GOVERNMENT DEPARTMENTAL NOTICES.

FINANCIAL DEPARTMENT.

The following Extract from the Proceedings of the Government of India, is published for the information of Heads of Departments:—

"No. 3837.

Extract from the Proceedings of the Government of India, in the Financial Department, dated 18th August 1863.

READ again para. 11 of a Despatch from the Right Honorable the Secretary of State for India, No. 129, dated 9th August 1861.

Read again Financial Orders, dated 25th September 1861.

Read again Financial Resolution, dated 19th August 1861, No. 10258.

Read again an Endorsement from the Home Department, dated 9th June 1863, No. 3661, and the orders passed thereon, dated 23rd idem.

RESOLUTION.—In sanctioning the payment of certain bills referred with the above-mentioned Endorsement from the Home Department, amounting to Rupees 704-2-8, for maps and instruments obtained by the Superintendent of the Geological Survey from the Office of the Surveyor General of India, the attention of the Honorable the President in Council has been drawn to the existing rule of cash payments for the value of stores received by one Department of Government from another.

2. This rule, he observes, originated with a suggestion of the Accountant General to the Government of Madras, that the Commissariat Department of that Presidency should cease to incur expense on account of supplies for the Civil Departments, and that all Civil Officers who received such supplies should obtain them in the market. The Government of Madras having adopted this suggestion, requested this Government to make arrangements for the supply of stores to the Civil Departments subordinate to this Government which obtained their supplies through the Madras Commissariat, and the Auditor General of India was thereupon directed to issue orders to the heads of all the Departments concerned, to the effect that in future, stores should be procured from the market, or, if to the advantage of Government, through the Madras Commissariat on the usual indents, but that, in either case, cash must be paid for the supplies.

3. Subsequently, at the suggestion of the Military Finance Department, this rule was made general for all India, without reference to the source through which supplies were procured, the object being that, by compelling cash payments, which must necessarily be made by a Civil or Military authority, the transaction must come directly under the review of the controlling Officer of the service to which it relates.

4. His Honor in Council further observes that, in accordance with the terms of para. 11 of the despatch from the Secretary of State for India, No. 129 of 1861, dated 9th August, the charges for Stores obtained from England appear as charges in the Indian Accounts and Estimates, under the heads of account to which the expenses of the Departments and Officers indenting for them are debitable; but that, on the issue of such stores by the indenting Officers and Departments, for the use of other Departments of the Public Service, the former under existing rules demand and receive cash payment for the value from the latter.

5. Again, in respect to Stores manufactured in this country, such as Gun-powder manufactured in the Government Agencies under the control of the Military Department, and maps, &c., prepared in the Office of the Surveyor General of India, the cost of which appears in the first instance in the public accounts to the debit of the Departments concerned, His Honor in Council observes that on the issue of Gun-powder by the Military Department for the use of the Police Department, and on the supply of maps by the Surveyor General to the several Public Departments and Officers requiring them, the latter are required to pay for them in cash under existing rules.

6. On a re-consideration of the whole subject, His Honor in Council observes that the system of inter-departmental cash payments above described, entails much waste of public time and labour, in the unnecessary issue of money from the public treasuries, which, after passing through the hands of the Officers concerned, finds its way back into the Treasuries, and leads to a multiplication of transactions, in the shape of Departmental Debits and Credits, the adjustment of which is one cause of the delay in rendering the accounts, and of the uncertainty whether the periodical statements made of them can be accepted as final. The practice also involves double charges being made for Government Stores in the Budget Estimates, and in the accounts founded on them, whereby the Estimates and Accounts are confused, and the expenditure is made to appear greater than it is.

7. The real check against extravagant expenditure of Government Stores is the efficient supervision of the Officer or Department with whom the responsibility rests of fixing or controlling the amount of the Indent. In the event, however, of any Indent appearing to contain items of an unusual, or of an unnecessarily expensive character, either as regards quantity or quality, it will be the duty of the Officer charged with the supply to call attention to it, and to await a final decision previously to executing the order, unless it should be of an emergent character.

8. His Honour in Council, therefore, directs that the system of cash payments by one Department of Government to another for the value of Stores already paid for by Government, be discontinued; and that Stores so transferred be charged, as final charges, in the accounts of the supplying Department in the same manner as Stores issued for the use of the supplying Department itself.

9. But when one Department purchases articles for another in the market, the Department which makes the Indent must provide in its Budget Estimate for the cost, and place the supplying Department in funds by "Transfer Receipts."

