B.—Medical stores and other appliances and fittings for maintaining health, cleanliness, and decency.

II.—(1) Every such ship shall have on board,—

- (a) if she carry a surgeon, a supply of medicines and surgical appliances as set forth in Schedule A, hereunto annexed;
- (b) if she do not carry a surgeon, a supply of medicines and appliances as set forth in Schedule B, hereunto annexed, together with written or printed instructions for their use in a language which the commander or some other officer of the ship can read; provided that if the ship is about to commence a 'short voyage' only as defined by section 5 of the Act, the ship need only have on board the medicines and surgical appliances mentioned in Schedule C, hereunto annexed.

III.—(1) Every such ship carrying more than one hundred passengers as defined in the Act shall have the following hospital accommodation, or the following materials for the construction of hospital accommodation, for the passengers:

This hospital shall contain not more than six bunks, and shall have a superficial deck area of at least 144 feet, and not less than 864 cubic feet of air space. It shall be lighted and ventilated to the satisfaction of the surveying officers, and shall be provided with a raised floor or platform at least four inches off the deck. Every permanent hospital must be made as secure as any other deck-house, and the roof must be well caulked and covered with painted canvas. In all such permanent hospitals, iron fittings are preferable to wood. No case of small-pox, cholera, yellow fever, or plague shall on any account be treated in the permanent hospital.
- (b) To provide for the treatment of such cases of sickness as it may be considered desirable to separate (such as small-pox, cholera, yellow fever, or plague), and for any general outbreak of sickness when the permanent hospital accommodation becomes insufficient, each ship shall carry the materials for the construction of a temporary hospital upon its upper deck. The part of the upper deck upon which such hospital shall be erected shall be pointed out and measured off by the surveying officers. The framework of the hospital may be either of iron (in pieces that can be easily fitted together) or of wooden spars or bamboos. The roof must be tented, and both that and the side walls must be made of stout canvas and be perfectly water-tight, due provision being at the same time made for ventilation. The superficial area of the floor shall be not less than 144 feet, and such floor shall be raised at least four inches from the deck. Sheet iron is preferable as the material of the floor.

B.—In the case of ships making short voyages.

- (c) Each ship shall carry the materials for the erection of a temporary hospital, as described in clause (b) above, for the treatment of cases of the kind referred to in the said clause, provided that the superficial area reserved for such hospital need not be more than 72 feet. This space must always be deducted from the area measured for passengers on board of such ships.

(2) The permanent hospital, in the case of ships provided with the same, shall be available at all times for the use of sick passengers (other than those suffering from small-pox, cholera, yellow fever, or plague), and the temporary hospital shall always be erected at once and made available for the use of sick passengers whenever the circumstances as described above so require.

(3) If the master of any ship omits either to keep any hospital available for the use of sick passengers or to erect a temporary hospital as required by this rule, he shall be punished with fine which may extend to two hundred rupees, and with a further fine of twenty rupees for every day after the first during which the omission continues.

IV.—(1) Every such ship shall be fitted with not less than two privies sufficiently screened from public view and readily accessible and available at all times for the use of the passengers, and with one more such privy for every 100 passengers, or part of that number, carried in excess of 100; but no privies shall be allowed in the between-decks.

(2) A proportion of such privies, in any case not less than one, if there be any females among the passengers, shall be set apart for the exclusive use of females, such proportion corresponding, as nearly as may be, to the proportion of female to male passengers.

V.—Every such ship shall be provided with and have available for the use of the passengers not less than two places for washing sufficiently screened from public view, whereof a full proportion, as described in Rule IV, shall be set apart exclusively for females. VI.—On every such ship cattle shall be kept securely penned in, so as not to inconvenience the passengers.

VII.—(1) Every such ship shall be provided with not less than two cabooses, or cooking ranges, on deck, properly housed and covered, to which passengers shall have ready access at certain times in each day. The ranges shall be made of substantial plate-iron lined inside with bricks, and raised at least four inches from the deck, with an outlet or chimney at the top for the escape of smoke. Each range shall contain at least five cooking places, and an additional range shall be provided for every two hundred passengers carried in excess of one hundred. Cooking on board in the passengers' own stoves is prohibited, and any passenger so cooking or attempting to cook shall be punished with fine which may extend to one hundred rupees.

(2) The crew of the ship shall not be allowed to use the cooking ranges set apart for passengers during the period passengers are on board, but shall be provided with a separate cooking range.

(3) In the case of ships engaged in the coasting trade and carrying passengers on short voyages from port to port, who do not ordinarily cook food on board, the number of cooking ranges may be reduced to such number, not being less than two, as may seem adequate to the requirements of the passengers.

VIII.—The master of any ship omitting to keep any privy, washing place, or cooking-range available for the use of the passengers, or any cattle securely penned in, or allowing the crew of the ship to use any cooking-range set apart for passengers in breach of the foregoing rules, shall be punished with fine which may extend to two hundred rupees, and when the breach is a continuing one with a further fine of twenty rupees for every day after the first during which the breach continues.
