Legislative Council of India.

8th January 1859.

The following Act, passed by the Legislative Council of India, received the assent of the Right Honorable the Governor General on the 30th December 1858 (communicated to the Legislative Council on the 8th January 1859), and is hereby promulgated for general information:—

ACT No. XLI. OF 1858.

An Act to Amend Regulation X. 1829 of the Bengal Code, for the Collection of Stamp Duties.

Whereas, by the General Rule laid down at the end of Schedule A annexed to Regulation X. 1829 of the Bengal Code, it is declared that if any Deed, Instrument, or Document specified in that Schedule shall not be contained in one sheet or piece of paper or other material, it shall suffice that one sheet shall bear the stamp, provided that the seals or signatures of the parties and witnesses be thereupon; and whereas the said Rule has been productive of inconvenience, and there is reason to believe that many Deeds, Instruments, and Documents have been executed since the said Regulation came into effect, in respect of which the said Rule has not been complied with; and it is expedient to repeal the said Rule, and to provide for the reception in evidence of such Deeds as aforesaid; It is declared and enacted as follows:—

Part of Schedule A Regulation X. 1829 repealed.

I. The above Rule is hereby repealed.

II. Every Deed, Instrument, or Document specified in the said Schedule, which is or shall be contained in more than one sheet or

Stamp on Deeds contained in more than one sheet of paper.

piece of paper or other material, shall be deemed to be sufficiently stamped if any one or more of such sheets or pieces of paper or other material shall bear the requisite stamp or stamps equal in value to the requisite stamp, whether the signatures or seals of the parties and witnesses shall or shall not be upon such sheet or sheets. The above provision shall apply to Deeds, Instruments, and Documents executed before this Act, as well as to Deeds, Instruments, and Documents which shall hereafter be executed. Provided, as regards Deeds, Instruments, and Documents which shall be executed after the 1st day of January 1859, that every sheet or piece of

Proviso as regards Deeds, &c. to be hereafter executed.

paper or other material which shall contain any part of such Deed, Instrument, or Document shall be stamped with a Government Stamp of the value of at least One Anna.

III. In any case in which a Deed, Instrument, or

Review of judgment in certain cases in which Deeds, &c. have been rejected as not stamped.

Document has been rejected by any Court upon the ground that the same was not stamped within the meaning of the abovementioned Rule, any

party injured by the decision may obtain a review of judgment, if the application be made within six months from the passing of this Act, and if the Court to which the application is made be satisfied that the Deed, Instrument, or Document, if admitted, would have led to a different decision upon the merits of the case.

IV. Nothing in the last preceding Section shall extend to any case in which a final decision was given more than six years before the passing of this Act.

Operation of Section III. limited.

W. MORGAN,
Clerk of the Council.

Office of the Commander in Chief I. N.,
Bombay, 22nd January 1859.**Notice to Mariners.****THE "CAIRNSMORE" ROCK.**

The position of this Rock, upon which the British Ship *Cairnsmore*, of Liverpool, John Bragg, Master, bound from Hongkong to Shanghai, was totally wrecked, on the 26th of June last (see *North China Herald*, July 3rd), is given as follows, by Lieut. Ward, R. N., in charge of H. M.'s Yacht *Emperor*, from observations taken whilst the Wreck was upon it:—

"The *Cairnsmore* Rock lies in Latitude 30° 42' 10" North, and Longitude 122° 34' 40" East, very nearly in mid-channel between the Parker Islands and the Saddle Group. The following are the Bearings of the most conspicuous objects seen from the Rock :—

South-east point of Senhouse Island.	South.
A small rugged rock close to the South-east point of Raffles Island, and in a line with the point.	S. 59° W.
The Northernmost Rock of the Group off Chesney Island (very conspicuous)	N. 59° W.

On approaching this dangerous Rock, the lead

can give no warning whatever, as the Rock is very small, apparently not more than 30 or 40 feet in diameter, and rises very abruptly.

It will be prudent, in future, for vessels navigating this channel, to keep on the Saddle Island side. When, *going North*, the Bit rock opens South of South Saddle Island, they will be to the Northward of the *Cairnsmore* Rock, and, when *going South*, the same Rock opens to the Northward of the South Saddle, they will be to the Southward of it."

NOTICE TO MARINERS.

MACDONNELL LIGHTHOUSE, CAPE
NORTHUMBERLAND, SOUTH AUSTRALIA.

[*The Bearings are Magnetic. Variation 5° East.*]

The Master and Wardens of the Trinity House, Port Adelaide, hereby give notice, that the "Macdonnell Light," on Cape Northumberland, in lat. 38° 3' 0" S., long. 140° 37' 45" E., will be exhibited nightly on and after the 1st of January 1859, from Sunset to Sunrise.

The Lighthouse Tower, which is 28 feet in height, stands on a rocky headland elevated 103 feet above high-water mark.

The Light, which is catoptric and revolving, consists of three faces, and exhibits alternately EVERY MINUTE a White, Red, and Green Light, on an arc visible from seaward from N. 74° E. to N. 66° W. round by south (by compass).

The White Light may be seen from the deck of a moderate sized Vessel about 18 miles, and from aloft at a distance proportionate to the elevation attained.

The Red Light will not be seen, under the most favourable circumstances, at a greater distance than 15 miles.

The Green Light will not generally be distinguished beyond a range of 8 miles.

During hot weather and NE. Winds, when there is often much refraction, the White Light will frequently be observed at a great distance.

Vessels approaching from the eastward should not bring the White or Red Light to bear to the westward of WNW., and when the Green Light becomes visible on that bearing, should steer more southerly, in order to give the reef, which stretches

to the eastward of Cape Northumberland, a wide berth.

Vessels from the northward should never sight the White or Red Light on a bearing more southerly than E. $\frac{1}{2}$ S., and on distinguishing the Green Light should immediately alter the course so as to give the outlying reefs, to the westward of the Cape, running parallel to the coast a mile from the shore, an offing.

In bad weather, with the wind hanging from the southward, it will be advisable to give the Cape such an offing as will enable a Ship to pass the Lighthouse without sighting the Green Light, and should the weather, which is occasionally the case, be thick, or it be blowing hard, it will be prudent not to sight the Red Light, which, under such circumstances, would not be seen at the distance first given.

The coast to the north-westward of the Cape soon becomes low, and, owing to the heavy ocean swell, which sets directly on the shore, should be very carefully avoided.

To the eastward of the Cape is a deep bight, which offers no shelter from the prevailing winds and swell, or inducement to enter.

The Light-keepers are provided with a nine-pounder carronade, and a code of Marryat's Signals, which will be used to warn Vessels if observed to be standing into danger.

Master of the Trinity House, South Australia.