ORDERED,—That a copy of the above Resolution be sent to the Home, Foreign, Military, Public Works, and Military Finance Departments, the several Local Governments and Administrations, the Auditor General of India, the Accountant General to the Government of India, the several Local Deputy Auditors and Accountants General, and the Civil Pay Masters, for information and guidance.

FINANCIAL DEPARTMENT.

The following Extract from a letter from the Government of India, is published for the information of heads of Departments:—

Extract (*Paragraphs* 1 *and* 2) *from the Government of India's letter in the Financial Department, No.* 4088, *dated 26th August* 1863.

In reply to your letter No. 114-35, dated 5th August 1863, I am directed to state that to such of the discharged servants of the Hyderabad Residency as have passed the entire period of their service in grades eligible to pensions, but who have not served long enough to be entitled to pension, gratuities may be awarded, under the new Rules, at the rate of one month's pay for each entire or complete year

of service up to the maximum of twelve months' pay, without any allowance for fractions of a year. In calculating the periods of the services of these persons, the Rule disallowing from the calculation the service rendered before the age of 22 need not be enforced as regards gratuities, but periods of absence on leave other than privilege and preparatory leave should be thrown out of the calculation of service equally as in the cases of pension.

2. To persons, however, employed in ineligible grades the Old Rules will still apply.

By order,

A. D. ROBERTSON,
Officiating Chief Secretary to Government.

Bombay Castle, 7th November 1863.

N.B.—This table is an extract from a more extensive yearly Return that is prepared for statistical purposes, and chiefly for the detection of any removable sources of disease, with a view to improving the healthiness of the Island. As the principal object cannot be fully attained unless the true causes of death be recorded, persons at out stations are requested, in each case of death occurring in their circle, to obtain, in writing, from the Medical Attendant, the name of the fatal disease, that it may be delivered to the Policeman at the funeral place. Medical Practitioners, particularly, are requested to aid the registration. Blank forms of Death Reports, to keep by them in readiness, are given gratuitously on application at the Office of the Deputy Commissioner of Police.

It is thought that some withhold their assistance through the notion that reports of the single casualties coming now and then under their observation could but little affect the Returns; but it ought rather to be borne in mind, that the accuracy of the Returns depends on the correct reporting of all *single* cases, for of such only the aggregate is made up.

PUBLIC WORKS DEPARTMENT.

INDUSTRIAL MINES.

Fort William, the 17th August 1863.

ADVERTISEMENT.

The Government of India having come to the conclusion that it is not expedient to carry on the Iron Works recently established at Burwai, on the Nerbudda, as a Government undertaking, will be prepared to receive offers from Capitalists desirous of taking up such an enterprise for the sale or lease of the Works.

The annexed Extracts from a Report lately submitted to the Government of India will explain the present condition of the Works and the resources of the neighbouring country.

Communications on this subject should be addressed to the Secretary to the Government of India, in the Public Works Department, with the Governor General.

(Signed) J. P. BEADLE, Lt.-Col., R.E.,
Offg. Secy. to the Govt. of India.

Extract from a Report by the Executive Engineer, Mhow Division, No. 533, *dated* 11*th May* 1863.

* * * * I have furnished a block plan of the works which shows the position of all the existing buildings. All of these buildings are finished, with the exception of the Calcining Kiln and the Forge, which are waiting for castings we had calculated upon making at the Works. The expenditure incurred upon them amounted to Rupees 66,194 up to the 1st March last, and I have estimated that their entire cost will amount to Rupees 85,000. I do not anticipate that any other buildings will be required for the manufacture of Bar Iron, with perhaps the exception of one or two of an inexpensive nature, such as a small Cupola Furnace and a Shed for calcined Ore; an increase in our manufactures will, of course, increase the buildings. I regret I am unable to furnish you with a general plan of the locality of the Works; the Village of Burwai, near which they have been erected, is one of considerable size and importance, it is in British Territory, and is situated two miles north of the Nerbudda, on the main road between Central India and the Great Indian Peninsula Railway, from which it is only 40 miles distant. Its population amounts to 4,000, and no great difficulty has been experienced in obtaining labour from it for our operations; supplies also to any extent are procured there. It is also the residence of the Kamasider of the District, and the money transactions of the Works are in consequence easily arranged.

I do not know what the value of the machinery is, as it has not been debited to the Works. I have furnished a list of what we have received at Burwai, and Mr. Mitander is of opinion that we have sufficient for our present wants.

THE SUPPLY OF ORE.

