FINANCIAL DEPARTMENT.

The following Notification, by the Government of India, in the Financial Department, is republished for general information :—

“ No. 5166.

Read again the Financial Resolution No. 66., dated the 29th August 1862, sanctioning a classification of the appointments in the General Department of Account in substitution of the arrangement introduced by Financial Resolution No. 84, dated the 13th May 1862.

Read again the Financial Resolution No. 3390, dated the 25th July 1863, sanctioning one set of Rules for the grant of deputation allowance to the classified Officers of the Financial Department without distinction of the service to which they belong.

RESOLUTION.—The Honorable the President in Council observes that, under the Financial Resolution of the 29th August 1862, the distinction between the Covenanted and Uncovenanted Service, in the Financial Department was abolished, and that under the Financial Resolution of 25th July 1863 all the Officers of the Department were placed, in respect to deputation allowance, under one set of Rules based on those for the Covenanted Civil Service.

In respect, however, to travelling allowance two sets of Rules are still in operation in the Financial Department, one applicable to the Covenanted and the other to the Uncovenanted Officers; but as the latter equally with the former are required in the Finance Department to travel from one Presidency to another, thereby incurring heavy transit expenses for which the inferior rates of travelling allowance for Uncovenanted Officers are inadequate, the superior rates for Covenanted Officers will be given in lieu, in future, under the ordinary Rules on that head.

ORDER.—Ordered, that the above Resolution be published in the *Calcutta Gazette* for general information, and that a copy be forwarded to the Right Honorable the Secretary of State for information.

(Signed) E. H. LUSHINGTON,
Secretary to the Government of India.”

By order,

The following Notification, by the Government of India, in the Home Department, is republished for general information :—

“ HOME DEPARTMENT.

NOTIFICATION.—The following Despatch from the Secretary of State for India is published for general information :—

‘ FINANCIAL.

No. 142.

INDIA OFFICE, London, 15th August 1863.

His Excellency the Right Honorable the GOVERNOR GENERAL OF INDIA IN COUNCIL.

MY LORD,—I have received and considered in Council your Public Letter, dated the 6th June last, No. 32, reporting your decision on an application from Sir F. B. Outram for the grant of an Invalid Pension of £150 per annum, to which he considered himself entitled as a Civil Servant of more than five and under ten years' service.

2. You refused this application on the ground that my Financial Despatch of the 25th November last, No. 193, did not appear to alter the interpretation hitherto put on the word ‘Service,’ under which one year's sick leave only is allowed to be reckoned in qualification for pension, and therefore that Sir F. Outram is not entitled to a pension.

3. By the Despatch in question the period of twenty-five years' service, and twenty-two years' residence, including one year's absence on sick leave, was required as a qualification for the full Annuity; but in the cases of Civilians who might be compelled, by the state of their health, to retire at an earlier period, service and not residence is to be calculated in deciding on their claims to Invalid Pensions.

4. Sir F. B. Outram has accordingly been instructed to apply again to your Government for an Invalid Pension, to which he will be entitled from the 6th February last, the date on which his resignation of the Service was accepted.

I have, &c.,
(Signed) C. Wood."

Paragraph 1.—In reply to the question submitted in your Lordship's letter dated 30th May last, No. 23 A, I have to inform you that, an Officer holding the rank of Brigadier would not, under the Regulations of the British Army, command an Officer in the same Brigade holding Her Majesty's Commission of a prior date; and I am informed by His Royal Highness the Field Marshal Commanding in Chief, that your Lordship rightly interprets the Queen's Regulations, under which it is ruled that, although Brigadiers General rank with each other according to the date of their Commissions as Colonels, they exercise command over all Colonels whatsoever, who do not hold the rank of Brigadier General.

Paragraph 2.—It appeared to me with the view of extending as widely as possible the sphere of selection for the Command of Brigades that the recommendation of your Lordship and the Commander in Chief in India, that the rank of Brigadier General should be conferred upon Officers appointed to such Commands, should be carried out, and I suggested to the Field Marshal Commanding in Chief that this course should be adopted.

Paragraph 3.—His Royal Highness has expressed his concurrence in this suggestion.

Paragraph 4.—In conveying to you the sanction of Her Majesty's Government to the above proposal, I wish it to be distinctly understood that no additional expense is to be occasioned by the arrangement."

PUBLIC WORKS DEPARTMENT.

INDUSTRIAL MINES.

Fort William, the 17th August 1863.

ADVERTISEMENT.

