FINANCIAL DEPARTMENT.

Bombay Castle, 10th September 1909.

No. 3367.—In accordance with No. 10 of the Rules prescribed in the notification of the Government of India, Finance Department, No. 6565-A, dated 24th October 1907, republished in Part I of the *Bombay Government Gazette* dated 7th November 1907, under Financial Department No. 4318, dated 4th idem, His Excellency the Governor in Council is pleased to publish the following application from the President of the Bijapur Municipality for the grant of a loan of Rs. 1,76,000 under the provisions of the Local Authorities Loan Act, 1879 :—

From—The President, the Vice-President, the Chairman of the Managing Committee and other Councillors of the Bijapur Municipality;

To—The Chief Secretary to Government, Financial Department, Bombay.

Municipal Office, Bijapur, 20th April 1909.

Sir,—We, the President, the Vice-President, the Chairman of the Managing Committee and other Councillors of the Bijapur Municipality, beg to request that, under the provisions of section 4 of the Local Authorities Loan Act, No. XI of 1879, Government will be pleased to grant to this Municipality a loan of Rupees one lac and seventy-six thousand for the purpose indicated below.

2. Conforming to the Rules made by the Government of India under section 5 of the said Act, published at pages 1833 and 1834 of the *Bombay Government Gazette* of November 1907, we beg to supply the following details :—

- (1) The loan is required for constructing a large tank by putting a dam across the *Shindi Nala* near Bhutnal, about 4 miles from Bijapur, in order to provide an adequate and reliable water-supply for the town of Bijapur. The estimated cost of the work is Rs. 4,26,848.
- (2) The amount of loan applied for is Rs. 1,76,000 (one lac and seventy-six thousand only).
- (3) The rates, taxes and revenue of the Bijapur Municipality are offered as security for the loan.
- (4) The law under which the abovementioned Municipal revenue is raised is the District Municipal Act III of 1901.
- (5) The loan is required for a period of twenty years and is asked for in three instalments as under on the following terms :
 - (a) (i) One lac will be required by the 1st of August 1910.
 - (ii) Half a lac will be required by the 1st of December 1910.
 - (iii) Twenty-six thousand will be required by the 1st of March 1911.
 - (b) The loan will bear simple interest at 4 per cent. per annum.
 - (c) It is proposed to repay the loan by equal yearly instalments of Rs. 12,950 payable on the 1st of June each year commencing from the 1st of June 1912.
- (6) Two statements A and B showing the revenue and expenditure of this Municipality for the last three years are appended.
- (7) There are no prior charges on account of debt on the revenue of this Municipality.

3. The income of the Municipality is nearly always somewhat in excess of the expenditure. In the statements appended, the income for 1905-06 will be seen to be well over the expenditure. That for 1906-07 is less, but that was due to the failure of rains, which resulted in the fall of octroi income from Rs. 29,117 to Rs. 21,068, a difference of 8,000 nearly. On the other hand, the expenditure in 1906-07 was about Rs. 4,000 more than in 1905-06, owing to important additions being made to the Vegetable Market and Victoria Memorial Girls' School. But the proposed loan is to be met by raising an additional revenue from the following sources :—

By revising the octroi schedule	Rs. 8,000
By imposing a water cess	„ 4,000
By imposing a water rate	„ 8,000
From other miscellaneous sources	„ 2,000
			„ 22,000

Add to this the annual savings of Rs. 3,000 on the expenditure now incurred on water-supply, which will no longer be necessary on completion of the scheme. The total amount of Rs. 25,000 thus arrived at will be available annually towards the cost of the scheme. Deducting the cost of working the scheme which is estimated at Rs. 12,000 a year, the balance of Rs. 13,000 will go to repay the loan. There will thus be no difficulty in repayment.

The entire cost of the proposed project is, as stated above, estimated at Rs. 4,26,848. Of this a free grant of 2 lacs will be obtained from Government, and the District Local Board, Bijapur, have promised to contribute Rs. 50,000 in suitable instalments. For the rest, the loan herein applied for is required.

It was at first supposed that the entire project would cost not more than four lacs; but detailed estimates being made, the cost comes to Rs. 4,26,848. The loan amount has had therefore to be raised from 1½ lacs, as originally intended, to Rs. 1,76,000.