We obtain Ore from the Mitanderpore Mine, seven miles east of the Works, and from the Nandia Mine, an old Native working, three miles west of Burwai; both of the Ores have been described from Mr. Mitander's Report in the Calcutta *Gozernment Gazette* of the 23rd April 1863, and by Dr. Oldham, to whom specimens were forwarded for analysis, in the following extract from his Report:—

"One specimen is a mass of almost pure homatile Iron Ore, evidently a piece of a vein or string of Ore. It is crystalline massive. It yields 62·22 per cent. of Iron, pure homatile would give 70 00 per cent.; the slight admixture in this Ore being chiefly Silica."

"The second specimen is a Breccia made up of broken fragments of Ore and other materials re-cemented by Crystalline Carbonate of Lime. It forms on the whole a very hard, tough, and difficult frangible mass. In such a rock the only fair plan to arrive at an average result, as to its composition, would be to reduce a considerable mass of the rock to powder, thoroughly mix up this, and then take a sample from the mixed product."

This of course we were unable to do satisfactorily, but so far as was possible with a hand specimen it has been done.

A fair sample of the whole mass gives 50·63 per cent. of Iron. Picked from the richer portions it yielded 57·95 per cent. Both these are very rich and valuable ores of Iron, and with proper treatment will yield excellent metal. Unless some care be taken, if the ordinary processes by a *Blast Furnace* be used in the reduction of these, the probability is that the Iron will be *cold short*, but this can be readily prevented.

Dr. Oldham's analysis of these Ores is considered by Mr. Mitander to be too favourable for a working estimate, and his calculations do not allow for more than 43 per cent. of Iron from the Mitanderpore Ore, and 33 per cent. from the Nandia Ore. The specimen which were forwarded to Dr. Oldham were probably richer than the average produce of the Mine.

Note.—The estimated cost of the Ore at the Furnace is Rupees 4 per ton.

FUEL.

The Forest from which the supply of charcoal is obtained extends from Burwai to Chandghur, on the Nerbudda, and northward to the crest of the Vhindian range. Of this tract 144 square miles are within an available distance from the Works; 10 square miles of tree jungle on the south of the River are also within the distance we have calculated that we can profitably carry charcoal, we have therefore an area of 154 square miles of Forest.

The principal Trees of the Forests are:—

The Sallee	.....	Boswellia Glabra.
„ Mhonee	.....	Sterculia Urens.
„ Dawra	.....	
„ Kheir	.....	Acacia Catechee.
„ Saghwan	.....	Tectona Grandis.
„ Ungun	.....	Hardwickia Binata.

The two latter are useful Timber trees, and we do not cut them, but from the four others our charcoal is entirely made.

The Sallee is the most common tree, and with the Mhonee yields a soft and indifferent charcoal. The Dawra on the other hand is an excellent charcoal yielding tree, fully equal, Mr. Mitander thinks, to the Beech, the best in Sweden for this purpose. The Kheir also produces a hard wood, and we intend to use it for the Blast Furnace uncharred.

The yield of charcoal we find to be 35 per cent. of the wood by measurement and 25 per cent. by weight.

In Sweden from 48 to 75 per cent. is obtained by measurement, while by weight there is little difference from us. One hundred cubic feet of Swedish charcoal weighs about 900 lbs., while 100 cubic feet of ours weighs 1,400 lbs. As the consumption of fuel is estimated by measurement, this is an advantage to us, from which we may derive

very great benefit; on the other hand, however, the residue of ashes from our charcoal is much greater.

Cutting and carrying the wood and burning it is now undertaken by Contractors at the following rates:—

	Rs.	a.	p.
Cutting and stacking wood per 100 cubic feet	0	6	3
Making 100 cubic feet charcoal ..	3	2	0

The carriage varies with the distance from Burwai. Charcoal brought from the extremity of our Works, 12 miles distant, cost Rupees 3-12-0 per 100 cubic feet for carriage, while from our nearest clearing it is brought for 15 annas: the mean rate therefore is Rupees 2-5-6. From these prices we arrive at the following estimate of the cost of 100 cubic feet of charcoal:—

	Rs.	a.	p.
285 cubic feet of wood, at 6 annas 3 pie per 100 cubic feet.....	1	1	9
Cost of making 100 cubic feet of charcoal	3	2	0
Mean rate for carriage to the Works.	2	5	6
Cost of 100 cubic feet charcoal....	6	9	3

Flux.

A Limestone is obtained within two miles from Burwai, and its cost at the Works is 1½ Rupees per ton uncalcined.
