corpses of low-caste Hindoos, and the other for those of other Hindoos, have been constructed and enclosed by Masonry walls. *Formerly the dead of low-caste Hindoos* were buried on the Beach in Back Bay, as were also the carcasses of cattle. As they were frequently buried so near the surface that the tide washed away the covering of sand, and left the bodies exposed, a great nuisance was created, which has now ceased to exist.

Pumps worked by Bullocks have been erected near the outlet of the Main Drain at the Lovegrove Sluices for the purpose of emptying the water from the Main Drain during the process of removing the mud. This work was formerly done, at a considerable expense, by men with baling-vessels made of matting, which process created a great nuisance while the work lasted.

Various other petty Works, which do not call for particular notice, have been executed.

Mr. Forjett, the Deputy Commissioner of Police, represented to the Senior Magistrate of Police in 1856, the difficulty of obtaining water for the Fire Engines by means of Bheesties and the consequent delays, owing to which much property was destroyed, and fire oftentimes greatly extended before any effectual aid could be rendered by the Fire Brigade. He therefore proposed having Horses to draw the Fire Engines, and offered to undertake the Watering of a certain portion of the Roads, with the view of having under his order and control Twenty New Water-carts, according to a new pattern, to be drawn by Horses. For the construction of these Twenty Water-carts, and the purchase of Horses, Harness, &c., he stated that Rs. 8,500 would be required, adding—"By this arrangement there will be payable by the Board for watering the ten miles of road Rs. 1,019-6-0 per mensem, from which, if the monthly charges, as shown in paragraph 9, of Rs. 470 be deducted, there will remain per mensem Rs. 549-6-0, which, within sixteen months, would more than cover the outlay of Rs. 8,500, and after that the surplus would revert and be a clear saving to the Board of Conservancy."

This arrangement was recommended to Government by the Senior Magistrate of Police, and, being deemed by the Board to be advantageous to the Public, it was sanctioned by the Worshipful Bench. It came into operation in April 1857.

To

THE CHIEF SECRETARY TO GOVERNMENT IN THE
GENERAL DEPARTMENT.

SIR,—With reference to your letter No. 2533, dated 15th October last, to the address of Colonel Jameson, H. D. Cartwright, Esquire, and Captain Marriott, requesting these gentlemen to form themselves into a Committee for the purpose of Auditing the Accounts of the Board of Conservancy for the Year 1856-57, and to subsequent letters and communications on the same subject, we have the honour to state that we have examined the Accounts of the Board of Conservancy for the year in question, and have found them to be correct.

2. Each of the items of Receipts and Disbursements, and of the Assets of the Fund, as shown in the Appendix A, have been compared with the Vouchers produced, and the amount has been found to correspond, and to be duly supported.

3. Many of the Payments by the Board to the Superintendent of Repairs are merely advances, which are accounted for by him in Bills audited by the Auditor of Municipal Accounts.

4. Into the Accounts of the Superintendent of Repairs with the Board which are thus audited, we have not thought it necessary to enter, and we only certify to the actual Receipts and Payments of the Board.

5. The Accounts received with your letter under acknowledgment are herewith returned, and

We have the honour to be, &c.

(Signed) J. SWANSON,
„ W. F. MARRIOTT.

Bombay, 19*th April* 1859.