An extract from the proceedings of the Special General Meeting held on 8th February 1909, resolving that an application for the required loan be submitted, is herewith attached.

We beg to remain,

Sir,

Your most obedient servants,

(Signed) C. W. A. TURNER,

President.

Vice-President, and 10 others.

MARINE DEPARTMENT.

Bombay Castle, 22nd September 1909.

No. 66.—In exercise of the powers conferred by section 6, sub-section (1), of the Indian Ports Act 1908 (XV of 1908), and in supersession of the rules published in Government Notification in the Marine Department, No. 52, dated the 8th May 1907, the Governor in Council is pleased to make the following rules for the purpose of minimising the risk to shipping in Bombay Harbour owing to the transportation of dangerous petroleum within the Port of Bombay, namely:—

Rules.

1. In these rules—

- (1) "dangerous petroleum" means dangerous petroleum as defined by the Indian Petroleum Act, 1899;
- (2) "the Harbour" means and includes every portion of the Port of Bombay of which the Trustees of the Port have, under the provisions of the Indian Ports Act, 1908, been appointed conservators;
- (3) "import" means to bring into the Harbour by sea; and
- (4) "transport" means to remove from one place to another within the Harbour.

2. These rules shall not apply to ships importing dangerous petroleum nor to motor vessels on which dangerous petroleum is used for internal combustion only and is not carried as cargo.

3. No dangerous petroleum shall be transported except in iron or steel barges with closed decks approved by the Port Officer and provided with an anchor and sufficient chain as ground tackle.

4. Every barge having any quantity of dangerous petroleum on board shall exhibit a large square red flag from a mast not less than 15 feet above the deck and in such position that it can be seen all round the compass.

5. No fire or light of any description and no matches or any detonating article or substance whatsoever shall be, or shall be taken, on board of any barge when any dangerous petroleum is on board.

6. Every barge, other than a motor-propelled barge, having dangerous petroleum on board shall be transported by a tug, and if steam be the motive power of such tug, the funnel top or tops shall be fitted with efficient spark protectors.

7. All towing hawsers shall be made of steel wire or chain and the scope between the stern of the tug and the stem of the nearest tow to her shall not be less than 100 feet.

8. Barges used for the carriage of dangerous petroleum may be propelled by motors fitted to such barges provided (a) that such barges are built in accordance with recognized rules for ship-building such as Lloyd's rules or those of the British Corporation and under the supervision of a responsible surveyor, (b) that the propelling power is situated in the afterpart of the vessel, the compartment in which it is fitted being separated from the hold used for cargo by a coffer-dam extending the full width of the vessel and of one frame space in length, (c) that the propelling power is sufficient to enable the vessel to traverse the distance from the loading to the discharging station within two hours, under ordinary conditions of weather, and (d) that such barges are approved of by the Port Officer conjointly with the Government Surveyor.

9. Dangerous petroleum shall not be loaded, unloaded or transported between the hours of sunset and sunrise.

10. The hatches of every barge having dangerous petroleum on board shall be and remain battened down and covered with tarpaulins from the time of her leaving the ship from which the petroleum was taken upto the time when she begins unloading, and in the event of such barge carrying dangerous petroleum failing to reach her destination and unload within the abovementioned time limit, she shall anchor at a place not further south than a line running due east of Dárukhána Bandar and at a distance of one mile from it at least and the crew shall immediately vacate the barge and board the mark boats from which they shall keep a careful watch. The position of the barge shall be marked by means of two boats, each carrying a bright light in the bows visible all round the horizon for one mile and a red light in the stern also visible all round the horizon: one of such boats shall be anchored ahead of the barge carrying dangerous petroleum and the other astern of her in such manner that, should either of such boats and such barge swing in opposite directions, a clear distance not less than 100 feet may be preserved between such boat and such barge.

11. The bilges of every barge which has carried a cargo of dangerous petroleum shall, immediately after the barge is unloaded, be thoroughly cleared of all traces of such petroleum and dried and the holds shall be thoroughly ventilated.

By order of His Excellency the Honourable the Governor in Council,

L. ROBERTSON,

Acting Secretary to Government.