The Government of India having come to the conclusion that it is not expedient to carry on the Iron Works recently established at Burwai, on the Nerbudda, as a Government undertaking, will be prepared to receive offers from Capitalists desirous of taking up such an enterprise for the sale or lease of the Works.

The annexed Extracts from a Report lately submitted to the Government of India will explain the present condition of the Works and the resources of the neighbouring country.

Communications on this subject should be addressed to the Secretary to the Government of

India, in the Public Works Department, with the Governor General.

(Signed) J. P. BEADLE, Lt.-Col., R.E.,
Offg. Secy. to the Govt. of India.

Extract from a Report by the Executive Engineer, Alhoo Division, No. 533, dated 11th May 1863.

* * * * I have furnished a block plan of the works which shows the position of all the existing buildings. All of these buildings are finished, with the exception of the Calcining Kiln and the Forge, which are waiting for castings we had calculated upon making at the Works. The expenditure incurred upon them amounted to Rupees 66,194 up to the 1st March last, and I have estimated that their entire cost will amount to Rupees 85,000. I do not anticipate that any other buildings will be required for the manufacture of Bar Iron, with perhaps the exception of one or two

of an inexpensive nature, such as a small Cupola Furnace and a Shed for calcined Ore; an increase in our manufactures will, of course, increase the buildings. I regret I am unable to furnish you with a general plan of the locality of the Works; the Village of Burwai, near which they have been erected, is one of considerable size and importance, it is in British Territory, and is situated two miles north of the Nerbudda, on the main road between Central India and the Great Indian Peninsula Railway, from which it is only 40 miles distant. Its population amounts to 4,500, and no great difficulty has been experienced in obtaining labour from it for our operations; supplies also to any extent are procured there. It is also the residence of the Kamasider of the District, and the money transactions of the Works are in consequence easily arranged.

I do not know what the value of the machinery is, as it has not been debited to the Works. I have furnished a list of what we have received at Burwai, and Mr. Mitander is of opinion that we have sufficient for our present wants.

THE SUPPLY OF ORE.

We obtain Ore from the Mitanderpore Mine, seven miles east of the Works, and from the Nandia Mine, an old Native working, three miles west of Burwai; both of the Ores have been described from Mr. Mitander's Report in the *Calcutta Government Gazette* of the 23rd April 1863, and by Dr. Oldham, to whom specimens were forwarded for analysis, in the following extract from his Report:—

"One specimen is a mass of almost pure homatite Iron Ore, evidently a piece of a vein or string of Ore. It is crystalline massive. It yields 62.22 per cent. of Iron, pure homatite would give 70.00 per cent.; the slight admixture in this Ore being chiefly Silica."

"The second specimen is a Breccia made up of broken fragments of Ore and other materials cemented by Crystalline Carbonate of Lime. It forms on the whole a very hard, tough, and difficult frangible mass. In such a rock the only fair plan to arrive at an average result, as to its composition, would be to reduce a considerable mass of the rock to powder, thoroughly mix up this, and then take a sample from the mixed product."

This of course we were unable to do satisfactorily, but so far as was possible with a hand specimen it has been done.

A fair sample of the whole mass gives 50.63 per cent. of Iron. Picked from the richer portions it yielded 57.95 per cent. Both these are very rich and valuable ores of Iron, and with proper treatment will yield excellent metal. Unless some care be taken, if the ordinary processes by a *Blast Furnace* be used in the reduction of these, the probability is that the Iron will be *cold short*, but this can be readily prevented.

Dr. Oldham's analysis of these Ores is considered by Mr. Mitander to be too favourable for a working estimate, and his calculations do not allow for more than 43 per cent. of Iron from the Mitanderpore Ore, and 33 per cent. from the Nandia Ore. The specimen which were forwarded to Dr. Oldham were probably richer than the average produce of the Mine.

Note.—The estimated cost of the Ore at the Furnace is Rupees 4 per ton.

FUEL.

The Forest from which the supply of charcoal is obtained extends from Burwai to Chandghur, on the Nerbudda, and northward to the crest of the Vhindian range. Of this tract 144 square miles are within an available distance from the Works; 10 square miles of tree jungle on the south of the River are also within the distance we have calculated that we can profitably carry charcoal, we have therefore an area of 154 square miles of Forest.

The principal Trees of the Forests are:—

The Sallee.....	Boswellia Glabra.
" Mhonee.....	Sterculia Urens.
" Dawra	
" Kheir.....	Acacia Catechee.
" Saghwan	Tectona Grandis.
" Ungun	Hardwickia Binata.

The two latter are useful Timber trees, and we do not cut them, but from the four others our charcoal is entirely made.

The Sallee is the most common tree, and with the Mhonee yields a soft and indifferent charcoal. The Dawra on the other hand is an excellent charcoal yielding tree, fully equal, Mr. Mitander thinks, to the Beech, the best in Sweden for this purpose. The Kheir also produces a hard wood, and we intend to use it for the Blast Furnace uncharred.

The yield of charcoal we find to be 35 per cent. of the wood by measurement and 25 per cent. by weight.

In Sweden from 48 to 75 per cent. is obtained by measurement, while by weight there is little difference from us. One hundred cubic feet of Swedish charcoal weighs about 900 lbs., while 100 cubic feet of ours weighs 1,400 lbs. As the consumption of fuel is estimated by measurement, this is an advantage to us, from which we may derive very great benefit; on the other hand, however, the residue of ashes from our charcoal is much greater.

Cutting and carrying the wood and burning it is now undertaken by Contractors at the following rates:—

	Rs.	a.	p.
Cutting and stacking wood per 100 cubic feet	0	6	3
Making 100 cubic feet charcoal ..	3	2	0

The carriage varies with the distance from Burwai. Charcoal brought from the extremity of our Works, 12 miles distant, cost Rupees 3-12-0 per 100 cubic feet for carriage, while from our nearest clearing it is brought for 15 annas: the mean rate therefore is Rupees 2-5-6. From these prices we arrive at the following estimate of the cost of 100 cubic feet of charcoal:—

	Rs.	a.	p.
285 cubic feet of wood, at 6 annas			
3 pie per 100 cubic feet.....	1	1	9
Cost of making 100 cubic feet of charcoal	3	2	0
Mean rate for carriage to the Works.	2	5	6
Cost of 100 cubic feet charcoal....	6	9	3

FLUX.

A Limestone is obtained within two miles from Burwai, and its cost at the Works is 1½ Rupees per ton uncalcined.

N.B.—This table is an extract from a more extensive yearly Return that is prepared for statistical purposes and chiefly for the detection of any removable sources of disease, with a view to improving the healthiness of the Island. As the principal object cannot be fully attained unless the true causes of death be recorded, persons of an stations are requested, in each case of death occurring in their circle, to obtain, in writing, from the Medical Attendant, the name of the fatal disease, that it may be delivered to the Policeman at the funeral place. Medical Practitioners, particularly, are requested to aid the registration. Blank forms of Death Reports, to keep by them in readiness, are given gratuitously on application at the Office of the Deputy Commissioner of Police.

It is thought that some withhold their assistance through the notion that reports of the single casualties coming now and then under their observation could but little affect the Returns; but it ought rather to be borne in mind, that the accuracy of the Returns depends on the correct reporting of all single cases, for of such only the aggregate is made up.

Nagpoor, 24th September 1863.

Revenue Survey and Assessment, Goozerat.

It being generally believed that the Superintendent of Revenue Survey and Assessment is empowered by Law to put up Survey Boundary Marks, at certain fixed charges, irrespective of the cost of labour in different Districts, the Superintendent of Revenue Survey and Assessment Goozerat hereby gives notice to the owners, occupiers, and cultivators of land, in the Talookas (of the principal division of the Surat Collectorate, and Sub-Collectorate of Broach,) noted in the margin, which will be under Survey this season, that they themselves are allowed by law to put up Boundary Marks (by their own hired labourers) so long as such marks are of the size and material approved by the Survey Officers, and the owners, occupiers, and cultivators of land are hereby required to do so as soon as their fields are measured.

2. If within two days of the measurement of any field, the owner, occupier, or cultivator does not erect the Boundary Marks required by law, he will be served with the Notice required by Act III. of 1846, and if within the days of grace allowed by the said Notice, the owner, occupier, or cultivator fails to erect Boundary Marks of the size and number required, such marks will be erected by the Survey Officers, and the cost (whatever it may be) recovered under the provisions of Act III. of 1846.

3. Neither the Superintendent, nor Assistants Superintendent of Revenue Survey, have any power to regulate the price of labour, and if owners and occupiers of land (who can always employ their own farm labourers to erect Boundary Marks) decline to do so, under the impression that the Survey Officers are obliged by law to erect Boundary Marks at a cheap rate, they will find they are mistaken, and must take the consequences.

4. In those Districts in which stones are procurable, and where stone Boundary Marks are allowed, the Survey Officers will be prepared—through their Contractors—to furnish stones of the regulation size, at a small fixed charge per stone.

C. J. PRESCOTT, Captain,

Sup. Rev. Survey and Assess. Goozerat.
